Contents

Chapter 1—General Information 1
Introduction 1
EAS Objectives 1
What This Book Contains 2
About 30 TAC 101.10 3
A Self-Reporting Process 3
Nonattainment Designations 3
Special Inventory Request 4
Text of 30 TAC 101.10 6
What Constitutes a Complete Submission? 10
Sample Calculations 10
Requirements for a New Emissions Inventory 11
Requirements for Updating an EI 12
If a Site Experienced Insignificant Changes in Emissions 14
If a Site Does Not Meet the Requirements of 30 TAC 101.10 for the Current Emissions Inventory Year 15
If a Site Will Not Meet the Requirements of 30 TAC 101.10 in Future Years 15
A Note about Confidentiality 16
Electronic Reporting 17
Updating an Electronic AEIU through Online Data Entry 17
Submitting an Electronic Text File of the AEIU Online through STEERS 17
A Note about the EI Due Date 19

Chapter 2—Creating an Initial Emissions Inventory 21
The Emissions Inventory Process 21
Requirements for Submitting an Emissions Inventory 21
Understanding Emissions Inventory Structure 22
Facilities and Emission Points 23
Paths 23

Chapter 3—Emissions Inventory Structure 25
Identifying Emission Sources 25
Guidelines for Including Sources in Emissions Inventory Structure 25
Sources That Must Be Added to the EI and That May Be Grouped as Collective Sources 25
Representing the Structure of a Regulated Entity in the Emissions Inventory 26
Facilities and Facility Identification Numbers 26
Emission Points and Emission Point Numbers 27
Abatement Devices and Control Identification Numbers 27
Emission Paths 28
Collective Sources 28
Representing Combustive Abatement Devices 29

Appropriate Structural Representation of Common Industrial Processes 30
Cooling Towers..... 30
Glycol Units and Amine Units..... 30
Sulfur Recovery Units..... 32
Loading Operations..... 33
Blowdown Operations 34
Surface Coating Operations 37
Aggregate Operations 38
Marine Operations 40
Loading and Unloading Bulk Liquids..... 40
Loading and Unloading Bulk Liquefied Gaseous Materials..... 41
Loading and Unloading Solid Bulk Materials 42
Wastewater Collection and Treatment..... 42
Chemical Production..... 42
Modifying Existing Emissions Inventory Structure 43
Removing Structure 44
Changing Facility and Emission Point Designations..... 44
Adding a New Emission Point to an Existing Facility 44
Adding a New Facility to an Existing Emission Point 45
Linking an Existing Facility to an Existing Emission Point..... 45
Adding a New Abatement Device to an Existing FIN / EPN Path without Changing the Emission Point..... 45
Adding a New CIN / EPN Path to an Existing Facility, Unlinking the Old Emission Point, and Linking the New CIN / EPN Path..... 46
Adding an Existing Abatement Device to an Existing FIN / EPN Path without Changing the Emission Point 47
Adding an Existing Abatement Device to an Existing Facility, Unlinking the Old Emission Point, and Linking the New CIN / EPN Path..... 47

Chapter 4—Determining and Reporting Emissions..... 49
Required Actual Emissions Data 49
Acceptable Determination Methodologies 49
Source-Specific Determination Methodologies..... 50
Choosing a Determination Methodology when More Than One Is Used for a Contaminant 55
General Order of Preference 56
Using Factors from a Permit..... 57
Speciating Emissions 57
Speciating VOCs..... 58
Speciating Hazardous Air Pollutants and Other Compounds of Interest 59
Speciating Particulate Matter..... 60
Speciation Criteria Summary..... 62
Reporting Emissions 62
Annual Emissions 62

Ozone Season Emissions 63
Emissions Events (EE)..... 65
Scheduled Maintenance, Startup, and Shutdown (SMSS) Activities 66
Special Note: "EE/SMSS" Column 67

Chapter 5—Example Initial Emissions Inventory..... 69
Identifying Emission Sources 69
Translating Emission Sources to the Emissions Inventory..... 71

Chapter 6—Updating an Emissions Inventory Questionnaire..... 81
Updating EIQ Data 81
Special Notes 81
Account Information..... 82
Emissions Inventory Contact Information..... 82
Criteria Emissions Totals..... 85
Site Quantifiable Event Totals..... 85
Emissions Events Certifying Signature 88
Signature of Legally Responsible Party..... 88
Facility Information 90
Control Device Information..... 97
Parameters for Emission Points 99
Total Aggregate Annual Heat Input.....101
Emissions Factors 101
Updating Reported Emissions.....102
Changing FIN and EPN Designations 105

Chapter 7—EI Revisions, Data Requests, Site Coordinate Data 107
Revising an EI.....107
Current Reporting Year.....107
Previous Reporting Year.....108
Revising STARS Data 108
EI Data Requests.....108
TCEQ Data Clearinghouse 109
Data Available at the EAS Web Site 109
Emissions Data Requests 109
Paper EI Data Requests.....100
Coordinate Data 110
Spatial Queries and Mapping Application Viewer 110

