TEXAS COMMISSION ON ENVIRONMENTAL QUALITY
2007 APR -5 AM 9:11
CHIEF CLERKS OFFICE

**Via Facsimile: (512) 239-3311**
Ms. LaDonna Castañuela, Chief Clerk
Office of Chief Clerk, MC 105
Texas Commission on Environmental Quality
P.O. Box 13087
Austin, Texas 78711-3087

**Re: Application for Domestic Septage Registration No. 710896; TCEQ Docket No. 2007-0395-SLG**

Dear Ms. Castañuela:

Since Mr. Ortega submitted his application for registration to land apply domestic septage in February 2006, the Texas Commission on Environmental Quality ("TCEQ" or "Commission") has received hundreds of protest letters in opposition to the facility. Among the opponents are State Representative Flynn, the Hunt County Commissioners Court, Hunt County Judge John Horn, Hunt County Commissioner Phillip Martin, and the Sabine River Authority as well as hundreds of individual Hunt County citizens. I support those public officials and well meaning citizens in opposition to the septage facility.

While the Executive Director has granted the requested registration, the Commission has the authority to reverse his decision and should do so now for the following reasons:

- Septage which receives minimal if any treatment can run off into the tributaries of Lake Fork Reservoir and Lake Tawakoni, both public drinking water supplies.
- On-site and nearby water wells, stock tanks and drainages were not properly identified in the application. Some of these features, like the abandoned on-site water well can be a conduit for groundwater contamination if not properly plugged.
- The application rate appears to be flawed which can lead to excess nutrient buildup and contamination of surface water.

The Commission should grant the Motions to Overturn the Executive Director's decision and should the Applicant pursue the authorization further, the Commission should require that he obtain an individual permit subject to an evidentiary hearing.

Sincerely,

Robert F. Deuell, M.D.
State Senator
District 2

TEXAS
COMMISSION
ON ENVIRONMENTAL
QUALITY

2007 APR -5 AM 3:37

CHIEF CLERKS OFFICE

Mr. LaDonna Castanuela
Chief Clerk
Texas Commission on Environmental Quality
Office of the Chief Clerk MC – 105
P.O. Box 13087
Austin, Texas 78711-3087

Dear Ms. Casuanuela,

In response to the letter received on March 13, 2007, We are requesting a "***Motion to Overturn***" on the decision made by Glen Shankle, Executive director of TCEQ regarding registration # 710896 submitted by Gustavo Ortega. In regards to the registration Mr. Shankle has stated that all requirements have been met on Mr. Ortegas behalf.

As requested in this letter this motion to overturn is being filed for the following reasons:

1. The proposed land runs adjacent to the Lake Fork Creek, which is a tributary to Lake Fork and its water supply for public consumption.
   The 1970's to 1980's literature and maps used by TCEQ to determine whether this was an appropriate location were not current for this area.
2. Three of the adjacent landowners have or have had serious medical conditions that could be worsened from the affects of human waste and the lime used to treat this waste being dumped on the proposed land.
3. We feel that Mr. Ortega and TCEQ has not taken into consideration how this will effect our children, livestock and quality of life. Hunt County provides ample facilities for the treatment of domestic sewage, which after treatment, it is properly disposed of in a landfill. The treatment of domestic sewage is a complicated chemical process, which needs proper management. In Mr. Ortega's case, there will be no monitoring of what is dumped, and how it will be treated.
4. Monitoring a humane waste disposal facility is a task that should be looked after by The State in which the facility resides. On numerous accounts including the letter mailed to us on March 13th, 2007 it clearly states that this facility will not be monitored by any state or local agency. If problems occur or Mr. Ortega fails to comply with the stipulations of his registration, He is required to report himself in being in violation of the rules in which TCEQ has set for his registration.

In Conclusion, We (all attached signatures) believe that TCEQ has made a bad decision in granting Mr. Ortega with a permit to dump human waste around our homes. We believe that this will have a negative effect on our community as well as the surrounding counties and North East Texas

Sincerely,
Concerned Citizens of Hunt County

Angela Andrews
31 24 CR 3210
Lone Oak, TX 75453

I am writing in reference to B.L.U. Application #710896

I live very close to the suggested sewage waste dumpsite of Mr. Gustavo Hernandez Ortega in Lone Oak, TX. Since August of 2006 our community has banned together against this atrocity. As of now we have failed to gain any ground against this being done. I am very concerned about the welfare of our community and the value of our property.

There has been a decision to let Mr. Ortega dump on the proposed property. In this decision there is a statement that there was no working well within a mile. I know, for a fact, there is a well across CR 3210 from me. It is less than 2600ft. from the dumpsite. I believe that is quite a bit less than 1 mile.

The dumpsite slopes toward the land I live on. I know that the land slopes toward a creek that eventually ends up in Lake Fork in Rains County which feeds into Lake Tawakoni and finally into Dallas County. I am concerned that raw sewage would contaminate our waterways. I don't like the idea of drinking the water from contaminated sites.

A concerned citizen,

Angela Andrews

Responses to TCEQ Directors Public Responses (4-13-07)
BLU Site # 710896-Ortega

Comment #1---Applicant still has not adequately described how lime will be mixed consistently in his transport tank to attain PH 12 or higher throughout the entire load of domestic septage. Driving around will not do it.

Comment #2---According to one eyewitness water was struck at 30 foot depth while digging a cistern less than a mile north of proposed septage site. TCEQ water tables are wrong.

Comment #5---TCEQ holds applicant accountable but he has no environmental insurance on file with the state for this kind of operation. Applicant is supposed to be self-regulating and self-reporting. This plan has the fox guarding the hen house.

Comment#6---The plan to grow Bermuda grass at the rate, the quantity of septage applied, and no adequate provision for timely or adequate water application----- shows what a SHAM this program is---AN EXCUSE TO DUMP SEPTAGE AT THIS SITE. If the plan specified in the application is a fabrication then the entire application must be overturned rather than approved. The Director's people are not using common sense to evaluate feasibility of this Bermuda grass growing plan---and that is the purpose of this BLU site.

Comment#7---The TCEQ quotes a Soil Survey Map that is over 30 years old and describes soil composition 30 miles away. Ortega still has not produced soil samples that identify BLU Site #710896 by name, county map block, or by GPS.

Comment#8---The mission of TCEQ is to insure environmental quality of life--- It is failing to protect the citizens of all Hunt County in this case.

Comment#9---The Director has failed to answer major questions concerning Ortega's plan and application. I insist upon a motion to overturn approval of this application for registration of BLU Site #710896 because it is based on the false premise that a viable Bermuda grass operation can be sustained as Ortega states--- Therefore it fails for lack reason.

I MOVE TO OVERTURN THE EXECUTIVE DIRECTOR'S ACTION IN APPROVING REGISTRATION OF BLU SITE # 710896.

The concept of allowing this man to dump collected wastes from septic tanks, that should be properly processed, is unconscionable. It is dangerous for those of us in this area who use the lake for recreation, drinking water, and it is no different than allowing open cesspools that are never treated at Residential locations.

CHIEF CLERKS OFFICE

Harold L. Carr
PO Box 158
Emory, Texas

Glenn Shankle
MC 109
PO Box 13087
Austin, Texas 78753

21 March 2007

Subject: Beneficial Land Use Application 710896 (Gustavo H. Ortega).

Mr. Shankle:

The application referenced above is in Hunt County, Texas. My responsibilities are with Rains County, Texas. Rains County is situated adjacent to, and south and east of Hunt County.

The application of septage to the Ortega property harbors the potential for contaminating watersheds that enter Lake Tawakoni and Lake Fork Reservoir. Lake Tawakoni is of particular concern to me. The major portion of potable water consumed in Rains County is drawn from Lake Tawakoni. Lake Tawakoni is also a source for the water needs of the City of Dallas, and many outlying areas. Lake Fork, once on line, will supply the City of Dallas and outlying areas.

The Ortega property lies on a raised elevation with prominent drainage to Lake Fork Creek, Head Creek and Pool Branch. Lake Fork Creek feeds directly into Lake Fork Reservoir. (The distance from the Ortega property to Lake Fork Creek is approximately 4/10 mile) Head Creek and Pool Branch, feed into Lake Tawakoni via Caney Creek, Timber Creek then the Sabine River. (The distance from the Ortega property to Head Creek is approximately 5/10 mile, and the distance from the Ortega property to Pool Branch is approximately 6/10 mile) (See attachment A) Most of the drainage from the Ortega property will flow directly into Lake Tawakoni. (See attachment B)

I respectfully request that you reconsider the preliminary approval of this application, considering the impact it can have on our water supply. A breakdown or failure of the process, as set forth in TAC 312, could be traumatic for our county.

As an interested party, I am available for any assistance I may be able to provide to you concerning this matter.

Sincerely:

Harold L. Carr

It sounds like the "Texas Commission on Environmental Quality" is on par with the "Texas Youth Commission" - State employees not doing their jobs. I propose that Mr. Ortega dump his waste in Mr. Shankle's back yard. Let's keep Lake Tawakoni, Lake Fork and the local wells uncontaminated.

**RESOLUTION NO. 07 - 12**

2007 APR -5 AM 3:44
CHIEF CLERKS OFFICE

**A RESOLUTION MOTIONING TO OVERTURN THE EXECUTIVE DIRECTOR OR THE TEXAS COMMISSION ON ENVIRONMENTAL'S DECISION ON GUSTAVO HERNANDEZ ORTEGA'S B.L.U. APPLICATION SITE #701896; GRANTING AUTHORITY TO THE MAYOR TO EXECUTE SAID RESOLUTION AND AUTHORIZING CITY SECRETARY TO AUTHENTICATE MAYOR'S SIGNATURE TO SAID RESOLUTION, AND AUTHORIZING CITY MANAGER TO EXECUTE ALL INSTRUMENTS REQUISITE IN IMPLEMENTING SAID RESOLUTION, AND AUTHORIZING CITY SECRETARY TO AUTHENTICATE CITY MANAGER'S SIGNATURE TO THIS RESOLUTION.**

A regular meeting of the City Council of the City of Commerce, Texas, was held in Commerce, Texas, at City Hall, on the 3rd day of April 2007, at 7:00 p.m.; a majority of Council Member's being present and constituting a quorum, the following Resolution was adopted:

**WHEREAS,** the City of Commerce has been notified of TCEQ's ruling allowing human waste to be dumped on property in Hunt County; and

**WHEREAS,** the City of Commerce has the right to motion to overturn the decision of the Executive Director, pursuant to the Texas Administrative Code.

**BE IT RESOLVED**, that after careful consideration, the City Council of the City of Commerce hereby deems it to be in the best interest to motion to overturn said decision of the Texas Commission on Environmental Quality.

**NOW, THEREFORE, BE IT RESOLVED** that the Mayor of the City of Commerce, Texas, be authorized and she is hereby authorized to execute this Resolution;

**BE IT FURTHER RESOLVED** that the City Secretary be authorized and she is hereby authorized to attest to the signature of the Mayor to this Resolution;

**BE IT FURTHER RESOLVED** that the City Secretary be authorized and she is hereby authorized to attest to the signature of the City Manager to any and all instruments requisite to implementing this Resolution.

**PASSED BY THE GOVERNING BODY** of the City of Commerce, Texas, at a regular meeting of the City Council of the City of Commerce, Texas, on the 3rd day of April 2007.

**ATTEST:**

Marty Cunningham, City Secretary

**CITY OF COMMERCE:**

Sheryl Zelhart, Mayor

(Seal)

APPROVED AS TO FORM:

Marty Cunningham for
Jim McLeroy; City Attorney

I, Marty Cunningham, City Secretary of the City of Commerce, Texas, do hereby certify that the above is a true and correct copy of a resolution , and that the same has not been repealed and is in full force and effect.

(Seal)

Marty Cunningham, City Secretary

Sworn to and subscribed before me, on this the 4th day of April, 2007 to certify which witness my hand and seal of office.

March 7, 2007

To the citizens of Hunt County and surrounding counties:

In August of 2006, local residents attended a TCEQ public hearing to voice their opposition to a Beneficial Land Use Application filed by Gustavo Ortega. The B.L.U. application site number is 710896. Let me make it plain. This would allow him to dump human waste on his property derived from septic systems.

I am sorry to inform the people the Executive Director of the Texas Commission on Environmental Quality, Glen Shankle, made a decision March 5, 2007 in favor of the application.

I, along with the people I represent am very upset. It is unbelievable that a state agency calling itself "The Texas Commission on Environmental Quality" would make such an outrageous decision. This has set us back 100 years or more. They are contradicting their own philosophy on protecting our water supplies. People have underground wells and this site is situated where run off goes into Lake Tawakoni and Lake Fork. I ask the people where do you get your water? This affects you and your loved ones.

Every day I pray to God for wisdom, understanding, and patience. We have been patient; this has been going on for over a year. I do not understand TCEQ's decision to grant the application. Wisdom tells me to do the right thing and fight TCEQ's decision.

We have twenty three (23) days from the date the chief clerk sends out the answers to the questions that were ask in August of 2006. Along with these answers Glen Shankle will make the people aware of his decision to grant the application. According to TCEQ these letters will be sent out within days. I talked to Katherine Fazz on March 6, 2007 at 4:10 p.m.

I have drafted a "Motion To Overturn Executive Director's Decision". I ask the citizens, leaders of the communities, churches association and you to get involved. When we receive the letter in response to our questions, we at that time need the citizens of Northeast Texas to respond with the "Motion To Overturn Executive Director's Decision". I will make this Motion available and will notify the public.

Respectively submitted,

Phillip A. Martin

**MOTION TO OVERTURN EXECUTIVE DIRECTOR'S DECISION**

2007 MAR 15 AM 10:41

CHIEF CLERKS OFFICE

Under the Texas Administrative Code Title 30 Part 1 Chapter 50 Subchapter G. Rule 50.130. I have the right to make a motion to overturn Executive Director's decision on Gustavo Hernandez Ortega's B.L.U. application site #710896, TCEQ customer number CN602999963, Regulated Entity number RN104916820.

I, (printed name) Irlanda D'amalfi of (printed home address) 709 FM 513 South make a motion to overturn the Executive Director's decision (Mr. Glen Shankle, Executive Director T.C.E.Q.) in reference to B.L.U. Application #710896 of Gustavo Hernandez Ortega.

TEXAS COMMISSION ON ENVIRONMENTAL QUALITY

2007 APR -5 AM 3:40

CHIEF CLERKS OFFICE

To Whom It May Concern:

I am writing to request that your committee **overturn** the approval of B.L.U. Site # 71096 by Gustavo Ortega. Mr. Ortega is planning to open a domestic septage facility on a piece of property off of County Road 3209 between Lone Oak and Campbell. This chosen property is the northern boarder to my family's land. My family has lived on and farmed our land in the Prairie Valley community for over five generations.

I am irate that your Executive Director, Mr. Glen Shankle, has chosen to approve this facility. Besides the fact that I despise the idea that this facility will be opened in my back yard, I have questions and concerns that have still failed to be answered by your organization. The main concern I have is who will consistently over see that Mr. Ortega operates his business properly. While the sewage may be safe to the surrounding population, livestock, agriculture production, and environment if treated perfectly, who will over see the treatment of the septage dumped? Also, if it is determined that Mr. Ortega has failed to treat the septage properly, who will he answer to? Your answer in Response 5 of the packet we received as a follow up to our August hearing, you noted that Mr. Ortega would submit an annual report that would be reviewed by the TCEQ to ensure that he is meeting all given requirements, but who will make sure that his report has not been falsified? I am still not convinced by the responses that your committee gave after our hearing that this facility will not contaminate our local water supplies. Within the first year, or even possibly the first 3-4 years, of this facilities existence it may not contaminate the water supply, but after several years of continually dumping sewage, it will eventually have an impact on the water supply. It appears that your committee has looked only into the immediate future, not the distant future. Who will ensure that Mr. Ortega will follow the proposed Agronomic Management Plan, your representative that comes around once or twice a year? My family has been farming in this community for over 100 years, and I know that it will be practically impossible for Mr. Ortega to maintain a steady crop of Bermuda grass (his proposed crop) under the conditions that he will be placing on his property. I also have several concerns about the application itself. There are many holes in application that your committee has appeared to just have brushed under the carpet.

It appears to me that your committee and your Executive Director Mr. Shankle have failed to do exactly what is in you name, that is to ensure environmental quality. I am extremely livid that you would even consider approving this application, none the less actually approve it. It is my desire that you will **overturn** the decision of Mr. Shankle and not allow this application to be approved and this facility allowed to begin. Allowing Mr. Ortega to begin his proposed business is a slap in the face of the Prairie Valley community, the surrounding families, the surrounding farms and ranches, the Prairie Valley Baptist Church, the Prairie Valley Cemetery and its Association, Hunt County, and the state of Texas. I hope that you will find it within yourselves to **overturn** this decision and take a stand on the side of the people of the Prairie Valley Community and the environmental quality of this community, Hunt County, and the great state of Texas.

Please **overturn** this decision of your Executive Director Glen Shankle.

Sincerely,

Kelli B. Davies

**Subject: B. L. U. Site #710896 by Gustavo Ortega**

My name is Larry J. Dick. , I live at 8189 CR 3417 in Lone Oak Texas. But my mother lives at 5357 CR 3209 in Campbell Texas, where the supposedly raw sewage landfill is to be placed.

I am requesting a **MOTION TO OVERTURN EXECUTIVE DIRECTOR'S DECISION on B.L.U. Site # 710896 by Gustavo Ortega**. This law was for the use of dairy farmers only. Not for human waste...would you like to have this in your back yard. I don't want it either.

I am against this proposed application due to the fact that it is a health hazard, and my mom has had enough problems these last few years with Cancer, Diabetes, and now a blood disorder.

Why do people try and impose their problems on others who are caring and understanding people. Her health is a very serious thing to me, and I would do almost anything to try and stop this action. We have enough problems in this world without adding more. Serious diseases come from this type of landfill.....This state has enough problems with the border, without adding a huge epidemic from germs in a landfill that could and should have been prevented. THINK ABOUT IT!

I like to fish in Lake Fork and Lake Tawakoni, and am very sad to hear of the possibility of it getting contimated from the run off of a landfill of this nature. What will the people of Dallas, Commerce and Garland do if the water gets filled with unwanted germs? They are the people who drink this water, pay for it, and now you want to let someone fowl it up.....Sad, really sad.

I hope that you take into consideration all of these matters and come to a solution that is not harmful to anyone, and will be safe for all everyone in the future to breathe, drink the water, eat the fish, and be able to travel the road with safety.

**I AM AGAIN ASKING FOR A MOTION TO OVERTURN BLU # 710896.**
**THE PEOPLE OF HUNT COUNTY DO NOT WANT THIS!**

March 7, 2007

To the citizens of Hunt County and surrounding counties:

In August of 2006, local residents attended a TCEQ public hearing to voice their opposition to a Beneficial Land Use Application filed by Gustavo Ortega. The B.L.U. application site number is 710896. Let me make it plain. This would allow him to dump human waste on his property derived from septic systems.

I am sorry to inform the people the Executive Director of the Texas Commission on Environmental Quality, Glen Shankle, made a decision March 5, 2007 in favor of the application.

I, along with the people I represent am very upset. It is unbelievable that a state agency calling itself "The Texas Commission on Environmental Quality" would make such an outrageous decision. This has set us back 100 years or more. They are contradicting their own philosophy on protecting our water supplies. People have underground wells and this site is situated where run off goes into Lake Tawakoni and Lake Fork. I ask the people where do you get your water? This affects you and your loved ones.

Every day I pray to God for wisdom, understanding, and patience. We have been patient; this has been going on for over a year. I do not understand TCEQ's decision to grant the application. Wisdom tells me to do the right thing and fight TCEQ's decision.

We have twenty three (23) days from the date the chief clerk sends out the answers to the questions that were ask in August of 2006. Along with these answers Glen Shankle will make the people aware of his decision to grant the application. According to TCEQ these letters will be sent out within days. I talked to Katherine Fazz on March 6, 2007 at 4:10 p.m.

I have drafted a "Motion To Overturn Executive Director's Decision". I ask the citizens, leaders of the communities, churches association and you to get involved. When we receive the letter in response to our questions, we at that time need the citizens of Northeast Texas to respond with the "Motion To Overturn Executive Director's Decision". I will make this Motion available and will notify the public.

Respectively submitted,

Phillip A. Martin

CHIEF CLERKS OFFICE

**MOTION TO OVERTURN EXECUTIVE DIRECTOR'S DECISION**

Under the Texas Administrative Code Title 30 Part 1 Chapter 50 Subchapter G. Rule 50.139. I have the right to make a motion to overturn Executive Director's decision on Gustavo Hernandez Ortega's B.L.U. application site #710896, TCEQ customer number CN602999963, Regulated Entity number RN104916820.

I, (printed name) J. B. DOOLEY of (printed home address) 3711 FM 513 S. LONE OAK TX. 75453 make a motion to overturn the Executive Director's decision (Mr. Glen Shankle, Executive Director T.C.E.Q.) in reference to B.L.U. Application #710896 of Gustavo Hernandez Ortega to wit: *(Please give reason for your motion. You may attach an additional sheet if necessary)*

THE EXECUTIVE DIRECTOR'S RESPONSE TO PUBLIC COMMENT DID NOT ADEQUATELY ADDRESS THE CONCERN OF BERMUDA GRASS PROPAGATION UNDER POTENTIALLY HIGH SOIL P.H. (GREATER THAN 8.0) CONDITIONS. IN ADDITION, NO CONSIDERATION WAS GIVEN TO LAND RECLAIMATION & RESTORATION COST (SURETY BONDS) SHOULD THE APPLICANT DEFAULT AND THE SITE BECOME A GRAVE DANGER TO PUBLIC HEALTH.

Date: [redacted] 4-2-07

FOR PUBLIC INTEREST COUNSEL:

Mr. Blas J. Coy, Jr., Attorney
Texas Commission on Environmental Quality
Public Interest Counsel MC-103
P.O. Box 13087
Austin, Texas 78711-3087

March 7, 2007

To the citizens of Hunt County and surrounding counties:

In August of 2006, local residents attended a TCEQ public hearing to voice their opposition to a Beneficial Land Use Application filed by Gustavo Ortega. The B.L.U. application site number is 710896. Let me make it plain. This would allow him to dump human waste on his property derived from septic systems.

I am sorry to inform the people the Executive Director of the Texas Commission on Environmental Quality, Glen Shankle, made a decision March 5, 2007 in favor of the application.

I, along with the people I represent am very upset. It is unbelievable that a state agency calling itself "The Texas Commission on Environmental Quality" would make such an outrageous decision. This has set us back 100 years or more. They are contradicting their own philosophy on protecting our water supplies. People have underground wells and this site is situated where run off goes into Lake Tawakoni and Lake Fork. I ask the people where do you get your water? This affects you and your loved ones.

Every day I pray to God for wisdom, understanding, and patience. We have been patient; this has been going on for over a year. I do not understand TCEQ's decision to grant the application. Wisdom tells me to do the right thing and fight TCEQ's decision.

We have twenty three (23) days from the date the chief clerk sends out the answers to the questions that were ask in August of 2006. Along with these answers Glen Shankle will make the people aware of his decision to grant the application. According to TCEQ these letters will be sent out within days. I talked to Katherine Fazz on March 6, 2007 at 4:10 p.m.

I have drafted a "Motion To Overturn Executive Director's Decision". I ask the citizens, leaders of the communities, churches association and you to get involved. When we receive the letter in response to our questions, we at that time need the citizens of Northeast Texas to respond with the "Motion To Overturn Executive Director's Decision". I will make this Motion available and will notify the public.

Respectively submitted,

Phillip A. Martin

MOTION TO OVERTURN EXECUTIVE DIRECTOR'S DECISION
ON GUSTAVO HERNANDEZ ORTEGA'S B.L.U. APPLICATION SITE # 710896.
TCEQ CUSTOMER # CN602999963. REGULATED ENTITY # RN104916820.

I, Janice Fenden

@ 1981 Mamie, Greenville, Tx 75402

MOVE TO OVERTURN ABOVE LISTED EXECUTIVE DIRECTOR'S DECISION.

SIGNATURE:
Date: 3-19-07

Janice Fenden / 903-454-0700

REASON:

If this motion is passed then people should not legally be made to have an anabic system installed at such a high price. Per this day we could have our waste dumped directy into our neighbors yard etc. This is very unsanitary to wildlife, humans etc. This is unheard of.

I, (printed name) Shirley A. Fender of (printed home address) 4456 CR 3323 Quinlan, TX 75474 make a motion to overturn the Executive Director's decision (Mr. Glen Shankle, Executive Director T.C.E.Q.) in reference to B.L.U. Application #710896 of Gustavo Hernandez Ortega to wit: *(Please give reason for your motion. You may attach an additional sheet if necessary)*

It poses a threat to our land, riviens, lakes and water. Could harm animal life. Will devalue our property. Seems like we are going back in time many years. Sounds very unsanity and could prefent people from moving here.

Under the Texas Administrative Code Title 30 Part 1 Chapter 50 Subchapter G. Rule 50.139. I have the right to make a motion to overturn Executive Director's decision on Gustavo Hernandez Ortega's B.L.U. application site #710896, TCEQ customer number CN602999963, Regulated Entity number RN104916820.

I, (printed name) Jennifer Fifield of (printed home address) 2489 C.R. 3308, Greenville, TX make a motion to overturn the Executive Director's decision (Mr. Glen Shankle, Executive Director T.C.E.Q.) in reference to B.L.U. Application #710896 of Gustavo Hernandez Ortega to wit: *(Please give reason for your motion. You may attach an additional sheet if necessary)*

The Commission is contradicting their own philosophy on protecting our water supply. Many people have underground wells and this dump site is situated where run off goes into Lake Tawakoni and Lake Fork.

**Subject: B. L. U. Site #710896 by Gustavo Ortega**

My name is Phyllis Fink, I live at 5357 CR 3209 (my homestead) approximately ½ to 1 mile due west of the proposed site.

I am requesting a **MOTION TO OVERTURN EXECUTIVE DIRECTOR'S DECISION on B.L.U. Site # 710896 by Gustavo Ortega**. This law was for the use of dairy farmers only. Not for human waste...would you like to have this in your back yard. I don't want it either.

I am against this proposed application due to the fact that it is a health hazard any way you look at it, and would cause the community undue harm from bad water and air elements. I have diabetes, have had cancer and am battling a blood problem caused by chemotherapy. My recovery is due in part to clean country air and a quiet neighborhood.....if this is allowed to come to be a reality, that is all gone.....My health is very worrisome to me and this will not be helping my problems.

