

Announcement: Texas NetDMR Permittee Training

If you are required to submit discharge monitoring reports (DMRs) through the Texas NetDMR system, your reporting method will be changing soon.

The TCEQ is in the process of transitioning from the Texas NetDMR system to the EPA's Federal NetDMR system. All Texas NetDMR users will have to follow detailed instructions to migrate into the Federal NetDMR system beginning on March 26, 2018.

To help you prepare for the migration, permittee training will be offered on Feb. 22, from 10:30 am – 12:00 pm (CST) via a webinar. You can access the [NetDMR webinar](#) online. If you experience difficulty with the link, copy and paste this link (<http://epawebconferencing.acms.com/netdmr-all/>) into your browser. The call-in number is 866-299-3188, Conference Code: 2025646692#.

Additional permittee trainings will be held on March 8 and March 14.

If you have questions about training, please visit the EPA's [NetDMR Support Portal](#) or you may contact the TCEQ at 512-239-3367 or NetDMR@tceq.texas.gov.
