RE: Request for public hearing on TCEQ Proposed Air Quality Permit number 111724 and Prevention of Significant Deterioration (PSD) Air Quality Permit PSDTX1374 – a proposed electrical generation plant fueled by natural gas, known as the Indeck Wharton Energy Center, built and operated by Indeck Wharton, LLC and/or its affiliate, Indeck Energy Services, Inc. of Illinois.

Dear Sir or Madam:

I wish to request a contested case hearing. I am a person affected by emissions of air contaminants and hazardous air pollutants from the above proposed facility. Indeck proposes to build this facility in the heart of our Danevang community (". . . about 0.50 mile south of the center . . ." – legal notice) where prevailing winds will, from time-to-time, deposit these contaminants directly onto us and our fellow residents.

Pursuant to TCEQ requirements for a contested case hearing request, are included:

Item (1) My name is Farryl David Holub. I reside at 10642 SH Hwy 71 S, Danevang, Texas 77432. My mailing address is P. O. Box 367, Danevang, Texas 77432. My daytime phone numbers are (979) 543-2222 and (979) 541-7844 (cell). My fax number is (979) 543-5555.

I file this request on behalf of myself, my spouse, Martha Ann Madsen Holub, and my daughters Jillian Nicole Holub and Jessica Ann Holub Rumbaugh. I also file this request on behalf of an organization, *LISTEN! – an Alliance to Protect the People & Property of Wharton County*, and its members. I am the president of that organization and have authority to file this request on its behalf. Those persons and entity share my mailing address.

Item (2) The applicant is Indeck Wharton, LLC. Of Buffalo Grove, IL. Indeck's proposed air quality permit numbers are 111724 and PSDTX1374.

Item (3) I/we request a contested case hearing.

Item (4) While numerous persons, both Danevang community residents and property owners and the general public, will be adversely affected by emissions from this facility, our situation is not common to that of the general public. We reside closer, own more acres and are more directly affected by emissions and prevailing winds than is the general public.

I have personal knowledge of the presence of various chemicals that may interact and/or combine with emissions from this facility that may create or produce a substance that may be harmful to the people, animals or plants of the Danevang community. Danevang is an agricultural community. Various chemicals have, are or will be applied to various crops and pastures in the area. Those chemicals also drift from other areas and deposit in Danevang. Crops include cotton, corn, grain sorghum, soybeans, wheat, rice and hay, among others. While we learned of this proposed project only very recently, I have asked an area agronomist to prepare a list of agricultural chemicals known to be present. Attached is a 25 page list of agricultural products, which is by no means a comprehensive list. We request additional assistance from the State in making certain that all chemicals are known, and this request for hearing includes chemicals known and unknown. For instance, additional chemicals that were used in the past and are likely to be present in the soil are: copper(II) acetate triarsenite or copper(II) acetoarsenite (a popular cotton pesticide used in the past); Octachloro-4,7-methanohydroindane; chalcophyllite $Cu_{18}Al_2(AsO_4)_3(SO_4)_3(OH)_{27}\cdot 36(H_2O)$; conichalcite $CaCu(AsO_4)(OH)$; cornubite $Cu_5(AsO_4)_2(OH)_4\cdot(H_2O)$; cornwallite $Cu_5(AsO_4)_2(OH)_4\cdot(H_2O)$; and, liroconite $Cu_2Al(AsO_4)(OH)_4\cdot 4(H_2O)$.

I have personal knowledge that a pipeline ruptured on property immediately adjacent to Indeck's tract. That company has drilled various wells and continues to monitor its groundwater contamination. I do not have access to the data collected. We are concerned that this groundwater and/or surface contamination may somehow interact with Indeck's operation and emissions.

We wish to be provided with the research data and reports that prove these chemicals have been thoroughly tested in combination with the emissions from this plant, and that the general population, including children and adults suffering from respiratory ailments, have no reason to fear further health problems.

Indeck met in secret with Wharton County officials and made every effort to keep this project hidden from the Danevang community and the public. The residents and property owners need more time to learn of this project, to research, and to comment. Signs that were required at the location were obscured from public view.