The roads are traveled enough by buses and people who live down this short road. Putting in this site will only cause more expense to the County, more road rock than usual; the two sets of culverts will have to be replaced from the weight of more trucks. The white rock in use now will probably have to be replaced by oil to keep down the amount of dust. We are a quiet neighborhood that cares for the welfare of others. Help us to keep our neighborhood safe from bad germs and undue traffic on our road.

I pray that you take into consideration all of these matters and come to a conclusion that is not harmful to anyone, and will be safe for all our grandchildren to breathe, drink the water, eat the fish, and be able to travel the road with safety.

**I AM AGAIN ASKING FOR A MOTION TO OVERTURN BLU # 710896.**
**THE PEOPLE OF HUNT COUNTY DO NOT WANT THIS!**

**Sincerely,**

CHIEF CLERKS OFFICE

**CITIZENS OPPOSED TO REGISTRATION DUMPS' MOTION TO OVERTURN**

TO THE HONORABLE COMMISSION:

NOW COMES the Citizens Opposed to Registration Dumps ("CORD" or "Protestants") and file this Motion to Overturn[1] domestic septage registration no. 710896 issued by the Executive Director of the Texas Commission on Environmental Quality ("TCEQ" or "commission"), and would respectfully show the following:

## I.
## Procedural Background

Applicant Gustavo Ortega ("Applicant") filed an application to authorize land application of domestic septage in Hunt County, Texas on February 27, 2006. The proposed registration was designated 710896 and the site is within the watersheds of Lake Fork Reservoir and Lake Tawakoni which are both public drinking water supplies. The application was declared administratively complete on March 30, 2006, technical review ensued and a public meeting was held on August 29, 2006. Since that time, the commission has received hundreds of letters protesting the application, including protest letters by State Representative Flynn, State Senator Deuell, the Sabine River Authority, the Hunt County Commissioners Court and public citizens.

[1]Prior to retaining legal counsel and formation of the group "CORD," hundreds of CORD members and other Hunt County citizens individually filed public comments, hearing requests and Motions to Overturn the Executive Director's decision. Those Motions are incorporated herein for all purposes.

## II.
## Group Standing

CORD is a group comprised of 89 people living in or owning property in Hunt County. *See* Exhibit A, CORD Member List. Ms. Renee Lane is the founding member of CORD and she lives within one-half mile of the proposed septage site. Ms. Lane's water well is approximately 2,200 ft. from the site. Charles and Sally Wilson, who live adjacent to the proposed septage site are also members of CORD and have received runoff from the proposed septage site during rainfall events. Photographs attached hereto as Exhibit B and taken during a 4-inch rainfall event on March 31, 2007 show standing water on both sides of the Applicant and Wilson property line, runoff coming off of the proposed septage site onto the Wilson property as well as the Lake Fork Creek approximately 150 feet away from the site. There is evidence that runoff from the proposed septage site has also run on to CORD member Monte Barrow's property during past rainfall events.

CORD was organized for the specific purpose of identifying and conveying its members' concerns to state regulators and local officials relating to the problems attendant with the land application of minimally-treated domestic septage. Neither Ms. Lane nor Mr. and Mrs. Wilson nor Mr. Barrow need participate in any contested case hearing, should such hearing be required by the commission.

Much of the rural property owned by CORD members surrounding the septage sites is characterized by private water wells, ponds, intermittent streams and tributaries to Lake Fork and Lake Tawakoni. In addition to surface water, shallow groundwater and seeps occur in the general vicinity of the septage site – all which are conduits for surface and groundwater contamination. The Protestants will be personally and uniquely affected

by surface runoff, nuisance odors and potential groundwater contamination emanating from the site.

## III.
## Site is Unsuitable for Land Application; Application Rate is Wrong

Professional geoscientist, agronomist and former TCEQ employee Paul Reynolds, P.G. reviewed the soil data in the application and the application rates prepared by the Executive Director in particular and concluded that ***significant mistakes were made in calculating the application rate***, as follows:

First and foremost, this application received no review by a TCEQ agronomist. Before submitting the application in February 2006, Applicant corresponded in January 2006 with an intern working for the Executive Director, Mr. Erik Agnew. It appears Mr. Agnew not only filled out Appendix A to the application for the Applicant (his handwritten notes are visible), but he stated in correspondence to the Applicant's representative, that:

> I used the % value instead of the mg/kg value even though those are normally used. The mg/kg values *were off the charts* and so not a practical/"calculatable" value. . .Remember to check with a soil agent. . .

(emphasis added). *See* Exhibit C, attached.

In substituting the % value for mg/kg on Appendix A, Mr. Agnew apparently did not understand the derivation of the available nutrient formula and that the given formula is specifically conditioned to inputting nutrient concentration in mg/kg or parts per million (ppm). As a result, the Executive Director's value for available nutrient in soil is off by a factor of 10,000. Using the same concentrations as staff, but correctly in ppm units, the nutrient- available-in-soil calculation is as follows:

2 * (3690) + 6 * (2760) = 23,940 pounds of available nitrogen per acre (not the 2.34 lb/ac stated by staff).

However, according to Mr. Reynolds, the value the Executive Director's staff used should never have been considered in the first place because the Total Kjeldahl Nitrogen (TKN) value is not an acceptable value for determining plant available nitrogen in the soil. The only time TKN is taken into consideration is in the waste analysis as part of the Total Nitrogen value utilized in determining application rates. Applicant should have considered Ammonium and Nitrate Nitrogen values instead of TKN. Had he done so, based on their own laboratory analysis, the Appendix A calculation would have arrived at 1,246 lb/ac N ($NH_4 + NO_3$) available in the soil, instead of the later revised 16 lb/ac N.

Second, the TCEQ files contain not just Appendix A filled out by Mr. Agnew and the Appendix A in the original February 27, 2006 application (which for some unknown reason is different from Mr. Agnew's January version), but three other versions. *See* Exhibit C, attached. The values for yield goal, nutrient needed by crop for specified yield goal, nutrient available in soil, nutrient amount still needed to meet yield goal, N and ultimate application rates all vary, culminating in an application rate which is legally and technically indefensible.

Additionally, the soil samples used in the original February 2006 application, Appendix A, were taken in July 2005. Some of the documentation supporting later versions of Appendix A were taken virtually a year later in May 2006. Why was the Applicant resubmitting different soil samples, analyzed by different labs, at different times? One of the labs, Texas Cooperative Extension Service, which data was used to support Applicant's last change to Appendix A (using 16 lbs/ac N as the nutrient

available in soil and 63,077 gallons/acre/yr as the ultimate application rate) recommended 90 lbs N/ac Nitrate-N. That value differs from the NRCS value of 210 lbs N/acre which differs still from what the Applicant input on various of his earlier versions of Appendix A.

Despite the various inconsistent versions of Appendix A in the TCEQ records, it is clear that the final application rate in the Registration issued in March 2007 is wrong and the Motion to Overturn should be granted on this basis alone. Special Provision VI.A. of the Registration, p. 7, states that the annual domestic septage application rate shall not exceed 68,077 gallons/acre/year, however, "68,077" is not supported anywhere in the application material. The original application contained an application rate of 68,310 gallons/acre/year. Later, the Applicant submitted a revised Appendix A containing an application rate of 63,077 gallons/acre/year. No version of Appendix A, no correspondence, formal or otherwise, identifies 68,077 gallons/acre/year as the application rate. On the contrary, it appears that the 68,077 gallons/acre/year application rate given in the Registration is based on using Mr. Agnew's erroneous 2.394 nutrient available in soil value. Or, despite Applicant's later attempts to change the application rate, the revised value never found its way into the final version of the Registration.

Whatever the explanation, there is precedent for the Commission requiring new samples and reapplication in cases where the application rate was wrong and/or soil samples were more than one year old. At a minimum, the Applicant should be required to resample, reapply and recalculate a reasonable and protective application rate in this case.

Application of excess Nitrogen in septage which cannot be taken up in the root zone of the cover crop is disposal, not beneficial use. Nitrogen application rates in excess of crop requirement can result in leaching to groundwater and/or movement into surface water constituting an unauthorized discharge ultimately contaminating waters in the state. The area surrounding the site is already known for severe flooding and erosion which will facilitate the runoff of harmful pollutants to public drinking water supplies.

## IV.
## Special Site Conditions Warrant Further Scrutiny

During the site assessment performed by TCEQ's regional office in April 2006, it was revealed that a number of significant site features exist which were not previously identified by the Applicant in the original application. Not only is there an abandoned water well on-site (which was not identified in the application and, to CORD's knowledge, has not been properly plugged according to the rules of the Texas Department of Licensing and Regulation), and nearby private water wells (also not identified), but there are at least 3 stock tanks and 2 drainages which may be contaminated if not properly buffered. *See* 4/13/06 Investigation Report by Region 4 Inspector Shane Isbell, p.2. None of these features was identified in the application or subsequent submittals by Applicant. Lake Fork Creek is approximately 150 feet from the application area and, as indicated in the protest letter submitted by the Sabine River Authority, Lake Fork Creek directly feeds Lake Fork Reservoir which is a public drinking water supply. *See* Exhibit D.

It appears the Executive Director's Water Quality Assessment Team prepared two additional interoffice memoranda (following its original August 31, 2006 memorandum) recommending buffering around these newly identified features. *See* October 5, 2006

and February 19, 2007 "Additional Agronomic Management Plan Recommendations for Gustavo Ortega, New Registration No. 710896, Hunt County." As a consequence, Applicant was required to decrease the available acreage (originally requested in the application) from 45.3 acres to 40 acres in order to account for the newly required buffer zones around the well, stock tanks and drainage. While CORD agrees with the Executive Director's decision to require additional buffering and management practices to address these features, none of the groundwater memos or the Draft Registration indicate whether the application rate was recalculated after the available acreage was decreased. The available application area is a critical factor to input in the application rate equation; without this updated information, the application rate is further flawed.

## V.
## Conclusion

WHEREFORE, PREMISES CONSIDERED, for the foregoing reasons and those stated in the individual Motions to Overturn, CORD requests that the commission grant its Motion and overturn Registration No. 710896. In the alternative, CORD requests that the commission overturn the registration, and should Applicant pursue an authorization further, the commission should require that Applicant submit new soil samples in accordance with the rules, recalculate the application rate, file an application for individual permit and refer it to the State Office of Administrative Hearings for a full evidentiary hearing on the merits.

Respectfully submitted,

Helen S. Gilbert

## CERTIFICATE OF SERVICE

I certify that a true copy of Citizens Opposed to Registration Dumps' Motion to Overturn was served on the following parties by hand delivery, facsimile or regular mail on this 5th day of April 2007:

**FOR APPLICANT:**
Mr. Gustavo Hernandez Ortega
P.O. Box 1959
Quinlan, TX 75474

**FOR OFFICE OF PUBLIC INTEREST COUNSEL:**
Mr. Blas J. Coy, Jr.
Office of the Public Interest Counsel
Texas Commission on Environmental Quality - MC 103
P.O. Box 13087
Austin, TX 78711-3087
Tel: 512/239-6363
Fax: 512/239-6377

**FOR THE EXECUTIVE DIRECTOR:**
Mr. Robert Brush
Environmental Law Division
Texas Commission on Environmental Quality - MC 173
P.O. Box 13087
Austin, TX 78711-3087
Tel: 512/239-5600
Fax: 512/239-0606

**FOR THE CHIEF CLERK:**
Ms. LaDonna Castañuela
Office of Chief Clerk
Texas Commission on Environmental Quality – MC 105
P.O. Box 13087
Austin, Texas 78711-3087
Tel: 512/239-0300
Fax: 512/239-3311

TEXAS COMMISSION ON ENVIRONMENTAL QUALITY

# APPENDIX A

## SEPTAGE APPLICATION RATE

### STEP 1 - SOIL TEST ANALYSIS AND FERTILIZER RECOMMENDATIONS

pH: 5.6 Intended Crop: Bermuda Grass Yield Goal: 10 tons N lbs/acre

Nutrient needed by crop for specified yield goal** 220 *

Nutrient available in soil ** Minus - 2.394

Nutrient amount still needed to meet yield goal, N = Equals = 217.61

** Please provide the means of determining these values.

[Nutrient available in soil (lbs/Acre) = (2*$NO_3$-N(ppm)(0-6" soil depth) + (6*$NO_3$-N(ppm)(6-24" soil depth)]

### STEP 2 - CALCULATE ANNUAL APPLICATION RATE BASED ON NITROGEN REQUIREMENTS OF CRO GALLONS PER ACRE PER 365 DAY PERIOD

AAR = N/0.0026 = 217.61 /0.0026 = 83,695 gal/acre/yr

AAR = Annual application rate in gallons per acre per 365 day period.
N = Amount of nitrogen in pounds per acre per 365 day period for the crop or vegetation grown on the land.

2(0.369) + 6(0.276) = 2.394

Exhibit C

Go with low end figures

# APPENDIX A

## SEPTAGE APPLICATION RATE

### STEP 1 - SOIL TEST ANALYSIS AND FERTILIZER RECOMMENDATIONS

pH: 5.6 Intended Crop: Bermuda Grass Yield Goal: 10 tons N lbs/acre

Nutrient needed by crop for specified yield goal** 180 #

Nutrient available in soil ** Minus - 2.394

Nutrient amount still needed to meet yield goal, N = Equals = 177.61

** Please provide the means of determining these values.
[Nutrient available in soil (lbs/Acre) = 2*$NO_3$-N(ppm)(0-6" soil depth) + 6*$NO_3$-N(ppm)(6-24" soil depth)]

### STEP 2 - CALCULATE ANNUAL APPLICATION RATE BASED ON NITROGEN REQUIREMENTS OF CROP GALLONS PER ACRE PER 365 DAY PERIOD

AAR = N/0.0026 = 177.6 / 0.0026 = 68,310 gal/acre/yr

AAR = Annual application rate in gallons per acre per 365 day period.
N = Amount of nitrogen in pounds per acre per 365 day period for the crop or vegetation grown on the land.

2(0.369) + 6(0.276) = 2.394

Judy,
This AAR seems better than the values I used before. I used the % unit although that's not usually used. I hope this helps.
*Remember to check w/ a soil agent or look for the correct "nutrient needed" value.

** Please provide the means of determining these values.
[Nutrient available in soil (lbs/Acre) = 2*$NO_3$-N(ppm)(0-6" soil depth) + 6*$NO_3$-N(ppm)(6-24" soil depth)]

### STEP 2 - CALCULATE ANNUAL APPLICATION RATE BASED ON NITROGEN REQUIREMENTS OF CROP IN GALLONS PER ACRE PER 365 DAY PERIOD

AAR = N/0.0026 = 164 / 0.0026 = 63,077 gal/acre/yr

AAR = Annual application rate in gallons per acre per 365 day period.
N = Amount of nitrogen in pounds per acre per 365 day period for the crop or vegetation grown on the land.

Exhibit C

1. Determined by Kjeldahl digestion or an equivalent accepted procedure. Methods that rely on Mercury as a catalyst are not acceptable.
2. Mehlich III plant available.
3. Electrical Conductivity (EC) - determine from extract of 2:1 (volume/volume) water/soil mixture.
4. Soil pH must be analyzed by the electrometric method in "Test Methods for Evaluating Solid Waste," EPA SW-846, 40 CFR 260.11; method 9045C.

* Analysis for metals in soil must be performed according to methods outlined in "Test Methods for Evaluating Solid Waste," EPA SW-846; method 3050.

## VI. Special Provisions:

A. Annual domestic septage application rate shall not exceed 68,077 gallons/acre/year at this site.

B. The Applicant is required to follow the Agronomic Management Plan approved by the Water Quality Assessments Team on October 5, 2006. The plan is to be kept on file for the term of the registration.

Texas Commission on Environmental Quality
P.O. Box 13087
Austin, TX 78711-3087

Re: Beneficial Use Site Registration No. 710896

Dear Ms. Castañuela:

The Sabine River Authority of Texas (SRA) has received a copy of the notice of receipt of an application and declaration of administrative completeness for Gustavo Hernandez Ortega (CN602999963) Beneficial Land Use Site Registration No. 710896 (RN104916820). The applicant has applied for authorization to land apply domestic septage at agronomic rates on approximately 45.3 acres located approximately 3,500 feet southeast of the intersection of Farm-to-Market Road 513 and County Road 3209. SRA is concerned about the location of this site since it includes acreage that is in the watersheds of Lake Tawakoni and Lake Fork reservoirs.

SRA is a conservation and reclamation district created by the Texas Legislature in 1949 with responsibilities to control, store, preserve, and distribute the waters of the Sabine River and its tributary streams for useful purposes. While not a regulatory agency, SRA works closely with agencies such as Texas Commission on Environmental Quality (TCEQ) to protect water quality in the surface water resources of the Sabine Basin. As TCEQ is aware, SRA serves as the planning agency for the Texas Clean Rivers Program (TCRP) in a collaborative effort between TCEQ, Texas Parks and Wildlife Department (TPWD), other agencies, local entities and the public. The TCRP goal is to maintain and improve the quality of water resources within each river basin in Texas. SRA serves as a clearinghouse for water quality data in the Sabine Basin, analyzes the data and prioritizes water quality concerns and the causes of pollution.

SRA owns and operates both Lake Fork and Lake Tawakoni Reservoirs, and would like to offer its comments on issuance of Domestic Septic Registration No. 710896 to site operator Gustavo Hernandez Ortega. The land application site is on the Basin divide between both Lake Fork and Lake Tawakoni, and as such has the potential to impact the water quality of both reservoirs. The eastern portion of this site would drain to Lake Fork

Exhibit
D

Creek thence to Lake Fork Reservoir while the western portion drains to Head Creek and/or Pool Branch thence to Caney Creek thence to the Cowleech Fork Sabine River thence to Lake Tawakoni. Lake Fork and Lake Tawakoni are both drinking water supply reservoirs and provide high quality surface water for municipal users in the North East Texas area. SRA would request that the staff of the TCEQ give careful consideration to protecting the water quality of these invaluable resources during their evaluation.

The standards established for the surface disposal of domestic septage include many general requirements as well as pollutant limits, management practices and operational standards which are required of each surface disposal site. SRA considers that a site such as this proposed site located in sensitive water supply reservoir watersheds needs to be particularly restrictive in establishing site specific management practices, pollutant limits, pathogen and vector attraction reduction requirements, frequency of monitoring and careful records keeping if it is approved by TCEQ. One of the primary water quality issues emerging with population growth in some areas of the Sabine Basin is elevated bacteria levels. Bacteria are a natural part of the environment and elevated levels can be present after rainfall runoff events. However, hundreds of species of pathogenic bacteria can be present in contaminated water which during rainfall runoff events could result in the proposed surface septage disposal area affecting downstream receiving waters.

SRA would request the staff of the TCEQ to take into consideration the location of this site and the potential impacts to surface water quality in the area. If the Executive Director issues a decision to approve this registration, SRA requests that consideration be given to adopting 'More Stringent Requirements' than the standard requirements in order to assure the protection of public health and to protect the environment from any adverse effect of any pollutants in the domestic septage applied to this site. If approved, we would also ask that TCEQ monitor this facility closely to ensure that all requirements are met during all phases of the operation.

We appreciate this opportunity to provide our comments on this matter. If you have any questions or concerns please contact Gerard Sala of my staff at (409) 746-2192.

Sincerely,

Jerry Clark

Jerry Clark

FOR PUBLIC INTEREST COUNSEL:

Mr. Blas J. Coy, Jr., Attorney
Texas Commission on Environmental Quality
Public Interest Counsel MC-103
P.O. Box 13087
Austin, Texas 78711-3087

March 7, 2007

To the citizens of Hunt County and surrounding counties:

In August of 2006, local residents attended a TCEQ public hearing to voice their opposition to a Beneficial Land Use Application filed by Gustavo Ortega. The B.L.U. application site number is 710896. Let me make it plain. This would allow him to dump human waste on his property derived from septic systems.

I am sorry to inform the people the Executive Director of the Texas Commission on Environmental Quality, Glen Shankle, made a decision March 5, 2007 in favor of the application.

I, along with the people I represent am very upset. It is unbelievable that a state agency calling itself "The Texas Commission on Environmental Quality" would make such an outrageous decision. This has set us back 100 years or more. They are contradicting their own philosophy on protecting our water supplies. People have underground wells and this site is situated where run off goes into Lake Tawakoni and Lake Fork. I ask the people where do you get your water? This affects you and your loved ones.

Every day I pray to God for wisdom, understanding, and patience. We have been patient; this has been going on for over a year. I do not understand TCEQ's decision to grant the application. Wisdom tells me to do the right thing and fight TCEQ's decision.

We have twenty three (23) days from the date the chief clerk sends out the answers to the questions that were ask in August of 2006. Along with these answers Glen Shankle will make the people aware of his decision to grant the application. According to TCEQ these letters will be sent out within days. I talked to Katherine Fazz on March 6, 2007 at 4:10 p.m.

I have drafted a "Motion To Overturn Executive Director's Decision". I ask the citizens, leaders of the communities, churches association and you to get involved. When we receive the letter in response to our questions, we at that time need the citizens of Northeast Texas to respond with the "Motion To Overturn Executive Director's Decision". I will make this Motion available and will notify the public.

Respectively submitted,

Phillip A. Martin

March 7, 2007

To the citizens of Hunt County and surrounding counties:

In August of 2006, local residents attended a TCEQ public hearing to voice their opposition to a Beneficial Land Use Application filed by Gustavo Ortega. The B.L.U. application site number is 710896. Let me make it plain. This would allow him to dump human waste on his property derived from septic systems.

I am sorry to inform the people the Executive Director of the Texas Commission on Environmental Quality, Glen Shankle, made a decision March 5, 2007 in favor of the application.

I, along with the people I represent am very upset. It is unbelievable that a state agency calling itself "The Texas Commission on Environmental Quality" would make such an outrageous decision. This has set us back 100 years or more. They are contradicting their own philosophy on protecting our water supplies. People have underground wells and this site is situated where run off goes into Lake Tawakoni and Lake Fork. I ask the people where do you get your water? This affects you and your loved ones.

Every day I pray to God for wisdom, understanding, and patience. We have been patient; this has been going on for over a year. I do not understand TCEQ's decision to grant the application. Wisdom tells me to do the right thing and fight TCEQ's decision.

We have twenty three (23) days from the date the chief clerk sends out the answers to the questions that were ask in August of 2006. Along with these answers Glen Shankle will make the people aware of his decision to grant the application. According to TCEQ these letters will be sent out within days. I talked to Katherine Fazz on March 6, 2007 at 4:10 p.m.

I have drafted a "Motion To Overturn Executive Director's Decision". I ask the citizens, leaders of the communities, churches association and you to get involved. When we receive the letter in response to our questions, we at that time need the citizens of Northeast Texas to respond with the "Motion To Overturn Executive Director's Decision". I will make this Motion available and will notify the public.

Respectively submitted,

Phillip A. Martin

Office of the Chief Clerk MC-105
P.O. Box 13087
Austin, Texas 78711-3087

Dear Ms. Castanuela,

In response to the letter that I received on March 13, 2007, please accept this letter as a formal request to file a "motion to overturn" a decision made by Glen Shankle, Executive Director of the Texas Commission on Environmental Quality. According to the letter from his office he states that he has granted Mr. Gustavo Hernandez Ortega ( Registration Number 710896) final approval for all stipulations regarding this registration.

As requested in the letter this motion to overturn is being filed for the following reasons:

1. As of April 24, 2006, the Hunt County Commissioners Court filed a resolution with the State of Texas ( Resolution # 42406) that clearly stated its opposition to the application made by Mr. Ortega. The reasons stated in the resolution were as follows:
    a. ...surrounding communities have voiced their concerns about this facility...this facility undermines the public view of environmental safety.
    b. ...Hunt County Environmental Enforcement Office cannot be effective
    c. ...City of Greenville, now and in the future is providing a safe and State approved sewage disposal site for this type of private business
    d. ...this permit is being considered by the state not for public safety or public need but for private gain.

I believe the above stated reasons in the resolution convey the thoughts and concerns of the entire governing body of Hunt County and also takes into consideration the welfare and concerns of the citizens they represent.

2. A review of a letter that was written to Ms. Castanuela of (TCEQ) back on May 2, 2006, by Jerry Clark, Executive Vice President and General Manager of the Sabine River Authority of Texas, indicated several concerns relating to the approval of such an action. In brief the letter intimated the following concerns:
   a. " SRA considers that a site such as this proposed site located in sensitive water supply reservoir watersheds…"
   b. "…SRA requests that consideration be given to adopting 'More Stringent Requirements' than the standard requirements in order to assure the protection of public health and to protect the environment from any adverse effect of any pollutants in the domestic septage applied to this site."
   c. "SRA is concerned about the location of this site since it includes acreage that is in the watersheds of Lake Tawakoni and Lake Fork reservoirs."

   As this letter explains, the SRA is a conservation and reclamation district set up in 1949 by the Texas Legislature. SRA was given the expressed duty to " control, store, preserve and distribute the waters of the Sabine River and its tributary streams for useful purposes.". It would appear that the decision by the executive director Mr. Shankle (TCEQ) has almost completely discounted any responsibilities that the Texas Legislature bestowed on the SRA.

   Again, the letter from SRA makes it very clear that the current rules and regulations as set forth by TCEQ are not stringent enough to allow for Mr. Ortega's proposed site. SRA has the local obligation to point out factors that will directly effect the water quality of wild-life, livestock, and most important, the citizens of the areas these particular reservoirs serve. SRA serves to provide invaluable information to the Texas Parks and Wildlife Department and as a planning source for the Texas Clean Rivers Program. It would appear that the only areas that were significantly addressed in the approval were the time periods and frequency of inspection. This leads to a labyrinth of obstacles when it comes to the "who" and at what expense to local taxpayers.

   I find Mr. Shankle's obvious disregard for SRA input as gross oversight to the facts of his decision and as a "stand alone" reason for overturning his decision. To not take their advise not only lessens the validity of his decision, but casts a serious cloud over the back-bone of our legislative bodies.

3. Hunt County currently maintains a population of more than 85,000 people. Greenville is the county seat and provides a host of services to the community. The receiving and processing of septic waste is one of those services. The Greenville facility is regulated and monitored by both local ordinance and State Law. The facility is located central to the county and provides easy access. The facility does not pose a threat to livestock, wildlife or people. It is operated by qualified personnel that have access to proper testing procedures and equipment. The stipulations for testing on sludge and domestic septage are absolutely vital to the reduction and or elimination of harmful pathogens. All of which are laid out in the Texas Administrative Code. It is highly improbable that Mr. Ortega has the chemistry background or qualification to meet any of the requirements of the code. In addition, the application is rather ambiguous and does not disclose or stipulate any of the pre-existing conditions of the ground on which the proposed site is planned. To my knowledge, at this point, no site specific testing has been done to determine the existing chemical make up of the soil.

