

# Rainwater Harvesting – Do It Yourself Class

## Are you interested in learning how to design and install a rainwater harvesting system?

You should attend the *Rainwater Harvesting – Do It Yourself* class where you will learn the basics of rainwater harvesting. The 3-hour class will cover the following topics:

- Rainwater harvesting components and ideal design
- Filtering and cleaning water
- Using rainwater for irrigation
- Simple irrigation set-ups for a rain barrel
- Maintenance

## Why Should You Attend?

Rainwater harvesting is a great way to manage rainwater that would otherwise leave your property. You can collect and store that water for later use in irrigation, livestock watering, toilet flushing, and several other uses! This class will provide you with the knowledge to plan for and install a basic rainwater harvesting system, such as a rain barrel.