Item (5) My wife and I own 240 acres of land located immediately south and southwest of the tract upon which Indeck has made application to the Commissioner's Court of Wharton County for designation as a reinvestment zone and for property tax abatement for its $301,000,000.00 construction project. Our property and Indeck's tract touch. My wife's sisters own 400 acres, which are adjacent to our land and immediately to the south of Indeck's tract. My wife, I and our children own another tract of land, being approximately 150 acres, one mile north of Indeck's facility. Said ownership interests are either direct or indirect through closely held family entities.

Item (6) Our property is used for row crop farming, being a rotation of cotton, corn and grain sorghum. We raise show horses and cattle on a portion of our property. We garden and grow food on a portion of

this property. We have continuously resided on this property for more than twenty-five years. Our children are the fourth generation of family to have lived on this farm and in this community.

I would appreciate the T.C.E.Q.'s attention to this matter. You may contact me at anytime.

Sincerely,

Farryl Holub

RE: Request for public hearing on TCEQ Proposed Air Quality Permit number 111724 and Prevention of Significant Deterioration (PSD) Air Quality Permit PSDTX1374 – a proposed electrical generation plant fueled by natural gas, known as the Indeck Wharton Energy Center, built and operated by Indeck Wharton, LLC and/or its affiliate, Indeck Energy Services, Inc. of Illinois.

Dear Sir or Madam:

I wish to request a contested case hearing. I am a person affected by emissions of air contaminants and hazardous air pollutants from the above proposed facility. Indeck proposes to build this facility in the heart of our Danevang community (". . . about 0.50 mile south of the center . . ." – legal notice) where prevailing winds will, from time-to-time, deposit these contaminants directly onto us and our fellow residents.

Pursuant to TCEQ requirements for a contested case hearing request, are included:

Item (1) My name is Farryl David Holub. I reside at 10642 SH Hwy 71 S, Danevang, Texas 77432. My mailing address is P. O. Box 367, Danevang, Texas 77432. My daytime phone numbers are (979) 543-2222 and (979) 541-7844 (cell). My fax number is (979) 543-5555.

I file this request on behalf of myself, my spouse, Martha Ann Madsen Holub, and my daughters Jillian Nicole Holub and Jessica Ann Holub Rumbaugh. I also file this request on behalf of an organization, *LISTEN! – an Alliance to Protect the People & Property of Wharton County*, and its members. I am the president of that organization and have authority to file this request on its behalf. Those persons and entity share my mailing address.

Item (2) The applicant is Indeck Wharton, LLC. Of Buffalo Grove, IL. Indeck's proposed air quality permit numbers are 111724 and PSDTX1374.

Item (3) I/we request a contested case hearing.

Item (4) While numerous persons, both Danevang community residents and property owners and the general public, will be adversely affected by emissions from this facility, our situation is not common to that of the general public. We reside closer, own more acres and are more directly affected by emissions and prevailing winds than is the general public.

I have personal knowledge of the presence of various chemicals that may interact and/or combine with emissions from this facility that may create or produce a substance that may be harmful to the people, animals or plants of the Danevang community. Danevang is an agricultural community. Various chemicals have, are or will be applied to various crops and pastures in the area. Those chemicals also drift from other areas and deposit in Danevang. Crops include cotton, corn, grain sorghum, soybeans, wheat, rice and hay, among others. While we learned of this proposed project only very recently, I have asked an area agronomist to prepare a list of agricultural chemicals known to be present. Attached is a 25 page list of agricultural products, which is by no means a comprehensive list. We request additional assistance from the State in making certain that all chemicals are known, and this request for hearing includes chemicals known and unknown. For instance, additional chemicals that were used in the past and are likely to be present in the soil are: copper(II) acetate triarsenite or copper(II) acetoarsenite (a popular cotton pesticide used in the past); Octachloro-4,7-methanohydroindane; chalcophyllite $Cu_{18}Al_2(AsO_4)_3(SO_4)_3(OH)_{27}\cdot 36(H_2O)$; conichalcite $CaCu(AsO_4)(OH)$; cornubite $Cu_5(AsO_4)_2(OH)_4\cdot(H_2O)$; cornwallite $Cu_5(AsO_4)_2(OH)_4\cdot(H_2O)$; and, liroconite $Cu_2Al(AsO_4)(OH)_4\cdot 4(H_2O)$.