4. Disputed land owner testimony about the existence of wells that are well within the minimum stated approved distances as stipulated in the TCEQ regulations. This issue was brought up in the public hearings. It is my understanding that the surveys that were used in determining many of these issues were derived from maps developed back in the early 70's.

5. TCEQ mandates stipulate that no raw sewage can be stored on land sites. My understanding is that, in most cases, individuals that have their tanks pumped by Mr. Ortega do so because the system is not working properly. Therefore, it would be highly unlikely that the sewage Mr. Ortega would be storing on this land site would be properly digested, or meet the ph standards set forth by the TCEQ.

Finally, these reasons should not preclude the fact that this site could potentially hold egregious consequences for the citizens of our county and adjacent counties. This site poses serious health and economic risks to many, and benefits few.

I would like to thank you in advance for your prompt and courteous attention to this issue, and await your timely response.

Respectfully,

John L. Horn

Kathleen Hartnett White, *Chairman*
Larry R. Soward, *Commissioner*
Glenn Shankle, *Executive Director*

# TEXAS COMMISSION ON ENVIRONMENTAL QUALITY

*Protecting Texas by Reducing and Preventing Pollution*

March 13, 2007

TO: Persons on the attached mailing list.

RE: Gustavo Hernandez Ortega
Registration No. 710896

This letter is your notice that the Texas Commission on Environmental Quality (TCEQ) executive director has issued final approval of the above-named registration. Enclosed with this letter are copies of the executive director's response to comments and the issued registration.

You may file a **motion to overturn** with the chief clerk. A motion to overturn is a request for the commission to review the TCEQ executive director's approval of the registration. Any motion must explain why the commission should review the TCEQ executive director's action.

A motion to overturn must be received by the chief clerk within 23 days after the date of this letter. An original and 11 copies of a motion must be filed with the chief clerk in person, or by mail to the chief clerk's address on the attached mailing list. On the same day the motion is transmitted to the chief clerk, please provide copies to the applicant, the Executive Director's attorney, and the Public Interest Counsel at the addresses listed on the attached mailing list. If a motion to overturn is not acted on by the commission within 45 days after the date of this letter, then the motion shall be deemed overruled.

Individual members of the public may seek further information by calling the TCEQ Office of Public Assistance, toll free, at 1-800-687-4040.

Sincerely,

LaDonna Castañuela
Chief Clerk

**RESOLUTION # 42406**

Whereas, the State of Texas has received an application from Gustavo Hernandez Ortega for the operation of A-1 Affordable Septic Cleaning, and

Whereas, this business and sewage site will be located south of CR3209, approximately 3,500 feet southwest of intersection FM 513 and CR3209, and 5.2 miles north of intersection FM 513 and U.S. Hwy 69, and

Whereas, the surrounding communities have voiced their concerns about this facility and this facility undermines the public view of environmental safety, and

Whereas, Hunt Counties own Environmental Enforcement Office cannot be effective without the support of all communities, and

Whereas, the City of Greenville, now and in the future is providing a safe and State approved sewage disposal site for this type of private business, and

Whereas, this permit is being considered by the state not for public safety or public need, but for private gain,

the refund, due to Hunt County, be re-allocated to the Appraisal District for computer upgrades.

9798 On the motion by Martin, second by Thornton, the Court approved "Resolution" objecting to the proposed waste disposal site owned by Gustavo Hernandez Ortega to be located in the Prairie Valley Area, near intersection of FM513 and CR3209 in Hunt County. Judge Bobbitt stated the City of Greenville provides a safe, state approved sewage disposal site for this type of privately owned business. Resolution to be submitted to the State of Texas. Judge Bobbitt applauded the efforts of all property owners who have met, organized and wrote letters contacting local and state officials on this issue. Representative Flynn and Senator Deuell have already began to work on the loophole in the statue.

9799 On the motion by Judge Bobbitt, second by Green, the Court approved issuance of Junk Yard Permit to Miller's Used Auto Parts, located 1969 I-30 West, Greenville, Texas. All requirements have been met and fees paid. *See Attachment.*

Ms. LaDonna Castañuela, Chief Clerk (MC 105)
Texas Commission on Environmental Quality
P.O. Box 13087
Austin, TX 78711-3087

Re: Beneficial Use Site Registration No. 710896

Dear Ms. Castañuela:

The Sabine River Authority of Texas (SRA) has received a copy of the notice of receipt of an application and declaration of administrative completeness for Gustavo Hernandez Ortega (CN602999963) Beneficial Land Use Site Registration No. 710896 (RN104916820). The applicant has applied for authorization to land apply domestic septage at agronomic rates on approximately 45.3 acres located approximately 3,500 feet southeast of the intersection of Farm-to-Market Road 513 and County Road 3209. SRA is concerned about the location of this site since it includes acreage that is in the watersheds of Lake Tawakoni and Lake Fork reservoirs.

SRA is a conservation and reclamation district created by the Texas Legislature in 1949 with responsibilities to control, store, preserve, and distribute the waters of the Sabine River and its tributary streams for useful purposes. While not a regulatory agency, SRA works closely with agencies such as Texas Commission on Environmental Quality (TCEQ) to protect water quality in the surface water resources of the Sabine Basin. As TCEQ is aware, SRA serves as the planning agency for the Texas Clean Rivers Program (TCRP) in a collaborative effort between TCEQ, Texas Parks and Wildlife Department (TPWD), other agencies, local entities and the public. The TCRP goal is to maintain and improve the quality of water resources within each river basin in Texas. SRA serves as a clearinghouse for water quality data in the Sabine Basin, analyzes the data and prioritizes water quality concerns and the causes of pollution.

SRA owns and operates both Lake Fork and Lake Tawakoni Reservoirs, and would like to offer its comments on issuance of Domestic Septic Registration No. 710896 to site operator Gustavo Hernandez Ortega. The land application site is on the Basin divide between both Lake Fork and Lake Tawakoni, and as such has the potential to impact the water quality of both reservoirs. The eastern portion of this site would drain to Lake Fork

Creek thence to Lake Fork Reservoir while the western portion drains to Head Creek and/or Pool Branch thence to Caney Creek thence to the Cowleech Fork Sabine River thence to Lake Tawakoni. Lake Fork and Lake Tawakoni are both drinking water supply reservoirs and provide high quality surface water for municipal users in the North East Texas area. SRA would request that the staff of the TCEQ give careful consideration to protecting the water quality of these invaluable resources during their evaluation.

The standards established for the surface disposal of domestic septage include many general requirements as well as pollutant limits, management practices and operational standards which are required of each surface disposal site. SRA considers that a site such as this proposed site located in sensitive water supply reservoir watersheds needs to be particularly restrictive in establishing site specific management practices, pollutant limits, pathogen and vector attraction reduction requirements, frequency of monitoring and careful records keeping if it is approved by TCEQ. One of the primary water quality issues emerging with population growth in some areas of the Sabine Basin is elevated bacteria levels. Bacteria are a natural part of the environment and elevated levels can be present after rainfall runoff events. However, hundreds of species of pathogenic bacteria can be present in contaminated water which during rainfall runoff events could result in the proposed surface septage disposal area affecting downstream receiving waters.

SRA would request the staff of the TCEQ to take into consideration the location of this site and the potential impacts to surface water quality in the area. If the Executive Director issues a decision to approve this registration, SRA requests that consideration be given to adopting 'More Stringent Requirements' than the standard requirements in order to assure the protection of public health and to protect the environment from any adverse effect of any pollutants in the domestic septage applied to this site. If approved, we would also ask that TCEQ monitor this facility closely to ensure that all requirements are met during all phases of the operation.

We appreciate this opportunity to provide our comments on this matter. If you have any questions or concerns please contact Gerard Sala of my staff at (409) 746-2192.

Sincerely,

Jerry Clark

Jerry Clark
Executive Vice President and General Manager

TITLE 30 ENVIRONMENTAL QUALITY
PART 1 TEXAS COMMISSION ON ENVIRONMENTAL QUALITY
CHAPTER 50 ACTION ON APPLICATIONS AND OTHER AUTHORIZATIONS
SUBCHAPTER G ACTION BY THE EXECUTIVE DIRECTOR
RULE §50.139 **Motion to Overturn Executive Director's Decision**

(a) The applicant, public interest counsel or other person may file with the chief clerk a motion to overturn of the executive director's action on an application or water quality management plan (WQMP) update certification. Wherever other commission rules refer to a "motion for reconsideration", that term should be considered interchangeable with the term "motion to overturn executive director's decision."

(b) A motion to overturn must be filed no later than 23 days after the date the agency mails notice of the signed permit, approval, or other action of the executive director to the applicant and persons on any required mailing list for the action.

(c) A motion to overturn must be filed no later than 20 days after the date persons who timely commented on the WQMP update are notified of the response to comments and the certified WQMP update. A person is presumed to have been notified on the third day after the date the notice of the executive director's action is mailed by first class mail.

(d) An action by the executive director under this subchapter is not affected by a motion to overturn filed under this section unless expressly ordered by the commission.

(e) With the agreement of the parties or on their own motion, the commission of the general counsel may, by written order, extend the period of time for filing motions to overturn and for taking action on the motions so long as the period for taking action is not extended beyond 90 days after the date the agency mails notice of the signed permit, approval, or other action of the executive director.

(f) Disposition of motion.

(1) Unless an extension of time is granted, if a motion to overturn is not acted on by the commission within 45 days after the date the agency mails notice of the signed permit, approval, or other action of the executive director, the motion is denied.

(2) In the event of an extension, the motion to overturn is overruled by operation of law on the date fixed by the order, or in the absence of a fixed date, 90 days after the date the agency mails notice of the signed permit, approval, or other action of the executive director.

(g) When a motion to overturn is denied under subsection (f) of this section, a motion for rehearing does not need to be filed as a prerequisite for appeal. Section 80.272 of this title (relating to Motion for Rehearing) and Texas Government Code, §2001.146, regarding motions for rehearing in contested cases do not apply when a motion to overturn is denied. If applicable, the commission decision may be subject to judicial review under Texas Water Code, §5.351, or Texas Health and Safety Code, §§361.321, 382.032, or 401.341.

# TEXAS COMMISSION ON ENVIRONMENTAL QUALITY

*Protecting Texas by Reducing and Preventing Pollution*

October 10, 2006

**CERTIFIED MAIL**

Mr. Phillip Martin, Hunt County Commissioner
P.O. Box 1097
Greenville, Texas 75403

Re: Application for proposed Domestic Septage Land Application Registration No. 710896
Gustavo Hernandez Ortega Land Application Site

Dear Mr. Martin:

As requested, I am sending you a copy of the Texas Administrative Code Chapter 50, Rule 50.139(b) pertaining to the requirements for a motion to overturn on registrations. This rule states the following: (b) A motion to overturn must be filed no later than 23 days after the date the agency mails notice of the signed permit, approval, or other action of the Executive Director to the applicant and persons on any required mailing list for the action. In this case, the reference to "other action" relates to the registration being proposed. In addition, I am sending you a copy of the Texas Administrative Code Chapter 312, Rule for 312.12(2)(c) and (d) pertaining to the Executive Director's Decision and Rule for 312.13(d) and (e) pertaining to public comment on registrations and motion to overturn.

If you should have any further questions, please do not hesitate to call me at (512) 239-2012, or if by correspondence include MC 148 in the letterhead address following my name.

Sincerely,

Katherine Faz, Permit Coordinator
Land Application Team
Water Quality Division

Enclosures

control, or operator, changes in waste composition, changes in the source of sewage sludge, or waste management methods, and information regarding soils and subsurface conditions where the operation is to be located. Any information provided under this paragraph must be submitted to the executive director in duplicate form.

(c) The executive director shall determine, after review of any application, whether to approve or deny an application in whole or in part, deny with prejudice, suspend the authority to conduct an activity for a specified period of time, or amend or modify the proposed activity requested by the applicant. The determination of the executive director shall include review and action on any new applications or changes, renewals, and requests for major amendment of any existing application. In consideration of such an application, the executive director shall consider all relevant requirements of this chapter and consider all information pertaining to those requirements received by the executive director regarding the application. The written determination on any application, including any authorization granted, shall be mailed to the applicant upon the decision of the executive director.

(d) At the same time that the executive director's decision is mailed to the applicant, notice of this decision must also be mailed to all parties who submitted written information on the application, as described in §312.13(c)(2) and (3) of this title (relating to Actions and Notice).

(e) For registered land application sites located in a major sole-source impairment zone, the registrant must comply with the provisions listed in §312.11(k) of this title (relating to Permits).

Adopted September 28, 2005 Effective October 20, 2005

**§312.13. Actions and Notice.**

(a) Applicability. This section sets forth the manner in which action will be taken on applications filed with the executive director for either a permit or a registration to land apply, store, process, dispose of, or incinerate sewage sludge.

(b) Permit actions.

(1) All permit applications are subject to the standards and requirements as set forth in Chapter 39, Subchapters H - J of this title (relating to Applicability and General Provisions; Public Notice of Solid Waste Applications; and Public Notice of Water Quality Applications and Water Quality Management Plans), Chapter 50, Subchapters E - G of this title (relating to Purpose, Applicability, and Definitions; Action by the Commission; and Action by the Executive Director ), and Chapter 55, Subchapters D - F of this title (relating to Applicability and Definitions; Public Comment and Public Meetings; and Requests for Reconsideration or Contested Case Hearing).

(4) Each notice must specify both the name, affiliation, address, and telephone number of the applicant and of the commission employee who may be reached to obtain more information about the application to register the site. The notice must specify that the registration application has been provided to the county judge and that it is available for review by interested parties.

(5) Any application for a registration is subject to the standards and requirements for actions concerning amendments, modifications, transfers, and renewals of registrations, as set forth in Chapter 50; Subchapter G of this title.

(d) Public comment on registrations. A person may provide the commission with written comments on any new or major amendment applications to register a site, where applicable. The executive director shall review any written comments when they are received within 30 days of mailing the notice. The written information received will be utilized by the executive director in determining what action to take on the application for registration in accordance with §312.12(c) of this title (relating to Registrations).

(e) Motion to overturn. The applicant, public interest counsel, or other person may file with the chief clerk a motion to overturn under §50.139 of this title (relating to Motion to Overturn Executive Director's Decision) to overturn the executive director's final approval or denial of an application.

Adopted September 28, 2005 Effective October 20, 2005

RECEIVED
MAR 16 07
Hunt County
Judge's Office

March 7, 2007

To the citizens of Hunt County and surrounding counties:

In August of 2006, local residents attended a TCEQ public hearing to voice their opposition to a Beneficial Land Use Application filed by Gustavo Ortega. The B.L.U. application site number is 710896. Let me make it plain. This would allow him to dump human waste on his property derived from septic systems.

I am sorry to inform the people the Executive Director of the Texas Commission on Environmental Quality, Glen Shankle, made a decision March 5, 2007 in favor of the application.

I, along with the people I represent am very upset. It is unbelievable that a state agency calling itself "The Texas Commission on Environmental Quality" would make such an outrageous decision. This has set us back 100 years or more. They are contradicting their own philosophy on protecting our water supplies. People have underground wells and this site is situated where run off goes into Lake Tawakoni and Lake Fork. I ask the people where do you get your water? This affects you and your loved ones.

Every day I pray to God for wisdom, understanding, and patience. We have been patient; this has been going on for over a year. I do not understand TCEQ's decision to grant the application. Wisdom tells me to do the right thing and fight TCEQ's decision.

We have twenty three (23) days from the date the chief clerk sends out the answers to the questions that were ask in August of 2006. Along with these answers Glen Shankle will make the people aware of his decision to grant the application. According to TCEQ these letters will be sent out within days. I talked to Katherine Fazz on March 6, 2007 at 4:10 p.m.

I have drafted a "Motion To Overturn Executive Director's Decision". I ask the citizens, leaders of the communities, churches association and you to get involved. When we receive the letter in response to our questions, we at that time need the citizens of Northeast Texas to respond with the "Motion To Overturn Executive Director's Decision". I will make this Motion available and will notify the public.

Respectively submitted,

Phillip A. Martin

Phillip A. Martin
Commissioner Pct. 3
Hunt County

## MOTION TO OVERTURN EXECUTIVE DIRECTOR'S DECISION

Under the Texas Administrative Code Title 30 Part 1 Chapter 50 Subchapter G. Rule 50.139. I have the right to make a motion to overturn Executive Director's decision on Gustavo Hernandez Ortega's B.L.U. application site #710896, TCEQ customer number CN602999963, Regulated Entity number RN104916820.

I, (printed name)_____ of (printed home address)_____ make a motion to overturn the Executive Director's decision (Mr. Glen Shankle, Executive Director T.C.E.Q.) in reference to B.L.U. Application #710896 of Gustavo Hernandez Ortega to wit: *(Please give reason for your motion. You may attach an additional sheet if necessary)*

TITLE 30 ENVIRONMENTAL QUALITY
PART 1 TEXAS COMMISSION ON ENVIRONMENTAL QUALITY
CHAPTER 312 SLUDGE USE, DISPOSAL, AND TRANSPORTATION
SUBCHAPTER D PATHOGEN AND VECTOR ATTRACTION REDUCTION
RULE §312.83 **Vector Attraction Reduction**

(a) Compliance requirements.

(1) One of the vector attraction reduction requirements in subsection (b)(1)-(10) of this section shall be met when bulk sewage sludge is applied to agricultural land, forest, a public contact site, or a reclamation site.

(2) One of the vector attraction reduction requirements in subsection (b) paragraphs (1)-(8) of this section shall be met when bulk sewage sludge is applied to a lawn, home garden, or is sold or given away in a bag or other container.

(3) One of the vector attraction reduction requirements in subsection (b)(1)-(11) of this section shall be met when sewage sludge (other than domestic septage) is placed on an active sewage sludge unit.

(4) One of the vector attraction reduction requirements in subsection (b)(9), (10), or (12) of this section shall be met when domestic septage is applied to agricultural land, forest, or a reclamation site.

(5) One of the vector attraction reduction requirements in subsection (b)(9)-(12) of this section shall be met when domestic septage is placed on an active sewage sludge unit.

(b) Compliance alternatives.

(1) The mass of volatile solids in the sewage sludge shall be reduced by a minimum of 38%.

(2) If an anaerobically digested sewage sludge can not meet the 38% volatile solids reduction requirement in paragraph (1) of this subsection, vector attraction reduction can be demonstrated by digesting a portion of the previously digested sewage sludge anaerobically in a laboratory in a bench-scale unit for 40 additional days at a temperature between 30 and 37 degrees Celsius. If at the end of the 40 days, the volatile solids in the sewage sludge at the beginning of that period is reduced by less than 17%, vector attraction reduction is achieved.

(3) If an aerobically digested sewage sludge can not meet the 38% volatile solids reduction requirement in paragraph (1) of this subsection, vector attraction reduction can be demonstrated by digesting a portion of the previously digested sewage sludge that has a percent solids of 2.0% or less aerobically in a laboratory in a bench-scale unit for 30 additional days at 20 degrees Celsius. If at the end of the 30 days, the volatile solids in the sewage sludge at the beginning of that period is reduced by less than 15%, vector attraction reduction is achieved.

(4) The specific oxygen uptake rate (SOUR) for sewage sludge treated in an aerobic process shall be equal to or less than 1.5 milligrams of oxygen per hour per gram of total solids (dry weight basis) at a temperature of 20 degrees Celsius.

(5) Sewage sludge shall be treated in an aerobic process for 14 days or longer. During that time, the temperature of the sewage sludge shall be higher than 40 degrees Celsius and the average temperature of sewage sludge shall be higher than 45 degrees Celsius.

(6) The pH of sewage sludge shall be raised to 12 or higher by alkali addition and, without the addition of more alkali, shall remain at 12 or higher for two hours and then remain at a pH of 11.5 or higher for an additional 22 hours.

(7) The percent solids of sewage sludge that does not contain unstabilized solids generated in a primary wastewater treatment process shall be equal to or greater than 75% based on the moisture content and total solids prior to mixing with other materials.

(8) The percent solids of sewage sludge that contains unstabilized solids generated in a primary wastewater treatment process shall be equal to or greater than 90% based on the moisture content and total solids prior to mixing with other materials.

(9) Sewage sludge shall be injected below the surface of the land. No significant amount of the sewage sludge shall be present on the land surface within one hour after the sewage sludge is injected. If the sewage sludge that is injected below the surface of the land is Class A with respect to pathogens, as described in §312.82 (relating to Pathogen Reduction), the sewage sludge shall be injected below the land surface within eight hours after the sewage sludge is discharged from the pathogen treatment process.

(10) Sewage sludge applied to the land surface or placed on a surface disposal site shall be incorporated into the soil within six hours after application or placement on the land. If the sewage sludge that is incorporated into the soil is Class A with respect to pathogens, as described in §312.82 of this title (relating to Pathogen Reduction), the sewage sludge shall be applied to or placed on the land within eight hours after the sewage sludge is discharged from the pathogen treatment process.

(11) Sewage sludge placed on an active sewage sludge unit shall be covered with soil or other material at the end of each operating day.

(12) The pH of domestic septage shall be raised to 12 or higher by alkali addition and, without the addition of more alkali, shall remain at 12 or higher for 30 minutes.

**Source Note:** The provisions of this §321.83 adopted to be effective October 13, 1995, 20 TexReg 7840.

TITLE 30 ENVIRONMENTAL QUALITY
PART 1 TEXAS COMMISSION ON ENVIRONMENTAL QUALITY
CHAPTER 312 SLUDGE USE, DISPOSAL, AND TRANSPORTATION
SUBCHAPTER D PATHOGEN AND VECTOR ATTRACTION REDUCTION
RULE §312.82 **Pathogen Reduction**

(a) Sewage sludge--Class A.

(1) Compliance requirements--Class A.

(A) For a sewage sludge to be classified as Class A with respect to pathogens, the requirements in subparagraphs (B) and (C) of this paragraph and the requirements of one of the alternatives listed in paragraph (2) of this subsection must be met.

(B) The requirements of the chosen alternative for pathogen reduction from paragraph (2) of this subsection must be met prior to or at the same time as the vector attraction reduction requirements, except the requirements in §312.83(b)(6) - (8) of this title (relating to Vector Attraction Reduction).

(C) Either the density of fecal coliform in the sewage sludge must be less than 1,000 Most Probable Number per gram of total solids (dry weight basis) or the density of Salmonella (sp. bacteria) in the sewage sludge must be less than three Most Probable Number per four grams of total solids (dry weight basis) at the time the sewage sludge is used or disposed of, at the time the sewage sludge is prepared for sale or given away in a bag or other container for application to the land, or at the time the sewage sludge or material derived from sewage sludge is prepared to meet the requirements in §312.41(b), (c), (e), or (f) of this title (relating to Applicability).

(2) Compliance alternatives--Class A.

(A) Alternative 1. The temperature of the sewage sludge that is used or disposed of must be maintained at a specified value for a period of time.

(i) When the percent solids of the sewage sludge is 7.0% or higher, the temperature of the sewage sludge must be 50 degrees Celsius or higher; the time period must be 20 minutes or longer; and the temperature and time period must be determined using the equation in this clause, except when small particles of sewage sludge are heated by either warmed gases or an immiscible liquid.

Attached Graphic

(ii) When the percent solids of the sewage sludge is 7.0% or higher and small particles of sewage sludge are heated by either warmed gases or an immiscible liquid, the temperature of the sewage sludge must be 50 degrees Celsius or higher, the time period must be 15 seconds or longer, and the temperature and time period must be determined using the equation in clause (i) of this subparagraph.

(iii) When the percent solids of the sewage sludge is less than 7.0% and the time period is at least 15 seconds, but less than 30 minutes, the temperature and time period must be determined using the equation in clause (i) of this subparagraph.

(iv) When the percent solids of the sewage sludge is less than 7.0%; the temperature of the sewage sludge is 50 degrees Celsius or higher; and the time period is 30 minutes or longer, the temperature and time period must be determined using the equation in this clause.

Attached Graphic

(B) Alternative 2. The temperature and pH of the sewage sludge that is used or disposed of must be maintained at specific values for periods of time.

(i) The pH of the sewage sludge must be raised to above 12 and must remain above 12 for 72 hours.

(ii) The temperature of the sewage sludge must be above 52 degrees Celsius for 12 hours or longer during the period that the pH of the sewage sludge is above 12.

(iii) At the end of the 72-hour period during which the pH of the sewage sludge is above 12, the sewage sludge must be air dried to achieve a percent solids in the sewage sludge greater than 50%.

(C) Alternative 3. The sewage sludge that is used or disposed of must be analyzed prior to pathogen treatment to determine whether the sewage sludge contains enteric viruses and viable helminth ova.

(i) When the density of enteric viruses in the sewage sludge prior to pathogen treatment is less than one Plaque-forming Unit per four grams of total solids (dry weight basis), the sewage sludge is Class A with respect to enteric viruses until the next monitoring episode for the sewage sludge.

(ii) When the density of enteric viruses in the sewage sludge prior to pathogen treatment is equal to or greater than one Plaque-forming Unit per four grams of total solids (dry weight basis), the sewage sludge is Class A with respect to enteric viruses when the density of enteric viruses in the sewage sludge after pathogen treatment is less than one Plaque-forming Unit per four grams of total solids (dry weight basis) and when the values or ranges of values for the operating parameters for the pathogen treatment process that produces the sewage sludge that meets the enteric virus density requirement are documented.

(iii) After the enteric virus reduction in clause (ii) of this subparagraph is demonstrated for the pathogen treatment process, the sewage sludge continues to be Class A with respect to enteric viruses when the values for the pathogen treatment process operating parameters are consistent with the values or ranges of values documented in clause (ii) of this subparagraph.

(iv) When the density of viable helminth ova in the sewage sludge prior to pathogen treatment is less than one per four grams of total solids (dry weight basis), the sewage sludge is Class A with respect to viable helminth ova until the next monitoring episode for the sewage sludge.

(v) When the density of viable helminth ova in the sewage sludge prior to pathogen treatment is equal to or greater than one per four grams of total solids (dry weight basis), the sewage sludge is Class A with respect to viable helminth ova when the density of viable helminth ova in the sewage sludge after pathogen treatment is less than one per four grams of total solids (dry weight basis) and when the values or ranges of values for the operating parameters for the pathogen treatment process that produces the sewage sludge that meets the viable helminth ova density requirement are documented.

