Executive Summary

Texas Emissions Reduction Plan

This sixth Texas Emissions Reduction Plan (TERP) biennial report is produced by the Texas Commission on Environmental Quality (TCEQ) in fulfillment of the requirements of Texas Health and Safety Code, Sections 386.057 and 386.116(d).

The TERP was established by the 77th Texas Legislature in 2001, through the enactment of Senate Bill (SB) 5. The legislation defines the program's objective to reduce nitrogen oxides (NO_X) emissions from older heavy-duty, on-road vehicles and non-road equipment by providing grants and rebates for voluntary upgrades and replacements. Since NO_X is a primary precursor to the formation of ground-level ozone, the TERP program targets areas in Texas designated as nonattainment for ground-level ozone under the Federal Clean Air Act (FCAA), as well as other areas of concern for ozone issues. The 42 current TERP-eligible counties are shown on the list and map on the following page. Lowering NO_X emissions from TERP-eligible sources remains an important strategy for the Texas State Implementation Plan (SIP), which details how the state will meet the FCAA requirements.

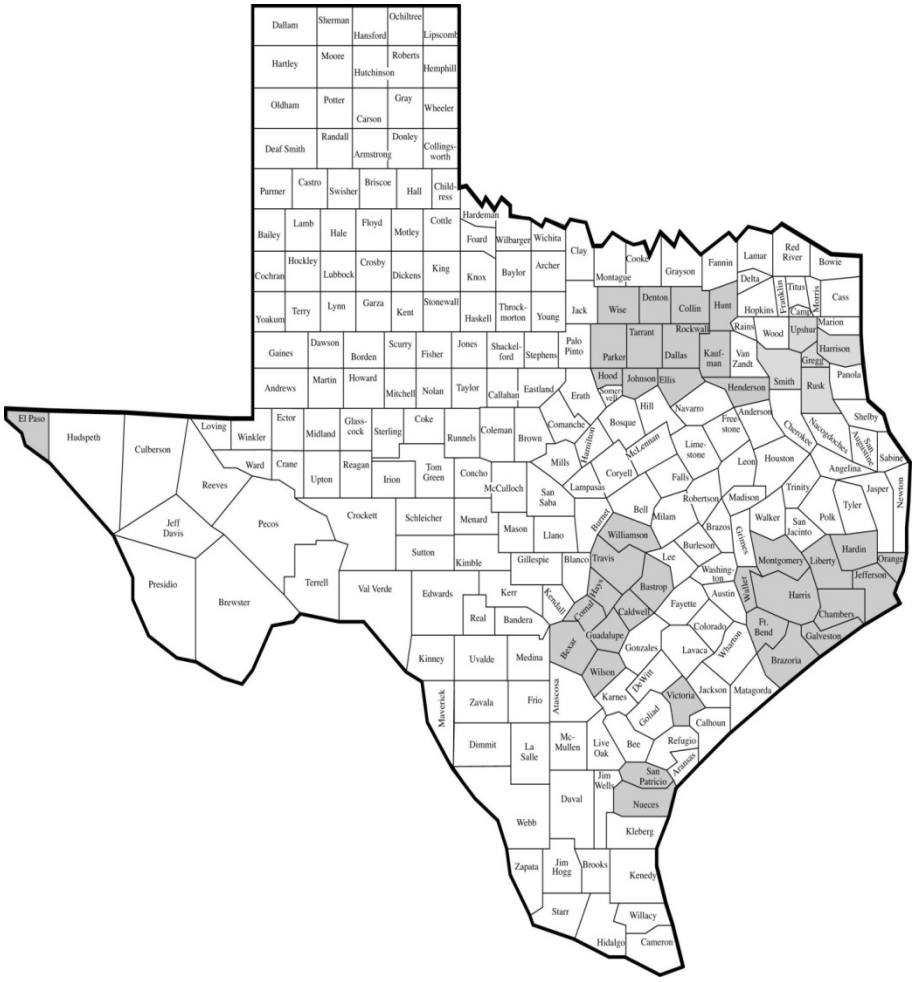
In sum, from fiscal year (FY) 2002 through FY 2012, the TCEQ has issued over $858 million under the primary TERP emissions reduction grant program, representing a total of 8,956 projects, or 14,685 individual pieces of equipment and/or vehicles. From FY 2002 through FY 2012, this level of activity represents a projected reduction of 164,966 tons of NO_X, or the equivalent average daily reduction of 64.4 tons of NO_X per day in 2012.

During this time, TERP projects have typically included:

- purchases of new, low-emission equipment and vehicles;
- replacement of old, high-emission equipment and vehicles with more efficient, less-polluting models;
- retrofit and add-on devices designed to reduce NO_X emissions from equipment and vehicles; and
- infrastructure to support qualifying fuels, electrification, and reduced idling time.

2012 TERP-Eligible Counties and Map

Bastrop	Bexar	Brazoria	Caldwell	Chambers
Collin	Comal	Dallas	Denton	Ellis
El Paso	Fort Bend	Galveston	Gregg	Guadalupe
Hardin	Harris	Harrison	Hays	Henderson
Hood	Hunt	Jefferson	Johnson	Kaufman
Liberty	Montgomery	Nueces	Orange	Parker
Rockwall	Rusk	San Patricio	Smith	Tarrant
Travis	Upshur	Victoria	Waller	Williamson
Wilson	Wise			



Since the creation of the TERP in 2001, there have been several key legislative enhancements, additions, and revisions.

In 2003, House Bill (HB) 1365, 78th Texas Legislature, established a new revenue source of vehicle title fee increases under Texas Transportation Code 501.138(a–b) to replace the original $225 out-of-state vehicle registration fee, which was determined to be unconstitutional. In addition, under Texas Tax Code (TTC) 151.0515 the existing surcharge on the sale, lease, or rental of new or used off-road equipment increased from 1 to 2 percent. A one percent surcharge was added for the sale, lease, or use of model 1997 and later heavy-duty diesel on-road vehicles under TTC 152.0215(a). The bill added a program for small business grants and increased the number of counties and the types of projects eligible for the Emissions Reduction Incentive and Small Business Grants programs.

Also in 2003, HB 37 set appropriation levels for various TERP programs. This bill, in conjunction with HB 43, defined roles of the TCEQ and the Texas Council on Environmental Technology in administering the New Technology Research and Development (NTRD) Program.

In 2005, HB 2481, 79th Texas Legislature, established cost-effectiveness limits for locomotive and marine vessel grants. The bill also directed the TCEQ to implement a new Rebate Grants program under the TERP incentive programs. Rebate grants are designed to streamline grant applications, contracting, reimbursement, and reporting for certain projects. The bill transferred the administration and implementation of the NTRD program from the TCEQ to a nonprofit research organization based in Houston. It also repealed the statutory provision requiring the TCEQ to include NTRD information in this biennial report.

Also in 2005, HB 3469 authorized the TCEQ to create and implement a new Texas Clean School Bus Program to provide grants for technologies that reduce diesel-exhaust emissions inside the cabin of a school bus. Approved technologies include closed crankcase filtration systems, diesel particulate filters, and diesel oxidation catalysts. From FY 2008 through FY 2012, 6,812 Texas school buses have been retrofitted.

In 2007, SB 12, 80th Texas Legislature, amended the TERP program. The bill raised the maximum cost-effectiveness of a grant project from $13,000 to $15,000 per ton of NOX reduced. The bill also allowed travel on TCEQ-designated highways and roadways in Texas to count toward the requirement that grant-funded on-road vehicles be operated at least 75 percent of the annual miles in the nonattainment areas and affected counties. In addition, SB 12 added marine vessels to the list of vehicles and equipment for which an electrification or idle-reduction infrastructure project may be funded. The bill authorized the TCEQ to fund other state agencies to lease, purchase, or install idle-reduction infrastructure at rest areas and other public facilities located on major highway transportation routes in eligible nonattainment areas and affected counties.

Also in 2007, HB 160 added “rail relocation and improvement” as a new category to the list of infrastructure projects that may be funded under the TERP. The new project category was designed to fund rail relocation and improvement projects at major rail intersections in the eligible counties to reduce emissions from locomotive and vehicle engine idling. To date, no

projects have been funded under this category, primarily due to the high costs of such improvements relative to the eligible grant amounts based on the cost-per-ton limits.

In 2009, the 81st Texas Legislature modified some existing TERP programs and added new TERP programs through SB 1759 and HB 1796.

SB 1759 established the Texas Clean Fleet Program (TCFP) to provide incentives for owners of large vehicle fleets in Texas to replace diesel vehicles with alternative fuel or hybrid vehicles. This program is authorized through August 2017.

HB 1796 established the New Technology Implementation Grant (NTIG) Program to provide incentives for advanced clean energy projects, new technology projects, and electricity storage projects at facilities and stationary sources. This bill also transferred administration of the NTRD program back to the TCEQ from the nonprofit research organization that had been administering it. In addition, the bill included a new definition of stationary engines under the TERP criteria to authorize grant funding for projects involving gas turbine engines. It also added "Location of use" provisions for projects involving non-road equipment used for natural gas recovery, and extend the TERP program authorization and fee sources through August 2019.

In 2011, the 82nd Texas Legislature modified existing TERP programs, added new ones, and eliminated one program And it modified the funding allocation percentages through HB 3399, SB 385 and SB 20, and SB 527.

