COMMENTS: This is concerning Noverro Generating LLC. I have a 40 acre farm at the corner of SW County Road 2150. The application states that they will be discharging 1.5 million gallons a day of raw water in Little Pin Oak Creek that cuts my property almost in half. With the amount of water that they are proposing to discharge I will not have the capability to get to the back half of my farm where my farm cabin is located. This creek stays dry 99% of the time. Once they put that amount of water on me it will become a small running river. That is a little over 1,050 GPM. That is the equivilent of having two 2.5" nozzles open on a fire hydrant and flowing at 80%. I have been working in the water department for 23 years. I know how much water this is and I know how much damage it will do. It will create a floodplain on my property because that little creek does not flow unless we have one of our infrequest Texas rains which only happens once every couple of years. This will be a great burden on me and my property. I know this power plant is coming but I would like someone to contact me and help me resolve this problem. It's bad enough that my property value will go down to nothing but now I can not get to the back half of my property without the expense of putting in a bridge or large culvert. This was to be my retirement home and now it is just somewhere to keep my cows. I would like someone to contact me about the negative impact on my property. My property is within 900 feet of the property proposed for the power plant. It's not like I'm 2 or 3 miles away. I am right next door and trying to be a good neighbor, as I would expect the power plant to be. I have been a member of TCEQ for over 20 years. I have a B Sewer and a C Water License. I know how hard the job is and the decisions you have to make. I would appreciate it if you could help me in any way. Let me know what I can do to prevent loosing everything. I am devastated about this. This land is my whole life savings. It is very hard knowing that I can't build a retirement home without looking at a power plant, much less not being able to access my property at will. Thank you. Please respond. Rick Anderson

RE: Application for Industrial Waste Water Discharge Permit

To Whom It May Concern:

I understand that the Navarro Generating LLC has proposed to operate Navarro Energy Center, a natural gas fired combined cycle electric generating facility, in Navarro County. Navarro Generating LLC has applied for a new permit, proposed Texas Pollutant Discharge Elimination System (TPDES) Permit No. WQ0004870000, to authorize the discharge of industrial waste water. Having examined all sides of this issue I am convinced that the discharge of pollutant water in this area far outweigh any financial gains associated with this operation. The facility is located at the intersection of Farm-to-Market Road 1394 and Southwest County Road 2100, approximately 3.3 miles southwest of Richland, Navarro County, Texas. As an official, responsible for watching out for the best interests of Texas and its citizens, I call upon you to oppose this permit in all of your capacities/functions.

I reiterate--I am **ADAMANTLY OPPOSED** to the Navarro Generating LLC's application for the Texas Pollutant Discharge Elimination System (TPDES) Permit No. WQ0004870000.

Sincerely,

Jason K. Dodd

OVER

Please give this to the person at the information table. Thank you.

Given the plant owner is responsible for monitoring, ~~record~~ testing, and reporting the waste water quality and the waste water will be discharged into a public water reservoir, the TCEQ should require the owner to pay the additional costs for independent 3rd party water sampling, with reports going directly to the TCEQ for ~~comparison~~ Comparative ~~and~~ results/reports from the owner. This especially needs to be done during plant start-up and anytime ~~the~~ the facility has not operated for 72 or more hours.
