Contents

Chapter 1. General Information 1
Introduction 1
What This Publication Contains 1
About 30 TAC Section 101.10 2
A Self-Reporting Process 2
Nonattainment Designations 3
Special Inventory Request 3
Emissions Inventory Reporting Requirements Map 4
Due Date 4
What Constitutes a Complete Submission? 5
Requirements for a New Emissions Inventory or Updating an EI 6
Special Requirements for a Site that Experienced Insignificant Changes in Emissions 6
If a Site Does Not Meet the Requirements for the Current Emissions Inventory Year 7
If a Site Does Not Expect to Meet the Applicability Requirements in Future Years 8
If a Site Is Permitted but Not Built 9
Sample Calculations 9
Confidential Data and Other Information 10
Web Reporting 10
Reporting an IEI or Submitting an AEIU through Interactive Web Entry 10
Reporting an IEI or Submitting a Text File of the AEIU Online through STEERS 11
Chapter 2. Creating an Initial Emissions Inventory 13
The Emissions Inventory Process 13
Requirements for Submitting an Emissions Inventory 13
Understanding Emissions Inventory Structure 14
Facilities and Emission Points 14
Paths 15
Chapter 3. Emissions Inventory Structure 17
Identifying Emission Sources 17
Guidelines for Including Sources in Emissions Inventory Structure 17
Sources that Must Be Added to the EI and that May Be Grouped as Collective Sources 17
Representing the Structure of a Regulated Entity in the Emissions Inventory 18
Facilities and Facility Identification Numbers 18
Emission Points and Emission Point Numbers 19
Abatement Devices and Control Identification Numbers 19
Emission Paths 20
Collective Sources (Collective Facilities) 20
Representing Combustive Abatement Devices 21
Appropriate Structural Representation of Common Industrial Processes 22
Cooling Towers 22
Glycol Units and Amine Units 22

Sulfur Recovery Units ... 24
Loading Operations ... 26
Blowdown Operations ... 27
Surface Coating Operations ... 29
Aggregate Operations ... 30
Marine Operations ... 32
Wastewater Collection and Treatment ... 35
Chemical Production ... 35
Modifying Existing Emissions Inventory Structure ... 36
Removing Structure ... 36
Changing Facility, Emission-Point, or Abatement-Device Nomenclature ... 36
Chapter 4. Determining and Reporting Emissions ... 37
Required Emissions Data ... 37
Acceptable Determination Methodologies ... 37
Source-Specific Determination Methodologies ... 38
Choosing a Determination Methodology when More than One Is Used ... 44
General Order of Preference ... 45
Using Factors from a Permit ... 45
Speciating Emissions ... 45
Speciating Volatile Organic Compounds ... 46
Speciating Hazardous Air Pollutants and Other Compounds of Interest ... 47
Speciating Particulate Matter ... 48
Speciation Criteria Summary ... 50
Reporting Emissions ... 50
Annual Emissions ... 50
Ozone Season Emissions ... 52
Ozone Season Daily Rates Are Required from Sites in These Counties ... 52
Emissions Events ... 53
Scheduled Maintenance, Startup, and Shutdown ... 54
Chapter 5. Example Initial Emissions Inventory ... 55
Identifying Emission Sources ... 55
Representing Emission Sources in the Emissions Inventory ... 57
Chapter 6. Updating an Emissions Inventory ... 63
Updating EI Data ... 63
Special Notes ... 63
Account Information ... 63
Contact Information ... 64
Criteria Emissions Totals ... 64
Site Quantifiable Event Totals ... 64
Emissions Events Certifying Signature ... 65
Signature of Legally Responsible Party ... 65
Facility Information ... 66
Control Device Information ... 70

Emission Point Information ... 71
Total Aggregate Annual Heat Input ... 71
Emissions Factors ... 72
Updating Reported Emissions ... 72
Chapter 7. EI Revisions, EI Data, Site Coordinate Data ... 75
Revising an EI ... 75
Current and Previous Reporting Year ... 75
Other Reporting Years ... 76
EI Data ... 77
View and Download Data from the EAS Webpage ... 77
Run TCEQ Central Registry Integrated Web Reports ... 77
Request Detailed Emissions Data from the EAS ... 77
File a TCEQ Open Records Request ... 78
View Paper EI Data ... 78
Coordinate Data ... 78
Spatial Queries and Mapping Application Viewer ... 78
Appendix A. Technical Supplements ... 79
Miscellaneous VOC Sources ... 79
Casing Head Gas Releases ... 79
Coking Units ... 79
Confined Entry Ventilation ... 80
Merox Units ... 80
Glycol Dehydration Operations ... 80
Amine Units in Carbon Dioxide Service ... 81
Technical Supplements ... 81
Technical Supplement 1: Selected Combustion Sources ... 83
Introduction ... 83
Internal Combustion Engines ... 83
External Combustion Sources Burning Gaseous Fuel ... 89
Combined-Cycle Turbines with Heat Recovery Steam Generators ... 93
Portable Engines ... 94
Coal-Fired Boilers ... 94
Technical Supplement 2: Cooling Towers ... 99
Introduction ... 99
Cooling Tower Structure ... 99
Cooling Tower Source Classification Codes ... 100
Expected Emissions ... 100
Emissions Determination ... 100
Annual and Ozone Season Rates ... 103
Speciation ... 104
Supporting Documentation ... 104
Issues of Special Concern ... 104
References ... 105

