Texas Commission on Environmental Quality

Section 185 Baseline Amount Determination Form for a Single Major Stationary Source or Group of Major Stationary Sources Aggregating Volatile Organic Compounds with Nitrogen Oxides in a Baseline Amount

This Section 185 Account will aggregate the volatile organic compound (VOC) baseline amount with nitrogen oxides (NO_X) from one or more major stationary sources. All subsequent §185 fees are due based on actual VOC emissions from all the major stationary sources listed for this Section 185 Account.

Section A: Customer Information			
Customer Number (CN):		Customer Name:	
Section B: Section §185 Contact Information

Section C: Baseline Amount Worksheet

List all the RNs in the proposed Section 185 Account Group. List the VOC baseline emissions and authorized VOC limits for each RN. The period used for the baseline emissions must be the same for each RN. List only one RN if no baseline aggregation is being requested for VOC at a single major stationary source.

Table C.1: Compare Emissions (tons)

RN	Site Name	SIC	Baseline Emissions (EI-Reported*)		Authorized Limit in 2007	
			VOC	NO_X	VOC	NO_X
		Subtotal				
Sum the VOC with the NO_X baseline emissions subtotals to determine the baseline emissions total. Sum the VOC with the NO_X authorized subtotals to determine the allowable limit total.		**Total**				

*Include annual and planned maintenance, startup and shutdown emissions from emissions inventory. Do not include non-compliant emissions. Adjust the baseline emissions downward to account for emissions limit in place on November 15, 2007.

Period (Indicate): The Period used for the baseline emissions for the major stationary source(s).

◯2007 Or ◯24 Month Period Start Date: End Date:

Table C.2: Determine VOC and NO_X Baseline Amount	
From Table C.1, Select the lower of Baseline Emissions Total or Authorized Limit Total	
VOC with NO_X Baseline Amount Total (Tons)	**Basis (Select One)**

Certification

The information reported on this baseline amount determination form is true and accurately represents authorizations and baseline emissions for this site to the best of my knowledge.
