COMMENTS: This is to be considered a formal request for a contested hearing to deny the permit 120973. The effects on the area where the plant would be located are more negative than positive. After doing research it is clear that some of the information that Navasota has listed does not seem to be completely honest. The amount of water that will be pumped out of our aquifer alone will devastate surrounding water wells. Water wells that are the only source of water for our families and livestock. The air pollutants that will be a product of

the plant are KNOWEN to affect people with breathing disorders. My 14 year old son has Asthma and takes several different kinds of medicine every day. The air pollution, no matter how minimal, is more than he is used to breathing AT HIS HOME. If the plant is built, the air will harm him in his home. My children are 4th generation Talley's on our property. Talley's have lived here since before 1935. My son and daughter have been in 4H and FFA programs since they were 9 years old learning to work the land and livestock for their futures. Help them with their futures by denying this permit. Lornna Talley 210*722*3424

Please consider this a formal request for a contested hearing to deny the permit 120973. My family and I are very concerned that the proposed plant would have a negative effect on, not only my family but also, all of our neighbors and friends. We have lived here for the past 31 years and have come to love this very rural area. Our main areas of concern are: the amount of water the Navasota energy plant will use - which research has shown is not the same as they reported on their proposal, the light pollution is another grave concern -we moved to the country to escape intrusive city lights, possible pollutants which might harm the native wildlife as well as our beloved migratory Sandhill Cranes, additionally the same pollutants which may also be extremely harmful to the human inhabitants.

My children and grandchildren should be able to live and work here and enjoy the same quality of life that we have enjoyed for the last 31 years and I am concerned that this plant will make that impossible. We have always been frugal with our use of water due to the fragility and fickleness of nature. It is a precious commodity to farmers, ranchers and local families. The sheer volume of water that will be pumped out of our aquifer alone will devastate area wells.

I run a small private school within a few miles of the proposed plant. Several of my students have asthma and I am concerned for their welfare as well. Again, it is my request that you deny the permit #120973.
Sincerely,
Patti Werley

COMMENTS: I would like to withdraw my intent to hire a lawyer to stop the Navasota Union Valley energy center. I still don't want this plant in my neighborhood and think it is very unnecessary but will not sue to stop it being built.