(vi) After the viable helminth ova reduction in clause (v) of this subparagraph is demonstrated for the pathogen treatment process, the sewage sludge continues to be Class A with respect to viable

helminth ova when the values for the pathogen treatment process operating parameters are consistent with the values or ranges of values documented in clause (v) of this subparagraph.

(D) Alternative 4. The sewage sludge that is used or disposed of must be analyzed prior to pathogen treatment to determine whether the sewage sludge contains enteric viruses and viable helminth ova.

(i) The density of enteric viruses in the sewage sludge must be less than one Plaque-forming Unit per four grams of total solids (dry weight basis) at the time the sewage sludge is used or disposed of, at the time the sewage sludge is prepared for sale or given away in a bag or other container for application to the land, or at the time the sewage sludge or material derived from sewage sludge is prepared to meet the requirements in §312.41(b), (c), (e), or (f) of this title.

(ii) The density of viable helminth ova in the sewage sludge must be less than one per four grams of total solids (dry weight basis) at the time the sewage sludge is used or disposed of, at the time the sewage sludge is prepared for sale or given away in a bag or other container for application to the land, or at the time the sewage sludge or material derived from sewage sludge is prepared to meet the requirements in §312.41(b), (c), (e), or (f) of this title.

(E) Alternative 5 (Processes to Further Reduce Pathogens (PFRP). Sewage sludge that is used or disposed of must be treated in one of the PFRP described in 40 Code of Federal Regulations (CFR) Part 503, Appendix B.

(F) Alternative 6 (PFRP Equivalent). Sewage sludge that is used or disposed of must be treated in a process that has been approved by the United States Environmental Protection Agency (EPA) as being equivalent to those in subparagraph (E) of this paragraph.

(b) Sewage sludge--Class B.

(1) Compliance requirements--Class B.

(A) For a sewage sludge to be classified as Class B with respect to pathogens, the requirements in subparagraphs (B) and (C) of this paragraph must be met. As an alternative for a sewage sludge to be classified as Class B, the requirements of subparagraph (B) of this paragraph and paragraph (2) of this subsection must be met.

(B) The site restrictions in paragraph (3) of this subsection must be met when sewage sludge that is classified as Class B with respect to pathogens is applied to the land for beneficial use.

(C) A minimum of seven representative samples of the sewage sludge must be collected within 48 hours of the time that the sewage sludge is used or disposed of during each monitoring episode for the sewage sludge. The geometric mean of the density of fecal coliform for the samples collected must be less than either 2,000,000 Most Probable Number per gram of total solids (dry weight basis) or 2,000,000 Colony-forming Units per gram of total solids (dry weight basis).

(2) Processes to Significantly Reduce Pathogens (PSRP) compliance alternatives--Class B. Sewage sludge that is used or disposed of must be treated in one of the PSRP described in 40 CFR Part 503, Appendix B, or must be treated by an equivalent process approved by the EPA, so long as all of the following requirements are met by the generator of the sewage sludge.

(A) Prior to use or disposal, all the sewage sludge must have been generated from a single location,

except as provided in subparagraph (F) of this paragraph.

(B) An independent Texas registered professional engineer must make a certification to the generator of a sewage sludge that the wastewater treatment facility generating the sewage sludge is designed to achieve one of the PSRP at the permitted design loading of the facility. The certification need only be repeated if the design loading of the facility is increased. The certification must include a statement indicating that the design meets all the applicable standards specified in 40 CFR Part 503, Appendix B.

(C) Prior to any off-site transportation or on-site use or disposal of any sewage sludge generated at a wastewater treatment facility, the chief certified operator of the wastewater treatment facility or other responsible official who manages the PSRP at the wastewater treatment facility for the permittee, shall certify that the sewage sludge underwent at least the minimum operational requirements necessary in order to meet one of the PSRP. The acceptable processes and the minimum operational and recordkeeping requirements must be in accordance with established EPA final guidance.

(D) All certification records and operational records describing how the requirements of this paragraph were met must be kept by the generator for a minimum of three years and be available for inspection by commission staff for review.

(E) In lieu of a generator obtaining a certification as specified in subparagraph (B) of this paragraph, the executive director will accept from the EPA a finding of equivalency to the defined PSRP.

(F) If the sewage sludge is generated from a mixture of sources, resulting from a person who prepares sewage sludge from more than one wastewater treatment facility, the resulting derived product must meet one of the PSRP, and meet the certification, operation, and recordkeeping requirements of this paragraph.

(3) Site restrictions.

(A) Food crops with harvested parts totally above the land surface that touch the sewage sludge/soil mixture must not be harvested from the land for at least 14 months after the application of sewage sludge.

(B) Food crops with harvested parts below the surface of the land must not be harvested for at least 20 months after application of sewage sludge when the sewage sludge remains on the land surface for four months or longer prior to incorporation into the soil.

(C) Food crops with harvested parts below the surface of the land must not be harvested for at least 38 months after application of sewage sludge when the sewage sludge remains on the land surface for less than four months prior to the incorporation into the soil.

(D) Food crops, feed crops, and fiber crops must not be harvested for at least 30 days after application of sewage sludge.

(E) Animals must not be allowed to graze on the land for at least 30 days after application of sewage sludge.

(F) Turf grown on land where sewage sludge is applied may not be harvested for at least one year after application of sewage sludge when the harvested turf is placed on either land with a high potential for public exposure or a lawn.

(G) Public access to land with a high potential for public exposure must be restricted for at least one year after application of sewage sludge.

(H) Public access to land with a low potential for public exposure must be restricted for at least 30 days after application of the sewage sludge.

(c) Domestic septage.

(1) The site restrictions in subsection (b)(3) of this section must be met if domestic septage is applied to agricultural land, forest, or a reclamation site.

(2) The pH of domestic septage applied to agricultural land, forest, or a reclamation site must be raised to 12 or higher by alkali addition and, without the addition of more alkali, must remain at 12 or higher for a period of 30 minutes.

---

**Source Note:** The provisions of this §312.82 adopted to be effective October 13, 1995, 20 TexReg 7840; amended to be effective October 20, 2005, 30 TexReg 6743

TITLE 30 ENVIRONMENTAL QUALITY
PART 1 TEXAS COMMISSION ON ENVIRONMENTAL QUALITY
CHAPTER 312 SLUDGE USE, DISPOSAL, AND TRANSPORTATION
SUBCHAPTER B LAND APPLICATION FOR BENEFICIAL USE AND STORAGE AT BENEFICIAL USE SITES

## RULE §312.42 General Requirements

(a) No person shall apply sewage sludge, including domestic septage, to the land except in accordance with the requirements in this subchapter.

(b) No person shall apply sewage sludge that does not meet the metal concentrations in §312.43(b)(3) of this title to land where any of the cumulative metal loading rates in §312.43(b)(2) of this title (relating to Metal Limits) have been reached.

(c) No person shall apply domestic septage to agricultural land, forest, or a reclamation site during a 365 day period where the annual application rate in §312.43(c) of this title has been reached.

(d) The person who applies sewage sludge, including domestic septage, to the land shall obtain information needed to comply with the requirements in this subchapter.

(e) If a treatment works provides bulk sewage sludge to a person who applies the bulk sewage sludge to the land, the treatment works shall provide the person who applies the bulk sewage sludge to the land notice and necessary information to comply with the requirements in this subchapter.

(f) If a treatment works provides bulk sewage sludge to a person who prepares the bulk sewage sludge for application to the land, the treatment works shall provide the person who prepares the bulk sewage sludge for application to the land notice and necessary information to comply with the requirements in this subchapter.

(g) The person who applies bulk sewage sludge to the land shall provide the owner or lease-holder of the land on which the bulk sewage sludge is applied notice and necessary information to comply with the requirements in this subchapter.

(h) If a treatment works provides sewage sludge to a person who prepares the sewage sludge for sale or give away in a bag or other container for application to the land, the treatment works shall provide the person who prepares the sewage sludge for sale or give away in a bag or other container for application to the land notice and information to comply with the requirements in this subchapter.

(i) The applicant shall determine the concentration of regulated metals in accordance with §312.12(a)(1)(E) of this title (relating to Registration of Land Application Activities) and demonstrate to the satisfaction of the commission that the proposed cumulative metal loading will result in a non-toxic condition or reduce the toxicity of the existing soil.

TITLE 30 ENVIRONMENTAL QUALITY

PART 1 TEXAS COMMISSION ON ENVIRONMENTAL QUALITY

CHAPTER 312 SLUDGE USE, DISPOSAL, AND TRANSPORTATION

SUBCHAPTER B LAND APPLICATION FOR BENEFICIAL USE AND STORAGE AT BENEFICIAL USE SITES

## RULE §312.41 Applicability

(a) Application to land. This subchapter applies to any person who prepares sewage sludge that is applied to the land, to any person who applies sewage sludge to the land, to sewage sludge applied to the land, and to the land on which sewage sludge is applied.

(b) Bulk sewage sludge.

(1) Section 312.42 of this title (relating to General Requirements) and §312.44 of this title (relating to Management Practices) do not apply when bulk sewage sludge is applied to the land if the bulk sewage sludge meets the metal concentrations in §312.43(b)(3) of this title (relating to Metal Limits), the Class A pathogen requirements in §312.82(a) of this title (relating to Pathogen Reduction), and one of the vector attraction reduction requirements in §312.83(b)(1)-(8) of this title (relating to Vector Attraction Reduction).

(2) The executive director may apply any or all of §312.42 and §312.44 of this title to the bulk sewage sludge described in this subsection on a case-by-case basis after determining that the general requirements or management practices are needed to protect public health and the environment from any reasonably anticipated adverse effect that may occur from any metal in the bulk sewage sludge.

(c) General Requirements for Bulk Derived Materials.

(1) Section 312.42 of this title (relating to General Requirements) and the management practices in §312.44 of this title (relating to Management Practices) do not apply when a bulk material derived from sewage sludge is applied to the land if the derived bulk material meets the metal concentrations in §312.43(b)(3) of this title (relating to Metal Limits), the Class A pathogen requirements in §312.82(a) of this title (relating to Pathogen Reduction), and one of the vector attraction reduction requirements in §312.83(b)(1)-(8) of this title (relating to Vector Attraction Reduction).

(2) The executive director may apply any or all of §312.42 and §312.44 to the bulk material described in this subsection on a case-by-case basis after determining that the general requirements or management practices are needed to protect public health and the environment from any reasonably anticipated adverse effect that may occur from any metal in the bulk sewage sludge.

(d) Special Requirements for Certain Bulk Derived Materials. The requirements in this subchapter may not apply when a bulk material derived from sewage sludge is applied to the land; if the sewage sludge from which the bulk material is derived meets the metal concentrations in §312.43(b)(3) of this title the Class A pathogen requirements in §312.82(a) of this title, and one of the vector attraction reduction requirements in §312.83(b)(1)-(8) of this title. The executive director may apply any or all of §312.42 and §312.44 of this title to the bulk derived material on a case-by-case basis after determining that the general requirements or management practices are needed to protect public health and the environment

from any reasonably anticipated adverse effect that may occur from any metal in the sewage sludge.

(e) Bagged sludge. Sewage sludge sold or given away in a bag or other container for application to the land. Section 312.42 and §312.44 of this title may not apply when sewage sludge is sold or given away in a bag or other container for application to the land if the sewage sludge sold or given away in a bag or other container for application to the land meets the metal concentrations in §312.43(b)(3) of this title, the Class A pathogen requirements in §312.82(a) of this title, and one of the vector attraction reduction requirements in §312.83(b)(1)-(8) of this title.

(f) Bagged derived materials. Section 312.42 and §312.44 of this title may not apply when a material derived from sewage sludge is sold or given away in a bag or other container for application to the land if the derived material meets the metal concentrations in §312.43(b) of this title, the Class A pathogen requirements in §312.82(a) of this title, and one of the vector attraction reduction requirements in §312.83(b)(1)-(8) of this title.

(g) Bagged materials. The requirements in this subchapter may not apply when a material derived from sewage sludge is sold or given away in a bag or other container for application to the land if the sewage sludge from which the material is derived meets the metal concentrations in §312.43(b)(3) of this title (relating to Metal Limits), the Class A pathogen requirements in §312.82(a) of this title (relating to Pathogen Reduction), and one of the vector attraction reduction requirements in §312.83(b)(1)-(8) of this title.

---

**Source Note:** The provisions of this §312.41 adopted to be effective October 13, 1995, 20 TexReg 7840.

| TITLE 30 | ENVIRONMENTAL QUALITY |
| PART 1 | TEXAS COMMISSION ON ENVIRONMENTAL QUALITY |
| CHAPTER 312 | SLUDGE USE, DISPOSAL, AND TRANSPORTATION |
| SUBCHAPTER B | LAND APPLICATION FOR BENEFICIAL USE AND STORAGE AT BENEFICIAL USE SITES |
| RULE §312.50 | **Storage and Staging of Sludge at Beneficial Use Sites** |

(a) Except as provided in subsection (b) of this section, storage of sludge at a beneficial land application site must not exceed 90 days. Storage is allowed only when the following requirements are carried out.

(1) Written authorization must be obtained from the executive director prior to construction of the storage area.

(2) The storage area must be operated and maintained to prevent surface water runoff and to prevent a release to groundwater. Discharge of storm water or wastewater which has come into contact with sewage sludge is prohibited. The storage area shall be designed to collect such runoff. Any runoff collected during the storage of sewage sludge shall be disposed in a manner to prevent a release to groundwater.

(3) The storage area shall be designed, constructed, and operated in a manner which protects public health and the environment.

(4) The storage area must be lined to prevent a release to groundwater. Natural or artificial liners are required for leachate control. A natural liner or equivalent barrier of one foot of compacted clay with a permeability coefficient of $1 \times 10^{-7}$ cm/sec or less must be provided. Various flexible synthetic membrane lining materials may be used in lieu of soil liners if prior written approval has been obtained from the executive director. The registrant shall furnish certification by a licensed professional engineer or licensed professional geoscientist that the completed storage area lining meets the appropriate criteria described in this section prior to using the facilities. The certification shall be signed, sealed, and dated by a licensed professional engineer or licensed professional geoscientist.

(5) The application shall outline measures to be taken to minimize vectors and to avoid public health nuisances such as odors.

(6) The storage area shall be fenced or other methods shall be used, if necessary to control access by humans or domestic animals.

(7) Berms or dikes shall be constructed to contain the waste without leakage.

(8) Liquid sludge must be stored in an enclosed vessel.

(9) Processing of sludge is prohibited unless a permit is obtained from the commission.

(b) Up to an additional 90 days of storage will be allowed with the prior approval of the appropriate Texas Commission on Environmental Quality regional office, for reasons associated with application

area flooding, saturated soils, or frozen soils.

(c) Staging of sewage sludge on-site, prior to land application, is allowable without executive director approval. Staging of sewage sludge may only occur for a maximum of seven calendar days.

TEXAS
COMMISSION
ON ENVIRONMENTAL
QUALITY

2007 MAR 22 PM 3:11

CHIEF CLERKS OFFICE

**MOTION TO OVERTURN EXECUTIVE DIRECTOR'S DECISION**

Under the Texas Administrative Code Title 30 Part 1 Chapter 50 Subchapter G. Rule 50.139. I have the right to make a motion to overturn Executive Director's decision on Gustavo Hernandez Ortega's B.L.U. application site #710896, TCEQ customer number CN602999963, Regulated Entity number RN104916820.

I, (printed name) John. L. Horn of (printed home address) PO Box 1097 Greenville, TX make a motion to overturn the Executive Director's decision (Mr. Glen Shankle, Executive Director T.C.E.Q.) in reference to B.L.U. Application #710896 of Gustavo Hernandez Ortega to wit: *(Please give reason for your motion. You may attach an additional sheet if necessary)*

attached

Date: 3/19/07

Signature: John L. Horn
Hunt County Judge

Phone number: 903-408-4146

MAIL IMMEDIATELY or within 23 days of March 14, 2007
with **original and 11 copies**

TO:
LaDonna Castanuela
Chief Clerk (MC-105)
Texas Commisison Environmental Quality
P. O. Box 13087
Austin, Texas 78711-3087

# HUNT COUNTY

POST OFFICE BOX 1097 • GREENVILLE, TEXAS 75403-1097

JOHN L. HORN
HUNT COUNTY JUDGE

(903) 408-4299 FAX

Ms. LaDonna Castanuela
Chief Clerk
Texas Commission on Environmental Quality
Office of the Chief Clerk MC-105
P.O. Box 13087
Austin, Texas 78711-3087

Dear Ms. Castanuela,

In response to the letter that I received on March 13, 2007, please accept this letter as a formal request to file a "motion to overturn" a decision made by Glen Shankle, Executive Director of the Texas Commission on Environmental Quality. According to the letter from his office he states that he has granted Mr. Gustavo Hernandez Ortega ( Registration Number 710896) final approval for all stipulations regarding this registration.

As requested in the letter this motion to overturn is being filed for the following reasons:

1. As of April 24, 2006, the Hunt County Commissioners Court filed a resolution with the State of Texas ( Resolution # 42406) that clearly stated its opposition to the application made by Mr. Ortega. The reasons stated in the resolution were as follows:
    a. ...surrounding communities have voiced their concerns about this facility...this facility undermines the public view of environmental safety.
    b. ...Hunt County Environmental Enforcement Office cannot be effective
    c. ...City of Greenville, now and in the future is providing a safe and State approved sewage disposal site for this type of private business
    d. ...this permit is being considered by the state not for public safety or public need but for private gain.

    I believe the above stated reasons in the resolution convey the thoughts and concerns of the entire governing body of Hunt County and also takes into consideration the welfare and concerns of the citizens they represent.

2. A review of a letter that was written to Ms. Castanuela of (TCEQ) back on May 2, 2006, by Jerry Clark, Executive Vice President and General Manager of the Sabine River Authority of Texas, indicated several concerns relating to the approval of such an action. In brief the letter intimated the following concerns:
   a. " SRA considers that a site such as this proposed site located in sensitive water supply reservoir watersheds…"
   b. "…SRA requests that consideration be given to adopting 'More Stringent Requirements' than the standard requirements in order to assure the protection of public health and to protect the environment from any adverse effect of any pollutants in the domestic septage applied to this site."
   c. "SRA is concerned about the location of this site since it includes acreage that is in the watersheds of Lake Tawakoni and Lake Fork reservoirs."

   As this letter explains, the SRA is a conservation and reclamation district set up in 1949 by the Texas Legislature. SRA was given the expressed duty to " control, store, preserve and distribute the waters of the Sabine River and its tributary streams for useful purposes.". It would appear that the decision by the executive director Mr. Shankle (TCEQ) has almost completely discounted any responsibilities that the Texas Legislature bestowed on the SRA.

   Again, the letter from SRA makes it very clear that the current rules and regulations as set forth by TCEQ are not stringent enough to allow for Mr. Ortega's proposed site. SRA has the local obligation to point out factors that will directly effect the water quality of wild-life, livestock, and most important, the citizens of the areas these particular reservoirs serve. SRA serves to provide invaluable information to the Texas Parks and Wildlife Department and as a planning source for the Texas Clean Rivers Program. It would appear that the only areas that were significantly addressed in the approval were the time periods and frequency of inspection. This leads to a labyrinth of obstacles when it comes to the "who" and at what expense to local taxpayers.

   I find Mr. Shankle's obvious disregard for SRA input as gross oversight to the facts of his decision and as a "stand alone" reason for overturning his decision. To not take their advise not only lessens the validity of his decision, but casts a serious cloud over the back-bone of our legislative bodies.

3. Hunt County currently maintains a population of more than 85,000 people. Greenville is the county seat and provides a host of services to the community. The receiving and processing of septic waste is one of those services. The Greenville facility is regulated and monitored by both local ordinance and State Law. The facility is located central to the county and provides easy access. The facility does not pose a threat to livestock, wildlife or people. It is operated by qualified personnel that have access to proper testing procedures and equipment. The stipulations for testing on sludge and domestic septage are absolutely vital to the reduction and or elimination of harmful pathogens. All of which are laid out in the Texas Administrative Code. It is highly improbable that Mr. Ortega has the chemistry background or qualification to meet any of the requirements of the code. In addition, the application is rather ambiguous and does not disclose or stipulate any of the pre-existing conditions of the ground on which the proposed site is planned. To my knowledge, at this point, no site specific testing has been done to determine the existing chemical make up of the soil.

4. Disputed land owner testimony about the existence of wells that are well within the minimum stated approved distances as stipulated in the TCEQ regulations. This issue was brought up in the public hearings. It is my understanding that the surveys that were used in determining many of these issues were derived from maps developed back in the early 70's.

5. TCEQ mandates stipulate that no raw sewage can be stored on land sites. My understanding is that, in most cases, individuals that have their tanks pumped by Mr. Ortega do so because the system is not working properly. Therefore, it would be highly unlikely that the sewage Mr. Ortega would be storing on this land site would be properly digested, or meet the ph standards set forth by the TCEQ.

Finally, these reasons should not preclude the fact that this site could potentially hold egregious consequences for the citizens of our county and adjacent counties. This site poses serious health and economic risks to many, and benefits few.

I would like to thank you in advance for your prompt and courteous attention to this issue, and await your timely response.

Respectfully,

John L. Horn

Kathleen Hartnett White, *Chairman*
Larry R. Soward, *Commissioner*
Glenn Shankle, *Executive Director*

# TEXAS COMMISSION ON ENVIRONMENTAL QUALITY

*Protecting Texas by Reducing and Preventing Pollution*

March 13, 2007

TO: Persons on the attached mailing list.

RE: Gustavo Hernandez Ortega
Registration No. 710896

This letter is your notice that the Texas Commission on Environmental Quality (TCEQ) executive director has issued final approval of the above-named registration. Enclosed with this letter are copies of the executive director's response to comments and the issued registration.

You may file a **motion to overturn** with the chief clerk. A motion to overturn is a request for the commission to review the TCEQ executive director's approval of the registration. Any motion must explain why the commission should review the TCEQ executive director's action.

A motion to overturn must be received by the chief clerk within 23 days after the date of this letter. An original and 11 copies of a motion must be filed with the chief clerk in person, or by mail to the chief clerk's address on the attached mailing list. On the same day the motion is transmitted to the chief clerk, please provide copies to the applicant, the Executive Director's attorney, and the Public Interest Counsel at the addresses listed on the attached mailing list. If a motion to overturn is not acted on by the commission within 45 days after the date of this letter, then the motion shall be deemed overruled.

Individual members of the public may seek further information by calling the TCEQ Office of Public Assistance, toll free, at 1-800-687-4040.

Sincerely,

LaDonna Castañuela
Chief Clerk

LDC/cz

**EXECUTIVE DIRECTOR'S RESPONSE TO PUBLIC COMMENT**

**(FILED 2/16/07)**

---

The Executive Director (ED) of the Texas Commission on Environmental Quality (the Commission or TCEQ) files this Response to Public Comment (Response) on the application of Gustavo Hernandez Ortega (Applicant) for Registration No. 710896. The Office of Chief Clerk received timely comment letters or oral formal comments at the public meeting from the following persons:

**Public Officials and Public Entities:** The Commissioners Court of Hunt County, Texas State Senator Robert F. Deuell, M.D. (Senate District 2), State Representative Dan Flynn (House District 2), Hunt County Commissioner Phillip Martin, and the Sabine River Authority. **Groups:** The Mamie Road Neighborhood Watch and Prairie Valley Baptist Church. **Members of the general public:** Jeri Stephens Aikens, Michele Arguello, Jose Arguello, Betty and Donald Atkins, Joyce Bailey, Crystal Barcheers, Timothy E. Barcheers, Monte Barrow, Frances Black, Serena Booth, Carolyn Bowen, Sigrid Bowles, Don L. Bowles, Lisa Brannon, Lisa M. Brehm, Pennie Brignon, Kathleen Brown, Jan Burks, Arlen S. Butler, Jan Dooley Byrd, Kenneth Byrd, Robert Byrd, Steve Bryd, Sandra C. Clark, Samuel Coats, Gennie Colbert, John Cole, Linda Cole, Pat Coley, Charles and Patricia Conine, James L. Coody, Tom Crowther, Gayla Ann Cummings, Steven A. Cummings, Betty J. Davies, Kelli B. Davies, Mark Davies, Geraldine M. Deppe, William S. Deppe, Ann Dial, Larry J. Dick, Ann Dooley, Ben and Mary Dooley, Dora Dooley, J.B. Dooley, John and Jana

## BACKGROUND

### Description of Facility

The Applicant has applied to TCEQ for a new registration that will authorize the land application of domestic septage at a rate of 68,077 gallons per acre per year on 40 acres of land. The land application area is owned by the Applicant. No discharge of pollutants into water in the state is authorized by this registration. The proposed site is located on a private road south of County Road 3209, approximately 3,500 feet southeast of the intersection of Farm-to-Market Road (FM) 513 and County Road 3209 and approximately 5.2 miles north of the intersection of FM 513 and U.S. Highway 69 in Hunt County, Texas.

### Procedural Background

The application for a new registration was received on February 27, 2006 and declared administratively complete on March 30, 2006. The Notice of Receipt of an Application and Declaration of Administrative Completeness along with a copy of the application for registration was mailed on April 6, 2006 and made available for viewing at the Hunt County Judge's Office. A decision was made to hold a public meeting and The Notice of Public Meeting was published in the *Herald Banner* on July 29, 2006. A public meeting was held on August 29, 2006 in Greenville, Texas and the public comment period ended at the close of the public meeting.

## COMMENTS AND RESPONSES

**COMMENT 1:**

There were concerns that this type of land application poses potential health issues, for example, from air-borne diseases carried by flies and mosquitoes, to humans and wildlife. Many were concerned with the health issues of land applying "raw sewage."

sewage sludge is Class A with respect to pathogens, as described in § 312.82 of this title (relating to Pathogen Reduction), the sewage sludge must be applied to or placed on the land within eight hours after the sewage sludge completes the pathogen treatment process; or

3. The pH of domestic septage must be raised to 12 or higher by alkali addition and, without the addition of more alkali, must remain at 12 or higher for 30 minutes.