I have personal knowledge that a pipeline ruptured on property immediately adjacent to Indeck's tract. That company has drilled various wells and continues to monitor its groundwater contamination. I do not have access to the data collected. We are concerned that this groundwater and/or surface contamination may somehow interact with Indeck's operation and emissions.

We wish to be provided with the research data and reports that prove these chemicals have been thoroughly tested in combination with the emissions from this plant, and that the general population, including children and adults suffering from respiratory ailments, have no reason to fear further health problems.

Indeck met in secret with Wharton County officials and made every effort to keep this project hidden from the Danevang community and the public. The residents and property owners need more time to learn of this project, to research, and to comment. Signs that were required at the location were obscured from public view.

Item (5) My wife and I own 240 acres of land located immediately south and southwest of the tract upon which Indeck has made application to the Commissioner's Court of Wharton County for designation as a reinvestment zone and for property tax abatement for its $301,000,000.00 construction project. Our property and Indeck's tract touch. My wife's sisters own 400 acres, which are adjacent to our land and immediately to the south of Indeck's tract. My wife, I and our children own another tract of land, being approximately 150 acres, one mile north of Indeck's facility. Said ownership interests are either direct or indirect through closely held family entities.

Item (6) Our property is used for row crop farming, being a rotation of cotton, corn and grain sorghum. We raise show horses and cattle on a portion of our property. We garden and grow food on a portion of

this property. We have continuously resided on this property for more than twenty-five years. Our children are the fourth generation of family to have lived on this farm and in this community.

I would appreciate the T.C.E.Q.'s attention to this matter. You may contact me at anytime.

Sincerely,

Farryl Holub

RE: Request for public hearing on TCEQ Proposed Air Quality Permit number 111724 and Prevention of Significant Deterioration (PSD) Air Quality Permit PSDTX1374 – a proposed electrical generation plant fueled by natural gas, known as the Indeck Wharton Energy Center, built and operated by Indeck Wharton, LLC and/or its affiliate, Indeck Energy Services, Inc. of Illinois.

Dear Sir or Madam:

I wish to request a contested case hearing. I am a person affected by emissions of air contaminants and hazardous air pollutants from the above proposed facility. Indeck proposes to build this facility in the heart of our Danevang community (". . . about 0.50 mile south of the center . . ." – legal notice) where prevailing winds will, from time-to-time, deposit these contaminants directly onto us and our fellow residents.

Pursuant to TCEQ requirements for a contested case hearing request, are included:

Item (1) My name is Farryl David Holub. I reside at 10642 SH Hwy 71 S, Danevang, Texas 77432. My mailing address is P. O. Box 367, Danevang, Texas 77432. My daytime phone numbers are (979) 543-2222 and (979) 541-7844 (cell). My fax number is (979) 543-5555.

I file this request on behalf of myself, my spouse, Martha Ann Madsen Holub, and my daughters Jillian Nicole Holub and Jessica Ann Holub Rumbaugh. I also file this request on behalf of an organization, *LISTEN! – an Alliance to Protect the People & Property of Wharton County*, and its members. I am the president of that organization and have authority to file this request on its behalf. Those persons and entity share my mailing address.

Item (2) The applicant is Indeck Wharton, LLC. Of Buffalo Grove, IL. Indeck's proposed air quality permit numbers are 111724 and PSDTX1374.

Item (3) I/we request a contested case hearing.

Item (4) While numerous persons, both Danevang community residents and property owners and the general public, will be adversely affected by emissions from this facility, our situation is not common to that of the general public. We reside closer, own more acres and are more directly affected by emissions and prevailing winds than is the general public.

