TCEQ Surface Water Quality Monitoring

Nonstandard Data Request Form

For assistance in completing this form, please contact the Data Management & Analysis Team at (512) 239-1678 or wdma@tceq.texas.gov

This form must be accompanied by a completed Standard Data Request Form.

Include Data* Where the:

- ☐ LOQ is higher than the AWRL
- ☐ Value is above the quantitation range of the instrument
- ☐ Blank did not meet QA criteria
- ☐ Analyte concentration was less than the limit of quantitation but greater than the limit of detection
- ☐ Value was not identified as an outlier, but was deemed unreasonable by the collector
- ☐ Value Did Not Pass some or all Q.C. Criteria (specific failure unknown)
- ☐ Value is duplicative of another value in the database (i.e., same data reported twice)
- ☐ Value has an increased level of uncertainty due to an unspecified lab error
- ☐ Value has been estimated
- ☐ Hold time has been exceeded
- ☐ Value has an increased level of uncertainty because of interference that occurred during analysis
- ☐ Spike recover fell outside specified acceptance limits
- ☐ Analyte concentration was less than the limit of detection
- ☐ Value is from a preserved, rather than unpreserved, sample
- ☐ Lab indicated instrument failure occurred during analysis
- ☐ Value was obtained using alternative or experimental method(s)
- ☐ Sample container arrived at the lab leaking
- ☐ Material was specifically analyzed for but not detected
- ☐ Data was not collected under an agency approved QAPP (i.e., data quality unknown)
- ☐ Sample was received with a deficiency that occurred during shipping
- ☐ Value was identified as an outlier and deemed unreasonable by the collector
- ☐ Sample was improperly collected
- ☐ RPD value fell outside specified acceptance limits
- ☐ RPD value from field split results fell outside the specified acceptance limits
- ☐ Preservation temperature was exceeded
- ☐ Value was deemed unreasonable by the TCEQ data validator

**** Data users should use caution when requesting any data meeting any of the above conditions.***

These results have an increased level of uncertainty associated with them. Consequently, TCEQ has chosen not to use these data in regulatory decisions, water quality assessments, or other applications where it is necessary to use only data of the highest quality.

over

Quality Assurance data requested:

- ☐ Equipment Blank
- ☐ Field Blank
- ☐ Trip Blank
- ☐ Field Split
- ☐ Continuous Monitoring QA sample

In order for us to better serve you, please tell us about how you intend to use the data you are requesting today:

When completed, submit this form to wdma@tceq.texas.gov.