As shown in the application and in correspondence received August 25, 2006, the Applicant intends to meet this requirement by choosing option #3. The Applicant will pre-treat the septage with bagged hydrated lime at a rate of 20 lbs. per 1,000 gallons, or 70 lbs. per load, to raise the pH level of the septage to 12.0 or higher prior to land application. A higher pH encourages pathogen inactivation and die-off. In addition, records that demonstrate these conditions are met for each load of domestic septage must be maintained at this site for five years, as required by 30 TAC § 312.47(b). The registration also requires a thorough description in the Annual Report on how the Applicant is meeting the pathogen and vector attraction requirements.

**COMMENT 2:**

There were many concerns about the potential contamination of groundwater and surface water resources.

**RESPONSE 2:**

The registration does not authorize discharge of waste into water in the state. To prevent run-off beyond the active application area, the Applicant will be required to apply septage uniformly and at agronomic rates over the surface of the land. Additionally, the Applicant will not be allowed to land apply to areas where permeable surface soils are less than 2 feet thick or to any areas having a slope in excess of 8%. Also, the Applicant may not land apply during rainstorms or during periods when surface soils are water-saturated.

was inspected prior to the public meeting by a TCEQ Regional Inspector and the inspector found no evidence of any other water wells.

The area produces groundwater from the Nacatoch Aquifer. The Nacatoch Aquifer is designated as a minor aquifer by the TWDB. The aquifer dips further below the surface as it travels towards the east. Two miles west of the proposed land application area groundwater is produced from approximately 150 feet below the surface. Two miles to the east of the proposed land application area groundwater is found from 764 to 942 feet below the surface. At the proposed land application site, it is expected that groundwater from the Nacatoch Aquifer is found approximately 400 feet below the surface.

Well drilling reports indicated confining sediment layers between the surface and groundwater producing intervals. The shallow sub-surface clays possess low permeable values. The surface clays and subsurface confining layers were determined to provide protection from direct recharge to the groundwater producing intervals 400 feet beneath the proposed application area.

The registration also includes buffer zone requirements that restrict how close a land application area may be located to water bodies to minimize the potential of contaminating water supplies. TCEQ rules at 30 TAC § 312.44(c) require the following separation from application areas:

1. Surface water- 200 feet if sludge not incorporated into soil and 33 feet if soil is incorporated into soil.
2. Private water supply well - 150 feet
3. Public water supply well, public water supply spring or similar source, public water supply treatment plant, or public water supply elevated or ground storage tank - 500 feet
4. Solution channel, sinkhole, or other conduit to groundwater - 200 feet
5. Irrigation conveyance canal - 10 feet
6. Property boundary and public right-of-way - 50 feet

If members of the public experience nuisance odor conditions from the application area, they may contact the TCEQ Dallas-Fort Worth Regional Office at (817) 588-5800 or by calling the toll free 24-hour complaint hotline at 888-777-3186. Citizens may also file complaints on-line at http://www.tceq.state.tx.us/compliance/complaints/. Regional investigators will respond to complaints on a case-by-case basis and if a violation of TCEQ regulations or the registration is documented, then appropriate action will be taken, which may include referral for an enforcement action.

Also, as noted in Response #2, the Applicant must follow an Agronomic Management Plan, which requires complete incorporation of septage into the soil and a soil cover during conditions when the cover vegetation is dormant, or when the Applicant is attempting to establish cover vegetation. In addition, the registration does not limit the ability to seek legal remedies regarding any potential nuisance, or other causes of action in response to activities that may result in injury to human health or property, or that interfere with the normal use and enjoyment of property.

**COMMENT 5:**

There were concerns about who will be held accountable for the domestic septage being placed on this land application site.

**RESPONSE 5:**

The state holds all operators accountable for meeting the conditions in their TCEQ authorizations and for following applicable state rules and regulations. TCEQ field inspectors conduct periodic site inspections to determine whether an applicant is meeting its regulatory requirements.

The Applicant must also assist TCEQ in monitoring compliance with specific conditions by submitting an annual report documenting certain activities. The TCEQ Land Application Team reviews the annual report to ensure that the Applicant is meeting the pathogen and vector attraction requirements, and to ensure that the Applicant is not land applying in excess of the agronomic rate. If the annual report shows that requirements are not being met, the Applicant is subject to enforcement action. The annual report must include the following information:

septage, the amount of nitrogen in the soils at the application site, and the nitrogen requirements of the proposed crop.

TCEQ's Water Quality Assessments Team evaluated the proposed crop of Bermuda grass and the necessary management practices were incorporated into the registration in order to minimize septage nuisance odors and to help prevent septage runoff from the site. As determined by the review and as previously discussed, the Applicant will have to follow an Agronomic Management Plan (See Response #2).

**COMMENT 7:**

There were questions raised about the information provided in the registration application. Items mentioned in the application as causes of concern were:

1. Applicant's wife is not listed as one of the landowners;
2. There appears to be a different name on the soil sampling chain-of-custody;
3. The Applicant provided only one soil sample and there are two soil classes at the site;
4. There is no clear description of the methods to raise the pH to 12.0 standard units; and
5. The application doesn't state how pathogens will be controlled.

**RESPONSE 7:**

During review of the application, TCEQ's Administrative Review and Processing Team ensures that all information submitted in the administrative portion of the application is complete, accurate, and meets the requirements in 30 TAC, Chapter 312.

During technical review of the registration application, all technical items in the application, pages 1 through 6, are reviewed by TCEQ's Land Application Team and the Water Quality Assessment Team. The registration application is checked to ensure completion and clarity. If there are incomplete items or items in need of clarification in the registration application, then additional information is requested from the Applicant.

**RESPONSE 8:**

TCEQ is tasked by the Texas Legislature with protecting environmental quality in the state. The ED does not consider property values, the marketability of adjacent property, or economic development in determining whether to issue a water quality permit or registration.

**COMMENT 9:**

It was requested that TCEQ deny issuing the registration.

**RESPONSE 9:**

The Applicant is required to operate in compliance with the Texas Water Code, TCEQ's rules, and the terms of the registration. A registration is issued if the application meets all administrative and technical requirements and the ED has concluded that those requirements have been met.

In response to public comment, the Executive Director approved a more stringent Agronomic Management Plan that the Applicant must follow. The plan outlines the management of the Bermuda grass prior to land application and after the grass is established. Additionally, the plan provides that the septage be completely incorporated into the soil profile and requires a soil cover during conditions when the cover vegetation is dormant, or when the Applicant is attempting to establish cover vegetation. The plan is more stringent than 30 TAC, Chapter 312 rules because it does not give the Applicant the option to reduce buffer zones to surface water if the septage is incorporated into the soil profile as allowed by the rules. The site acreage was decreased from 45.3 acres to 40 acres to incorporate the buffer zone requirements outlined in the Agronomic Management Plan.

Respectfully submitted,

Texas Commission on Environmental Quality

Glen Shankle
Executive Director

## CERTIFICATE OF SERVICE

I certify that on February 16, 2007 the "Executive Director's Response to Public Comments (Filed 2/16/07)" for Registration No. 710896 was filed with the Texas Commission on Environmental Quality's Office of Chief Clerk.

Robert D. Brush, Staff Attorney
Environmental Law Division
State Bar No. 00788772

TEXAS COMMISSION ON ENVIRONMENTAL QUALITY
P.O. Box 13087
Austin, Texas 78711-3087

# DOMESTIC SEPTAGE REGISTRATION

**I. REGISTRATION NO.** 710896

**II. Sludge Registration Issued to:**

Site Operator and Landowner
Gustavo Hernandez Ortega
P.O. Box 1959
Quinlan, Texas 75474

**III. Sludge Site:** Domestic septage will be beneficially land applied on 40 acres located within an approximate 55.1 acres. This site is located on a private road south of County Road 3209, approximately 3,500 feet southeast of the intersection of Farm-to-Market Road 513 and County Road 3209 and approximately 5.2 miles north of the intersection of Farm-to-Market Road 513 and U.S. Highway 69 in Hunt County, Texas (see Attachment A).

**IV. Authorization:** Domestic septage

This registration and the authorization contained herein will expire at midnight, five years from the date issued.

DATE ISSUED: MAR 05 2007

For the Commission

7. A description of how the pathogen requirements in 30 TAC 312.82(c)(1) and (2) were met.

8. A description of how the vector attraction requirements in 30 TAC 312.83(b)(9), (10) or (12) were met.

9. Soil test reports, as per Section V.G., Soil Sampling

The Annual Report must be submitted by September 30th of each year per 30 TAC 312.48 which includes all required information above for a period covering September 1 of the previous year through August 31 of the current year. Additionally an "Annual Sludge Summary Report Form" (**Attachment C**) should be filled out and submitted with the annual report. Submit your report to the Water Quality Division, Land Application Team (MC 148) and the TCEQ Regional Office (MC Region 4). Record retention requirements must be followed in accordance with 30 TAC 312.47(b) for domestic septage.

## D. Regulated Management Conditions:

1. Domestic septage applications must not cause or contribute to the harm of a threatened or endangered species of plant, fish, or wildlife or result in the destruction or adverse modification of the critical habitat of a threatened or endangered species.

2. Domestic septage must not be applied to land that is flooded, frozen or snow-covered.

3. Domestic septage applied to the land must maintain the following buffer zones for each application area:

| | | |
|---|---|---|
| a. | Established school, institution, business or residence | 750 feet |
| b. | Public water supply well, intake, public water supply spring or similar source, public water treatment plant, or public water supply elevated or ground storage tank | 500 feet |
| c. | Solution channels, sinkholes, or other conduits to groundwater | 200 feet |
| d. | Waters in the State of Texas | 200 feet |
| e. | Private water supply well | 150 feet |
| f. | Public right of way | 50 feet |
| g. | Property boundary | 50 feet |
| h. | Irrigation conveyance canals | 10 feet |

e. Where runoff from the active application area is evident, the operator must cease further domestic septage application until the condition is corrected.

10. The site operator must prevent public health nuisances. Domestic septage debris must be prevented from leaving the site. Where nuisance conditions exist, the operator must eliminate the nuisance as soon as possible.

11. Domestic septage application practices must not allow uncontrolled public access, so as to protect the public from potential health and safety hazards at the site.

**E. Pathogen Control:**

1. Domestic septage applied to the site must have a pH raised to 12 or higher by alkali addition and, without the addition of more alkali, remain at 12 or higher for a period of at least 30 minutes. **Records that demonstrate these conditions for each load of domestic septage must be maintained at this site for five (5) years.** If the alkali addition occurs in a transport vehicle, the records must also be maintained in the vehicle for one (1) month and at the offices of the transporter's company for five (5) years.

2. In addition to controlling pathogens, the following site restrictions must be met:

    1. Food crops with harvested parts totally above the land surface in areas where domestic septage has been applied must not be harvested from the land for at least 14 months after the last application of domestic septage if any of the harvested parts contact the domestic septage or soil.

    2. Food crops with harvested parts below the surface of the land must not be harvested from the land for at least 20 months after application of domestic septage when the material remains on the land surface for four months or longer prior to incorporation into the soil.

    3. Food crops with harvested parts below the surface of the land must not be harvested for at least 38 months after application of domestic septage when the material remains on the land surface for less than four months prior to the incorporation into the soil.

    4. Food crops (when grown and harvested in a manner that prevents any part of the crop from contacting the soil or domestic septage), feed crops, and fiber crops must not be harvested for at least 30 days after application of domestic septage.

    5. Animals must not be allowed to graze on the land for at least 30 days after application of domestic septage.

| | | | | | |

1. Determined by Kjeldahl digestion or an equivalent accepted procedure. Methods that rely on Mercury as a catalyst are not acceptable.
2. Mehlich III plant available.
3. Electrical Conductivity (EC) - determine from extract of 2:1 (volume/volume) water/soil mixture.
4. Soil pH must be analyzed by the electrometric method in "Test Methods for Evaluating Solid Waste," EPA SW-846, 40 CFR 260.11; method 9045C.

* Analysis for metals in soil must be performed according to methods outlined in "Test Methods for Evaluating Solid Waste," EPA SW-846; method 3050.

## VI. Special Provisions:

A. Annual domestic septage application rate shall not exceed 68,077 gallons/acre/year at this site.

B. The Applicant is required to follow the Agronomic Management Plan approved by the Water Quality Assessments Team on October 5, 2006. The plan is to be kept on file for the term of the registration.

# Annual Sludge Summary Report Form (Domestic Septage Only)

Note 1: Please note that in addition to this summary form, you need submit the information required per 30 TAC 312.48.
Note 2: Please place this form at the top of your Annual Sludge Report.
Note 3. If you operate other registered/permitted site, then fill-out this form for each one of those sites.
Note 4: Also send one complete copy of your report and this form to local TCEQ regional office.

**For TCEQ Fiscal year _____ : Reporting period from September 1, _____, August 31, _____.**

**REGISTRATION NO.:** _____ **DATE:** _____

NAME OF REGISTRANT : _____

MAILING ADDRESS: _____

_____

CONTACT PERSON: Name: _____ Telephone No: _____

a. Treated Domestic Septage: Land Applied: _____ gallons / year

b. Acreage used for Sludge Application/disposal at this site: _____ acres

c. Site Vegetation (such as grass type etc) and # of cuttings: _____

d. Description of the process used to achieve pathogen requirements in 30 TAC §312.82 (c):

_____

e. Description of the process used to meet the vector attraction reduction requirements in 30 TAC §312.83(b)(9),(10), or (12): _____

f. Have you enclosed the certification statement? Yes _____ No_____

g. Have you enclosed dates of septage land application to this site? Yes _____ No_____

h. Have you enclosed the recent soil-septage analysis? Yes ____ No_____

APR 24 2006

LINDA BROOKS
County Clerk, Hunt County, Tex.
By D. Brooks

**RESOLUTION # 42406**

Whereas, the State of Texas has received an application from Gustavo Hernandez Ortega for the operation of A-1 Affordable Septic Cleaning, and

Whereas, this business and sewage site will be located south of CR3209, approximately 3,500 feet southwest of intersection FM 513 and CR3209, and 5.2 miles north of intersection FM 513 and U.S. Hwy 69, and

Whereas, the surrounding communities have voiced their concerns about this facility and this facility undermines the public view of environmental safety, and

Whereas, Hunt Counties own Environmental Enforcement Office cannot be effective without the support of all communities, and

Whereas, the City of Greenville, now and in the future is providing a safe and State approved sewage disposal site for this type of private business, and

the refund, due to Hunt County, be re-allocated to the Appraisal District for computer upgrades.

9798 On the motion by Martin, second by Thornton, the Court approved "Resolution" objecting to the proposed waste disposal site owned by Gustavo Hernandez Ortega to be located in the Prairie Valley Area, near intersection of FM513 and CR3209 in Hunt County. Judge Bobbitt stated the City of Greenville provides a safe, state approved sewage disposal site for this type of privately owned business. Resolution to be submitted to the State of Texas. Judge Bobbitt applauded the efforts of all property owners who have met, organized and wrote letters contacting local and state officials on this issue. Representative Flynn and Senator Deuell have already began to work on the loophole in the statue.

9799 On the motion by Judge Bobbitt, second by Green, the Court approved issuance of Junk Yard Permit to Miller's Used Auto Parts, located 1969 I-30 West, Greenville

Ms. LaDonna Castañuela, Chief Clerk (MC 105)
Texas Commission on Environmental Quality
P.O. Box 13087
Austin, TX 78711-3087

Re: Beneficial Use Site Registration No. 710896

Dear Ms. Castañuela:

The Sabine River Authority of Texas (SRA) has received a copy of the notice of receipt of an application and declaration of administrative completeness for Gustavo Hernandez Ortega (CN602999963) Beneficial Land Use Site Registration No. 710896 (RN104916820). The applicant has applied for authorization to land apply domestic septage at agronomic rates on approximately 45.3 acres located approximately 3,500 feet southeast of the intersection of Farm-to-Market Road 513 and County Road 3209. SRA is concerned about the location of this site since it includes acreage that is in the watersheds of Lake Tawakoni and Lake Fork reservoirs.

SRA is a conservation and reclamation district created by the Texas Legislature in 1949 with responsibilities to control, store, preserve, and distribute the waters of the Sabine River and its tributary streams for useful purposes. While not a regulatory agency, SRA works closely with agencies such as Texas Commission on Environmental Quality (TCEQ) to protect water quality in the surface water resources of the Sabine Basin. As TCEQ is aware, SRA serves as the planning agency for the Texas Clean Rivers Program (TCRP) in a collaborative effort between TCEQ, Texas Parks and Wildlife Department (TPWD), other agencies, local entities and the public. The TCRP goal is to maintain and improve the quality of water resources within each river basin in Texas. SRA serves as a clearinghouse for water quality data in the Sabine Basin, analyzes the data and prioritizes water quality concerns and the causes of pollution.

SRA owns and operates both Lake Fork and Lake Tawakoni Reservoirs, and would like to offer its comments on issuance of Domestic Septic Registration No. 710896 to site operator Gustavo Hernandez Ortega. The land application site is on the Basin divide between both Lake Fork and Lake Tawakoni, and as such has the potential to impact the water quality of both reservoirs. The eastern portion of this site would drain to Lake Fork

Creek thence to Lake Fork Reservoir while the western portion drains to Head Creek and/or Pool Branch thence to Caney Creek thence to the Cowleech Fork Sabine River thence to Lake Tawakoni. Lake Fork and Lake Tawakoni are both drinking water supply reservoirs and provide high quality surface water for municipal users in the North East Texas area. SRA would request that the staff of the TCEQ give careful consideration to protecting the water quality of these invaluable resources during their evaluation.

The standards established for the surface disposal of domestic septage include many general requirements as well as pollutant limits, management practices and operational standards which are required of each surface disposal site. SRA considers that a site such as this proposed site located in sensitive water supply reservoir watersheds needs to be particularly restrictive in establishing site specific management practices, pollutant limits, pathogen and vector attraction reduction requirements, frequency of monitoring and careful records keeping if it is approved by TCEQ. One of the primary water quality issues emerging with population growth in some areas of the Sabine Basin is elevated bacteria levels. Bacteria are a natural part of the environment and elevated levels can be present after rainfall runoff events. However, hundreds of species of pathogenic bacteria can be present in contaminated water which during rainfall runoff events could result in the proposed surface septage disposal area affecting downstream receiving waters.

SRA would request the staff of the TCEQ to take into consideration the location of this site and the potential impacts to surface water quality in the area. If the Executive Director issues a decision to approve this registration, SRA requests that consideration be given to adopting 'More Stringent Requirements' than the standard requirements in order to assure the protection of public health and to protect the environment from any adverse effect of any pollutants in the domestic septage applied to this site. If approved, we would also ask that TCEQ monitor this facility closely to ensure that all requirements are met during all phases of the operation.

We appreciate this opportunity to provide our comments on this matter. If you have any questions or concerns please contact Gerard Sala of my staff at (409) 746-2192.

Sincerely,

Jerry Clark

Re: Application for proposed Domestic Septage Land Application Registration No. 710896
Gustavo Hernandez Ortega Land Application Site

Dear Mr. Martin:

As requested, I am sending you a copy of the Texas Administrative Code Chapter 50, Rule 50.139(b) pertaining to the requirements for a motion to overturn on registrations. This rule states the following: (b) A motion to overturn must be filed no later than 23 days after the date the agency mails notice of the signed permit, approval, or other action of the Executive Director to the applicant and persons on any required mailing list for the action. In this case, the reference to "other action" relates to the registration being proposed. In addition, I am sending you a copy of the Texas Administrative Code Chapter 312, Rule for 312.12(2)(c) and (d) pertaining to the Executive Director's Decision and Rule for 312.13(d) and (e) pertaining to public comment on registrations and motion to overturn.

If you should have any further questions, please do not hesitate to call me at (512) 239-2012, or if by correspondence include MC 148 in the letterhead address following my name.

Sincerely,

Katherine Faz, Permit Coordinator
Land Application Team
Water Quality Division

KF/sp

Enclosures

control, or operator, changes in waste composition, changes in the source of sewage sludge, or waste management methods, and information regarding soils and subsurface conditions where the operation is to be located. Any information provided under this paragraph must be submitted to the executive director in duplicate form.

(c) The executive director shall determine, after review of any application, whether to approve or deny an application in whole or in part, deny with prejudice, suspend the authority to conduct an activity for a specified period of time, or amend or modify the proposed activity requested by the applicant. The determination of the executive director shall include review and action on any new applications or changes, renewals, and requests for major amendment of any existing application. In consideration of such an application, the executive director shall consider all relevant requirements of this chapter and consider all information pertaining to those requirements received by the executive director regarding the application. The written determination on any application, including any authorization granted, shall be mailed to the applicant upon the decision of the executive director.

(d) At the same time that the executive director's decision is mailed to the applicant, notice of this decision must also be mailed to all parties who submitted written information on the application, as described in §312.13(c)(2) and (3) of this title (relating to Actions and Notice).

(e) For registered land application sites located in a major sole-source impairment zone, the registrant must comply with the provisions listed in §312.11(k) of this title (relating to Permits).

Adopted September 28, 2005 Effective October 20, 2005

**§312.13. Actions and Notice.**

(a) Applicability. This section sets forth the manner in which action will be taken on applications filed with the executive director for either a permit or a registration to land apply, store, process, dispose of, or incinerate sewage sludge.

(b) Permit actions.

(1) All permit applications are subject to the standards and requirements as set forth in Chapter 39, Subchapters H - J of this title (relating to Applicability and General Provisions; Public Notice of Solid Waste Applications; and Public Notice of Water Quality Applications and Water Quality Management Plans), Chapter 50, Subchapters E - G of this title (relating to Purpose, Applicability, and Definitions; Action by the Commission; and Action by the Executive Director ), and Chapter 55, Subchapters D - F of this title (relating to Applicability and Definitions; Public Comment and Public Meetings; and Requests for Reconsideration or Contested Case Hearing).

TITLE 30 ENVIRONMENTAL QUALITY

PART 1 TEXAS COMMISSION ON ENVIRONMENTAL QUALITY

CHAPTER 50 ACTION ON APPLICATIONS AND OTHER AUTHORIZATIONS

SUBCHAPTER G ACTION BY THE EXECUTIVE DIRECTOR

RULE §50.139 **Motion to Overturn Executive Director's Decision**

---

(a) The applicant, public interest counsel or other person may file with the chief clerk a motion to overturn of the executive director's action on an application or water quality management plan (WQMP) update certification. Wherever other commission rules refer to a "motion for reconsideration", that term should be considered interchangeable with the term "motion to overturn executive director's decision."

(b) A motion to overturn must be filed no later than 23 days after the date the agency mails notice of the signed permit, approval, or other action of the executive director to the applicant and persons on any required mailing list for the action.

(c) A motion to overturn must be filed no later than 20 days after the date persons who timely commented on the WQMP update are notified of the response to comments and the certified WQMP update. A person is presumed to have been notified on the third day after the date the notice of the executive director's action is mailed by first class mail.

(d) An action by the executive director under this subchapter is not affected by a motion to overturn filed under this section unless expressly ordered by the commission.

(e) With the agreement of the parties or on their own motion, the commission of the general counsel may, by written order, extend the period of time for filing motions to overturn and for taking action on the motions so long as the period for taking action is not extended beyond 90 days after the date the agency mails notice of the signed permit, approval, or other action of the executive director.

(f) Disposition of motion.

(1) Unless an extension of time is granted, if a motion to overturn is not acted on by the commission within 45 days after the date the agency mails notice of the signed permit, approval, or other action of the executive director, the motion is denied.

(2) In the event of an extension, the motion to overturn is overruled by operation of law on the date fixed by the order, or in the absence of a fixed date, 90 days after the date the agency mails notice of the signed permit, approval, or other action of the executive director.

(g) When a motion to overturn is denied under subsection (f) of this section, a motion for rehearing does not need to be filed as a prerequisite for appeal. Section 80.272 of this title (relating to Motion for Rehearing) and Texas Government Code, §2001.146, regarding motions for rehearing in contested cases do not apply when a motion to overturn is denied. If applicable, the commission decision may be subject to judicial review under Texas Water Code, §5.351, or Texas Health and Safety Code, §§361.321, 382.032, or 401.341.

**Source Note:** The provisions of this §50.139 adopted to be effective September 23, 1
8254; amended to be effective February 3, 2000, 25 TexReg 593; amended to be effe

(4) Each notice must specify both the name, affiliation, address, and telephone number of the applicant and of the commission employee who may be reached to obtain more information about the application to register the site. The notice must specify that the registration application has been provided to the county judge and that it is available for review by interested parties.

(5) Any application for a registration is subject to the standards and requirements for actions concerning amendments, modifications, transfers, and renewals of registrations, as set forth in Chapter 50, Subchapter G of this title.

(d) Public comment on registrations. A person may provide the commission with written comments on any new or major amendment applications to register a site, where applicable. The executive director shall review any written comments when they are received within 30 days of mailing the notice. The written information received will be utilized by the executive director in determining what action to take on the application for registration in accordance with §312.12(c) of this title (relating to Registrations).

(e) Motion to overturn. The applicant, public interest counsel, or other person may file with the chief clerk a motion to overturn under §50.139 of this title (relating to Motion to Overturn Executive Director's Decision) to overturn the executive director's final approval or denial of an application.

RECEIVED
MAR 16 07
Hunt County
Judge's Office

March 7, 2007

To the citizens of Hunt County and surrounding counties:

In August of 2006, local residents attended a TCEQ public hearing to voice their opposition to a Beneficial Land Use Application filed by Gustavo Ortega. The B.L.U. application site number is 710896. Let me make it plain. This would allow him to dump human waste on his property derived from septic systems.

I am sorry to inform the people the Executive Director of the Texas Commission on Environmental Quality, Glen Shankle, made a decision March 5, 2007 in favor of the application.

I, along with the people I represent am very upset. It is unbelievable that a state agency calling itself "The Texas Commission on Environmental Quality" would make such an outrageous decision. This has set us back 100 years or more. They are contradicting their own philosophy on protecting our water supplies. People have underground wells and this site is situated where run off goes into Lake Tawakoni and Lake Fork. I ask the people where do you get your water? This affects you and your loved ones.

Every day I pray to God for wisdom, understanding, and patience. We have been patient; this has been going on for over a year. I do not understand TCEQ's decision to grant the application. Wisdom tells me to do the right thing and fight TCEQ's decision.

We have twenty three (23) days from the date the chief clerk sends out the answers to the questions that were ask in August of 2006. Along with these answers Glen Shankle will make the people aware of his decision to grant the application. According to TCEQ these letters will be sent out within days. I talked to Katherine Fazz on March 6, 2007 at 4:10 p.m.

I have drafted a "Motion To Overturn Executive Director's Decision". I ask the citizens, leaders of the communities, churches association and you to get involved. When we receive the letter in response to our questions, we at that time need the citizens of Northeast Texas to respond with the "Motion To Overturn Executive Director's Decision". I will make this Motion available and will notify the public.