I have personal knowledge of the presence of various chemicals that may interact and/or combine with emissions from this facility that may create or produce a substance that may be harmful to the people, animals or plants of the Danevang community. Danevang is an agricultural community. Various chemicals have, are or will be applied to various crops and pastures in the area. Those chemicals also drift from other areas and deposit in Danevang. Crops include cotton, corn, grain sorghum, soybeans, wheat, rice and hay, among others. While we learned of this proposed project only very recently, I have asked an area agronomist to prepare a list of agricultural chemicals known to be present. Attached is a 25 page list of agricultural products, which is by no means a comprehensive list. We request additional assistance from the State in making certain that all chemicals are known, and this request for hearing includes chemicals known and unknown. For instance, additional chemicals that were used in the past and are likely to be present in the soil are: copper(II) acetate triarsenite or copper(II) acetoarsenite (a popular cotton pesticide used in the past); Octachloro-4,7-methanohydroindane; chalcophyllite $Cu_{18}Al_2(AsO_4)_3(SO_4)_3(OH)_{27}\cdot 36(H_2O)$; conichalcite $CaCu(AsO_4)(OH)$; cornubite $Cu_5(AsO_4)_2(OH)_4\cdot(H_2O)$; cornwallite $Cu_5(AsO_4)_2(OH)_4\cdot(H_2O)$; and, liroconite $Cu_2Al(AsO_4)(OH)_4\cdot 4(H_2O)$.

I have personal knowledge that a pipeline ruptured on property immediately adjacent to Indeck's tract. That company has drilled various wells and continues to monitor its groundwater contamination. I do not have access to the data collected. We are concerned that this groundwater and/or surface contamination may somehow interact with Indeck's operation and emissions.

We wish to be provided with the research data and reports that prove these chemicals have been thoroughly tested in combination with the emissions from this plant, and that the general population, including children and adults suffering from respiratory ailments, have no reason to fear further health problems.

Indeck met in secret with Wharton County officials and made every effort to keep this project hidden from the Danevang community and the public. The residents and property owners need more time to learn of this project, to research, and to comment. Signs that were required at the location were obscured from public view.

Item (5) My wife and I own 240 acres of land located immediately south and southwest of the tract upon which Indeck has made application to the Commissioner's Court of Wharton County for designation as a reinvestment zone and for property tax abatement for its $301,000,000.00 construction project. Our property and Indeck's tract touch. My wife's sisters own 400 acres, which are adjacent to our land and immediately to the south of Indeck's tract. My wife, I and our children own another tract of land, being approximately 150 acres, one mile north of Indeck's facility. Said ownership interests are either direct or indirect through closely held family entities.

Item (6) Our property is used for row crop farming, being a rotation of cotton, corn and grain sorghum. We raise show horses and cattle on a portion of our property. We garden and grow food on a portion of

this property. We have continuously resided on this property for more than twenty-five years. Our children are the fourth generation of family to have lived on this farm and in this community.

I would appreciate the T.C.E.Q.'s attention to this matter. You may contact me at anytime.

Sincerely,

Farryl Holub

Danevang Lutheran Church in Danevang, Texas wishes to request a hearing concerning the proposed Air Quality Permit Numbers 11724 and PSDTX1374. Indeck Wharton,LLC , 600 N. Buffalo Grove, Il 60089,2432 has applied to you to issue such permit that would authorize construction of their energy center at the west side of State Route 71.

Our historic church property is located on the east side of State Route 71 almost directly across from the proposed site. We have been here since the community was founded in1894 and have several historical markers on our property and cemetery. We sit alongside the Danish Heritage Preservation Museum and also hold farm land beside the church.

We feel we would be adversely affected by the application and air emissions from the facility in a way not common to the general public because unlike the general public we attract visitors from all over the country. We were designated the "Danish Capital of Texas" by the state legislature in 1976. Our visitors come to see the museum, the church and the hall which is over 100 years old plus the cemetery. They make donations to preserve this place and that helps us maintain the place. We feel that the beauty of our place will be ruined by the close proximity of the proposed huge energy center and visitors will stop coming.