HB 3399 modified some of the criteria applying to the TERP Emissions Reduction Incentive Grants Program (ERIG), Small Business and Rebate Grants Programs, Third-Party Grants Program, and TCFP. Changes and additions to the program eligibility criteria included: changes to the period over which a grant-funded vehicle must be operated to either five years or 400,000 miles, whichever occurs earlier; more specific criteria for decommissioning a vehicle or vehicle engine under the program; and provisions to allow a vehicle that has been leased or otherwise commercially financed to be replaced under the program. The revisions also included provisions that the executive director waive eligibility requirements on a finding of good cause.

SB 385 and SB 20 established the same new programs, with SB 385 serving as the controlling legislation since it was enacted last. The additional programs include these:

- Alternative Fueling Facilities Program (AFFP)
- Clean Transportation Triangle (CTT) Program,
- Texas Natural Gas Vehicle Grants Program (TNGVGP)

The AFFP was established to fund fueling facilities for alternative fuels in the state's nonattainment areas. The CTT provides funding for fueling facilities specifically for Compressed Natural Gas (CNG) and Liquefied Natural Gas (LNG) within three miles of the interstate highways connecting the Houston, Dallas, Fort Worth, and San Antonio areas. The TNGVGP provides grant funding for replacing medium and heavy-duty on-road vehicles with vehicles fueled by CNG or LNG. Vehicles funded under the TNGVGP must be operated

at least 75 percent of the annual miles in the state's nonattainment areas and along the interstate highways designated under the CTT Program.

SB 527 revised the allocation percentages for use of the TERP Fund, eliminated the NTRD Program, and established a new program for monitoring air quality in the North Texas region to be funded from the TERP Fund.

Programs

Several government agencies and one state university, in addition to the TCEQ, are responsible for developing and implementing TERP-related programs, including these:

- Texas Comptroller of Public Accounts (CPA)
- State Energy Conservation Office (SECO)
- Public Utility Commission of Texas (PUC), and
- local governments

The Energy Systems Laboratory (ESL) at the Texas Engineering Experiment Station of the Texas A&M University system assists in energy-efficiency and renewable energy research, along with emissions reduction calculations. A description of each program follows.

Emissions Reduction Incentive Grants Program (ERIG)

Authorized in the Texas Health and Safety Code, Section 386.102, the TCEQ manages this program, which provides grants to cover the incremental costs of projects in the state's 42 TERP-eligible counties. Eligible projects include new purchases, replacements, repowers, retrofit technologies, infrastructure, qualifying fuels, and rail relocation and improvement.

Rebate Grants Program

The Texas Health and Safety Code, Section 386.117, directs the TCEQ to award rebate grants for on-road heavy-duty vehicles and non-road equipment in the eligible counties. This program features streamlined processes for grant applications, contracting, reimbursement, and reporting. Projects are limited to replacements and engine repowers of on-road vehicles and non-road equipment.

Small Business Grants Program

The Texas Health and Safety Code, Section 386.116, defines businesses that own and operate no more than two vehicles or pieces of equipment, or a combination of the two, one of which must be diesel-powered and a pre-1994 model vehicle—or pieces of non-road equipment with "uncontrolled emissions" as small businesses. The TCEQ continues to fund grants to small businesses under a streamlined and simplified application and award process as part of the Rebate Grants Program.

American Recovery and Reinvestment Act Rebate Grants Program (ARRA)

During 2010, the TCEQ used federal ARRA funds to implement a supplemental TERP-ARRA Rebate Grants Program that is consistent with the requirements for ARRA recipients and the TCEQ TERP Rebate Grants Program.

Third-Party Grants

The TCEQ maintains statutory authority to contract with third parties to provide grant funds for projects consistent with the TERP guidelines. The TCEQ has awarded eight third-party grants to assist with implementing the TERP projects in eligible areas. The four entities awarded these grants include:

- the Railroad Commission of Texas, to fund propane vehicle and equipment projects;
- the North Central Texas Council of Governments, to fund regional TERP projects, including local government and construction projects;
- the Houston-Galveston Area Council, to fund local government projects and projects involving vehicles operating in or near port facilities; and
- the Texas General Land Office, to fund natural gas vehicle and equipment projects.

Texas Clean Fleet Program (TCFP)

The TCFP, established under Texas Health and Safety Code, Chapter 392, provides grant incentives to owners of at least 75 vehicles in Texas to replace a minimum of 20 diesel vehicles with new alternative-fuel or hybrid vehicles.

Alternative Fueling Facilities Grant Program (AFFP)

Authorized under Texas Health and Safety Code, Chapter 393, the AFFP provides grants in the EPA-designated, Texas nonattainment counties for the construction, reconstruction, or acquisition of facilities to store, compress, or dispense alternative fuel. Alternative fuels eligible for funding under this program include biodiesel, hydrogen, methanol, natural gas, propane, and/or electricity.

Clean Transportation Triangle (CTT) Grant Program

Authorized under Texas Health and Safety Code, Chapter 394, the CTT program was created to support an infrastructure of natural gas fueling stations along interstate highways between the Houston, Dallas, Fort Worth, and San Antonio areas.

Texas Natural Gas Vehicle Grants Program (TNGVGP)

Authorized under the Texas Health and Safety Code, Chapter 394, the TNGVGP funds projects in designated eligible Texas counties to replace or repower existing vehicles with natural gas vehicles and engines with the goal of reducing NO_X. Grant applicants must go

through a “participating dealer” under contract with the TCEQ when applying for this grant.

New Technology Research and Development (NTRD)

Authorized under the Texas Health and Safety Code, Chapter 387, the primary objective of the NTRD was to promote the development and commercialization of technologies that will support projects that can be funded under the TERP ERIG program. In 2011, SB 527 eliminated future funding and authority for the NTRD program. The TCEQ continues to administer NTRD grants issued during FY 2010 to FY 2011 until their expiration in May 2013.

New Technology Implementation Grants (NTIG)

Authorized under the Texas Health and Safety Code, Chapter 391, the primary objective of the NTIG program is to offset the incremental cost of emissions reductions of pollutants from facilities and other stationary sources in Texas. Projects considered for NTIG grants include advanced clean energy projects, as defined by the Texas Health and Safety Code, Section 382.003, new technology projects that reduce emissions of regulated pollutants from point sources and involve capital expenditures that exceed $500 million, and electricity storage projects related to renewable energy.

Texas Clean School Bus Program

The Texas Clean School Bus program, established under the Texas Health and Safety Code, Section 390.002, and managed by the TCEQ per 386.052, is designed to reduce emissions of diesel exhaust from school buses throughout the state. Eligible projects may involve emissions-reducing add-on equipment and other applications such as closed-crankcase filtration systems, diesel particulate filters, and diesel-oxidation catalysts.

Heavy-Duty Motor Vehicle Purchase or Lease Incentive Program

The Heavy-Duty Motor Vehicle Purchase or Lease Incentive Program is a statewide program under the Texas Health and Safety Code, Section 386.112, to reimburse a purchaser or lessee of an eligible new on-road heavy-duty vehicle for the incremental costs of purchasing or leasing the vehicle in lieu of a higher-emitting diesel-powered vehicle. A heavy-duty vehicle is defined as a motor vehicle with a gross vehicle weight rating of 8,500 pounds or more. This program is to be managed by the TCEQ but has not implemented it due to other funding priorities.

Light-Duty Motor Vehicle Purchase or Lease Incentive Program

Under the Texas Health and Safety Code, Section 386.152, the Light-Duty Motor Vehicle Purchase or Lease Incentive Program was to be administered by the CPA and the TCEQ. The program was to provide financial incentives (rebates) for the purchase or lease of an eligible new car or light truck meeting certain EPA emission standards. This program has not been implemented due to elimination of funding by the legislature.

Energy-Efficiency Grants Program

The PUC has jurisdiction over this program, per Texas Health and Safety Code, Section 386.202. The PUC regulates energy-efficiency programs to meet demand-reduction goals in the 42 TERP-eligible counties. The original TERP program authorized the PUC to administer grant funding. HB 1365 removed that authorization.. However, the PUC does administer other energy-efficiency programs and is required to report the results of those programs to the TCEQ. The energy savings achieved may result in corresponding reductions in air emissions.

Texas Building Energy Performance Standards

Local governments are responsible for administering and enforcing the standards found in the International Energy Conservation Code and the chapter on energy efficiency in the International Residential Code. The ESL is responsible for assessing the energy savings from adopted energy codes. The Texas Building Energy Performance Standards are authorized by Texas Health and Safety Code, Section 388.003. The energy savings achieved may result in corresponding reductions in air emissions.

Energy-Efficiency Programs in Certain Political Subdivisions

Energy-efficiency programs in certain political subdivisions require counties and political subdivisions in the affected areas to establish the goal of reducing energy consumption by five percent per year and to implement cost-effective energy-efficiency measures. As required by Texas Health and Safety Code, Sections 388.005 and 399.006, organizations report their progress each year to the SECO. In turn, the SECO is to include information for the TCEQ as part of its TERP reporting.

Funding

The TERP revenue is allocated through appropriations from the state legislature. The revenue allocations for FY 2007 through FY 2012 are shown in the table below.

