Contents

Chapter 1—General Information 1
Introduction 1
IEAS Objectives 1
What You Will Find in This Book 2
About 30 TAC § 101.10 3
A Self-Reporting Process 3
Nonattainment Designations 3
Special Inventory Request 4
Text of 30 TAC § 101.10 6
What Constitutes a Complete Submission? 11
Sample Calculations 11
Requirements for a New Account 11
Requirements for a Previously Existing Account 13
If Your Site Experienced Insignificant Changes in Emissions 14
If a Site Does Not Meet the Requirements of 30 TAC § 101.10 for the Current Emissions Inventory Year 14
If a Site Will Not Meet the Requirements of 30 TAC § 101.10 in Future Years 15
A Note About Confidentiality 15
Electronic Reporting 16

Chapter 2—Creating an Initial Emissions Inventory 17
The Emissions Inventory Process 17
Requirements for Submitting an Emissions Inventory 17
Understanding Account Structure 19
Facilities and Emission Points 19
Paths 20

Chapter 3—Account Structure 21
Identifying Emission Sources 21
Guidelines for Including Sources in Account Structure 21
Sources That Must Be Added to the EI and That May Be Grouped as Collected Sources 22
Representing Account Structure in the Emissions Inventory 22
Facilities and Facility Identification Numbers 22
Emission Points and Emission Point Numbers 23
Abatement Devices and Control Identification Numbers 23
Emission Paths 24
Collective Sources 25
Representing Combustive Abatement Devices 26
Appropriate Structural Representation of Common Industrial Processes 27
Cooling Towers 27
Glycol Units and Amine Units 27
Sulfur Recovery Units 29

Loading Operations 30
Surface Coating Operations 31
Aggregate Operations 32
Marine Operations 34
Wastewater Collection and Treatment 37
Chemical Production 37
Modifying Existing Account Structure 37
Removing Structure 38
Changing Facility and Emission Point Designations 38
Adding a New Emission Point to an Existing Facility 38
Adding a New Facility to an Existing Emission Point 39
Linking an Existing Facility to an Existing Emission Point 39
Adding a New Abatement Device to an Existing FIN/EPN Path without Changing the Emission Point 40
Adding a New CIN/EPN Path to an Existing Facility, Unlinking the Old Emission Point, and Linking the New CIN/EPN Path 40
Adding an Existing Abatement Device to an Existing FIN/EPN Path without Changing the Emission Point 41
Adding an Existing Abatement Device to an Existing Facility, Unlinking the Old Emission Point, and Linking the New CIN/EPN Path 41

Chapter 4—Determining and Reporting Emissions 43
Required Actual Emissions Data 43
Acceptable Determination Methodologies 43
Source-Specific Determination Methodologies 44
General Order of Preference 49
Using Factors from a Permit 49
Speciating Emissions 50
Speciating VOCs 50
Speciating Hazardous Air Pollutants and Other Compounds of Interest 52
Speciating Particulate Matter 52
Reporting Emissions 55
Annual Emissions 55
Ozone Season Emissions 55
Emissions Events (EE) 58
Scheduled Maintenance, Startup, and Shutdown (SMSS) Activities 58
Special Note: “EE/SMSS” Column 59

Chapter 5—Example Initial Emissions Inventory 61
Identifying Emissions Sources 61
Translating Emissions Sources to the Emissions Inventory 63

Chapter 6—Updating an Emissions Inventory Questionnaire 71
Updating EIQ Data 71

Special Notes 71
Electronic Accounts 72
Account Information 72
Emissions Inventory and Account Contact Information 72
Criteria Emissions Totals 72
Site Quantifiable Event Totals 73
Emissions Events Certifying Structure 73
Signature of Legally Responsible Party 74
Facility Information 75
Control Device Information 79
Parameters for Emission Points 79
Changing FIN and EPN Designations 80
Total Aggregate Annual Heat Input 80
Emissions Factors 80
Updating Reported Emissions 81

Appendix A—Technical Supplements A-1
Miscellaneous VOC Sources A-1
Casing Head Gas Releases A-1
Coking Units A-2
Confined Entry Ventilation A-2
Merox Units A-2
Technical Supplements A-3

