To Whom it may concern;

I would like to oppose the wastewater treatment plant in Kauffman County on F.M. 148 (in the middle of our neighborhood) for several reasons:

- The treatment plant would reduce our property Value
- I disagree with discharging 1.5 Million gallons of treated water in our creeks
- Foul odor that will be generated from the wastewater
- Visual eye sore from our established property of our country view
- Noise from the machinery
- Undocumented health hazards to our livestock, pets and Humans

At this time I would like to request a public hearing on the Wastewater Treatment Plant. Also, please place me on the PERMANENT contested case hearings list for Terrell, Texas Kauffman County. (Proposed Permit No. WQ 0014803001.

Sincerely,

Andres and Agripina Benavidez

To TCEQ Chief Clerk

I am writing to request a public hearing regarding the application made by Las Lomas Municipal Utility District No. 4 of Kaufman County for proposed Texas Pollutant Discharge Elimination System [TPDES] Permit No. #WQ0014803001 [EPA I.D.. No. TX0129623] to authorize the discharge of treated wastewater at a volume no to exceed an annual average flow of 1,500,000 gallons per day.

As a property owner, this proposal is disturbing to me, and I would like to know more about the permit proposal. In addition, please add my name to your future mailing list for this permit as well as any other permit application made by Las Lomas Municipal Water District No. 4 of Kaufman County.

Following is my name and address.

RE: Proposed Permit No. WQ0014803001

TCEQ Staff,

I would like to express my concerns for a permit requested by Las Lomas Municipal Water District for a wastewater treatment plant authorizing them to discharge 1.5 million gallons of treated wastewater per day into Terry and Brushy creeks.

My neighborhood of Lost Creek is near Brushy creek and I feel that this volume of water could contribute to potential flooding especially during heavy rains. My neighborhood already faces the threat of flooding during heavy rain. Also a lot of the children in the neighborhood explore the area of Brushy creek. I don't think they should be exposed to any hazardous toxic waste even if it has been treated.

At the very least I think a public hearing should be held to be sure all homeowners in the general area are informed of the issuance of this permit for a wastewater treatment plant.

Please add my name to your mailing list for any future information you may distribute.

Sincerely,

Jack Herring

CHIEF CLERKS OFFICE

To TCEQ Chief Clerk:

I am writing to request a public hearing regarding application by Las Lomas Municipal Utility District No. 4 of Kaufman County, for proposed Texas Pollutant Discharge Elimination System {TPDES} Permit No. WQOO14803001 {EPA I.D. No. TX0129623} to authorize the discharge of treated wastewater at a volume not to exceed an annual average flow of 1,500,000 gallons per day.

As the property owner that the waste plant will be built next to, this proposal is very disturbing to me, and I would like to know more about the permit proposal. Please add my name to your future mailing list for this permit as well as any other applications for permits made by Las Lomas Municipal Water District No. 4 of Kaufman county.

The plant is planned about 1000 feet from my home. Please consider granting a public hearing for those of us that this affects.