Allocation of TERP Revenue

Agency	2010	2011	2012
Texas Commission on Environmental Quality	$116,482,851	$116,482,851	$57,165,047
Engineering Experiment Station, Texas A & M University	$952,019	$952,019	$952,019
Total Allocation	$117,434,870	$117,434,870	$58,117,066
Other fund obligations [benefits, Statewide Cost Allocation Plan (SWCAP), etc]	$1,327,000	$1,154,000	$1,154,000
HB 1796, 81st Texas Legislature	$521,074	$521,074	
5% Reduction [a]	($35,350,002)	($7,000,000)	
2.5% Reduction [b]		($6,963,227)	
HB 4 Additional Reduction [c]		($35,000,000)	
Rider 21, Article VI, GAA, 82nd Texas Legislature [d]			$8,000,000
Total Fund Deductions	$83,932,942	$70,146,717	$67,271,066

[a] The 5% reduction is from the 2012-2013 LAR.

[b] The 2.5% reduction is for 2011 based on HB 4.

[c] Additional 5% reduction as authorized under HB 4.

[d] Additional $8 million as authorized under contingency rider 21, Article VI, GAA, 82nd Texas Legislature

Results to Date

Emissions Reduction Incentive Grants Program

Since the beginning of the program in FY 2002 through August 31, 2012, the TCEQ awarded grants to 8,956 projects under all grant categories for a total of $858,145,220. These projects are projected to reduce NOX emissions by 164,966 tons, representing 64.4 tons per day in 2012, at an average cost per ton of $5,202.

Of the grants awarded, 3,192 are funded under the ERIG Program for $639,017,826. The ERIG projects are projected to reduce NOX emissions by 137,269 tons, representing 61.05 tons per day in 2012, at a cost per ton of $4,654.

Rebate Grants Program

The Rebate Grants Program has been in place since April 2006. The TCEQ has awarded 2,172 rebate grants for a total of $142,234,466. The rebate grant projects are projected to reduce NO_X emissions by 17,682 tons, representing 10.21 tons per day in 2012, at a cost per ton of $8,039.

Small Business Grants Program

Of the awarded or pending rebate contracts, 853 grantees were identified as small businesses. These grants totaled $57,661,610, with projected NO_X emissions reductions of 7,681 tons, representing 4.48 tons per day in 2012, at a cost per ton of $7,506. The TCEQ estimates that many more potential grant recipients from the TERP programs met the definition of a small business, but they did not apply under the Rebate Grants Program.

American Recovery and Reinvestment Act Rebate Grants Program

The federal stimulus moneys for the TERP-ARRA rebate grants included $12,632,318 awarded under a special round of rebate grants during 2010. A total of 234 ARRA rebate grants were awarded under this special federal stimulus program. The ARRA rebate grants are projected to reduce NO_X emissions in 2012 by 1,322 tons, representing 0.75 tons per day, at a cost per ton of $9,481.

Third-Party Grants Program

The TCEQ has awarded 3,358 third-party grants to the Railroad Commission of Texas, North Central Texas Council of Governments, Texas General Land Office, and Houston-Galveston Area Council, for a total of $64,260,608. These grants are currently projected to reduce NO_X emissions by 8,644 tons, representing 4.76 tons per day in 2012, at a cost per ton of $7,443.

Texas Clean Fleet Program

The TCEQ received 13 applications under the first Texas Clean Fleet application period that closed in July 2010. Project selections were completed and eight grant awards issued in FY 2011. This initial round of Texas Clean Fleet grant awards totaled approximately $18 million. These grants are currently projected to reduce NO_X emissions by 166.9 tons, representing 0.13 tons per day in 2012, at a cost per ton of $109,875.

New Technology Research and Development Program

The TCEQ received 44 NTRD project applications under its first application period in FY 2010 and awarded eight grants for approximately $6 million. Under its second NTRD application period in FY 2011, the TCEQ received 35 project applications and awarded six grants for approximately $6 million. Examples of the type of NTRD projects funded include:

- the testing and developing of hydrogen and electric tractors;
- a demonstration of a hydrogen bus and fueling system, in addition to demonstrations of electric-powered medium-duty delivery trucks; and
- the development and verification/certification testing for a selective catalytic reduction system for locomotives and marine engines.

Due to elimination of funding and authority for the NTRD program in 2011, no future NTRD application periods will be held.

New Technology Implementation Grants Program

The initial NTIG grant application round opened in August 2010. The TCEQ reviewed three proposals for electricity storage projects and awarded two projects in FY 2011: a thermal storage system (in Floyd County) and an energy storage system for compressed air (in Gaines County), both capturing wind energy. The NTIG Program also opened a grant solicitation for advanced clean energy projects and new technology projects but did not receive any applications.

Texas Natural Gas Vehicle Grant Program

For the first biennium of the TNGVGP, $18,292,816 in grant funds were available. As of August 31, 2012, one application had been received in response to the first TNGVGP solicitation for a total of $2,250,000 funds requested. The applications must be submitted through a participating dealer under contract with the TCEQ. As of August 31, 2012, there were 46 businesses on the Participating Dealers list. The TCEQ will review applications received on a first-come, first-served basis and expects contracts to be in place by the first quarter of FY 2013. Depending on the grant amounts for the individual applications, the TNGVGP could fund between 200-500 natural gas vehicles and engines.

Texas Clean Transportation Triangle Grant Program

The TCEQ received 21 CTT grant applications under its first application period in 2012, for a total of $3,725,000 of funds requested. As of August 31, 2012, the TCEQ had prioritized $3,250,000 to fund 15 grants to 10 grantees. The TCEQ expects contracts for these grants to be in place by the first quarter of FY 2013. The TCEQ anticipates opening a second solicitation with more specific geographic requirements early in FY 2013 in an effort to distribute the remaining $1.4 million in CTT grant funds.

Texas Alternative Fueling Facilities Grant Program

The TCEQ received 25 AFFP grant applications during its first application period in 2012 for a total of more than $11.7 million in funds requested. Application scoring and grant selection were completed the first quarter of FY 2013. Contracts for these grants will be finalized the second quarter of FY 2013. The TCEQ anticipates awarding all available AFFP grant funds under this first solicitation.

Texas Clean School Bus Program

Over the 2012-2013 biennium, the legislature appropriated $2,239,602 for FY 2012 and $2,239,602 for FY 2013 for the Texas Clean School Bus Program to install retrofit devices to reduce diesel exhaust emissions from school buses throughout the state. The TCEQ has also supplemented state funding with federal funding, including $203,968 in State Clean Diesel funds awarded by the EPA in FY 2012.

As of November 19, 2012, the TCEQ had reimbursed a total of $20,255,348, including $16,279,499 in state funds and $3,975,849 in federal funds from FY 2008 through FY 2012, to 181 school districts. During this time period, 6,812 school buses were retrofitted with 9,665 individual devices.

Heavy-Duty Motor Vehicle Purchase or Lease Incentive Program

The Heavy-Duty Motor Vehicle Purchase or Lease Incentive Program has not been implemented because of TCEQ funding priorities. However, it remains as a statutorily authorized program and could be implemented in the future, although changes would be needed to update the certified NO_X emission rates for eligible vehicles.

Light-Duty Motor Vehicle Purchase or Lease Incentive Program

The Texas Comptroller of Public Accounts suspended this program in 2002 due to funding limitations. The legislature has not appropriated any funds for it since FY 2002. The program remains statutorily authorized and could be implemented in the future, if funding is available.

Energy-Efficiency Grants Program

The PUC had jurisdiction for the Energy-Efficiency Grants Program using money from the TERP Fund. In FY 2002 and FY 2003, the PUC provided grants to electric companies in the TERP-eligible counties to reduce electricity consumption. The PUC approved templates for a variety of energy-efficiency technologies to be implemented that contribute to a reduction in electric consumption. Lower energy consumption results in a reduction in electric production and can help minimize NO_X-producing emissions. Funding for this program was eliminated by the legislature in 2003.

The PUC is responsible for the energy efficiency program established by SB 7 in 1999. It introduced retail competition in the sale of electricity and directed the PUC to establish energy efficiency programs to meet a specific demand-reduction goal. Although the 1999 legislatively authorized it, the demand reduction goal was not explicitly adopted to reduce air emissions; the energy savings achieved through the energy-efficiency program also provide corresponding reductions in air emissions within nonattainment areas.

The PUC is required to report the reductions of energy demand, peak loads, and associated emissions. The Transmission and Distribution Utilities (TDU), which are responsible for implementing the energy-efficiency program, exceeded their demand reduction goals by 191 percent, and saved nearly 529,334 megawatt-hours/year of energy. To implement energy-efficient measures, the TDU spent a total of $113,560,878 during year 2011.

Based on estimates from the ESL, the annual integrated savings from the PUC's SB 5 and SB 7 energy-efficiency programs through 2011 was 2,861,805 megawatt-hours/year. The ESL estimates that these electricity savings could represent up to 1,950 tons of NO_X emissions reductions.

Links to the ESL and PUC reports are provided at the TERP Web site, <www.terpgrants.org>.

Texas Building Energy Performance Standards

The ESL also assesses energy savings in nonattainment and affected counties for energy-compliant new construction. The ESL reports an estimated annual integrated electricity savings through 2011 for these programs of 2,073,290 megawatt-hours/year, for an estimated annual integrated NO_X emissions reduction of 1,454 tons.