Chapter 8—Questions Answered: Emission Events, Excess Opacity Events, SMSS Activities 113
Site Quantifiable Event Totals.....113
Reporting EE and SMSS Emissions 113
Excess Opacity.....115
Emissions Event Certification.....115

Appendix A—Technical Supplements A-1
Miscellaneous VOC Sources A-1
Casing Head Gas Releases A-1
Coking Units A-2
Confined Entry Ventilation A-2
Merox Units A-2
Glycol Dehydration Operations A-2
Technical Supplements A-3

Technical Supplement 1: Selected Combustion Sources A-5
Introduction A-5
Internal Combustion Engines A-5
Expected Contaminants A-5
Emissions Determination Methodologies A-6
SO_2 Emissions A-6
Particulate Emissions A-6
VOC Emissions A-8
Ozone Season Emissions A-11
External Combustion Sources Burning Natural Gas A-11
Expected Contaminants A-11
Emissions Determination Methodologies A-11
SO_2 Emissions A-12
Particulate Emissions A-12
VOC Emissions A-12
Combined-Cycle Turbines with Heat Recovery Steam Generators A-15
Structure A-15
Expected Contaminants A-15
Emissions Determination Methodologies A-16
NO_x and CO Emissions A-16
Particulate, VOC, and SO_2 Emissions A-16
Air-Curtain Incinerators A-17
Structure A-17
Expected Contaminants A-17
Emissions Determination Methodologies A-17

Technical Supplement 2: Cooling Towers A-19
Introduction A-19
Definitions A-19
Cooling Tower Structure A-19
Cooling Tower Source Classification Codes A-20
Expected Emissions A-20
Particulate Matter A-20
Inorganic Compounds A-21
Volatile Organic Compounds A-21
Emissions Determination A-21
Particulate Matter A-21

Inorganic Compounds A-22
Volatile Organic Compounds A-22
Annual and Ozone Season Rates A-24
Speciation A-25
Supporting Documentation A-25
Issues of Special Concern A-25
References A-26

Technical Supplement 3: Fugitive Emissions from Piping Components ... A-29
Introduction A-29
Definitions A-29
Expected Emissions A-30
Quantifying Fugitive Emissions from Piping Components A-30
Introduction A-30
Requirements for Determining Fugitive Emissions from Piping Components A-30
Emissions Determination Methodologies: Order of Preference A-31
Emission Factors A-31
Determining Emissions from Monitored Components A-32
Quantifying Emissions Using Correlation Equations A-32
Quantifying Emissions from Components Monitored by an Audio/Visual/Olfactory Inspection A-34
Determining Emissions from Unmonitored Components A-35
Emissions Determination Requirements A-35
Quantifying Emissions Using Average Factors A-35
Quantifying Emissions from Components Exempt from Monitoring A-37
Quantifying Emissions Using Average Factors with Emissions Reduction Credits A-37
Quantifying Emissions of Odorous or Toxic Inorganic Compounds A-37
Quantifying Emissions for Nontraditional Components A-38
Special Considerations when Quantifying Emissions A-38
Speciation A-40
Supporting Documentation A-40
Issues of Special Concern A-41
References A-44
Instructions for Completing the Fugitive Data Form A-46
Component Counts A-46
VOC Percentages A-47
Monitoring Equipment Data A-47
Emissions Determination Methodology A-47
LDAR Program Used A-47

Technical Supplement 4: Flares A-49
Introduction A-49
Definitions A-49
Expected Emissions A-49
Products of Combustion A-50
Compounds from Uncombusted Flared Gas A-50
Emissions Determination A-50
Flared Gas Flow Rate and Composition A-50
NO_x and CO Emissions A-51
Uncombusted Flared Gas Emissions A-52
SO_2 Emissions A-54
Annual and Ozone Season Rates A-54
Speciation of Uncombusted Flared Gas Compounds A-55
Supporting Documentation A-55
Reporting Emissions from a Shared Flare A-56
References A-56

Technical Supplement 5: Marine Facilities A-57
Introduction A-57
Expected Emissions A-58
Determining Emissions A-58
Loading and Unloading Bulk Liquid Materials A-59
Loading and Unloading Bulk Liquefied Gaseous Materials A-59
Loading and Unloading Bulk Solid Materials A-60
Degassing and Cleaning Vessel Compartments A-60
Abrasive Blasting and Surface Coating A-61
Annual and Ozone Season Emission Rates A-61
VOC and Particulate Speciation A-62
Supporting Documentation A-62
Issues of Special Concern A-63
References A-63