We know the state needs electricity and more energy plants. We propose the facility be located in a more isolated area of the community where they would still have access to the power lines and gas lines but would not have impact over 100 homes in this area. We are a small community that shaped Texas and continues to do so. We are proud of the many accomplishments our community has contributed such as the first farmers coop in the state formed here, REA formed here , the first mutual insurance company in the state formed here by

our ancestors. Please honor our request and accept our petition signatures to stop the proposed building in the present location.

New power plant eyed Danevang

Residents express concerns over location, no second on reinvestment zone vote

By KEITH MAGEE
news@leader-news.com

An Illinois-based power company wants to build a natural gas-fired electric generation facility in the Danevang area and is seeking tax abatement for the project.

Officials with Indeck Energy Services have an option to purchase property at Hwy. 71 and FM 441, but some area residents voiced their objections to the proposed location during a public hearing at Monday's Wharton County commissioners meeting.

Commissioners accepted the tax abatement application. But after hearing comments, a motion to create a reinvestment zone for the project died because of a lack of a second. The motion was made by County Judge Phillip Spenrath.

"We were approached about a year ago," Spenrath said. "They have 15 plants across the country. Most are gas powered. It would be a peaker plant. It only runs when it's needed."

Officials estimated the total number of hours the plant would run per year would tally about three weeks.

Some residents who attended the meeting said they were upset they didn't know anything about it.

"My issues are about how they planned it without anyone knowing about it," said Patty Jensen, who has lived in Danevang for 60 years. "I'm not opposed to it, but I'm opposed to the location. There should have been a meeting of residents, or at least a letter."

> *"I'm not opposed to it, but I'm opposed to the location."*
>
> – Patty Jensen
> Danevang resident

There were more than 108 homes in close proximity to the proposed plant site, she said, adding another location south of Danevang would have been better.

"Please take your time on this," said resident Farryl Holub. "I'm not against power plants, but I think this location is terrible."

Spenrath said the power plant doesn't have to have the county's approval to be constructed, only that of the Texas Commission on Environmental Quality.

"We have no way of stopping them," Spenrath said. "All they are asking from us is an abatement."

Ann Schaer, a representative of Danevang Lutheran Church, was also against the location.

"My biggest concern is for the church," Schaer said. "We are alive and well. The church is growing. We're not a dying community."

While commissioners did not vote on the issue, Spenrath said it could come back on a future agenda.

Officials from the company want to speak to local civic organizations to make a presentation about their plans. They also plan to be at a commissioners meeting in two or four weeks to make a presentation.

"The plant would add 8 percent to the county's tax value," Spenrath said.

"That's a big chunk," he added.

TEXAS COMMISSION ON ENVIRONMENTAL QUALITY
2014 SEP 26 PM 2:42
CHIEF CLERKS OFFICE

We will not be able to attend the public meeting in Bel Campo on 9/30/14.

We do want to oppose a permit for Indeck Wharton, LLC. Based on the emissions to our country air and the unsightly building in our community. We believe the sound will be a significant environmental hazard to our nesting Bald Eagles in our community as well as people.

On behalf of our Church, Donevang Lutheran, and our own behalf we request you decline to issue the permit.