Energy-Efficiency Programs in Certain Political Subdivisions

The SECO within the CPA worked with local governments to establish and implement goals to reduce electrical consumption by five percent per year, beginning January 2002. Additionally, the ESL assists these local governments and submits reports on the estimated energy savings and reductions in NO_X emissions. During the first reporting cycles of SB 12, 80th Texas Legislature, 130 Texas jurisdictions reported adopting the five-percent energy efficiency goal through 2013 for public facilities to reduce their electricity consumption. The ESL estimates that the annual integrated energy savings from energy efficiency commitment could be as high as 2,939,857 megawatt-hours/year, for an estimated cumulative annual reduction in NO_X emissions of 2,220 tons.

TCEQ Monitoring Efforts

To minimize the risk of fraud, a three-tiered Quality Assurance and Fraud Prevention and Detection Program was developed. Additionally, the TERP staff now includes one certified fraud examiner (CFE). This credential denotes proven expertise in fraud prevention, detection, and deterrence. The TERP CFE is trained to identify the warning signs that indicate evidence of fraud or fraud risk and, in the process, help protect the program by uncovering fraud and preventing fraud from occurring in the first place.

Future Considerations for the TERP Programs

During the remainder of the 2012-2013 biennium, the TCEQ will address these issues.

Emissions Reduction Incentive Grants Program

In 2008, the Ozone National Ambient Air Quality Standard (NAAQS) was lowered by the EPA. In 2012, the EPA designated areas as nonattainment for the 2008 ground-level ozone NAAQS. Wise County was included as part of the Dallas-Fort Worth nonattainment area, the TERP Guidelines and program materials were updated to include Wise County in the list of TERP-eligible counties. The grants will continue to be used to help address the SIP compliance goals, as well as helping other areas remain in attainment.

Cost-per-ton criteria continues to be evaluated each year in relation to the types of projects being submitted by applicants. Adjustments may be considered as appropriate to further encourage applications from targeted emission sectors.

The TCEQ is also expanding its use of default usage rates as an option for grant projects under the ERIG Program, similar to what has been used for the Rebate Grant Program. For projects not using the default usage rate option, the TCEQ is initiating a requirement for detailed records showing historical usage above the default rate or the use of electronic usage tracking using Global Positioning Systems (GPS) and electronic reporting of location and use. The intent of these changes it to minimize risks and lead to a much simpler program for applicants and the agency and significantly reduce administrative requirements.

Rebate and Small Business Grant Programs

The TCEQ will continue to prioritize an annual allocation for the Rebate and Small Business Grant Programs from the overall ERIG funds. The Small Business Grants program will continue to be implemented as part of the overall TERP Rebate Grants program.

Third-Party Grants

The TCEQ will continue the administration and oversight of the third-party Grants program and, where appropriate, expand the availability and type of grants to additional state agencies and other authorities, such as local councils of government, where unique opportunities benefit the overall goals of TERP.

Texas Clean Fleet Program

The TCEQ will continue to implement the TCFP. As more entities with large fleets consider converting to alternative fuels and hybrid vehicles, this program will help encourage owners of large fleets to embrace alternative fuels while achieving needed NO_X reductions.

Texas Clean School Bus Program

The TCEQ will continue to implement the Texas Clean School Bus Grants Program to help school districts throughout the state reduce the costs of retrofitting school buses with advanced technological devices designed to reduce diesel exhaust emissions.

New Technology Research and Development Program

In 2011, SB 527 eliminated future funding and authority for the NTRD program. The TCEQ is continuing to administer NTRD grants issued from FY 2010 to FY 2011 until their expiration in May 2013.

New Technology Implementation Grants Program

Currently, there are no plans to open another NTIG round of solicitation in FY 2013. However, the TCEQ may open additional grant rounds in the future depending on available funding. The TCEQ is continuing to administer NTIG awards issued during FY 2011 until their expiration.

Texas Natural Gas Vehicle Grant Program

The initial grant application period for this program was opened in FY 2012, and applications will be accepted through May 2013 or until all of the biennial funding allocation is awarded.

The TCEQ is also completing the development of an online grant application system, as required under SB 385, for use in future grant rounds. This new system is expected to be completed in fall 2012 and will be available for future grant rounds.

Clean Transportation Triangle Grant Program

The initial application period for this program was also completed in FY 2012. It has sufficient funding allocated to it that the TCEQ expects to open an additional application period in fall 2012. The TCEQ will evaluate the initial program implementation results and make changes as needed to ensure that the program is successful.

Alternative Fueling Facilities Grant Program

The initial application period for this program was completed in FY 2012 with good participation. Due to the number of applications received, it was expected that all of the biennial funding allocation for this program would be awarded.

Program Monitoring

As the TERP programs have matured, the ongoing usage and monitoring of grant-funded projects has become an increasingly large part of managing them. Most projects have a five- to seven-year reporting life, while some projects may extend for 10to 20 years. The TCEQ will continue to consider enhancements for both monitoring and enforcement to effectively manage a large grants program.

Implementing a new, default-usage option under the ERIG Program, and the potential use of GPS tracking of usage for projects that don't use the default option are expected to substantially reduce administrative requirements for project monitoring and improve enforcement of the grant requirements.

Legislative Issues

The TCEQ continues to be available to provide analysis, data, research, and information that may be needed to assist the legislature in evaluating opportunities for strengthening the TERP program.

I. Overview

The 2012 Texas Emissions Reduction Plan (TERP) Biennial Report is submitted by the Texas Commission on Environmental Quality (TCEQ) in fulfillment of the requirements of Texas Health and Safety Code 386.057 and 386.116(d).

Purpose

The TERP was established by the 77th Texas Legislature in 2001 through enactment of Senate Bill (SB) 5. The goals of the TERP as set forth in SB 5 are to:

- ensure that the air in this state is safe to breathe and meets minimum federal standards established under the Federal Clean Air Act (Section 7407, Title 42 United States Code);
- develop multi–pollutant approaches to solving the state's environmental problems; and
- adequately fund research and development that will make the state a leader in new technologies that can solve the state's environmental problems while creating new business and industry in the state.

The focus of the TERP is to reduce emissions of nitrogen oxides (NO_X) through voluntary financial incentive programs. One of the main drivers for establishment of the TERP was to replace reductions that would have been accomplished through two mandatory measures (time restrictions on use of construction and industrial equipment and the requirement to replace older off-road equipment with new equipment) that SB 5 directed the TCEQ to remove from the state implementation plan (SIP) for the Dallas–Fort Worth and Houston–Galveston–Brazoria ground-level ozone nonattainment areas. Projects in other nonattainment areas and other areas of concern for ozone issues in the state are also eligible for TERP funding. The list of TERP-eligible counties is included in Appendix 1, TERP-Eligible Counties Map.

Texas Emissions Reduction Plan Advisory Board

The TERP Advisory Board is a 15-member body created under SB 5. Five members each are appointed by the governor, lieutenant governor, and speaker of the House of Representatives. The Board also includes seven ex officio members. A list of members is included in Appendix 2, TERP Advisory Board Members.

II. Funding

Revenue

TERP funding sources were first established by SB 5 with subsequent changes made by House Bill (HB) 1365, 78th Texas Legislature. The revenue received into the TERP Fund for FY 2008 through FY 2012 is listed in Appendix 3, Texas Emissions Reduction Plan Revenue. The current funding sources from the Texas Tax Code and Texas Transportation Code are listed below.

- Texas Tax Code (TTC) 151.0515(b) and 151.0515(b)(1): A 2 percent surcharge on the sale price or lease/rental amount of off-road diesel equipment sold, rented or leased (a surcharge is also applied to the storage, use, or the consumption of this equipment in Texas).
- TTC 152.0215(a): A 2.5 percent surcharge of the total consideration on sale or lease of model year pre–1997 on-road diesel vehicles over 14,000 lbs and a 1 percent surcharge for vehicle model year 1997 and newer.
- Transportation Code 502.1675: A 10 percent surcharge of the total fees due for the registration of truck tractors and commercial motor vehicle.
- Transportation Code 501.138(a): A portion of the certificate of the vehicle title fee, $20 out of the $33 fee for applicants in the nonattainment counties and $15 out of the $28 fee for applicants in all other counties; and
- Transportation Code 548.5055: A $10 fee on commercial motor vehicles required to be inspected.

Funds Allocation

Through FY 2011, Texas Health and Safety Code 386.252 directed that the money in the TERP Fund was to be allocated as follows:

- 87.5 percent to be used for the emissions reduction incentive programs;
- 9 percent to be used for the NTRD program, of which $500,000 was to be deposited to the Clean Air Account to supplement funding for air quality activities in affected counties, up to $200,000 allocated for a health effects study, and a minimum 20 percent to support air quality research in the Houston–Galveston–Brazoria and Dallas–Fort Worth nonattainment areas; and
- 2 percent for the administrative costs associated with the TCEQ's administration of the Texas Emissions Reduction Plan and 1.5 percent for the administrative costs of the Texas Energy Systems Laboratory, Texas Engineering Experiment Station, Texas A & M University.

Of the money allocated to the emissions reduction incentive programs:

- not more than 4 percent was to be used for the Texas Clean School Bus Program;

- not more than 10 percent was to be used for the Heavy-Duty Motor Vehicle Purchase or Lease Incentive Program; and
- a specified amount could be used for the New Technology Implementation Grants Program, including a defined amount set aside for electricity storage projects used for renewable energy.