Respectively submitted,

Phillip A. Martin

Phillip A. Martin
Commissioner Pct. 3
Hunt County

## MOTION TO OVERTURN EXECUTIVE DIRECTOR'S DECISION

Under the Texas Administrative Code Title 30 Part 1 Chapter 50 Subchapter G. Rule 50.139. I have the right to make a motion to overturn Executive Director's decision on Gustavo Hernandez Ortega's B.L.U. application site #710896, TCEQ customer number CN602999963, Regulated Entity number RN104916820.

I, (printed name)_____ of (printed home address)_____ make a motion to overturn the Executive Director's decision (Mr. Glen Shankle, Executive Director T.C.E.Q.) in reference to B.L.U. Application #710896 of Gustavo Hernandez Ortega to wit: *(Please give reason for your motion. You may attach an additional sheet if necessary)*

TITLE 30 ENVIRONMENTAL QUALITY
PART 1 TEXAS COMMISSION ON ENVIRONMENTAL QUALITY
CHAPTER 312 SLUDGE USE, DISPOSAL, AND TRANSPORTATION
SUBCHAPTER D PATHOGEN AND VECTOR ATTRACTION REDUCTION
RULE §312.83 **Vector Attraction Reduction**

(a) Compliance requirements.

(1) One of the vector attraction reduction requirements in subsection (b)(1)-(10) of this section shall be met when bulk sewage sludge is applied to agricultural land, forest, a public contact site, or a reclamation site.

(2) One of the vector attraction reduction requirements in subsection (b) paragraphs (1)-(8) of this section shall be met when bulk sewage sludge is applied to a lawn, home garden, or is sold or given away in a bag or other container.

(3) One of the vector attraction reduction requirements in subsection (b)(1)-(11) of this section shall be met when sewage sludge (other than domestic septage) is placed on an active sewage sludge unit.

(4) One of the vector attraction reduction requirements in subsection (b)(9), (10), or (12) of this section shall be met when domestic septage is applied to agricultural land, forest, or a reclamation site.

(5) One of the vector attraction reduction requirements in subsection (b)(9)-(12) of this section shall be met when domestic septage is placed on an active sewage sludge unit.

(b) Compliance alternatives.

(1) The mass of volatile solids in the sewage sludge shall be reduced by a minimum of 38%.

(2) If an anaerobically digested sewage sludge can not meet the 38% volatile solids reduction requirement in paragraph (1) of this subsection, vector attraction reduction can be demonstrated by digesting a portion of the previously digested sewage sludge anaerobically in a laboratory in a bench-scale unit for 40 additional days at a temperature between 30 and 37 degrees Celsius. If at the end of the 40 days, the volatile solids in the sewage sludge at the beginning of that period is reduced by less than 17%, vector attraction reduction is achieved.

(3) If an aerobically digested sewage sludge can not meet the 38% volatile solids reduction requirement in paragraph (1) of this subsection, vector attraction reduction can be demonstrated by digesting a portion of the previously digested sewage sludge that has a percent solids of 2.0% or less aerobically in a laboratory in a bench-scale unit for 30 additional days at 20 degrees Celsius. If at the end of the 30 days, the volatile solids in the sewage sludge at the beginning of that period is reduced by less than 15%, vector attraction reduction is achieved.

(4) The specific oxygen uptake rate (SOUR) for sewage sludge treated in an aerobic process shall be equal to or less than 1.5 milligrams of oxygen per hour per gram of total solids (dry weight basis) at a temperature of 20 degrees Celsius.

(5) Sewage sludge shall be treated in an aerobic process for 14 days or longer. During that time, the temperature of the sewage sludge shall be higher than 40 degrees Celsius and the average temperature of sewage sludge shall be higher than 45 degrees Celsius.

(6) The pH of sewage sludge shall be raised to 12 or higher by alkali addition and, without the addition of more alkali, shall remain at 12 or higher for two hours and then remain at a pH of 11.5 or higher for an additional 22 hours.

(7) The percent solids of sewage sludge that does not contain unstabilized solids generated in a primary wastewater treatment process shall be equal to or greater than 75% based on the moisture content and total solids prior to mixing with other materials.

(8) The percent solids of sewage sludge that contains unstabilized solids generated in a primary wastewater treatment process shall be equal to or greater than 90% based on the moisture content and total solids prior to mixing with other materials.

(9) Sewage sludge shall be injected below the surface of the land. No significant amount of the sewage sludge shall be present on the land surface within one hour after the sewage sludge is injected. If the sewage sludge that is injected below the surface of the land is Class A with respect to pathogens, as described in §312.82 (relating to Pathogen Reduction), the sewage sludge shall be injected below the land surface within eight hours after the sewage sludge is discharged from the pathogen treatment process.

(10) Sewage sludge applied to the land surface or placed on a surface disposal site shall be incorporated into the soil within six hours after application or placement on the land. If the sewage sludge that is incorporated into the soil is Class A with respect to pathogens, as described in §312.82 of this title (relating to Pathogen Reduction), the sewage sludge shall be applied to or placed on the land within eight hours after the sewage sludge is discharged from the pathogen treatment process.

(11) Sewage sludge placed on an active sewage sludge unit shall be covered with soil or other material at the end of each operating day.

(12) The pH of domestic septage shall be raised to 12 or higher by alkali addition and, without the addition of more alkali, shall remain at 12 or higher for 30 minutes.

---

**Source Note:** The provisions of this §321.83 adopted to be effective October 13, 1995, 20 TexReg 7840.

TITLE 30 ENVIRONMENTAL QUALITY
PART 1 TEXAS COMMISSION ON ENVIRONMENTAL QUALITY
CHAPTER 312 SLUDGE USE, DISPOSAL, AND TRANSPORTATION
SUBCHAPTER D PATHOGEN AND VECTOR ATTRACTION REDUCTION
RULE §312.82 **Pathogen Reduction**

(a) Sewage sludge--Class A.

(1) Compliance requirements--Class A.

(A) For a sewage sludge to be classified as Class A with respect to pathogens, the requirements in subparagraphs (B) and (C) of this paragraph and the requirements of one of the alternatives listed in paragraph (2) of this subsection must be met.

(B) The requirements of the chosen alternative for pathogen reduction from paragraph (2) of this subsection must be met prior to or at the same time as the vector attraction reduction requirements, except the requirements in §312.83(b)(6) - (8) of this title (relating to Vector Attraction Reduction).

(C) Either the density of fecal coliform in the sewage sludge must be less than 1,000 Most Probable Number per gram of total solids (dry weight basis) or the density of Salmonella (sp. bacteria) in the sewage sludge must be less than three Most Probable Number per four grams of total solids (dry weight basis) at the time the sewage sludge is used or disposed of, at the time the sewage sludge is prepared for sale or given away in a bag or other container for application to the land, or at the time the sewage sludge or material derived from sewage sludge is prepared to meet the requirements in §312.41(b), (c), (e), or (f) of this title (relating to Applicability).

(2) Compliance alternatives--Class A.

(A) Alternative 1. The temperature of the sewage sludge that is used or disposed of must be maintained at a specified value for a period of time.

(i) When the percent solids of the sewage sludge is 7.0% or higher, the temperature of the sewage sludge must be 50 degrees Celsius or higher; the time period must be 20 minutes or longer; and the temperature and time period must be determined using the equation in this clause, except when small particles of sewage sludge are heated by either warmed gases or an immiscible liquid.

Attached Graphic

(ii) When the percent solids of the sewage sludge is 7.0% or higher and small particles of sewage sludge are heated by either warmed gases or an immiscible liquid, the temperature of the sewage sludge must be 50 degrees Celsius or higher, the time period must be 15 seconds or longer, and the temperature and time period must be determined using the equation in clause (i) of this subparagraph.

(iii) When the percent solids of the sewage sludge is less than 7.0% and the time period is at least 15 seconds, but less than 30 minutes, the temperature and time period must be determined using the equation in clause (i) of this subparagraph.

(iv) When the percent solids of the sewage sludge is less than 7.0%; the temperature of the sewage sludge is 50 degrees Celsius or higher; and the time period is 30 minutes or longer, the temperature and time period must be determined using the equation in this clause.

Attached Graphic

(B) Alternative 2. The temperature and pH of the sewage sludge that is used or disposed of must be maintained at specific values for periods of time.

(i) The pH of the sewage sludge must be raised to above 12 and must remain above 12 for 72 hours.

(ii) The temperature of the sewage sludge must be above 52 degrees Celsius for 12 hours or longer during the period that the pH of the sewage sludge is above 12.

(iii) At the end of the 72-hour period during which the pH of the sewage sludge is above 12, the sewage sludge must be air dried to achieve a percent solids in the sewage sludge greater than 50%.

(C) Alternative 3. The sewage sludge that is used or disposed of must be analyzed prior to pathogen treatment to determine whether the sewage sludge contains enteric viruses and viable helminth ova.

(i) When the density of enteric viruses in the sewage sludge prior to pathogen treatment is less than one Plaque-forming Unit per four grams of total solids (dry weight basis), the sewage sludge is Class A with respect to enteric viruses until the next monitoring episode for the sewage sludge.

(ii) When the density of enteric viruses in the sewage sludge prior to pathogen treatment is equal to or greater than one Plaque-forming Unit per four grams of total solids (dry weight basis), the sewage sludge is Class A with respect to enteric viruses when the density of enteric viruses in the sewage sludge after pathogen treatment is less than one Plaque-forming Unit per four grams of total solids (dry weight basis) and when the values or ranges of values for the operating parameters for the pathogen treatment process that produces the sewage sludge that meets the enteric virus density requirement are documented.

(iii) After the enteric virus reduction in clause (ii) of this subparagraph is demonstrated for the pathogen treatment process, the sewage sludge continues to be Class A with respect to enteric viruses when the values for the pathogen treatment process operating parameters are consistent with the values or ranges of values documented in clause (ii) of this subparagraph.

(iv) When the density of viable helminth ova in the sewage sludge prior to pathogen treatment is less than one per four grams of total solids (dry weight basis), the sewage sludge is Class A with respect to viable helminth ova until the next monitoring episode for the sewage sludge.

(v) When the density of viable helminth ova in the sewage sludge prior to pathogen treatment is equal to or greater than one per four grams of total solids (dry weight basis), the sewage sludge is Class A with respect to viable helminth ova when the density of viable helminth ova in the sewage sludge after pathogen treatment is less than one per four grams of total solids (dry weight basis) and when the values or ranges of values for the operating parameters for the pathogen treatment process that produces the sewage sludge that meets the viable helminth ova density requirement are documented.

(vi) After the viable helminth ova reduction in clause (v) of this subparagraph is demonstrated for the pathogen treatment process, the sewage sludge continues to be Class A with respect to viable

helminth ova when the values for the pathogen treatment process operating parameters are consistent with the values or ranges of values documented in clause (v) of this subparagraph.

(D) Alternative 4. The sewage sludge that is used or disposed of must be analyzed prior to pathogen treatment to determine whether the sewage sludge contains enteric viruses and viable helminth ova.

(i) The density of enteric viruses in the sewage sludge must be less than one Plaque-forming Unit per four grams of total solids (dry weight basis) at the time the sewage sludge is used or disposed of, at the time the sewage sludge is prepared for sale or given away in a bag or other container for application to the land, or at the time the sewage sludge or material derived from sewage sludge is prepared to meet the requirements in §312.41(b), (c), (e), or (f) of this title.

(ii) The density of viable helminth ova in the sewage sludge must be less than one per four grams of total solids (dry weight basis) at the time the sewage sludge is used or disposed of, at the time the sewage sludge is prepared for sale or given away in a bag or other container for application to the land, or at the time the sewage sludge or material derived from sewage sludge is prepared to meet the requirements in §312.41(b), (c), (e), or (f) of this title.

(E) Alternative 5 (Processes to Further Reduce Pathogens (PFRP). Sewage sludge that is used or disposed of must be treated in one of the PFRP described in 40 Code of Federal Regulations (CFR) Part 503, Appendix B.

(F) Alternative 6 (PFRP Equivalent). Sewage sludge that is used or disposed of must be treated in a process that has been approved by the United States Environmental Protection Agency (EPA) as being equivalent to those in subparagraph (E) of this paragraph.

(b) Sewage sludge--Class B.

(1) Compliance requirements--Class B.

(A) For a sewage sludge to be classified as Class B with respect to pathogens, the requirements in subparagraphs (B) and (C) of this paragraph must be met. As an alternative for a sewage sludge to be classified as Class B, the requirements of subparagraph (B) of this paragraph and paragraph (2) of this subsection must be met.

(B) The site restrictions in paragraph (3) of this subsection must be met when sewage sludge that is classified as Class B with respect to pathogens is applied to the land for beneficial use.

(C) A minimum of seven representative samples of the sewage sludge must be collected within 48 hours of the time that the sewage sludge is used or disposed of during each monitoring episode for the sewage sludge. The geometric mean of the density of fecal coliform for the samples collected must be less than either 2,000,000 Most Probable Number per gram of total solids (dry weight basis) or 2,000,000 Colony-forming Units per gram of total solids (dry weight basis).

(2) Processes to Significantly Reduce Pathogens (PSRP) compliance alternatives--Class B. Sewage sludge that is used or disposed of must be treated in one of the PSRP described in 40 CFR Part 503, Appendix B, or must be treated by an equivalent process approved by the EPA, so long as all of the following requirements are met by the generator of the sewage sludge.

(A) Prior to use or disposal, all the sewage sludge must have been generated from a single location,

except as provided in subparagraph (F) of this paragraph.

(B) An independent Texas registered professional engineer must make a certification to the generator of a sewage sludge that the wastewater treatment facility generating the sewage sludge is designed to achieve one of the PSRP at the permitted design loading of the facility. The certification need only be repeated if the design loading of the facility is increased. The certification must include a statement indicating that the design meets all the applicable standards specified in 40 CFR Part 503, Appendix B.

(C) Prior to any off-site transportation or on-site use or disposal of any sewage sludge generated at a wastewater treatment facility, the chief certified operator of the wastewater treatment facility or other responsible official who manages the PSRP at the wastewater treatment facility for the permittee, shall certify that the sewage sludge underwent at least the minimum operational requirements necessary in order to meet one of the PSRP. The acceptable processes and the minimum operational and recordkeeping requirements must be in accordance with established EPA final guidance.

(D) All certification records and operational records describing how the requirements of this paragraph were met must be kept by the generator for a minimum of three years and be available for inspection by commission staff for review.

(E) In lieu of a generator obtaining a certification as specified in subparagraph (B) of this paragraph, the executive director will accept from the EPA a finding of equivalency to the defined PSRP.

(F) If the sewage sludge is generated from a mixture of sources, resulting from a person who prepares sewage sludge from more than one wastewater treatment facility, the resulting derived product must meet one of the PSRP, and meet the certification, operation, and recordkeeping requirements of this paragraph.

(3) Site restrictions.

(A) Food crops with harvested parts totally above the land surface that touch the sewage sludge/soil mixture must not be harvested from the land for at least 14 months after the application of sewage sludge.

(B) Food crops with harvested parts below the surface of the land must not be harvested for at least 20 months after application of sewage sludge when the sewage sludge remains on the land surface for four months or longer prior to incorporation into the soil.

(C) Food crops with harvested parts below the surface of the land must not be harvested for at least 38 months after application of sewage sludge when the sewage sludge remains on the land surface for less than four months prior to the incorporation into the soil.

(D) Food crops, feed crops, and fiber crops must not be harvested for at least 30 days after application of sewage sludge.

(E) Animals must not be allowed to graze on the land for at least 30 days after application of sewage sludge.

(F) Turf grown on land where sewage sludge is applied may not be harvested for at least one year after application of sewage sludge when the harvested turf is placed on either land with a high potential for public exposure or a lawn.

(G) Public access to land with a high potential for public exposure must be restricted for at least one year after application of sewage sludge.

(H) Public access to land with a low potential for public exposure must be restricted for at least 30 days after application of the sewage sludge.

(c) Domestic septage.

(1) The site restrictions in subsection (b)(3) of this section must be met if domestic septage is applied to agricultural land, forest, or a reclamation site.

(2) The pH of domestic septage applied to agricultural land, forest, or a reclamation site must be raised to 12 or higher by alkali addition and, without the addition of more alkali, must remain at 12 or higher for a period of 30 minutes.

---

**Source Note:** The provisions of this §312.82 adopted to be effective October 13, 1995, 20 TexReg 7840; amended to be effective October 20, 2005, 30 TexReg 6743

TITLE 30 ENVIRONMENTAL QUALITY
PART 1 TEXAS COMMISSION ON ENVIRONMENTAL QUALITY
CHAPTER 312 SLUDGE USE, DISPOSAL, AND TRANSPORTATION
SUBCHAPTER B LAND APPLICATION FOR BENEFICIAL USE AND STORAGE AT BENEFICIAL USE SITES
RULE §312.42 **General Requirements**

(a) No person shall apply sewage sludge, including domestic septage, to the land except in accordance with the requirements in this subchapter.

(b) No person shall apply sewage sludge that does not meet the metal concentrations in §312.43(b)(3) of this title to land where any of the cumulative metal loading rates in §312.43(b)(2) of this title (relating to Metal Limits) have been reached.

(c) No person shall apply domestic septage to agricultural land, forest, or a reclamation site during a 365 day period where the annual application rate in §312.43(c) of this title has been reached.

(d) The person who applies sewage sludge, including domestic septage, to the land shall obtain information needed to comply with the requirements in this subchapter.

(e) If a treatment works provides bulk sewage sludge to a person who applies the bulk sewage sludge to the land, the treatment works shall provide the person who applies the bulk sewage sludge to the land notice and necessary information to comply with the requirements in this subchapter.

(f) If a treatment works provides bulk sewage sludge to a person who prepares the bulk sewage sludge for application to the land, the treatment works shall provide the person who prepares the bulk sewage sludge for application to the land notice and necessary information to comply with the requirements in this subchapter.

(g) The person who applies bulk sewage sludge to the land shall provide the owner or lease-holder of the land on which the bulk sewage sludge is applied notice and necessary information to comply with the requirements in this subchapter.

(h) If a treatment works provides sewage sludge to a person who prepares the sewage sludge for sale or give away in a bag or other container for application to the land, the treatment works shall provide the person who prepares the sewage sludge for sale or give away in a bag or other container for application to the land notice and information to comply with the requirements in this subchapter.

(i) The applicant shall determine the concentration of regulated metals in accordance with §312.12(a)(1)(E) of this title (relating to Registration of Land Application Activities) and demonstrate to the satisfaction of the commission that the proposed cumulative metal loading will result in a non-toxic condition or reduce the toxicity of the existing soil.

**Source Note:** The provisions of this §312.42 adopted to be effective October 13, 1995, 20 TexReg 7840.

TITLE 30 ENVIRONMENTAL QUALITY

PART 1 TEXAS COMMISSION ON ENVIRONMENTAL QUALITY

CHAPTER 312 SLUDGE USE, DISPOSAL, AND TRANSPORTATION

SUBCHAPTER B LAND APPLICATION FOR BENEFICIAL USE AND STORAGE AT BENEFICIAL USE SITES

## RULE §312.41 Applicability

(a) Application to land. This subchapter applies to any person who prepares sewage sludge that is applied to the land, to any person who applies sewage sludge to the land, to sewage sludge applied to the land, and to the land on which sewage sludge is applied.

(b) Bulk sewage sludge.

(1) Section 312.42 of this title (relating to General Requirements) and §312.44 of this title (relating to Management Practices) do not apply when bulk sewage sludge is applied to the land if the bulk sewage sludge meets the metal concentrations in §312.43(b)(3) of this title (relating to Metal Limits), the Class A pathogen requirements in §312.82(a) of this title (relating to Pathogen Reduction), and one of the vector attraction reduction requirements in §312.83(b)(1)-(8) of this title (relating to Vector Attraction Reduction).

(2) The executive director may apply any or all of §312.42 and §312.44 of this title to the bulk sewage sludge described in this subsection on a case-by-case basis after determining that the general requirements or management practices are needed to protect public health and the environment from any reasonably anticipated adverse effect that may occur from any metal in the bulk sewage sludge.

(c) General Requirements for Bulk Derived Materials.

(1) Section 312.42 of this title (relating to General Requirements) and the management practices in §312.44 of this title (relating to Management Practices) do not apply when a bulk material derived from sewage sludge is applied to the land if the derived bulk material meets the metal concentrations in §312.43(b)(3) of this title (relating to Metal Limits), the Class A pathogen requirements in §312.82(a) of this title (relating to Pathogen Reduction), and one of the vector attraction reduction requirements in §312.83(b)(1)-(8) of this title (relating to Vector Attraction Reduction).

(2) The executive director may apply any or all of §312.42 and §312.44 to the bulk material described in this subsection on a case-by-case basis after determining that the general requirements or management practices are needed to protect public health and the environment from any reasonably anticipated adverse effect that may occur from any metal in the bulk sewage sludge.

(d) Special Requirements for Certain Bulk Derived Materials. The requirements in this subchapter may not apply when a bulk material derived from sewage sludge is applied to the land; if the sewage sludge from which the bulk material is derived meets the metal concentrations in §312.43(b)(3) of this title the Class A pathogen requirements in §312.82(a) of this title, and one of the vector attraction reduction requirements in §312.83(b)(1)-(8) of this title. The executive director may apply any or all of §312.42 and §312.44 of this title to the bulk derived material on a case-by-case basis after determining that the general requirements or management practices are needed to protect public health and the environment

from any reasonably anticipated adverse effect that may occur from any metal in the sewage sludge.

(e) Bagged sludge. Sewage sludge sold or given away in a bag or other container for application to the land. Section 312.42 and §312.44 of this title may not apply when sewage sludge is sold or given away in a bag or other container for application to the land if the sewage sludge sold or given away in a bag or other container for application to the land meets the metal concentrations in §312.43(b)(3) of this title, the Class A pathogen requirements in §312.82(a) of this title, and one of the vector attraction reduction requirements in §312.83(b)(1)-(8) of this title.

(f) Bagged derived materials. Section 312.42 and §312.44 of this title may not apply when a material derived from sewage sludge is sold or given away in a bag or other container for application to the land if the derived material meets the metal concentrations in §312.43(b) of this title, the Class A pathogen requirements in §312.82(a) of this title, and one of the vector attraction reduction requirements in §312.83(b)(1)-(8) of this title.

(g) Bagged materials. The requirements in this subchapter may not apply when a material derived from sewage sludge is sold or given away in a bag or other container for application to the land if the sewage sludge from which the material is derived meets the metal concentrations in §312.43(b)(3) of this title (relating to Metal Limits), the Class A pathogen requirements in §312.82(a) of this title (relating to Pathogen Reduction), and one of the vector attraction reduction requirements in §312.83(b)(1)-(8) of this title.

TITLE 30 ENVIRONMENTAL QUALITY

PART 1 TEXAS COMMISSION ON ENVIRONMENTAL QUALITY

CHAPTER 312 SLUDGE USE, DISPOSAL, AND TRANSPORTATION

SUBCHAPTER B LAND APPLICATION FOR BENEFICIAL USE AND STORAGE AT BENEFICIAL USE SITES

## RULE §312.50 Storage and Staging of Sludge at Beneficial Use Sites

(a) Except as provided in subsection (b) of this section, storage of sludge at a beneficial land application site must not exceed 90 days. Storage is allowed only when the following requirements are carried out.

(1) Written authorization must be obtained from the executive director prior to construction of the storage area.

(2) The storage area must be operated and maintained to prevent surface water runoff and to prevent a release to groundwater. Discharge of storm water or wastewater which has come into contact with sewage sludge is prohibited. The storage area shall be designed to collect such runoff. Any runoff collected during the storage of sewage sludge shall be disposed in a manner to prevent a release to groundwater.

(3) The storage area shall be designed, constructed, and operated in a manner which protects public health and the environment.

(4) The storage area must be lined to prevent a release to groundwater. Natural or artificial liners are required for leachate control. A natural liner or equivalent barrier of one foot of compacted clay with a permeability coefficient of $1 \times 10^{-7}$ cm/sec or less must be provided. Various flexible synthetic membrane lining materials may be used in lieu of soil liners if prior written approval has been obtained from the executive director. The registrant shall furnish certification by a licensed professional engineer or licensed professional geoscientist that the completed storage area lining meets the appropriate criteria described in this section prior to using the facilities. The certification shall be signed, sealed, and dated by a licensed professional engineer or licensed professional geoscientist.

(5) The application shall outline measures to be taken to minimize vectors and to avoid public health nuisances such as odors.

(6) The storage area shall be fenced or other methods shall be used, if necessary to control access by humans or domestic animals.

(7) Berms or dikes shall be constructed to contain the waste without leakage.

(8) Liquid sludge must be stored in an enclosed vessel.

(9) Processing of sludge is prohibited unless a permit is obtained from the commission.

(b) Up to an additional 90 days of storage will be allowed with the prior approval of the appropriate Texas Commission on Environmental Quality regional office, for reasons associated with application

area flooding, saturated soils, or frozen soils.

(c) Staging of sewage sludge on-site, prior to land application, is allowable without executive director approval. Staging of sewage sludge may only occur for a maximum of seven calendar days.

---

Office of the Chief Clerk
Attn. Donna Castanuela
P.O. Box 13087
Austin, Texas 78711

Dear Mrs. Castanuela,

The City of Emory opposes Beneficial Land Use Application #710896 (Gustavo H. Ortega) because of the drainage potential into the watershed that enters Lake Tawakoni and Lake Fork Reservoirs. Lake Tawakoni is the primary water source for nearly 2/3 of all the citizens of Rains County who purchase directly or by contract with the City of Emory, their processed water.

I would appreciate your consideration of our City and of Rains County when you hear arguments concerning this application.

Sincerely,

Cay House, Mayor
City of Emory

It is outrageous that anyone would be allowed to dispose of human waste on property other than the waste water facility. There is the danger of pollution of air and run off of water into creeks and/or rivers and property of others. A home owner is mandated by law to install systems that do not pollute and this is no different.

# MOTION TO OVERTURN EXECUTIVE DIRECTOR'S DECISION

Under the Texas Administrative Code Title 30 Part 1 Chapter 50 Subchapter G. Rule 50.139. I have the right to make a motion to overturn Executive Director's decision on Gustavo Hernandez Ortega's B.L.U. application site #710896, TCEQ customer number CN602999963, Regulated Entity number RN104916820.

