

Water-Related Infrastructure Projects in Border 2012's Four-State Region That Have Received Support from the BECC and the NADB

The Four-State Region includes Tamaulipas, Nuevo León, Coahuila, and the border region of Texas adjacent to those Mexican states. This is one of the four regions into which the U.S.-Mexico Border 2012 Environmental Program is divided.

Virtually all the information in the list below was obtained from reports that are available on the website of the North American Development Bank (<http://www.nadbank.org/>), which cooperates with its sister organization, the Border Environmental Cooperation Commission (<http://www.cocef.org/>) on infrastructure in the border region. This list was updated from the fourth quarter 2011 versions of those reports.

Projects are arranged chronologically, according to the date on which the Border Environmental Cooperation Commission certified the project. Although the Border 2012 program did not start until 2003, this list includes all water-related projects assisted in the named states since the first certifications by the BECC in 1996.

NADB loans come from equal amounts of capital invested by the governments of the United States and Mexico. NADB grants come from a fund provided by the U.S. Environmental Protection Agency.