Technical Supplement 1: Selected Combustion Sources A-5
Introduction A-5
Internal Combustion Engines A-6
Expected Contaminants A-6
Emissions Determination Methodologies A-6
SO_2 Emissions A-6
Particulate Emissions A-7
VOC Emissions A-8
Ozone Season Emissions A-11
External Combustion Sources Burning Natural Gas A-11
Expected Contaminants A-11
Emissions Determination Methodologies A-11
SO_2 Emissions A-12
Particulate Emissions A-12
VOC Emissions A-12
Combined Cycle Turbines with Heat Recovery Steam Generators A-15
Structure A-15
Expected Contaminants A-15
Emissions Determination Methodologies A-16
NO_x and CO Emissions A-16
Particulate, VOC, and SO_2 Emissions A-16

Technical Supplement 2: Cooling Towers A-17
Introduction A-17
Definitions A-17
Cooling Tower Structure A-17
Cooling Tower Source Classification Codes A-18
Expected Emissions A-18
Particulate Matter A-18
Inorganic Compounds A-19
Volatile Organic Compounds A-19
Emissions Determination A-19
Particulate Matter A-19
Inorganic Compounds A-20
Volatile Organic Compounds A-20
Annual and Ozone Season Rates A-22
Speciation A-22
Supporting Documentation A-22
Issues of Special Concern A-23
References A-24

Technical Supplement 3: Equipment Leak Fugitives A-25
Introduction A-25
Definitions A-25
Expected Emissions A-26
Quantifying Equipment Leak Fugitive Emissions A-26
Introduction A-26
Requirements for Determining Equipment Leak Fugitive Emissions A-26
Emissions Determination Methodologies: Order of Preference A-27
Emissions Factors A-27
Determining Emissions from Monitored Components A-27
Quantifying Emissions Using Correlation Equations A-27
Quantifying Emissions from Components Monitored by an Audio/Visual/Olfactory Inspection A-30
Determining Emissions from Unmonitored Components A-30
Emissions Determination Requirements A-30
Quantifying Emissions Using Average Factors A-30
Quantifying Emissions from Components Exempt from Monitoring A-32
Quantifying Emissions Using Average Factors with Emissions Reduction Credits A-32
Quantifying Emissions of Odorous or Toxic Inorganic Compounds A-33
Quantifying Emissions for Nontraditional Components A-33
Special Considerations when Quantifying Emissions A-34
Speciation A-36

Supporting Documentation A-36
Issues of Special Concern A-36
References A-39
Instructions for Completing the Fugitive Data Form A-42
Component Counts A-42
VOC Percentages A-42
Monitoring Equipment Data A-43
Emissions Determination Methodology A-43
LDAR Program Used A-43

Technical Supplement 4: Flares A-45
Introduction A-45
Definitions A-45
Expected Emissions A-46
Products of Combustion A-46
Compounds from Uncombusted Flared Gas A-46
Emissions Determination A-46
Flared Gas Flow Rate and Composition A-46
NO_x and CO Emissions A-47
Uncombusted Flared Gas Emissions A-47
SO_2 Emissions A-49
Annual and Ozone Season Rates A-49
Speciation of Uncombusted Flared Gas Compounds A-50
Supporting Documentation A-51
References A-51

Technical Supplement 5: Marine Facilities A-53
Introduction A-53
Expected Emissions A-54
Determining Emissions A-54
Loading and Unloading Bulk Liquid Materials A-55
Loading and Unloading Bulk Liquefied Gaseous Materials A-56
Loading and Unloading Solid Bulk Materials A-56
Degassing and Cleaning Vessel Compartments A-57
Abrasive Blasting and Surface Coating A-57
Annual and Ozone Season Emission Rates A-58
VOC and Particulate Speciation A-58
Supporting Documentation A-59
Issues of Special Concern A-59
References A-60

Technical Supplement 6: Aboveground Liquid Storage Tanks A-61
Introduction A-61
Guidance Available in This Supplement A-61
Definitions A-62
Expected Emissions A-62