I, (printed name) Audrey Kaliseh. of (printed home address) 5620 CR 3214 Lone Oak, TX 75453 make a motion to overturn the Executive Director's decision (Mr. Glen Shankle, Executive Director T.C.E.Q.) in reference to B.L.U. Application #710896 of Gustavo Hernandez Ortega to wit: *(Please give reason for your motion. You may attach an additional sheet if necessary)*

Human waste runoff would contaminate our private wells, lakes & ponds that we and our animals depend on for our clean water supply. The proposed human waste dump would jeapordize our air quality and smell. Our property values would decrease since no ~~man~~ one wants to live near a smelly feces dump.

I, (printed name) WAYNE KALISEK of (printed home address) 5010 CR 521 LONE OAK, TX 75453 make a motion to overturn the Executive Director's decision (Mr. Glen Shankle, Executive Director T.C.E.Q.) in reference to B.L.U. Application #710896 of Gustavo Hernandez Ortega to wit: *(Please give reason for your motion. You may attach an additional sheet if necessary)*

Reasons being: The waste would eventually end up in the water table. We drink water from an underground well. Since we live so close to Mr. Ortega's site, we would be able to smell the waste. Property values would also be affected.

**TCEQ PROPOSED REGISTRATION NO. 710896**

**BEFORE THE TEXAS COMMISSION ON ENVIRONMENTAL QUALITY**

*  *  *  *  *

**Motion to Overturn TCEQ Executive Director's Final Approval of Proposed Registration No. 710896**

CHIEF CLERKS OFFICE
2007 MAR 29 AM 10:02
TEXAS COMMISSION ON ENVIRONMENTAL QUALITY

**March 26, 2007**

Background:

On February 27, 2006, the Applicant applied to TCEQ for a new registration to authorize the land application of up to 68,077 gallons of domestic septage per acre per year on 40 acres situated in Hunt County, Texas. The land is currently owned by the Applicant. On August 29, 2006, after filing of notices and other administrative actions by TCEQ, a public meeting was held in Greenville, Texas. On March 13, 2007, notice of TCEQ Executive Director's Final Approved of the above-captioned registration was issued, setting April 5, 2007 as the administrative deadline for filing any Motion to Overturn. This motion is dated March 26, 2007, and was mailed on the same day; therefore, it falls within the administrative deadline.

This motion is filed by a resident of the southern part of Hunt County who would be potentially affected by the above-captioned registration. I attended the public hearing and I am listed as a "Protestant/Interested Party".

Basis for Motion to Overturn:

1. The vast majority of Hunt County residents are opposed to Proposed Registration No. 710896. This is based on the following:
   a. Public comments and questions during the public hearing, including those of local and county government officials, as well as officials from the Sabine River Authority. Evidence of these comments and question would be available in TCEQ records and files.
   b. Public letters published in local newspapers, quotes in local newspaper articles and other general public comments. Evidence of these comments is in archived sections of the Herald Banner and other local publications.
   c. Discussions that I have had with other Hunt County residents.

2. Consideration of Proposed Registration No. 710896 has not been adequately made by other effected constituents. This would include the largest users of water from Lake Fork and Lake Tawakoni such as the City of Dallas. These parties, if contacted to intervene, would like question and possibly oppose this proposed registration.

3. TCEQ Staff's analytical work was principally limited to determining if the application met certain standard operational requirements and set-offs. No specific site testing in wet or flooding conditions was conducted to determine if run-off from land-applied domestic septage would not actually occur in the location proposed under this application, and if such run-off would not adversely affect local water supplies, including Lake Fork and Lake Tawakoni. The Executive Director has unreasonably relied on TCEQ Staff's limited analytical and testing work in making his determination.

4. There are currently other viable sources for disposal of septage in Hunt County, including the waste water treatment facility owned and operated by the City of Greenville. This alternative avoids the risks of water pollution and other contamination that may occur from the land application of septage which would be allowed under Proposed Registration No. 710896.

Conclusion:

The Texas Commission on Environmental Quality ("Commission") should overturn the TCEQ Executive Director's final approval of Proposed Registration No. 710896. In the alternative, the Commission should seek to have obtained the views of other interested parties, such as the City of Dallas, who have apparently either not been provided notice of the proposed application and the TCEQ Executive Director's decision, or who have not intervened in this process.

Respectfully Submitted to:

# MOTION TO OVERTURN EXECUTIVE DIRECTOR'S DECISION

Under the Texas Administrative Code Title 30 Part 1 Chapter 50 Subchapter G. Rule 50.130. I have the right to make a motion to overturn Executive Director's decision on Gustavo Hernandez Ortega's B.L.U. application site #710896, TCEQ customer number CN602999963, Regulated Entity number RN104916820.

I, (printed name) Jesse S. Leutwyler of (printed home address) 3002 CR 3210 Lone Oak TX make a motion to overturn the Executive Director's decision (Mr. Glen Shankle, Executive Director T.C.E.Q.) in reference to B.L.U. Application #710896 of Gustavo Hernandez Ortega. (1) Mr. Ortega can dump his domestic septage with the city of Greenville's Sanitation Department.

TEXAS COMMISSION ON ENVIRONMENTAL QUALITY
2007 MAR -3 AM 10:07
CHIEF CLERK'S OFFICE

To The Citizens of Hunt Co and Surrounding Counties and To The T.C.E.Q. Commission,

In August of 2006, local residence attended a T.C.E.Q. public hearing to voice their opposition to a Beneficial Land Use Application filed by Gustavo Ortega. The B.L.U. site # is 710896. This would allow him to spread Human waste on 40 acres of property that the runoff could possibly end up in Lake Tawakoni and Lake Fork. T.C.E.Q stated that they would individually answere each and everybody's questions, This would be on a one on one basis. They did not.

The Executive Director of The Texas Commission on Environmental Quality, Glen Shankle, made a decision March 5, of 2007 in favor of the application. A letter dated March 13 2007 was sent out advising the public his decision. We were given 23 day from March 13 to Make a Motion To overturn Executive Directors Decision on this matter. This would have us have the forms to him by April 5, 2007. we the people have to Mail one Original and 11 Copies To LaDonna Castanuela, Chief clerk of the T.C.E.Q. and then 1 copy To Gustavo Hernandez Ortega; 1 copy to Robert Brush Staff Attorney TCEQ; 1 copy To Kathy Faz, Technical staff TCEQ; and ~~them~~ then 1 Copy to Mr Blas Coy Jr. Attorney TCEQ. Four of the five addres are the same Box # with T.C.E.Q. ~~Does of any opinion that this~~ appears Maybe ~~is~~ a ploy by T.C.E.Q. to deter response from the Public.

This has put a burden on the citizens to voice their continued opposition. State Law Under the Texas Administrative Code Title 30 Part 1 Chapter 50 Subchapter G Rule 50.139 "Motion to Overturn Executive Director's Decision" States

(a) "The applicant, public interest counsel or other person may file with the chief clerk a motion to overturn of the executive director's action on an application or water quality management plan (WQMP) update certification." It is of my opinion that the commission needs to review all letters sent to the chief clerk in reference to a Motion to overturn. It will not be just, if they don't. T.C.E.Q sent me the law that addressed the issue of Motion to overturn Executive Director's Decision It is of my opinion, that this one page addresses the procedure. One Original To Chief Clerk, should have been enought.

The Sabine River authority requested that the Staff of the TCEQ give careful consideration to protecting the water quality of these invaluable resources during their evaluation", Referring to Lake Tawakoni and Lake Fork. They requested the staff of the T.C.E.Q. take in consideration the location of this site and the potential impacts to surface water quality in this area. The Sabine Authority advised the Water Shed at the site location could effect Lake Fork and Lake Tawakoni.

The Natural Resources Conservation service has built Flood prevention Dams in the area. Nine of these lakes are built to the South and Southeast of the B.Z.H. Site. Site 1 of Lake Fork watershed upper Lake Fork CREEK. was Built in 1976 and completed 8-11-77. The drainage area consists of 3,136 Acres, which includes the B.Z.H. Site. These lakes are considered to be 50 year old lakes, meaning they will silt in in approximately 50 years. Soil errosion will silt them in. From Site one Lake Fork creek runs directly into lake Fork. An unidentified person with the Natural Resources Conservation made the statement "I cannot believe the T.C.E.Q. approved the applicaton."

All the facts about the area were not at Shankle's disposal. There are water wells within a mile radius. There is a problem with erosion and flooding. There is a problem with what can be grown. There was a problem with Ortega's applicaton. The T.C.E.Q made the statement that they don't address this site causing property values declining in the area. I do and They should.

# MOTION TO OVERTURN EXECUTIVE DIRECTOR'S DECISION

Under the Texas Administrative Code Title 30 Part 1 Chapter 50 Subchapter G. Rule 50.139. I have the right to make a motion to overturn Executive Director's decision on Gustavo Hernandez Ortega's B.L.U. application site #710896, TCEQ customer number CN602999963, Regulated Entity number RN104916820.

I, (printed name) L. C. Mayo of (printed home address) 213 Friendship Cr, West Tawakoni Tx. 75474 make a motion to overturn the Executive Director's decision (Mr. Glen Shankle, Executive Director T.C.E.Q.) in reference to B.L.U. Application #710896 of Gustavo Hernandez Ortega to wit: *(Please give reason for your motion. You may attach an additional sheet if necessary)*

Mr. Gustavo Ortega should not be allowed to dump sewage on his property. TCEQ made a mistake in approving his application. TCEQ should reverse its decision.

Date: March 27, 2007

Signature: L C Mayo

Phone number: 903-447-4355

Under the Texas Administrative Code Title 30 Part 1 Chapter 50 Subchapter G. Rule 50.139. I have the right to make a motion to overturn Executive Director's decision on Gustavo Hernandez Ortega's B.L.U. application site #710896, TCEQ customer number CN602999963, Regulated Entity number RN104916820.

I, (printed name) Josie McGee + Jerry McGee of (printed home address) 2929 CR 3116, Campbell, TX 75422 make a motion to overturn the Executive Director's decision (Mr. Glen Shankle, Executive Director T.C.E.Q.) in reference to B.L.U. Application #710896 of Gustavo Hernandez Ortega to wit: *(Please give reason for your motion. You may attach an additional sheet if necessary)*

1. Water Pollution to Our Lakes, 2. Health issue of dumping raw sewage on our Land, 3. flies + pests, 4. tearing up our Roads, 5. Children + GRANDKids live in area + it effects them as well, 6. OVERseeing the Restrictions 7. sewage plant

Date: 3-26-07

Signature: Josie McGee + Jerry McGee

Phone number: 903-662-5704

MAIL IMMEDIATELY or within 23 days of March 14, 2007 with **original and 11 copies** to:

LaDonna Castanuela
Chief Clerk (MC-105)
Texas Commisison Environmental Quality
P. O. Box 13087
Austin, Texas 78711-3087

**Additional copies are to be mailed to the attached mailing list**

1. Water Pollution of our Lakes
This land runs off into 2 lakes that supplies water for several cities, Lake Fork & Lake Tawakani for Dallas, Greenville, Lone Oak, Campbell, Quinlan, & Etc. - How would you like to drink sewer water?

2. Heath issues -
I already have cancer, I'm doing treatments now for. I don't need extra problems. we hear on the news every nite about contaminations of our food Now we have to worry about our water too. How would you & your Family well or not like to drink this water?

3. flies & pests
We all know that food or the waste (crap) draws gnats & flies & other pests. would you want to be barbecuing & have to fight these things off of your food or your kids food?

4. tearing up of Roads
Several trips a day to the land would tear up the Road & costing the tax payers. Heavy trucks.

5. Kids & GRANDKIDS
my kids & GRANDKIDS live within 2 miles from this and it will effect them & their lives as much as ours. Please Reconsidee?!!

6. OVERseeing the Restrictions & making sure guidelines are met.
Again I refer you to the news. you know MR. Ortega will for awhile but then everybody slacks & quits doing what is expected & Right. Example: water Restrictions - People now of the drought - yet they continue to use water without regard to anyone else, they throw cigarettes out cars. Please don't let MR. Ortega have the right to do this.

7. sewage plant.
we have a plant (facility) to take care of the waste safely without any of these problems.

Please Reconsider your decision on this & realize there are more against it than for it &

FOR PUBLIC INTEREST COUNSEL:

Mr. Blas J. Coy, Jr., Attorney
Texas Commission on Environmental Quality
Public Interest Counsel MC-103
P.O. Box 13087
Austin, Texas 78711-3087

March 7, 2007

To the citizens of Hunt County and surrounding counties:

In August of 2006, local residents attended a TCEQ public hearing to voice their opposition to a Beneficial Land Use Application filed by Gustavo Ortega. The B.L.U. application site number is 710896. Let me make it plain. This would allow him to dump human waste on his property derived from septic systems.

I am sorry to inform the people the Executive Director of the Texas Commission on Environmental Quality, Glen Shankle, made a decision March 5, 2007 in favor of the application.

I, along with the people I represent am very upset. It is unbelievable that a state agency calling itself "The Texas Commission on Environmental Quality" would make such an outrageous decision. This has set us back 100 years or more. They are contradicting their own philosophy on protecting our water supplies. People have underground wells and this site is situated where run off goes into Lake Tawakoni and Lake Fork. I ask the people where do you get your water? This affects you and your loved ones.

Every day I pray to God for wisdom, understanding, and patience. We have been patient; this has been going on for over a year. I do not understand TCEQ's decision to grant the application. Wisdom tells me to do the right thing and fight TCEQ's decision.

We have twenty three (23) days from the date the chief clerk sends out the answers to the questions that were ask in August of 2006. Along with these answers Glen Shankle will make the people aware of his decision to grant the application. According to TCEQ these letters will be sent out within days. I talked to Katherine Fazz on March 6, 2007 at 4:10 p.m.

I have drafted a "Motion To Overturn Executive Director's Decision". I ask the citizens, leaders of the communities, churches association and you to get involved. When we receive the letter in response to our questions, we at that time need the citizens of Northeast Texas to respond with the "Motion To Overturn Executive Director's Decision". I will make this Motion available and will notify the public.

Respectively submitted,

Phillip A. Martin

We have no inspectors to check and a man that will go this far To get around the law will NOT follow a promise That he will take water samples (Whose Supply will he choose?)

& there will be no inspector to ck. Age and chemical levels & Safety thereof. No inspector will check on how many loads per month will be dumped on these premises.

Am a Fisherman that fishes this area. Your research is not right. Country Road 3205 has a creek that comes from that area. It is not enough length to clear up the water to have enough O2 to support the life in the creek. Once this amount of lime reaches the lake; the same low O2 will kill the life in the lake. This will kill the fish I usually catch.

March 7, 2007

To the citizens of Hunt County and surrounding counties:

In August of 2006, local residents attended a TCEQ public hearing to voice their opposition to a Beneficial Land Use Application filed by Gustavo Ortega. The B.L.U. application site number is 710896. Let me make it plain. This would allow him to dump human waste on his property derived from septic systems.

I am sorry to inform the people the Executive Director of the Texas Commission on Environmental Quality, Glen Shankle, made a decision March 5, 2007 in favor of the application.

I, along with the people I represent am very upset. It is unbelievable that a state agency calling itself "The Texas Commission on Environmental Quality" would make such an outrageous decision. This has set us back 100 years or more. They are contradicting their own philosophy on protecting our water supplies. People have underground wells and this site is situated where run off goes into Lake Tawakoni and Lake Fork. I ask the people where do you get your water? This affects you and your loved ones.

Every day I pray to God for wisdom, understanding, and patience. We have been patient; this has been going on for over a year. I do not understand TCEQ's decision to grant the application. Wisdom tells me to do the right thing and fight TCEQ's decision.

We have twenty three (23) days from the date the chief clerk sends out the answers to the questions that were ask in August of 2006. Along with these answers Glen Shankle will make the people aware of his decision to grant the application. According to TCEQ these letters will be sent out within days. I talked to Katherine Fazz on March 6, 2007 at 4:10 p.m.

I have drafted a "Motion To Overturn Executive Director's Decision". I ask the citizens, leaders of the communities, churches association and you to get involved. When we receive the letter in response to our questions, we at that time need the citizens of Northeast Texas to respond with the "Motion To Overturn Executive Director's Decision". I will make this Motion available and will notify the public.

Respectively submitted,

Phillip A. Martin

## MOTION TO OVERTURN EXECUTIVE DIRECTOR'S DECISION

07 MAR 19 AM 10:41

CHIEF CLERKS OFFICE

Under the Texas Administrative Code Title 30 Part 1 Chapter 50 Subchapter G. Rule 50.130. I have the right to make a motion to overturn Executive Director's decision on Gustavo Hernandez Ortega's B.L.U. application site #710896, TCEQ customer number CN602999963, Regulated Entity number RN104916820.

I, (printed name) James & Jennifer Owen of (printed home address) 500 Gladys Street Lone Oak make a motion to overturn the Executive Director's decision (Mr. Glen Shankle, Executive Director T.C.E.Q.) in reference to B.L.U. Application #710896 of Gustavo Hernandez Ortega.

CHIEF CLERKS OFFICE

**MOTION TO OVERTURN EXECUTIVE DIRECTOR'S DECISION**

Under the Texas Administrative Code Title 30 Part 1 Chapter 50 Subchapter G. Rule 50.139. I have the right to make a motion to overturn Executive Director's decision on Gustavo Hernandez Ortega's B.L.U. application site #710896, TCEQ customer number CN602999963, Regulated Entity number RN104916820.

I, (printed name) HAZEL L. OWENS of (printed home address) 213 FRIENDSHIP CR #3 W. TAWAKONI, TX make a motion to overturn the Executive Director's decision (Mr. Glen Shankle, Executive Director T.C.E.Q.) in reference to B.L.U. Application #710896 of Gustavo Hernandez Ortega to wit: *(Please give reason for your motion. You may attach an additional sheet if necessary)*

This is the most repulsive and obnoxious thing I have ever heard of. Not only is it unsafe for our water, it will certainly result in a hassle to the environment. What kind of limits came up with this plan?

Date: 3-27-07

MAILING LIST FOR
Gustavo Hernandez Ortega
Registration No. 710896

FOR THE APPLICANT:

Gustavo Hernandez Ortega
P.O. Box 1959
Quinlan, Texas 75474

FOR THE EXECUTIVE DIRECTOR:

Robert Brush, Staff Attorney
Texas Commission on Environmental Quality
Environmental Law Division MC-173
P.O. Box 13087
Austin, Texas 78711-3087

Kathy Faz, Technical Staff
Texas Commission on Environmental Quality
Water Quality Division MC-148
P.O. Box 13087
Austin, Texas 78711-3087

FOR PUBLIC INTEREST COUNSEL:

Mr. Blas J. Coy, Jr., Attorney
Texas Commission on Environmental Quality
Public Interest Counsel MC-103
P.O. Box 13087
Austin, Texas 78711-3087

March 7, 2007

To the citizens of Hunt County and surrounding counties:

In August of 2006, local residents attended a TCEQ public hearing to voice their opposition to a Beneficial Land Use Application filed by Gustavo Ortega. The B.L.U. application site number is 710896. Let me make it plain. This would allow him to dump human waste on his property derived from septic systems.

I am sorry to inform the people the Executive Director of the Texas Commission on Environmental Quality, Glen Shankle, made a decision March 5, 2007 in favor of the application.

I, along with the people I represent am very upset. It is unbelievable that a state agency calling itself "The Texas Commission on Environmental Quality" would make such an outrageous decision. This has set us back 100 years or more. They are contradicting their own philosophy on protecting our water supplies. People have underground wells and this site is situated where run off goes into Lake Tawakoni and Lake Fork. I ask the people where do you get your water? This affects you and your loved ones.

Every day I pray to God for wisdom, understanding, and patience. We have been patient; this has been going on for over a year. I do not understand TCEQ's decision to grant the application. Wisdom tells me to do the right thing and fight TCEQ's decision.

We have twenty three (23) days from the date the chief clerk sends out the answers to the questions that were ask in August of 2006. Along with these answers Glen Shankle will make the people aware of his decision to grant the application. According to TCEQ these letters will be sent out within days. I talked to Katherine Fazz on March 6, 2007 at 4:10 p.m.

I have drafted a "Motion To Overturn Executive Director's Decision". I ask the citizens, leaders of the communities, churches association and you to get involved. When we receive the letter in response to our questions, we at that time need the citizens of Northeast Texas to respond with the "Motion To Overturn Executive Director's Decision". I will make this Motion available and will notify the public.

Respectively submitted,

Phillip A. Martin

Austin, Texas 78711-3087

March 7, 2007

To the citizens of Hunt County and surrounding counties:

In August of 2006, local residents attended a TCEQ public hearing to voice their opposition to a Beneficial Land Use Application filed by Gustavo Ortega. The B.L.U. application site number is 710896. Let me make it plain. This would allow him to dump human waste on his property derived from septic systems.

I am sorry to inform the people the Executive Director of the Texas Commission on Environmental Quality, Glen Shankle, made a decision March 5, 2007 in favor of the application.

I, along with the people I represent am very upset. It is unbelievable that a state agency calling itself "The Texas Commission on Environmental Quality" would make such an outrageous decision. This has set us back 100 years or more. They are contradicting their own philosophy on protecting our water supplies. People have underground wells and this site is situated where run off goes into Lake Tawakoni and Lake Fork. I ask the people where do you get your water? This affects you and your loved ones.

Every day I pray to God for wisdom, understanding, and patience. We have been patient; this has been going on for over a year. I do not understand TCEQ's decision to grant the application. Wisdom tells me to do the right thing and fight TCEQ's decision.

We have twenty three (23) days from the date the chief clerk sends out the answers to the questions that were ask in August of 2006. Along with these answers Glen Shankle will make the people aware of his decision to grant the application. According to TCEQ these letters will be sent out within days. I talked to Katherine Fazz on March 6, 2007 at 4:10 p.m.

I have drafted a "Motion To Overturn Executive Director's Decision". I ask the citizens, leaders of the communities, churches association and you to get involved. When we receive the letter in response to our questions, we at that time need the citizens of Northeast Texas to respond with the "Motion To Overturn Executive Director's Decision". I will make this Motion available and will notify the public.

Respectively submitted,

Phillip A. Martin

CHIEF CLERKS OFFICE

**MOTION TO OVERTURN EXECUTIVE DIRECTOR'S DECISION**

Under the Texas Administrative Code Title 30 Part 1 Chapter 50 Subchapter G. Rule 50.139. I have the right to make a motion to overturn Executive Director's decision on Gustavo Hernandez Ortega's B.L.U. application site #710896, TCEQ customer number CN602999963, Regulated Entity number RN104916820.

I, (printed name) PERRY PITTMAN of (printed home address) 213 FRIENDSHIP CIR. #59, W. TAWAKONI TX 75474 make a motion to overturn the Executive Director's decision (Mr. Glen Shankle, Executive Director T.C.E.Q.) in reference to B.L.U. Application #710896 of Gustavo Hernandez Ortega to wit: *(Please give reason for your motion. You may attach an additional sheet if necessary)*

I RESPECT FULLY REQUEST THE TCEQ TO OVERTURN THE EXECUTIVE DIRECTORS DECISION.

Date: 3/30/07

Signature: Perry E Pittman II

Phone number: 903-447-5641

MAIL IMMEDIATELY or within 23 days of March 14, 2007 with **original and 11 copies** to:

FOR PUBLIC INTEREST COUNSEL:

Mr. Blas J. Coy, Jr., Attorney
Texas Commission on Environmental Quality
Public Interest Counsel MC-103
P.O. Box 13087
Austin, Texas 78711-3087

March 7, 2007

To the citizens of Hunt County and surrounding counties:

In August of 2006, local residents attended a TCEQ public hearing to voice their opposition to a Beneficial Land Use Application filed by Gustavo Ortega. The B.L.U. application site number is 710896. Let me make it plain. This would allow him to dump human waste on his property derived from septic systems.

I am sorry to inform the people the Executive Director of the Texas Commission on Environmental Quality, Glen Shankle, made a decision March 5, 2007 in favor of the application.

I, along with the people I represent am very upset. It is unbelievable that a state agency calling itself "The Texas Commission on Environmental Quality" would make such an outrageous decision. This has set us back 100 years or more. They are contradicting their own philosophy on protecting our water supplies. People have underground wells and this site is situated where run off goes into Lake Tawakoni and Lake Fork. I ask the people where do you get your water? This affects you and your loved ones.

Every day I pray to God for wisdom, understanding, and patience. We have been patient; this has been going on for over a year. I do not understand TCEQ's decision to grant the application. Wisdom tells me to do the right thing and fight TCEQ's decision.

We have twenty three (23) days from the date the chief clerk sends out the answers to the questions that were ask in August of 2006. Along with these answers Glen Shankle will make the people aware of his decision to grant the application. According to TCEQ these letters will be sent out within days. I talked to Katherine Fazz on March 6, 2007 at 4:10 p.m.

I have drafted a "Motion To Overturn Executive Director's Decision". I ask the citizens, leaders of the communities, churches association and you to get involved. When we receive the letter in response to our questions, we at that time need the citizens of Northeast Texas to respond with the "Motion To Overturn Executive Director's Decision". I will make this Motion available and will notify the public.

I can not understand why one individual would want to dump raw sewage in another person's neighborhood. This is one of the most disgusting, filthy, assaults a person can do to a neighbor.

This law is an antique, that needs to be abolished. This law is held over from when they wanted to aid dairy farmers to fertilize their pastures. It was not intended for human waste to be dumped on the land. When you see how close people reside to this 40 acres it is unbelievable that anyone would want to ruin their view, land, and peace with such a disgusting venture.

We have no way of knowing if there are toxic chemicals being spread on this property. Since the TC EQ only inspects when called, even local residents would not know if Mr. Ortega is collecting chemicals and dumping it along with other sewage. Unfortunately, we have no respect for Mr. Ortega and would not put this past him since he has no regard for anything except money.

With a Waste Treatment Plant within 13 miles of Lone Oak, and another being proposed, this filthy venture is unacceptable.

I can not believe the disregard that the TCEQ has for local residents and the value of their land. When you work for years to purchase a piece of land, maintain it, raise livestock, plant crops, to make a living with hopes of selling the land when you retire and be able to live comfortably, or leave it to your children for them to use or sell and then have some fool start dumping raw sewage near your farm and drop your land value down to nothing. Would anyone at the TCEQ buy a plot of land with a sewage dump next door? Perhaps someone needs to think of that issue. How about the odor? Pouring lime on the land does not eliminate the odor when the wind blows. How about the flies? Mr. Ortega is not going to put a net so the flies can not travel to local residents. Why didn't Mr. Ortega plan this dump near his residence? Or near his neighbors? I guess he does not want to deal with any of these issues. Perhaps the TCEQ should reconsider their decision since this action benefits Mr. Ortega only and not the people of Texas.