The allocation percentages were revised in 2011 by SB 527 and SB 385, 82nd Texas Legislature, including adding allocations for new programs. Under revised Texas Health and Safety Code 386.252, the total appropriation from the TERP Fund is to be allocated as follows:

- not more than 4 percent for the Texas Clean School Bus Program;
- not more than 10 percent for the Heavy-Duty Motor Vehicle Purchase or Lease Incentive Program;
- a specified amount may be used for the New Technology Implementation Grants Program;
- 5 percent for the Texas Clean Fleet Program;
- not less than 16 percent for the Texas Natural Gas Vehicle Grants Program;
- not more than 4 percent for the Clean Transportation Triangle Program;
- up to 2 percent for the Alternative Fueling Facilities Program;
- not more than $7 million in FY 2012 and FY 2013 and not more than $3 million in subsequent fiscal years for a regional air monitoring program in TCEQ Regions 3 and 4;
- a specified amount to support research related to air quality as provided by Texas Health and Safety Code Chapter 387;
- up to $200,000 for a health effects study;
- up to $500,000 to be deposited to the Clean Air Account for air quality planning activities in affected counties;
- not more than $216,000 to the TCEQ to contract with the Energy Systems Laboratory annually for the development and annual computation of creditable statewide emissions reductions obtained through wind and other renewable resources;
- not more than $3.4 million to the TCEQ for administrative costs;
- 1.5 percent for administrative costs incurred by the Energy Systems Laboratory; and
- the balance is allocated to the TCEQ for the Emissions Reduction Incentive Grants Program.

Notwithstanding the allocation formula set forth in Texas Health and Safety Code 286.352, the legislative appropriations under the State Appropriations Act dictate the specific funding

amounts that may be used from the TERP Fund and how those funds are allocated. The overall appropriations for FY 2008 through FY 2012 are listed in Appendix 4.

III. Program Accomplishments

Emissions Reduction Incentive Grants (ERIG) Program

The ERIG program is managed by the TCEQ and provides grants to fund the incremental costs of projects in the 42 TERP-eligible counties, including counties designated nonattainment for ground-level ozone and other affected counties. Eligible projects include new purchases, replacements, repowers, retrofit technologies, infrastructure, and qualifying fuels. For a project to be eligible, it must be certified to emit 25 percent less NO_X than the baseline engine, based on the federal standard for that engine. Certification means approved by the Environmental Protection Agency (EPA), the California Air Resources Board (CARB), or otherwise accepted by the TCEQ.

For each round of grant funding, a Request for Grant Applications (RFGA) was released. With each RFGA, the TCEQ conducted workshops and provided outreach material for potential applicants, along with the program guidelines and technical supplements. Applicants were able to access information via the TERP Web site <www.terpgrants.org>, and receive assistance from TCEQ staff through the TERP Hotline, 1-800-919-TERP.

Per Texas Health and Safety Code 386.106, grants may not be awarded to projects that exceed the cost of $15,000 per ton of NO_X emissions reduced. The TCEQ has the authority to set cost-per-ton-limits lower than the maximum amount authorized in the statute. For each RFGA round, the TCEQ has established a maximum cost per ton for eligible activities that is less than the statutorily authorized maximum: currently $5,000 cost per ton maximum for marine and locomotive projects, and $10,000 cost per ton maximum for all other projects.

Also, in 2005, HB 2481, 79th Texas Legislature, directed the TCEQ to establish lower cost per ton limits for locomotive and marine vessel projects than for projects involving other emission sources. Since 2008, locomotive and marine projects have been limited to a cost per ton of NO_X reductions not to exceed $5,000, while other project categories were limited to $10,000. The average cost per ton for all projects funded through August 31, 2012, is $5,202.

A list of the ERIG grants awarded from FY 2002 through FY 2012 is provided in Appendix 5, *TERP Projects Awarded*. The list in Appendix 5 includes information on infrastructure projects funded to date, as required under Texas Health and Safety Code 386.057(b)(2). Appendix 6, *Summary of TERP Projects by Area*, includes a summary of these projects by area, and Appendix 7, *Summary of TERP Projects by Emission Source*, includes a summary by emission source.

Since the beginning of the program in FY 2002 through FY 2012, the TCEQ has awarded grants for 8,956 projects under all grant categories for a total of $858,145,220. These projects are anticipated to reduce NO_X emissions by 164,966 tons, representing 64.4 tons per day in 2012, at a cost per ton of $5,202.

The emissions reductions presented for each of the grant programs in this Section and in Appendices 6, 7, and 8 are projections based on the emissions reduction commitments. The projections are continually updated to account for newly awarded projects and changes to existing projects and represent the best information available at the time. However, not all projects will be finally implemented and the actual emissions reductions achieved by the projects that are implemented may be lower than the projections. The timing on when the emissions reductions are achieved may also be delayed as grantees begin operating grant-funded equipment later than the dates used to determine the original projections.

For instance, the ERIG, Rebate, ARRA, Small Business, and Third-Party grant projects that were active and subject to reporting usage in FY 2012 reported achieving approximately 75 percent of their commitments for use of the grant-funded vehicles and equipment. About half of the 25 percent difference between the commitments and the reported usage is associated with locomotive replacement and repower projects that reported usage less than their original commitments. The TCEQ has preliminarily determined that part of the reason for the lower reported usage by these projects can be attributed to the use of fuel use estimates for the locomotives being replaced or repowered that were too high. Many of these estimates were based on EPA information on duty cycles and average fuel use. In addition, most of these projects involve new types of locomotive engines that achieve a significant improvement in fuel economy, and estimates of fuel use for these engines may have been too conservative. The TCEQ is considering options to adjust the usage commitments for these locomotive projects to an approach that will reflect more accurate fuel usage rates. Any changes to the projected emissions reductions as a result of this change will be incorporated into future reports and information regarding the grant projects funded under these programs.

Some of this difference is also attributed to projects that were late in submitting the latest usage reports, although many of those projects were in operation and the vehicles and equipment were being used. The remaining difference between the usage commitments and the reported usage can be attributed to a variety of factors, including projects where the vehicles or equipment were not being used for a sufficient amount of use and projects that are under some stage of enforcement by the TCEQ.

Rebate Grants Program

In 2006, the TCEQ initiated a Rebate Grants program to implement a portion of the TERP, as authorized under Texas Health and Safety Code 386.117, related to implementation of a new Rebate Grants Program and 386.116, Small Business Incentives.

The streamlined Rebate Grants Program tested the effectiveness and efficiency of new forms, processes, and procedures. The Notice of Rebate Grants invited participants, as well as the public, to comment on the new process. Minor application changes have been made since 2008, based on comments received.

Activities eligible for a rebate grant are intended to reduce NO_X emissions in the designated 42 TERP-eligible counties from on-road heavy-duty diesel vehicles and non-road diesel equipment. Rebate grants continue to be based on pre-approved maximum rebate grant amounts for eligible on-road and non-road replacement and repower projects.

The program is administered under the same ERIG program guidelines, quality assurance, and monitoring procedures.

The Rebate Grants Program has been very popular. Through FY 2012, the TCEQ awarded or approved 2,172 rebate grants for a total of $142,234,466. The rebate-grant projects are projected to reduce NO_X emissions by 17,682 tons, representing 10.21 tons per day in 2012, at a cost per ton of $8,039. Rebate Grant projects are listed in Appendix 5, *TERP Projects Awarded*.

Small Business Grants Program

The Small Business Grants Program targets small businesses and other entities that own and operate no more than two vehicles or pieces of equipment, or a combination of the two, one of which must be diesel-powered and a pre-1994 model year vehicle or non-road equipment with "uncontrolled emissions" as defined in Texas Health and Safety Code 386.116. The program was first established in FY 2004.

The program is streamlined for small businesses in the 42 TERP-eligible counties to apply for financial assistance to replace or repower vehicles or equipment, via a simplified application process.

The TCEQ has incorporated the small business grants into the Rebate Grants program. The program is administered under the same program guidelines, quality assurance, and fraud prevention and detection program measures.

Through August 31, 2012, TCEQ had funded 853 small business projects through various grant programs. These grants total $57,661,610, and are projected to reduce NO_X emissions by 7,681 tons, representing 4.48 tons per day in 2012, at a cost per ton of $7,507. Small business projects are listed in Appendix 5, *TERP Projects Awarded*.

American Recovery and Reinvestment Act (ARRA) Grants Program

The ARRA Grants Program provided over $12 million in federal stimulus funds for the TCEQ to offer additional financial incentives for a TERP-ARRA rebate program for individuals, corporations, organizations, government or governmental subdivisions or agencies, businesses, and other legal entities. These funds were made available for award through August 31, 2011.

The TCEQ awarded $12,632,318 in ARRA rebate grants. These 234 grants are projected to reduce NO_X emissions by 1,322 tons, representing 0.75 tons per day in 2012, at a cost per ton of $9,481. ARRA projects are listed in Appendix 5, *TERP Projects Awarded*.

Third-Party Grant Program

The TCEQ continues to issue pass-through grants to third parties to fund projects consistent with the TERP Guidelines. The TCEQ has awarded eight third-party grants to four grantees to assist with the implementation of TERP projects in the TERP-eligible areas: the Railroad Commission of Texas funds propane vehicles and equipment projects; North Central Texas Council of Governments to fund various TERP projects, including refuse haulers; the

Houston-Galveston Area Council to fund local government and commercial TERP projects; and the Texas General Land Office to fund natural gas vehicle and equipment projects.