Wayne & Ann Schaer

TEXAS COMMISSION ON ENVIRONMENTAL QUALITY

NOTICE OF PUBLIC MEETING
FOR AN AIR QUALITY PERMIT

PROPOSED PERMIT NUMBERS: 111724 and PSDTX1374

APPLICATION. Indeck Wharton, LLC, 600 N Buffalo Grove Rd Ste 300, Buffalo Grove, IL 600-89-2432, has applied to the Texas Commission on Environmental Quality (TCEQ) for issuance of Proposed Air Quality Permit 111724 and Prevention of Significant Deterioration (PSD) Air Quality Permit PSDTX1374, which would authorize construction of the Indeck Wharton Energy Center at the west side of State Route 71, 3350 feet south of the intersection of Route 71 and County 424 in Danevang, about 0.50 mile south of the center of Danevang, Wharton County, Texas 77432. This link to an electronic map of the site or facility's general location is provided as a public courtesy and not part of the application or notice. www.tceq.texas.gov/assets/public/hb610/index.html?lat=29.046944&lng=-96.213611&zoom=13&type=r. For exact location, refer to the application. The proposed facility will emit the following air contaminants in a significant amount: nitrogen oxides, carbon monoxide, sulfur dioxide, particulate matter including particulate matter with diameters of 10 micros or less and 2.5 microns or less, and volatile organic compounds. In addition, the facility will emit the following air contaminants: hazardous air pollutants.

The degree of PSD increment predicted to be consumed by the proposed facility and other increment-consuming sources in the area is as follows:

Nitrogen Dioxide

Maximum Averaging Time	Maximum Increment Consumed ($\mu g/m^3$)	Allowable Increment ($\mu g/m^3$)
Annual	6.3	25

The executive director has determined that the emission of air contaminants from the proposed facility which are subject to PSD review will not violate any state or federal air quality regulations and will not have any significant adverse impact on soils, vegetation, or visibility. All air contaminants have been evaluated, and "best available control technology" will be used for these contaminants.

The executive director has completed the technical review of the application and prepared a draft permit which, if approved, would establish the conditions under which the facility must operate.

PUBLIC COMMENT / PUBLIC MEETING. A public meeting will be held and will consist of two parts, an Informal Discussion Period and a Formal Comment Period. A public meeting is not a contested case hearing under the Administrative Procedure Act. During the Informal Discussion Period, the public will be encouraged to ask questions of the applicant and TCEQ staff concerning the permit application. The comments and questions submitted orally during the Informal Discussion Period will not be considered before a decision is reached on the permit application and no formal response will be made. Responses will be provided orally during the Informal Discussion Period. During the Formal Comment Period on the permit application, members of the public may state their formal comments orally into the official record. At the conclusion of the comment period, all formal comments will be considered before a decision is reached on the permit application. A written response to all formal comments will be prepared by the Executive Director and will be sent to each person who submits a formal comment or who requested to be on the mailing list for this permit application and provides a mailing address. Only relevant and material issues raised during the Formal Comment Period can be considered if a contested case hearing is granted on this permit application.

The Public Meeting is to be held:
Tuesday, September 30, 2014 at 7:00 p.m.
El Campo Civic Center
2350 N. Mechanic Street
El Campo, Texas 77437

INFORMATION. Citizens are encouraged to submit written comments anytime during the public meeting or by mail before the close of the public comment period to the Office of the Chief Clerk, TCEQ, Mail Code MC-105, P.O. Box 13087, Austin, Texas 78711-3087 or electronically at www.tceq.texas.gov/about/comments.html. **If you choose to communicate with the TCEQ electronically, please be aware that your email address, like your physical mailing address, will become part of the agency's public record.** If you need more information about the permit application or the permitting process, please call the TCEQ Public Education Program, toll free, at 1-800-687-4040. General information can be found at our Web site at www.tceq.texas.gov. *Si desea información en Español, puede llamar al 1-800-687-4040.*

The permit application, executive director's preliminary decision, draft permit, and the executive directors preliminary determination summary and executive director's air quality analysis, will be available for viewing and copying at the TCEQ central office, 12100 Park 35 Circle, Building E, Room 103, Austin, Texas 78753, the TCEQ Houston regional office, 5425 Polk Street, Suite H, Houston, Texas 77023, and at the El Campo City Hall, 315 E. Jackson Street, El Campo, Wharton County, Texas. The facility's compliance file, if any exists, is available for public review at the Houston regional office at the address listed above.

Further information may also be obtained from Indeck Wharton, LLC, 600 N Buffalo Grove Rd Ste 300, Buffalo Grove, IL 60089-2432 or by calling Mr. James S. Schneider, Senior Environmental Engineer at (847) 520-3212.