Associated Emissions A-63
Quantifying Storage Tank Emissions A-63
Determining Emissions from Breathing and Working Losses A-63
Determining Emissions from Flashing Losses A-64
Determining Emissions from Landing Losses A-69
Determining Emissions from Degassing and Cleaning A-71
Special Considerations when Quantifying Emissions A-72
Speciation A-75
Supporting Documentation A-75
For More Information A-76
References A-76

Appendix B—Sample Letters B-1
Inapplicability Notification and Request to Remain on Mailing List B-2
Insignificant Change Notification B-3
Inapplicability Notification and Request for Removal from Mailing List B-4

Appendix C—EPA and TCEQ Resources C-1
EPA Resources C-1
TCEQ Resources C-2

Appendix D—Small Business Information D-1

Appendix E—Pollution Prevention Information E-1
Introduction E-1
Marine Terminals E-1
Storage Tanks E-2
Breathing Losses E-2
Working Losses E-2
Fixed-Roof Landing Losses E-2
Other Tank Options E-3
Cooling Towers E-3
Glycol Units E-3
General BMPs for VOC Emissions Control E-3
Sandblasting E-5
Boilers and Process Heaters E-5

Appendix F—Checklist F-1
2006 Emissions Inventory Completeness Checklist F-2

Abbreviations G-1

Glossary H-1

Figures

3-1. Emission Paths 25
3-2. Glycol Unit Structure—Separate Still and Reboiler Vents 28
3-3. Glycol Unit Structure—Common Still and Reboiler Vents 28
3-4. Glycol Unit Structure—Flared Still Emissions 28
3-5. Glycol Unit Structure—Still Emissions Routed Through Reboiler 29
3-6. Sulfur Recovery Unit—Unabated 29
3-7. Sulfur Recovery Unit with Scrubber 29
3-8. Sulfur Recovery Unit with Incinerator 30
3-9. Sulfur Recovery Unit with Scrubber Prior to Incinerator 30
3-10. Loading Area—Unabated 30
3-11. Loading Area Controlled by a Flare 31
3-12. Paint Booth—Unabated 31
3-13. Paint Booth—Particulate Emissions Abated by a Filter 32
3-14. Spray Booth Controlled by an Incinerator 32
3-15. Fine and Coarse Piles—Emissions Controlled by Water Spray 33
3-16. Continuous and Batch Operations Separated 33
3-17. Conveyor Transport—Interdependent Systems 34
3-18. Uncontrolled Bulk Material Liquid Emissions 34
3-19. Liquid Loading Controlled by a Vapor Recovery Unit and Routed to an Incinerator 35
3-20. Uncontrolled Degassing and Cleaning Emissions 35
3-21. Pneumatic Transfer of Solids Controlled by a Baghouse 36
3-22. Uncontrolled Degassing and Cleaning Emissions 36
3-23. Degassing and Cleaning Emissions Captured by a VRU and Routed to an Incinerator 37

Tables

1-1. Near-Nonattainment and Affected Counties 5
4-1. General Order of Preference for Emissions Determination Methodologies (to Be Used *Only* in the Absence of Source-Specific Guidance) 49
4-2. Example of Speciated VOC Emissions 51
4-3. Example of Speciated Particulate Matter Emissions 54
4-4. Counties for Which Ozone Season Daily Rates Must Be Reported 57
5-1. Identifying Emissions Sources from Equipment and Processes 62
5-2. Assigning FINs to Emissions Sources 64
5-3. Identifying Emission Points for FINs 65
5-4. Assigning EPNs to Emission Points 66
5-5. Assigning CINs to Paths 67
5-6. Appropriate Forms to Add Structure to the EI 68
6-1. STARS Facility Group Types, Profiles, and Characteristics 77
A-1. Reporting Particulate Emissions A-8
A-2. Reporting Internal Combustion VOC Emissions A-10

A-3. Reporting External Combustion VOC Emissions A-14
A-4. Appropriate Substitute Factors for Nontraditional Components..... A-34

Maps