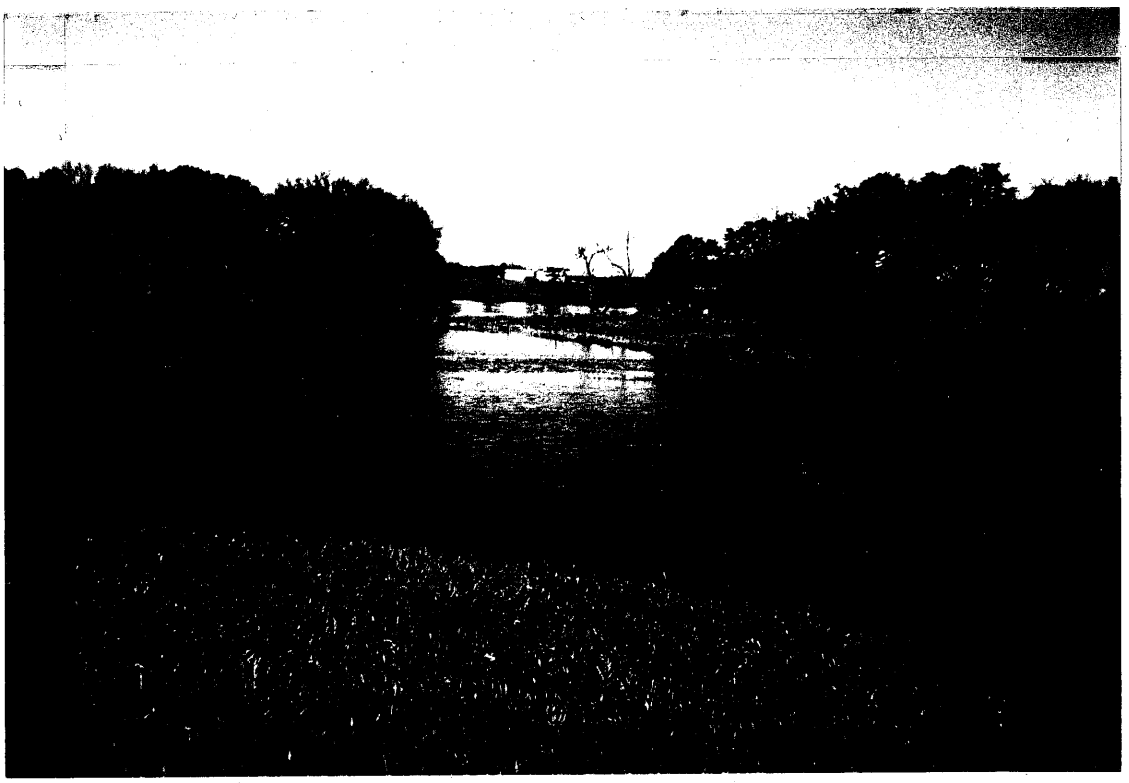
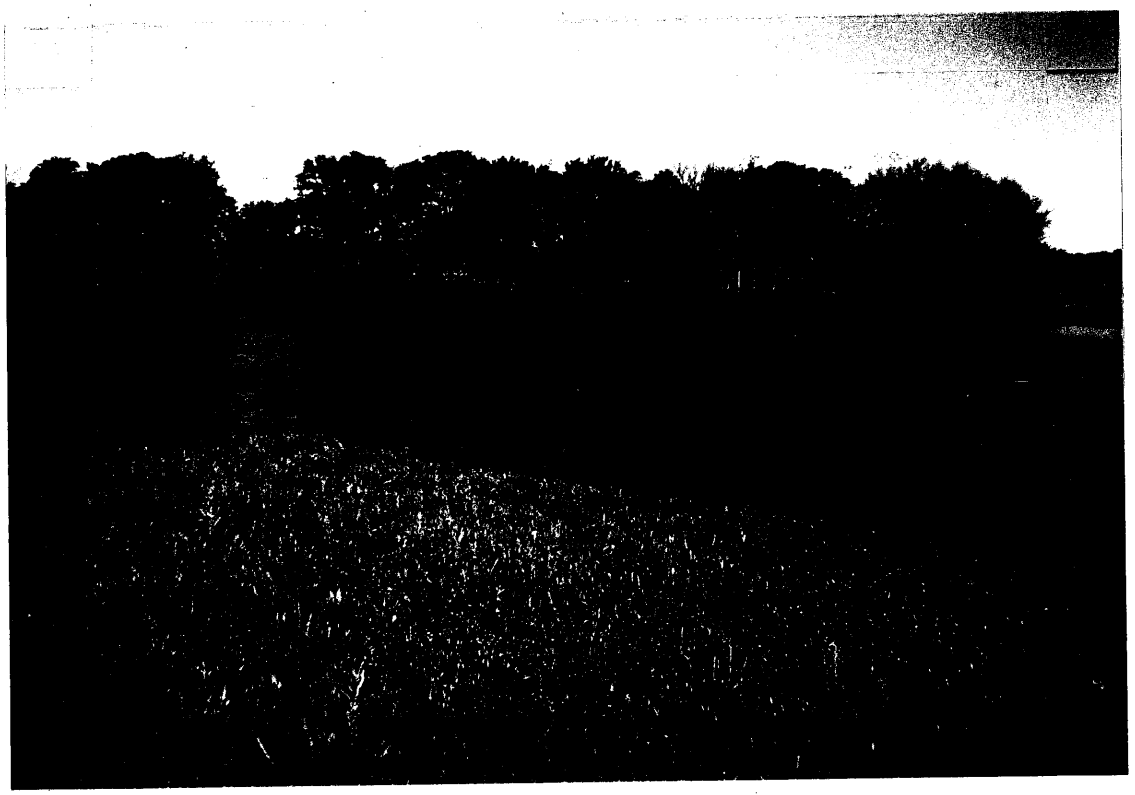
mw





1. After I-20 was built, our property floods from rains. I believe when the houses are built, we will be flooded even more. How do you propose to alleviate this? Our creek can't accommodate the natural rain fall now. Why do you think it can handle over a millions gallons a day more?

2. Since the treatment plant's proposed building site is about 1700 feet from my home, and since the treatment plant is built on the same flood plane as our property, what will you do to prevent flooding?

3. If you build up the proposed treatment plant's site up with soil, will you also build up our property ?

4. With 6000 acres to choose from can't you chose a site with no homes in the area? Are we to be sacrificed to progress?

5. What do you propose to do to prevent odor from the plant from reaching us? Since our home is so close, I am very concerned about this.

6. What will you do to prevent airborne particles from leaking into the air? What do you propose to do to prevent a break in the line that pumps the sewerage to the plant?

7. When will this happen? Is there a proposed time frame?

8. Ten years ago, we retired and built our dream home. Now can I look forward to seeing and smelling a sewerage plant next to me. How would you feel if this happened to you? Are we to be collateral damage?

These questions have been submitted by Milowe and Janice Jungjohann

I have recently been informed that the Las Lomas Municipal Water District has petitioned to build a wastewater treatment plant on the north side of F.M. 148 on Terry Creek. I am very concerned about the effect this possible build and the plant's output will have on our community and the surrounding environment. I would like information on this proposal, including the environmental impact study. It seems a project of this nature should merit a public hearing.

I would like to be added to your mailing list for any future information about this proposed build.

Regards,

Julie McDougal