Since the TCEQ has stated that they will not have time to check on Mr. Ortega's compliance with the law unless some person complains, I want to register my complaint about his possible activities. How about the possibility of picking up, motor oil, antifreeze, battery acid, paint, pesticides, herbicides and other poisonous, restricted containments? Has anyone addressed this issue? Mr. Ortega can say he will not do such a thing knowingly, however, since he has no problem dumping raw sewage in someone else's back yard, I do not think he would be concerned about the possibility that this could happen. That is why there is a waste treatment plant locally to insure that there is no possibility of this happening. This is just one more reason not to issue his request.

**Additional copies are to be mailed to the attached mailing list**

For Ignoring the following:

Health issues relating to contaminated water;
Killing fish in the lakes,
Killing livestock for drinking the water runoff when we have Texas storms (like we just Had)
Monitoring (except when called) if the proper maintenance is being done
Not taking into account needles, bandages, sanitary napkins, etc. that is flushed down the toilet and pumped into trucks that will unload on the land
The Sabine water authority's concerns about contaminating the lakes that feed water to local and Dallas residents.
The water wells of local residents.
The road maintenance required when the trucks start down a country road and tear it up. Mr. Ortega does not pay taxes in Lone Oak, only the residents of Lone Oak pay these road taxes and we are supposed to support this disgusting venture that no one wants except Mr. Ortega.
The technical information that was submitted in relation to the PH that must be maintained for vegetation and the water runoff to the lakes.

If this is what the environmental agency in Texas is all about, it seems there needs to be an investigation of their practices.

To approve a request to benefit one selfish self-centered person monetarily and ignore health issues to hundreds or thousands of residents of Northeast Texas that drink lake water from Lake Fork and Tawakoni is absolutely absurd.

P.O. Box 13087
Austin, Texas 78711-3087

FOR PUBLIC INTEREST COUNSEL:

Mr. Blas J. Coy, Jr., Attorney
Texas Commission on Environmental Quality
Public Interest Counsel MC-103
P.O. Box 13087
Austin, Texas 78711-3087

March 7, 2007

To the citizens of Hunt County and surrounding counties:

In August of 2006, local residents attended a TCEQ public hearing to voice their opposition to a Beneficial Land Use Application filed by Gustavo Ortega. The B.L.U. application site number is 710896. Let me make it plain. This would allow him to dump human waste on his property derived from septic systems.

I am sorry to inform the people the Executive Director of the Texas Commission on Environmental Quality, Glen Shankle, made a decision March 5, 2007 in favor of the application.

I, along with the people I represent am very upset. It is unbelievable that a state agency calling itself "The Texas Commission on Environmental Quality" would make such an outrageous decision. This has set us back 100 years or more. They are contradicting their own philosophy on protecting our water supplies. People have underground wells and this site is situated where run off goes into Lake Tawakoni and Lake Fork. I ask the people where do you get your water? This affects you and your loved ones.

Every day I pray to God for wisdom, understanding, and patience. We have been patient; this has been going on for over a year. I do not understand TCEQ's decision to grant the application. Wisdom tells me to do the right thing and fight TCEQ's decision.

We have twenty three (23) days from the date the chief clerk sends out the answers to the questions that were ask in August of 2006. Along with these answers Glen Shankle will make the people aware of his decision to grant the application. According to TCEQ these letters will be sent out within days. I talked to Katherine Fazz on March 6, 2007 at 4:10 p.m.

I have drafted a "Motion To Overturn Executive Director's Decision". I ask the citizens, leaders of the communities, churches association and you to get involved. When we receive the letter in response to our questions, we at that time need the citizens of Northeast Texas to respond with the "Motion To Overturn Executive Director's Decision". I will make this Motion available and will notify the public.

Respectively submitted,

Phillip A. Martin

I think this is a horrible concept, not only for the environment but also the citizens of Hunt County. I would like to see more environmental studies conducted to validate short and long term issues. The idea of dumping human waste on open land as a cheap means of disposal is somewhat counter productive to the concept of environmentally friendly waste treatment plants.

March 7, 2007

To the citizens of Hunt County and surrounding counties:

In August of 2006, local residents attended a TCEQ public hearing to voice their opposition to a Beneficial Land Use Application filed by Gustavo Ortega. The B.L.U. application site number is 710896. Let me make it plain. This would allow him to dump human waste on his property derived from septic systems.

I am sorry to inform the people the Executive Director of the Texas Commission on Environmental Quality, Glen Shankle, made a decision March 5, 2007 in favor of the application.

I, along with the people I represent am very upset. It is unbelievable that a state agency calling itself "The Texas Commission on Environmental Quality" would make such an outrageous decision. This has set us back 100 years or more. They are contradicting their own philosophy on protecting our water supplies. People have underground wells and this site is situated where run off goes into Lake Tawakoni and Lake Fork. I ask the people where do you get your water? This affects you and your loved ones.

Every day I pray to God for wisdom, understanding, and patience. We have been patient; this has been going on for over a year. I do not understand TCEQ's decision to grant the application. Wisdom tells me to do the right thing and fight TCEQ's decision.

We have twenty three (23) days from the date the chief clerk sends out the answers to the questions that were ask in August of 2006. Along with these answers Glen Shankle will make the people aware of his decision to grant the application. According to TCEQ these letters will be sent out within days. I talked to Katherine Fazz on March 6, 2007 at 4:10 p.m.

I have drafted a "Motion To Overturn Executive Director's Decision". I ask the citizens, leaders of the communities, churches association and you to get involved. When we receive the letter in response to our questions, we at that time need the citizens of Northeast Texas to respond with the "Motion To Overturn Executive Director's Decision". I will make this Motion available and will notify the public.

Respectively submitted,

Phillip A. Martin

P.O. Box 13087
Austin, Texas 78711-3087

FOR PUBLIC INTEREST COUNSEL:

Mr. Blas J. Coy, Jr., Attorney
Texas Commission on Environmental Quality
Public Interest Counsel MC-103
P.O. Box 13087
Austin, Texas 78711-3087

March 7, 2007

To the citizens of Hunt County and surrounding counties:

In August of 2006, local residents attended a TCEQ public hearing to voice their opposition to a Beneficial Land Use Application filed by Gustavo Ortega. The B.L.U. application site number is 710896. Let me make it plain. This would allow him to dump human waste on his property derived from septic systems.

I am sorry to inform the people the Executive Director of the Texas Commission on Environmental Quality, Glen Shankle, made a decision March 5, 2007 in favor of the application.

I, along with the people I represent am very upset. It is unbelievable that a state agency calling itself "The Texas Commission on Environmental Quality" would make such an outrageous decision. This has set us back 100 years or more. They are contradicting their own philosophy on protecting our water supplies. People have underground wells and this site is situated where run off goes into Lake Tawakoni and Lake Fork. I ask the people where do you get your water? This affects you and your loved ones.

Every day I pray to God for wisdom, understanding, and patience. We have been patient; this has been going on for over a year. I do not understand TCEQ's decision to grant the application. Wisdom tells me to do the right thing and fight TCEQ's decision.

We have twenty three (23) days from the date the chief clerk sends out the answers to the questions that were ask in August of 2006. Along with these answers Glen Shankle will make the people aware of his decision to grant the application. According to TCEQ these letters will be sent out within days. I talked to Katherine Fazz on March 6, 2007 at 4:10 p.m.

I have drafted a "Motion To Overturn Executive Director's Decision". I ask the citizens, leaders of the communities, churches association and you to get involved. When we receive the letter in response to our questions, we at that time need the citizens of Northeast Texas to respond with the "Motion To Overturn Executive Director's Decision". I will make this Motion available and will notify the public.

Respectively submitted,

Phillip A. Martin

I, (printed name) Charlene H. Smith of (printed home address) 4002 FM 513 No of Lone Oak, Tex 75453 make a motion to overturn the Executive Director's decision (Mr. Glen Shankle, Executive Director T.C.E.Q.) in reference to B.L.U. Application #710896 of Gustavo Hernandez Ortega to wit: *(Please give reason for your motion. You may attach an additional sheet if necessary)*

We do not need Contamination of existing water wells, rivers or Creeks by Human waste. This is not healthy for people who live close to, nor do we need to destroy our land. This will cause disease. The ground can only absorb so much and will ruin our water underground. Plus no one will buy land close by, so low value on property. Who will check on Mr. Ortega?

Re: Gustavo Hernandez Ortega
Registration No. 710896

Dear Chief Clerk:

I am the attorney for a number of property owners affected by the application of Gustavo Hernandez Ortega for Registration No. 710896. The property owners are including but not limited to the Singing Bell Ranch and the Double U Ranch located near the subject property. This is a motion to overturn the decision of the Executive Director, Glen Shankle dated March 13, 2007.

In the Executive Director's Response to Public Comment filed February 16, 2007, the Executive Director stated "the ED does not consider property values, the marketability of adjacent property, or economic development in determining whether to issue a water quality permit or registration." This is in violation of existing Texas law. The approval by the Executive Director and the Texas Commission on Environmental Quality of the Application for Domestic Septage on Land is a governmental action subject to the Texas Private Real Property Rights Preservation Act. *Texas Government Code, Section 2007*, et al. Under such act, the governmental agency must conduct a Takings Impact Assessment study of any actions subject to this Act. The Executive Director's admission of not conducting such Takings Impact Assessment study or considering the impact on the adjacent property by such measure taken by the Texas Commission on Environmental Quality is in violation of the Texas Private Real Property Rights Preservation Act and, thus, is a basis to overturn the approval of the above-named registration.

In addition, this Motion to overturn incorporates the basis for overturning the decision contained in County Judge John Horn's letter opposing the Executive Director's decision. Specifically, this action could potentially hold egregious consequences for the county and adjacent properties. This site, if used in the manner as approved by the Executive Director could pose serious health and economic risk to many and benefits few. As Judge Horn stated, the City of Greenville already offers a safe disposal site and the site is for private gain, not for the public good.

SETTLEPOU
ATTORNEYS • COUNSELORS

As a result of the above-referenced basis, this is a formal request to overturn the decision of the Executive Director. This motion is sent as an original and eleven (11) copies filed with the Chief Clerk by certified mail. Additionally, a portion of the interested parties involved are copied on this letter.

Thank you for your attention to this matter and please do not hesitate to contact me should you have any further questions or comments.

Sincerely,

J. Allen Smith

Mr. Blas J. Coy, Jr., Attorney
Texas Commission on Environmental Quality
Public Interest Counsel MC-103
P.O. Box 13087
Austin, Texas 78711-3087

March 7, 2007

To the citizens of Hunt County and surrounding counties:

In August of 2006, local residents attended a TCEQ public hearing to voice their opposition to a Beneficial Land Use Application filed by Gustavo Ortega. The B.L.U. application site number is 710896. Let me make it plain. This would allow him to dump human waste on his property derived from septic systems.

I am sorry to inform the people the Executive Director of the Texas Commission on Environmental Quality, Glen Shankle, made a decision March 5, 2007 in favor of the application.

I, along with the people I represent am very upset. It is unbelievable that a state agency calling itself "The Texas Commission on Environmental Quality" would make such an outrageous decision. This has set us back 100 years or more. They are contradicting their own philosophy on protecting our water supplies. People have underground wells and this site is situated where run off goes into Lake Tawakoni and Lake Fork. I ask the people where do you get your water? This affects you and your loved ones.

Every day I pray to God for wisdom, understanding, and patience. We have been patient; this has been going on for over a year. I do not understand TCEQ's decision to grant the application. Wisdom tells me to do the right thing and fight TCEQ's decision.

We have twenty three (23) days from the date the chief clerk sends out the answers to the questions that were ask in August of 2006. Along with these answers Glen Shankle will make the people aware of his decision to grant the application. According to TCEQ these letters will be sent out within days. I talked to Katherine Fazz on March 6, 2007 at 4:10 p.m.

I have drafted a "Motion To Overturn Executive Director's Decision". I ask the citizens, leaders of the communities, churches association and you to get involved. When we receive the letter in response to our questions, we at that time need the citizens of Northeast Texas to respond with the "Motion To Overturn Executive Director's Decision". I will make this Motion available and will notify the public.

Respectively submitted,

TO WHOM IT MY CONCERN:
Chief Clerk-TCEQ

Gustavo Hernandez Ortega
Registration # 710896

I'm sending a copy of this letter to all the people on this list. My place is approximately ½ mile Northwest of the dump site and I expect to get contamination to my 4 pools and water well. I do not wish to have this kind of system in this county and I don't believe it should be authorized in this state. This sewage dumping, in any other case would be against the law. To have sewage on top of the ground in the vicinity of any other occupants. This site is on the side of a hill and it will have drainage into Lake Tawakoni and Lake Fort. The Sabine River Authority even spoke against it. The TCEQ chose to turn a deaf ear to it.

The TCEQ office should have been done away with 50 years ago but apparently all they are trying to do is justify their job. This kind of certificate puts Texas 100 years behind and makes laws against dumping sewage a mockery to law abiding citizens, who try to keep their property clean and sanitary.

I feel it's a waste of taxpayers money to even have an office that gives this kind of permit, justification.

Mr. Ortega admitted that he is doing this primarily for financial reasons and does not wish to live on the property in question.

The lady at the town hall meeting admitted that they had no control over Mr. Ortega after they give him the license to do this. It would be more or less useless, since with a permit he can do anything he wants. I think it would lower the property value and increase health problems in the area. Without any extra commercial vehicles we have enough trouble keeping our roads up.

This is a few of many reasons this certification should be stopped.

March 7, 2007

To the citizens of Hunt County and surrounding counties:

In August of 2006, local residents attended a TCEQ public hearing to voice their opposition to a Beneficial Land Use Application filed by Gustavo Ortega. The B.L.U. application site number is 710896. Let me make it plain. This would allow him to dump human waste on his property derived from septic systems.

I am sorry to inform the people the Executive Director of the Texas Commission on Environmental Quality, Glen Shankle, made a decision March 5, 2007 in favor of the application.

I, along with the people I represent am very upset. It is unbelievable that a state agency calling itself "The Texas Commission on Environmental Quality" would make such an outrageous decision. This has set us back 100 years or more. They are contradicting their own philosophy on protecting our water supplies. People have underground wells and this site is situated where run off goes into Lake Tawakoni and Lake Fork. I ask the people where do you get your water? This affects you and your loved ones.

Every day I pray to God for wisdom, understanding, and patience. We have been patient; this has been going on for over a year. I do not understand TCEQ's decision to grant the application. Wisdom tells me to do the right thing and fight TCEQ's decision.

We have twenty three (23) days from the date the chief clerk sends out the answers to the questions that were ask in August of 2006. Along with these answers Glen Shankle will make the people aware of his decision to grant the application. According to TCEQ these letters will be sent out within days. I talked to Katherine Fazz on March 6, 2007 at 4:10 p.m.

I have drafted a "Motion To Overturn Executive Director's Decision". I ask the citizens, leaders of the communities, churches association and you to get involved. When we receive the letter in response to our questions, we at that time need the citizens of Northeast Texas to respond with the "Motion To Overturn Executive Director's Decision". I will make this Motion available and will notify the public.

Respectively submitted,

Phillip A. Martin

## MOTION TO OVERTURN EXECUTIVE DIRECTOR'S DECISION

Under the Texas Administrative Code Title 30 Part 1 Chapter 50 Subchapter G. Rule 50.139. I have the right to make a motion to overturn Executive Director's decision on Gustavo Hernandez Ortega's B.L.U. application site #710896, TCEQ customer number CN602999963, Regulated Entity number RN104916820.

I, (printed name) J.C. Vincent & Cheryl Vincent of (printed home address) 1604 Hollow Way Lane, Quinlan, TX make a motion to overturn the Executive Director's decision (Mr. Glen Shankle, Executive Director T.C.E.Q.) in reference to B.L.U. Application #710896 of Gustavo Hernandez Ortega to wit: *(Please give reason for your motion. You may attach an additional sheet if necessary)*

We object to this procedure due to the extreme threat to the environment, and residents health. Also we feel this is an unsanitary, antiquated practice which would set the county back 50+ years – all for the benefit and profit of one individual! We feel it would also adversley affect property values!

MAILING LIST FOR
Gustavo Hernandez Ortega
Registration No. 710896

FOR THE APPLICANT:

Gustavo Hernandez Ortega
P.O. Box 1959
Quinlan, Texas 75474

FOR THE EXECUTIVE DIRECTOR:

Robert Brush, Staff Attorney
Texas Commission on Environmental Quality
Environmental Law Division MC-173
P.O. Box 13087
Austin, Texas 78711-3087

Kathy Faz, Technical Staff
Texas Commission on Environmental Quality
Water Quality Division MC-148
P.O. Box 13087
Austin, Texas 78711-3087

FOR PUBLIC INTEREST COUNSEL:

Mr. Blas J. Coy, Jr., Attorney
Texas Commission on Environmental Quality
Public Interest Counsel MC-103
P.O. Box 13087
Austin, Texas 78711-3087

March 7, 2007

To the citizens of Hunt County and surrounding counties:

In August of 2006, local residents attended a TCEQ public hearing to voice their opposition to a Beneficial Land Use Application filed by Gustavo Ortega. The B.L.U. application site number is 710896. Let me make it plain. This would allow him to dump human waste on his property derived from septic systems.

I am sorry to inform the people the Executive Director of the Texas Commission on Environmental Quality, Glen Shankle, made a decision March 5, 2007 in favor of the application.

I, along with the people I represent am very upset. It is unbelievable that a state agency calling itself "The Texas Commission on Environmental Quality" would make such an outrageous decision. This has set us back 100 years or more. They are contradicting their own philosophy on protecting our water supplies. People have underground wells and this site is situated where run off goes into Lake Tawakoni and Lake Fork. I ask the people where do you get your water? This affects you and your loved ones.

Every day I pray to God for wisdom, understanding, and patience. We have been patient; this has been going on for over a year. I do not understand TCEQ's decision to grant the application. Wisdom tells me to do the right thing and fight TCEQ's decision.

We have twenty three (23) days from the date the chief clerk sends out the answers to the questions that were ask in August of 2006. Along with these answers Glen Shankle will make the people aware of his decision to grant the application. According to TCEQ these letters will be sent out within days. I talked to Katherine Fazz on March 6, 2007 at 4:10 p.m.

I have drafted a "Motion To Overturn Executive Director's Decision". I ask the citizens, leaders of the communities, churches association and you to get involved. When we receive the letter in response to our questions, we at that time need the citizens of Northeast Texas to respond with the "Motion To Overturn Executive Director's Decision". I will make this Motion available and will notify the public.

Respectively submitted,

Phillip A. Martin

**Additional copies are to be mailed to the attached mailing list**

There will be a direct impact to the cleanness to our environment, as well to the underground streams that run underneath that piece of property that will transport harmful bacteria to local conservation lakes and water wells. It will also be carrying waste and harmful bacteria through run off rain water to the local creeks, one of which, runs through my property and occasionally will over flow into my yard, therefore my children will be directly exposed to this bacteria and waste, and possibly diseases which is completely inexcusable! I don't want my children exposed to this. Would you want yours exposed to it? Many illnesses can be caused by this act, & WHO will be responsible? The water from the creeks will eventually empty into Lake Tawakoni, and Lake Fork therefore getting into a much wider water supply. How with this information can anyone possibly in good conscience think of voting to allow this waste dump!!

The outcome of this on the children, the water supply, wildlife ecology, & local environment could be devastating, are you ready for the ramifications?

Domestic Septage

Registration # 710896

D. Regulated Management Conditions
1. Must not cause harm to WILD LIFE

E. Pathogen Control
5. Animals must not be allowed to graze on land for 30 days after application of Domestic .

Question

How does he keep the Wild Life (deer/ hogs and we are near the eagle capital of TEXAS) from grazing on this sight for 30 days ?
Shouldn't he be required to have a deer and hog prove fence to protect these animals.
Your list does not say just domestic animals .
6. Public must be restricted for one year after domestic septage has been applied to land .
Regulated Management Conditions
11. Must not allow uncontrolled public access
To protect the Public from Potential Health and Safety Hazards at site .

Question

Is there going to be a guard are a lock gate to prevent the public from entering ? There are other land owers on the same road . Just a sign will not stop any one . Land fills have proved that .
The deer / hog fence would take care of both these problems.
This is not a step foreward this is many steps backwards.

**Please over turn your decision on this application.**

Thanks
Charlie Wilson

TCEQ
LaDonna Castañuela
Regarding Gestavo Hernandez Ortega, permit 710896

To Whom It May Concern:

Thank you for your time as you read this letter. I am writing to request from TCEQ a motion to overturn the ruling allowing the registration for Mr. Ortega to dump septage on property in northeast Texas. There are three primary reasons that I would request your immediate action.

1) I do not feel that the questions were answered from the meeting at the Greenville Civic Center. I understand that the commission must only consider if Mr. Ortega's plan is possible, but I think that you are working with inaccurate information. If a wrong decision was made based on wrong information, then the only thing to make it right would be to overturn the wrong decision. The errors vary from things like inaccurate information about the closest well and water depth. Tula Douglass (a widow in my church) has a well on her land less than ½ mile from the proposed dump site where the water depth was only 30 feet! I will gladly enumerate other questions that were not answered if that is the information you need.
2) There is additional information of which I have just become aware. We have been in a drought, as I am sure that you know. We recently had a good rain. There are pictures available that will clearly show that the land in question not only has significant run-off, but that it also gathers into low areas along the edge of his property. A silt fence will not solve the problem, because my concern is primarily a standing water question. The land simply cannot handle a good rain even after a drought, much less constant application of liquid and solid waste. Standing water is a concern for bacteria and mosquitoes. How much more then is standing septage – especially if even one application were to be accidentally or intentionally untreated?
3) I have a concern with regard to the first amendment, which states that Congress shall make no laws regarding the free-exercise of religion. I know that in urban areas, there are laws about how close certain things can be to places like schools and churches. I will be honest, I cannot expound on my concerns, except to say that I am fearful that a decision allowing someone to dump septage less than ½ mile from the church would be in effect a decision limiting the free-exercise of religion. Our church will have to modify the things that we typically do because of nuisance odors, etc. We use our baseball field for practice, church softball, and little league. The field is about ¼ mile from the dump site. If there is a problem with standing water, as I am suggesting above, we will be physically affected long before the complaint even reaches Austin. If TCEQ is certain about the safety of an operation like this, will you at least mandate direct oversight with legal consequences if this registration prohibits the free exercise of religion. I am not certain that my concerns are something that would warrant legal action, but I wanted your office to be aware of my concerns while there was still time to simply overturn the decision.

Thank you again for your time. I do not want anything I have written to imply that I am taking legal action at this point, except to ask for you to overturn your decision based on inaccurate information filed, new information available, and specific concerns with regard to a church and its legal protections.

Thank you,

Thomas L. Witt

FOR PUBLIC INTEREST COUNSEL:

Mr. Blas J. Coy, Jr., Attorney
Texas Commission on Environmental Quality
Public Interest Counsel MC-103
P.O. Box 13087
Austin, Texas 78711-3087

March 7, 2007

To the citizens of Hunt County and surrounding counties:

In August of 2006, local residents attended a TCEQ public hearing to voice their opposition to a Beneficial Land Use Application filed by Gustavo Ortega. The B.L.U. application site number is 710896. Let me make it plain. This would allow him to dump human waste on his property derived from septic systems.

I am sorry to inform the people the Executive Director of the Texas Commission on Environmental Quality, Glen Shankle, made a decision March 5, 2007 in favor of the application.

I, along with the people I represent am very upset. It is unbelievable that a state agency calling itself "The Texas Commission on Environmental Quality" would make such an outrageous decision. This has set us back 100 years or more. They are contradicting their own philosophy on protecting our water supplies. People have underground wells and this site is situated where run off goes into Lake Tawakoni and Lake Fork. I ask the people where do you get your water? This affects you and your loved ones.

Every day I pray to God for wisdom, understanding, and patience. We have been patient; this has been going on for over a year. I do not understand TCEQ's decision to grant the application. Wisdom tells me to do the right thing and fight TCEQ's decision.

We have twenty three (23) days from the date the chief clerk sends out the answers to the questions that were ask in August of 2006. Along with these answers Glen Shankle will make the people aware of his decision to grant the application. According to TCEQ these letters will be sent out within days. I talked to Katherine Fazz on March 6, 2007 at 4:10 p.m.

I have drafted a "Motion To Overturn Executive Director's Decision". I ask the citizens, leaders of the communities, churches association and you to get involved. When we receive the letter in response to our questions, we at that time need the citizens of Northeast Texas to respond with the "Motion To Overturn Executive Director's Decision". I will make this Motion available and will notify the public.

Respectively submitted,

Phillip A. Martin

March 7, 2007

To the citizens of Hunt County and surrounding counties:

In August of 2006, local residents attended a TCEQ public hearing to voice their opposition to a Beneficial Land Use Application filed by Gustavo Ortega. The B.L.U. application site number is 710896. Let me make it plain. This would allow him to dump human waste on his property derived from septic systems.

I am sorry to inform the people the Executive Director of the Texas Commission on Environmental Quality, Glen Shankle, made a decision March 5, 2007 in favor of the application.

I, along with the people I represent am very upset. It is unbelievable that a state agency calling itself "The Texas Commission on Environmental Quality" would make such an outrageous decision. This has set us back 100 years or more. They are contradicting their own philosophy on protecting our water supplies. People have underground wells and this site is situated where run off goes into Lake Tawakoni and Lake Fork. I ask the people where do you get your water? This affects you and your loved ones.

Every day I pray to God for wisdom, understanding, and patience. We have been patient; this has been going on for over a year. I do not understand TCEQ's decision to grant the application. Wisdom tells me to do the right thing and fight TCEQ's decision.

We have twenty three (23) days from the date the chief clerk sends out the answers to the questions that were ask in August of 2006. Along with these answers Glen Shankle will make the people aware of his decision to grant the application. According to TCEQ these letters will be sent out within days. I talked to Katherine Fazz on March 6, 2007 at 4:10 p.m.

I have drafted a "Motion To Overturn Executive Director's Decision". I ask the citizens, leaders of the communities, churches association and you to get involved. When we receive the letter in response to our questions, we at that time need the citizens of Northeast Texas to respond with the "Motion To Overturn Executive Director's Decision". I will make this Motion available and will notify the public.

Respectively submitted,

Phillip A. Martin
