IWD/76500

To whom it may concern:

We would like to oppose the (TPDES) Permit #WQ0004949000, which includes the discharge of waste water & storm water & cooling tower blowdown into Turkey Creek in Tyler County, Texas. And also oppose the 1 Acre land disposal surface application on site at the plant.

We live just a few yards from the proposed site of the plant.

Our concerns are:

Is the waste water pure & safe to dump into Turkey Creek?

Will the 1 Acre disposal site put off any type of smell or odor?

Will the pumping or blowoff make any noise

Will the seepage or run off affect our 1 Acre pond that is stocked with fish & wells?

Will it have any affect on the surrounding environment or wild life?

We would like our questions & concerns answered in a public meeting.

Thank you
