COMMENTS: I am concern that the discharge from the Capitol Cement at times of rain fall events and time of flooding will dangerously further impact the existing flooding issues in the receiving stream. During flooding, thirty feet from my back door, raging waters as much 150 feet wide have occurred. We are surrounded by drainage waterways and the Salado Creek, adding more water will certainly flood our neighbors and the neighborhood. If this project is approved, Capitol Cement or the City should ,and must construct a proper cement discharge route! I have photos to to sustain my argument and will gladly relay them if requested.