To date, the TCEQ has awarded $64,260,608 in third-party grants. The third-party grantees have awarded 3,358 subgrants. These subgrants are currently projected to reduce NO_X emissions by 8,644 tons, representing 4.7 tons per day in 2012, at a cost per ton of $7,433.

The third-party grant awards are included in the list provided in Appendix 5, TERP Projects Awarded, and the summary information in Appendix 6, Summary of TERP Projects by Area, and Appendix 7, Summary of TERP Projects by Emission Source. The subgrants awarded and reported by the third-party subgrantees are listed individually. Funding that has not been reported by the third-party grant recipients as awarded to a subgrantee is listed by third party grant recipient.

Texas Clean Fleet Program (TCFP)

In FY 2011, the TCEQ awarded eight TCFP grants. The TCFP initial round of grant awards totaled approximately $18 million. The TCFP provides financial incentives for entities that own and operate a minimum of 75 vehicles in Texas and plan to replace at least 20 diesel-powered vehicles with grant funds. The second round of TCFP grant awards was opened in FY 2012, and total approximately $5.7 million. Entities that received TCFP grants in FY 2011 are listed in Appendix 8, *Summary of TCFP Grants Funded in FY 2011*. A map of the Texas Clean Fleet eligible counties is in Appendix 9, *Texas Clean Fleet Program Map of Eligible Counties*.

Texas Natural Gas Vehicle Grant Program (TNGVGP)

For the first biennium of the TNGVGP, $18,292,816 in grant funds were available. As of August 31, 2012, one application was received in response to the first TNGVGP solicitation, for a total of $2,250,000 funds requested. The applications must be submitted through a Participating Dealer under contract with the TCEQ, which as of August 31, 2012, there were 46 businesses on the list of Participating Dealers. The TCEQ will review applications received on a first-come, first-served basis and expects contracts to be in place by the first quarter of FY 2013. Depending on the grant amounts for the individual applications, the TNGVGP could fund between 200-500 natural gas vehicles and engines. A map of the TNGVP eligible counties is in Appendix 10, *Texas Natural Gas Vehicle Grant Program Map of Eligible Counties*.

Texas Clean Transportation Triangle (CTT) Grant Program

For the first biennium of the CTT program, $4,573,204 in grant funds was available. Twenty-one applications were received in response to the first CTT solicitation, for a total of $3,725,000 funds requested. As of August 31, 2012, the TCEQ had prioritized $3,250,000 to fund 15 grants to 10 grantees. The TCEQ expects contracts for these grants to be in place by the first quarter of FY 2013. The TCEQ anticipates opening a second solicitation with more specific geographic requirements early in FY 2013 in an effort to distribute the remaining $1.4 million in CTT grant funds. A map of the CTT eligible highway segments is in Appendix 11, *Clean Transportation Triangle Grant Program Map of Eligible Highway Segments*.

Texas Alternative Fueling Facilities (AFFP) Program

For the first biennium of the AFFP, $2,286,602 in grant funds are available. Twenty-five applications were received in response to the first AFFP solicitation for a total of more than $11.7 million in funds requested. Scoring and grant selection were completed during the first quarter of FY 2013. AFFP contracts will be in place the second quarter of FY 2013. The TCEQ anticipates awarding all available AFFP grant funds under the first solicitation and does not plan to pursue a second grant round in FY 2013. A map of the AFFP eligible counties is in Appendix 12, *Alternative Fueling Facilities Grant Program Map of Eligible Counties*.

Texas Clean School Bus Grants Program

Over the 2012-2013 biennium, the legislature appropriated $2,239,602 for FY 2012 and $2,239,602 for FY 2013 for the Texas Clean School Bus Program to install retrofit devices to reduce diesel exhaust emissions from school buses throughout the state. The TCEQ has also supplemented state funding with federal funding, including $203,968 in State Clean Diesel funds awarded by the EPA in FY 2012.

As of July 1, 2012, the TCEQ had reimbursed a total of $17,625,124, including $13,927,375 in state funds and $3,697,749 in federal funds from FY 2008 though FY 2012, to 177 school districts. During this time period, 6,587 school buses were retrofitted with 9,427 individual devices. School districts that received funding in FY 2011 and FY 2012 are listed in Appendix 13, *Texas Clean School Bus Grants Program Projects Funded in FY 2011 and FY 2012*.

Heavy-Duty Motor Vehicle Purchase or Lease Incentive Program

The Heavy-Duty Motor Vehicle Purchase or Lease Incentive Program is a statewide TCEQ rebate program to cover the incremental cost difference of purchasing or leasing cleaner heavy-duty vehicles (8,500 pounds or greater). Rules and guidelines were adopted in 2001, but due to reduced revenues and other funding priorities, TCEQ has not allocated funding for this program. Currently, all available TERP funds have been allocated to the other grant programs intended to reduce emissions in the nonattainment areas and other participating counties.

Light-Duty Motor Vehicle Purchase or Lease Incentive Program

The Light-Duty Motor Vehicle Purchase or Lease Incentive Program is similar to the Heavy-Duty Motor Vehicle Purchase or Lease Incentive Program. This program is specifically for light-duty vehicles weighing less than 10,000 pounds. The program is to be administered jointly by the Texas Comptroller of Public Accounts (CPA) and the TCEQ. Rules and guidelines for this program were adopted in 2001 with SB 5. However, sufficient revenue was not received for the CPA to begin implementation of the program in FY 2002. Beginning in FY 2003, the legislature has not appropriated funds for this program.

Energy-Efficiency Grants Program

The Public Utility Commission (PUC) had jurisdiction for the Energy-Efficiency Grants Program using money from the TERP Fund. In FY 2002 and FY 2003, the PUC provided grants to electric companies in the TERP-eligible counties to reduce electricity consumption. The PUC approved templates for a variety of energy-efficiency technologies to be implemented that contribute to a reduction in electric consumption. Lower energy consumption results in a reduction in electric production and an avoidance of NO_X producing emissions. However, this program was eliminated by the legislature in 2003.

The PUC is responsible for the energy efficiency program established by SB 7 in 1999. The 1999 legislation introduced retail competition in the sale of electricity and directed the PUC to establish energy-efficiency programs to meet a specific demand reduction goal. Although the 1999 legislatively authorized demand reduction goal was not explicitly adopted to reduce air emissions, the energy savings achieved through the energy-efficiency program also provide corresponding reductions in air emissions within nonattainment areas.

Additionally, the PUC is required to report reductions in energy demand, peak loads, and associated emissions under the SB 7 provisions in Texas Utility Code 39.905. During 2011, utilities cumulatively exceeded goals for savings in demand by 191 percent and saved nearly 529,334 megawatt-hours of energy. To implement these energy-efficient measures, the utilities spent a total of $113,560,878 during 2011.

Based on estimates from the Energy Services Laboratory (ESL) at Texas A&M University, the annual integrated savings from the PUC's SB 5 and SB 7 energy efficiency programs through 2011 was 2,861,805 megawatt-hours/year. The ESL estimates that these electricity savings could represent up to 1,950tons of NO_X emissions reductions.

Links to the ESL and PUC reports are provided at the TERP Web site, <www.terpgrants.org>.

Texas Building Energy Performance Standards

Texas Health and Safety Code, Chapter 388 was created by SB 5 in 2001 to establish new state minimum construction standards for efficiency in buildings and to encourage higher levels of efficiency relative to this new baseline by recognizing locally enhanced codes, above-code building performance, and exemplary efforts by publicly owned facilities.

Local governments have the responsibility, per Texas Health and Safety Code 388.003, to administer and enforce the standards found in the International Energy Conservation Code and the Energy Efficiency chapter of the International Residential Code. The ESL is responsible for determining the energy savings from energy code adoption and, when applicable, from more stringent or above-code performance ratings. The ESL is required to provide an annual report of these reductions to the TCEQ.

The ESL also assesses energy savings in nonattainment and affected counties for energy-compliant new construction. The ESL reports an estimated annual integrated electricity savings through 2011 for these programs of 2,073,290 megawatt-hours/year, for an estimated annual integrated NO_X emissions reduction of 1,454 tons. A link to the ESL's latest reports is provided at the TERP Web site, <www.terpgrants.org>.

Energy-Efficiency Programs in Certain Political Subdivisions

Under Texas Health and Safety Code 388.05, political subdivisions in nonattainment areas or affected counties, were required to establish an energy consumption reduction goal of 5 percent per year beginning January 2002. The role of the State Energy Conservation Office (SECO) within the CPA has been to work to establish and implement these goals, and to evaluate the effectiveness of local entities' efforts and report its findings to the TCEQ.

Following the passage of SB 5 in 2001, the SECO worked with the United States Department of Energy (DOE) and the EPA to form the Texas Partnership to provide leadership and resources for affected jurisdictions in setting goals, determining strategies, and reporting energy savings data and progress. Examples of strategies include locally-mandated or voluntary "green" building energy codes that go beyond the state minimum, street lighting and traffic signal lighting improvements, and energy conservation retrofits for buildings, including lighting, windows, appliances, and cool roofs.

The ESL assists these local governments and submits reports on the estimated energy savings and reductions in NO_X emissions. During the first reporting cycle of SB 12, 80th Texas Legislature, 130 Texas jurisdictions reported adopting the 5 percent energy efficiency goal through 2013. The ESL estimates that the annual integrated energy savings from energy efficiency commitment could be as high as 2,939,857 megawatt-hours/year, for an estimated annual integrated reduction in NO_X emissions of 2,220 tons.