Technical Supplement 6: Aboveground Liquid Storage Tanks A-65
Introduction A-65
Guidance Available in This Supplement A-65
Definitions A-66
Expected Emissions A-66
Associated Emissions A-67
Quantifying Storage Tank Emissions A-67
Determining Emissions from Breathing and Working Losses A-67
Determining Emissions from Flashing Losses A-68
Determining Emissions from Landing Losses A-73
Determining Emissions from Degassing and Cleaning A-76
Special Considerations when Quantifying Emissions A-77
Speciation A-80

Supporting Documentation A-80
For More Information A-81
References A-81

Appendix B—Sample Letters B-1
Inapplicability Notification B-2
Insignificant Emissions Change Notification B-4

Appendix C—EPA and TCEQ Resources C-1
EPA Resources C-1
TCEQ Resources C-2

Appendix D—Small-Business Information D-1

Appendix E—Pollution Prevention Information E-1
Introduction E-1
Marine Terminals E-1
Storage Tanks E-1
Breathing Losses E-1
Working Losses E-2
Floating-Roof Landing Losses E-2
Other Tank Options E-3
Cooling Towers E-3
Glycol Units E-3
General BMPs for VOC Emissions Control E-3
Sandblasting E-5
Boilers and Process Heaters E-5

Appendix F—Checklist F-1
2009 Emissions Inventory Checklist F-2

Abbreviations G-1

Glossary H-1

Figures

3-1. Glycol Unit—Separate Still and Reboiler Vents 31
3-2. Glycol Unit—Common Still and Reboiler Vents 31
3-3. Glycol Unit—Flared Still Emissions 32
3-4. Glycol Unit—Still Emissions Routed Through Reboiler 32
3-5. Sulfur Recovery Unit—Unabated 33
3-6. Sulfur Recovery Unit with Scrubber 33
3-7. Sulfur Recovery Unit with Incinerator 33
3-8. Sulfur Recovery Unit with Scrubber Prior to Incinerator 34

3-9. Loading Area—Unabated 34
3-10. Loading Area Controlled by a Flare 35
3-11. Blowdown Operations—Separate Compressor Engine and Blowdown Vents 35
3-12. Blowdown Operations—Common Compressor Engine and Blowdown Vent 36
3-13. Blowdown Operations—Flared Blowdown Emissions 36
3-14. Blowdown Operations—Grouped Compressor Blowdowns 37
3-15. Paint Booth—Unabated 37
3-16. Paint Booth—Particulate Emissions Abated by a Filter 38
3-17. Spray Booth Controlled by an Incinerator 38
3-18. Fine and Coarse Piles—Emissions Controlled by Water Spray 39
3-19. Continuous and Batch Operations Separated 39
3-20. Conveyor Transport—Interdependent Systems 40
3-21. Uncontrolled Bulk Material Liquid Emissions 40
3-22. Liquid Loading Controlled by a Vapor Recovery Unit and Routed to an Incinerator 41
3-23. Uncontrolled Degassing and Cleaning Emissions 41
3-24. Pneumatic Transfer of Solids Controlled by a Baghouse 42
3-25. Uncontrolled Degassing and Cleaning Emissions 43
3-26. Degassing and Cleaning Emissions Captured by a VRU and Routed to an Incinerator 43
6-1. Sample EIQ Page for Account Information and Emissions Inventory Contact Information 84
6-2. Sample Account Emissions EIQ Page 87
6-3. Sample Account Information Certification EIQ Page 89
6-4. Sample Facility Information EIQ Page 96
6-5. Sample Control Device Information EIQ Page 98
6-6. Sample Emission Point Information EIQ Page 100
6-7. Sample Path Emissions EIQ Page 106

Tables

1-1. Special Inventory Counties 5
4-1. General Order of Preference for Emissions Determination Methodologies (to Be Used Only in the Absence of Source-Specific Guidance) 57
4-2. Example of Speciated VOC Emissions 59
4-3. Example of Speciated Particulate Matter Emissions 62
4-4. Summary of Speciation Criteria 63
4-5. Ozone Season Daily Rates Are Required from Sites in These Counties 62
5-1. Identifying Emission Sources from Equipment and Processes 70
5-2. Assigning FINs to Emission Sources 72
5-3. Identifying Emission Points for FINs 73
5-4. Assigning EPNs to Emission Points 74
5-5. Assigning CINs to Paths 75
5-6. Appropriate Forms for Adding Structure to the EI 77
6-1. STARS Facility Group Types, Profiles, and Characteristics 92

A-1. Reporting Particulate Emissions A-8
A-2. Reporting Internal Combustion VOC Emissions A-10
A-3. Reporting External Combustion VOC Emissions A-14
A-4. Determining Emissions Using Correlation Equations A-33
A-5. Appropriate Substitute Factors for Nontraditional Components A-39
A-6. TCEQ Air Permits Flare Emission Factors A-45
A-7. TCEQ Air Permits Flare Destruction or Removal Efficiencies for 40 CFR 60.18–Compliant Flares A-52