Technical Supplement 3: Fugitive Emissions from Piping Components 107
Introduction 107
Fugitive Component Structure 107
Expected Emissions 108
Quantifying Fugitive Emissions from Piping Components 108
Determining Emissions from Monitored Components 109
Determining Emissions from Unmonitored Components 112
Speciation 116
Supporting Documentation 117
Issues of Special Concern 117
References 120
Technical Supplement 4: Flares 123
Introduction 123
TCEQ 2010 Flare Study 124
Expected Emissions 124
Emissions Determination 125
Annual and Ozone Season Rates 128
Speciation of Uncombusted Flared Gas Compounds 128
Supporting Documentation 129
Reporting Emissions from a Shared Flare 129
References 129
Technical Supplement 5: Marine Facilities 131
Introduction 131
Expected Emissions 132
Determining Emissions 132
Annual and Ozone Season Emission Rates 134
VOC and Particulate Speciation 135
Supporting Documentation 135
Issues of Special Concern 135
Technical Supplement 6: Aboveground Liquid Storage Tanks 137
Introduction 137
Expected Emissions and Determination Methods 138
Quantifying Storage Tank Emissions 139
Speciation 154
Supporting Documentation 155
For More Information 155
References 155
Appendix B. Sample Letters 157
Letters that May Be Submitted Instead of an EI 157
Printing and Updating EIQ Pages Required with These Letters 157
Inapplicability Notification 158
Insignificant Emissions Change Notification 160

Appendix C. EAS Contact Information and Other Resources 163
Contacting the EAS 163
Emissions Inventory Mailing Addresses 163
EAS Staff Mailing Addresses 163
EAS Assistance 163
EAS Webpage 164
EPA Resources 164
Air CHIEF 164
AP-42 164
WebFIRE 164
Green Book 164
Protocol for Equipment Leak Emission Estimates 164
TCEQ Resources 165
Tools for Completing the EI 165
Information about Online Reporting 165
Central Registry IWR 165
EI Account Mailing Status 165
Air Permits Guidance Documents 165
Small Business and Local Government Assistance Information 165
Public Education and Pollution Prevention 165
Abbreviations 167
Glossary 171

Tables

4-1. Example of Speciated VOC Emissions 47
4-2. Example of Speciated Particulate Matter Emissions 50
4-3. Summary of Speciation Criteria 51
5-1. Identifying Emission Sources for a Hypothetical Upstream Gas-Field Site 56
5-2. Assigning FINs to Emission Sources for a Hypothetical Upstream Gas-Field Site 57
5-3. Identifying Emission Points for FINs for a Hypothetical Upstream Gas-Field Site 58
5-4. Assigning EPNs to Emission Points for a Hypothetical Upstream Gas-Field Site 59
5-5. Assigning CINs to Paths for a Hypothetical Upstream Gas-Field Site 60
5-6. Selecting Group Types and Profiles for a Hypothetical Upstream Gas-Field Site 62
6-1. STARS Facility Group Types, Profiles, and Attributes 68
A-1. Reporting Particulate Emissions 85
A-2. Reporting VOC Emissions from Internal Combustion—Includes Formaldehyde 87
A-3. Reporting VOC Emissions from Internal Combustion—Excludes Formaldehyde 89
A-4. Reporting VOC Emissions from External Combustion 92
A-5. Determining Emissions Using Correlation Equations 111
A-6. Appropriate Substitute Factors for Nontraditional Components 115
A-7. Flare Emissions Factors 126

A-8. Maximum Destruction or Removal Efficiencies for EI Determinations 127
A-9. Inputs for Calculation Ozone Season Emissions Using E&P TANK 146

Figures

3-1. Glycol Unit: Separate Still and Heater Vents 23
3-2. Glycol Unit: Common Still and Vents 23
3-3. Glycol Unit: Flared Still Emissions 24
3-4. Glycol Unit: Still Emissions Routed through Heater 24
3-5. Sulfur Recovery Unit, Unabated 25
3-6. Sulfur Recovery Unit with Scrubber 25
3-7. Sulfur Recovery Unit with Incinerator 25
3-8. Sulfur Recovery Unit with Scrubber Prior to Incinerator 26
3-9. Loading Area, Unabated 26
3-10. Loading Area Controlled by a Flare 27
3-11. Blowdown: Separate Compressor Engine and Blowdown Vents 27
3-12. Blowdown: Common Compressor Engine and Blowdown Vent 28
3-13. Blowdown: Flared Blowdown Emissions 28
3-14. Blowdown Operations: Grouped Compressor Blowdowns 29
3-15. Paint Booth: Unabated 29
3-16. Paint Booth: Particulate Emissions Abated by a Filter 30
3-17. Spray Booth Controlled by an Incinerator 30
3-18. Fine and Coarse Piles: Emissions Controlled by Water Supply 31
3-19. Continuous and Batch Operations, Separated 31
3-20. Conveyor Transport: Interdependent Systems 32
3-21. Uncontrolled Bulk Liquid Material Emissions 32
3-22. Liquid Loading Controlled by a Vapor Recovery Unit and Incinerator 33
3-23. Uncontrolled Degassing and Cleaning Emissions 34
3-24. Pneumatic Transfer of Solids Controlled by a Baghouse 34
3-25. Uncontrolled Degassing and Cleaning Emissions 34
3-26. Degassing and Cleaning Emissions Routed to VRU and Incinerator 35