Political subdivisions in the 42 TERP-eligible counties continued to develop energy efficiency plans, establish energy consumption baselines, audit individual facilities, and achieve significant savings. The SECO's 2011 report highlights actions taken by these political subdivisions. Links to the SECO and ESL reports appear at the TERP Web site: <www.terpgrants.org>.

Energy-Efficiency Programs and the Texas SIP

The programs administered by the PUC and SECO under the mandates of the SB 5 (2001) and SB 7 (1999) provide avenues for potentially creditable emission reductions to be claimed in the SIP. Accurate quantification of emission reductions from energy efficiency and renewable energy (EE/RE) is challenging due to the complex nature of the electrical grid system. It is impossible to determine exactly where on the electrical grid electricity comes from for any certain electrical user. In order to factor in the degree of the complexity of the electrical grid and the uncertainties in the data and methods used, emission reduction estimates are modified using a discounting formula to arrive at the reduction estimates reported in the SIP.

Energy efficiency and renewable energy are incorporated into computer models used to forecast ozone levels in future years to predict if a nonattainment area will meet the ozone standard by the attainment date. Emission rates expected based on new and current regulations, population growth, and expected future energy demand are factored into these models, including pollution reductions due to forecasted renewable energy use.

In the past, the TCEQ has specifically included reductions of NO_X from EE/RE in the SIP, as explained below. The current guidance provided by the EPA for claiming emission reductions

from EE/RE presents additional challenges for taking direct credit for EE/RE measures in areas that have a NO_X cap and trade program. Furthermore, the EPA guidance requires a number of additional commitments for states claiming reductions from EE/RE measures. Given some of the uncertainties associated with ensuring that reductions from EE/RE measures meet the EPA's criteria to be SIP eligible (emissions reductions must be quantifiable, permanent, enforceable, and surplus) and current guidance, the TCEQ has in more recent SIP revisions included EE/RE measures in the Weight of Evidence portion of the SIP rather than claim direct creditable reductions in the SIP.

San Antonio area: The November 2004 San Antonio Early Action Compact included 0.06 tons per day (tpd) of NO_X reductions in 2007 from energy-efficiency projects as a result of SB 5 and SB 7. The Energy Systems Laboratory, the Local Metropolitan Partnership for Energy, and the Brooks Energy Sustainability Laboratory of the Texas Engineering Experiment Station developed the methodology used to calculate the reductions.

Dallas-Fort Worth (DFW) area: The April 2005 DFW 5 Percent Increment of Progress SIP Revision included NO_X emission reductions of 0.72 tpd in 2007 for EE/RE programs in the DFW eight-hour ozone nonattainment area. The reductions were calculated based on electricity and natural gas usage reductions from implementation of the May 1, 2001, Texas Building Energy Performance Standards to single and multifamily residences in 2003. These reductions also include less energy use because of energy-efficiency measures implemented by local governments and utilities as reported to the SECO and to the PUC.

IV. TCEQ Monitoring Efforts

To minimize the risk of fraud, a three-tiered Quality Assurance and Fraud Prevention and Detection Program was developed. Additionally, the TERP staff now includes one staff person who is also a Certified Fraud Examiner (CFE). This credential denotes proven expertise in fraud prevention, detection, and deterrence. The TERP CFE is trained to identify the warning signs that indicate evidence of fraud or fraud risk and, in the process, help protect the program by uncovering fraud and preventing fraud from occurring in the first place.

The three levels are listed and described below.

1. The Application phase requires TCEQ to maintain a uniform process when reviewing applications; review and verify technologies; confirm emission reductions and cost-effectiveness calculations; maintain an electronic database; and perform duplicate reviews.
2. The Contract phase requires TCEQ to consistently utilize template documents and obtain approval from TCEQ legal and central contracting offices for each contract; follow written grant management procedures; review reimbursement requests completed by fiscal and program staff prior to program management; maintain an electronic database for contract and fiscal information; perform on-site monitoring visits; and ensure an independent contractor physically verifies grantees' expenditures by performing on-site reviews of records and confirming the location and use of equipment.
3. The Tracking and Reporting phase requires the TCEQ to ensure grantees track usage and report this usage information to the TCEQ every six months; utilize internal and external auditors to perform desk and on-site reviews of activities; and maintain contract provisions for return of funds if the usage does not meet contract commitments or is not tracked and reported. This phase, along with on-site audits by the TCEQ, verifies the project's actual NO_X emission reductions and usage of the funded vehicle/equipment in the affected areas during the activity life.

V. Future Considerations for the TERP Programs

Issues that will be addressed by the TCEQ in the remainder of the 2012 - 2013 biennium are outlined below.

Emissions Reduction Incentive Grants Program

In 2008, the Ozone National Ambient Air Quality Standard (NAAQS) was lowered by the EPA. In 2012, the EPA designated areas as nonattainment for the 2008 ground-level ozone NAAQS. Wise County was included as part of the Dallas-Fort Worth nonattainment-area, the TERP Guidelines and program materials were updated to include Wise County in the list of TERP-eligible counties. The grants will continue to be used to help address the SIP compliance goals, as well as helping other areas remain in attainment.

Cost-per-ton criteria continues to be evaluated each year in relation to the types of projects being submitted by applicants. Adjustments may be considered as appropriate to further encourage applications from targeted emission sectors.

The TCEQ is also expanding its use of default usage rates as an option for grant projects under the ERIG Program, similar to what has been used for the Rebate Grant Program. For projects not using the default usage rate option, the TCEQ is initiating a requirement for detailed records showing historical usage above the default rate or the use of electronic usage tracking using Global Positioning Systems (GPS) and electronic reporting of location and use. The intent of these changes it to minimize risks and lead to a much simpler program for applicants and the agency and significantly reduce administrative requirements.

Rebate and Small Business Grant Programs

The TCEQ will continue to prioritize an annual allocation for the Rebate and Small Business Grant Programs from the overall ERIG funds. The Small Business Grants program will continue to be implemented as part of the overall TERP Rebate Grants program.

Third-Party Grants Program

The TCEQ will continue the administration and oversight of the Third-Party Grants program and, where appropriate, expand the availability and type of grants to additional state agencies and other authorities, such as local councils of government, where unique opportunities benefit the overall goals of TERP.

Texas Clean Fleet Program

The TCEQ will continue to implement the TCFP. As more entities with large fleets consider using alternative fuels and hybrid vehicles, this program will help encourage owners of large fleets to embrace alternative fuels while achieving needed NO_X reductions.

Texas Clean School Bus Grants Program

The TCEQ will continue to implement the Texas Clean School Bus Program to help school districts in Texas reduce diesel-exhaust emissions from school buses.

New Technology Research and Development Program

This program was eliminated under SB 527. The TERP staff will monitor completion of remaining NTRD contracts and then this program will be closed.

New Technology Implementation Grant Program

Because of reduced funding for all TERP programs, the TCEQ does not anticipate opening another grant round for this program in the current biennium. Future implementation of this program will depend on future funding amounts and priorities for use of the funds.

Texas Natural Gas Vehicle Grants Program

The initial grant application period for this program was opened in FY 2012 and applications will be accepted through May 2013, or until all of the biennial funding allocation is awarded. The TCEQ is also completing development of an on-line grant application system as required under SB 385 to be used in future grant rounds. This new system is expected to be completed in fall 2012 and will be available for future grant rounds.

Clean Transportation Triangle Program

The initial grant application period for this program was also completed in FY 2012. This program has enough funding allocated that the TCEQ expected to open an additional application period in fall 2012.

Alternative Fueling Facilities Program

The initial grant application period for this program was completed in FY 2012 with good participation. Due to the number of applications received, it was expected that all of the biennial funding allocation for this program would be awarded.

Program Monitoring

As the TERP programs have matured, the ongoing usage monitoring of grant-funded projects has become an increasingly large part of their management. Most projects have a 5-7 year reporting life, while some projects may extend for 10-20 years. The TCEQ will continue to consider enhancements for both monitoring and enforcement to effectively manage a large grants program.

Implementation of a new default usage option under the ERIG Program and the use of GPS tracking of usage for projects not using the default option are expected to substantially reduce administrative requirements for project reporting and monitoring, help minimize risk, and improve enforcement of the grant requirements.

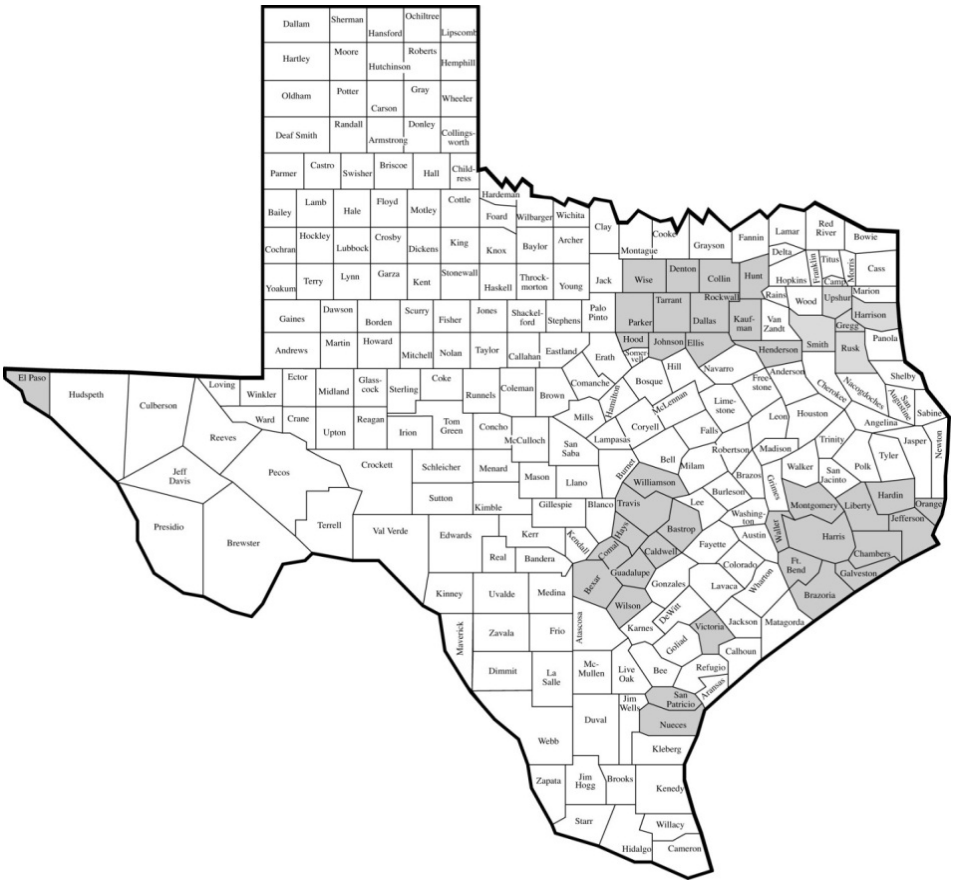
Legislative Issues

The TCEQ continues to be available to provide analysis, data, research, and information that may be needed to assist the legislature in evaluating opportunities for strengthening the TERP program.

Appendix 1: 2012 TERP-Eligible Counties Map

Appendix 1 2012 TERP-Eligible Counties

Bastrop	Ellis	Hays	Nueces	Upshur
Bexar	El Paso	Henderson	Orange	Victoria
Brazoria	Fort Bend	Hood	Parker	Waller
Caldwell	Galveston	Hunt	Rockwall	Williamson
Chambers	Gregg	Jefferson	Rusk	Wilson
Collin	Guadalupe	Johnson	San Patricio	Wise
Comal	Hardin	Kaufman	Smith	
Dallas	Harris	Liberty	Tarrant	
Denton	Harrison	Montgomery	Travis	



Appendix 2. TERP Advisory Board Members

Appendix 2. TERP Advisory Board Members

Appointed by the Governor

Kenneth A. Pelt
Representing Nonprofits
Scott J. Boxer
Representing the Air Conditioning Manufacturing Industry
L. Elizabeth Gunter
Representing the Electric Power Industry
Danny R. Perkins
Representing Transportation Industry
Mark L. Rhea
Representing the Trucking Industry

Appointed by the Speaker, Texas House of Representatives

Art Daniel
Representing the Construction Industry
Kathleen Hartnett White
Representing Consumer Groups
Ralph Arrell
Representing the Fuel Industry
Jerry Harris
Representing the Agriculture Industry
Steve Late
Representing the Automobile Industry

Appointed by the Lieutenant Governor of Texas

Michael Flores
Representing the Energy-Efficient Construction Industry
Vacant
Fuel Cell Industry Representative
Thomas "Smitty" Smith
Representing the Environmental Community
Jim Crites
Representing the Air Transportation Industry
John Mikolaitis
Representing the Engine Manufacturing Industry

Ex Officio Members

Honorable Troy Fraser
Chair, Senate Natural Resources Committee
Honorable Wayne Smith
Chair, House Environmental Regulation Committee

Joe Walton
Manager, Implementation Grants Section, Texas Commission on Environmental Quality

Daryl Morgan
Energy Resources Division, Texas General Land Office

Dan Kelly
Director, Alternative Fuels Research and Education Division, Railroad Commission of Texas

David Schanbacher, P.E.
Director, Natural Resources Policy Division, Texas Comptroller of Public Accounts

Sandra Rennie
Mobile Source Team Leader, United States Environmental Protection Agency, Region 6

Appendix 3. Texas Emissions Reduction Plan Revenue

Appendix 3: Texas Emissions Reduction Plan Revenue

REVENUE	2008		2009		2010		2011		2012	
Revenue Description	**Amount**	**%**	**Amount**	**%**	**Amount**	**%**	**Amount**	**%**	**Amount**	**%**
Fee on sale/lease/use of heavy-duty on-road diesel vehicles (2.5% for1996 and earlier and 1% for 1997 and newer vehicles)	$ 13,002,024	7.3%	$ 9,424,343	12.2%	$ 8,254,828	12.1%	$ 9,958,080	12.6%	$14,557,118	14.7%
Vehicle title transfer fee	$104,640,757	58.5%	$15,747,324	20.3%	$18,766,165	27.5%	$19,534,129	24.7%	$21,206,784	21.4%

2% fee on sale/lease/use of off-road diesel	$ 45,908,944	25.7%	$37,174,918	48.0%	$26,769,563	39.2%	$34,241,871	43.3%	$45,825,143	46.0%
Fee subtotal	$178,770,208		$77,507,271		$68,230,695		$79,094,698		$ 99,159,451	
Interest	$ 17,146,674		$ 9,180,068		$ 5,084,822		$ 4,101,081		$ 3,380,731	
Total Revenue (including interest) [a]	$195,916,882		$86,687,339		$73,315,517		$83,195,779		$102,540,182	
Transfers and reallocations [b]			$68,792,707		$74,239,518		$78,984,923		$86,257,083	
Total Funds (including transfers & reallocations)	$195,916,882		$155,480,046		$147,555,035		$162,180,702		$188,797,265	

- [a] Actual fee revenue as listed in the Comptroller's (CPA) Annual Cash Report for 2008-2010. TCEQ cannot verify the actual amounts disbursed to other agencies.
- [b] Transfers and reallocations include funds from the absorption of TCET, reallocated funds previously disbursed to other agencies, Texas Mobility Fund transfers (SB 12, 80th Texas Legislature) and unspent funds from prior years.

Appendix 4. Texas Emissions Reduction Plan Revenue Allocation

Appendix 4: Texas Emissions Reduction Plan Revenue Allocation[a]

Agency	2008	2009	2010	2011	2012
Texas Commission on Environmental Quality	$166,921,594	$170,921,594	$116,482,851	$116,482,851	$57,165,047
Engineering Experiment Station of Texas A&M University System	$952,019	$952,019	$952,019	$952,019	$952,019
Total Allocation	$167,873,613	$171,873,613	$117,434,870	$117,434,870	$58,117,066
Other fund obligations [benefits, Statewide Cost Allocation Plan (SWCAP), etc]	$1,295,000	$1,379,000	$1,327,000	$1,154,000	$1,154,000
HB 1796, 81st Texas Legislature			$521,074	$521,074	
5% Reduction [b]			($35,350,002)	($7,000,000)	
2.5% Reduction [c]				($6,963,227)	
HB 4 Additional Reduction [d]				($35,000,000)	
Rider 21, Article VI, GAA, 82nd Texas Legislature [e]					$8,000,000
Total Fund Deductions	$169,168,613	$173,252,613	$83,932,942	$70,146,717	$67,271,066

[a] Allocation as per CPA and TCEQ records.

[b] The 5% reduction is from the 2012-2013 LAR.

[c] The 2.5% reduction is for 2011 based on HB 4.

[d] Additional 5% reduction as authorized under HB4.

[e] Additional $8 million as authorized under contingency rider 21, Article VI, GAA, 82nd Texas Legislature

Appendix 5. Summary TERP Projects Awarded FY2002 to FY2012

Appendix 5. Summary TERP Projects Awarded FY2002 to FY2012

TERP Grant Project Identification Codes

The following is a list of TERP projects funded to date. The Project ID represents the year of funding, the grant round, unique project number, and type of grant.

Sample Project ID: 2010020351ER

The first four numbers represent the fiscal year of funding. **2010**020351ER

The next two numbers represent the round of funding during that year. 2010**02**0351ER

The following four numbers are the project's assigned number. 201002**0351**ER

The last two letters indicate the type of grant: 201020351**ER**

ER	Emissions Reduction Incentive Grants
SB	Small Business Grants
RG	Rebate Grants
SR	Small Business Rebate Grants
AR	American Recovery and Reinvestment Act Grants
AB	American Recovery and Reinvestment Act Small Business Grants
CF	Clean Fleet Grants
RC	Third-Party Grant or Sub-grant/Railroad Commission of Texas
NC	Third-Party Grant or Sub-grant/North-Central Texas Council of Governments
HG	Third-Party Grant or Sub-grant/Houston-Galveston Area Council
GL	Third-Party Grant or Sub-grant/Texas General Land Office

	Totals					**13,911**			**$858,145,219.77**	**164,964.8620**	**$5,201.99**

a Includes Small Business, Rebate Grants and Third-Party Grant to North Central Texas Council of Governments, Houston-Galveston Area Council and Railroad Commission of Texas for funding not yet reported as assigned to specific purchases

b Projects are listed by Primary Area, but may operate in more than one area.

c Total NO_x Emission Reductions are estimated to occur over the life of the projects.

d The average cost per ton is based on the dollars awarded divided by the projected tons of NO_x to be reduced by the projects.
