

TEXAS COMMISSION ON ENVIRONMENTAL QUALITY

EXECUTIVE SUMMARY

TO: Commissioners DATE: January 30, 2013

THRU: Caroline Sweeney, Deputy
Office of Legal Services

Robert Martinez, Director
Environmental Law Division
Office of Legal Services

FROM: Robin Smith, Attorney
Environmental Law Division
Office of Legal Services

SUBJECT: Executive Summary
Docket No. 2421-WR
Modification of Order Suspending Water Rights Based on a Senior call from Dow
Chemical Company
TWC §§ 11.053
Austin, Bastrop, Bell, Bosque, Brazoria, Brazos, Brown, Burleson, Burnet,
Callahan, Colorado, Comanche, Coryell, Eastland, Erath, Falls, Fayette, Fort
Bend, Freestone, Grimes, Hamilton, Harris, Hill, Hood, Jack, Johnson,
Lampasas, Lee, Leon, Limestone, Madison, McLennan, Milam, Mills, Palo Pinto,
Parker, Robertson, Somervell, Stephens, Travis, Waller, Washington, and
Williamson Counties.

This Executive Director's Order, signed on January 15, 2013, suspends and adjusts several water rights on the Brazos River that were not suspended in the Commission's December 12, 2012 Order. Dow Chemical Company (Dow) made a senior priority call to the Executive Director on November 14, 2012 asking that water rights junior to its water right be suspended. The Executive Director signed an Order on November 19, 2012, suspending non-municipal and non-power generation water rights on the Brazos River below Possum Kingdom Reservoir with priority dates after February 14, 1942. On December 12, 2012, the Commission issued an order modifying and affirming the Executive Director's order (December Order).

On January 8, 2013, the Executive Director also issued an order modifying the December Order to allow suspended water rights to take water at certain temporarily higher flow levels. This January 15, 2013 order incorporates the primary terms of that order and supersedes the January 8, 2013 order.

Dow's Water Right: Dow is the owner of Certificate of Adjudication 12-5328, which authorizes the diversion of 20,000 acre-feet of water from the Brazos River for industrial purposes with a priority date of February 28, 1929, the diversion of 150,000 acre-feet per year for industrial and municipal purposes with a priority date of February 14, 1942, 65,000 acre-feet per year for industrial purposes with a priority date of April 4, 1960, and 3,136 acre-feet per year for municipal purposes with a priority date of March 8, 1976. Dow's certificate also includes additional authorizations for storage in off-channel reservoirs and diversions from the San Jacinto-Brazos Coastal Basin.

Suspension Rule: Under Tex. Water Code § 11.027, older water rights have priority over more recent water rights ("first in time is first in right"). Under Tex. Water Code § 11.053 and 30 Tex. Admin. Code Chapter 36, the Executive Director, during a time of drought or emergency shortage of water, may issue a temporary order suspending or adjusting water rights based on a senior call for water. The Executive Director can modify the suspension and adjustment order pursuant to 30 Tex. Admin. Code § 36.6(3)(C).

The watershed at Dow's diversion point remains in a "drought" as defined in 30 Tex. Admin. Code § 36.2(3). Under that rule, a drought occurs when at least one of the following criteria are met:

- (A) drought conditions in the watershed or the part of the watershed subject to the executive director's Suspension or Adjustment Order are classified as at least moderate by the National Drought Mitigation Center;
- (B) streamflows at United States Geological Survey gaging stations in the drainage area are below the 33rd percentile of the period of record available for the impacted watershed; or
- (C) below normal precipitation in the watershed or part of the watershed subject to the Executive Director's Order, for the preceding three-month period, as reported in the Texas Climatic Bulletin (Office of the Texas State Climatologist), a senior call is made, and the demand for surface water exceeds the available supply as evidenced by a senior water right holder making a senior call.

The watershed above Dow is still classified as at least in a moderate drought. Dow still needs and can beneficially use the water resulting from the suspension.

Executive Director's Evaluation: The January 8, 2013 Executive Director Order allows suspended water rights to take water when the flow at several gages in the lower Brazos River are at certain levels. The primary provisions of that order are now in the January 15, 2013 order, and the January 15, 2013 order provides that the January 8, 2013 order is superseded by the January 15, 2013 order.

January 8, 2013 order (now part of January 15, 2013 order):

If conditions change to cause temporary higher flow levels to occur in the Brazos River watershed, water will be available for suspended water right holders to divert and impound without impairing Dow's senior call because at the higher flow levels the water could not all be beneficially used by Dow. The Executive Director decided that modifying the December Order to allow suspended water right holders to divert and impound surface water under their water

right during certain high flow events will maximize the beneficial use of water, minimize the impact on water right holders, and prevent the waste of water.

The Executive Director determined that multiple flow gages would be appropriate because of the large area affected by the call. Using multiple gages accounts for the fact that it can take as long as two weeks for water to travel from locations in the upper portion of the priority call area to Dow's diversion point. The Executive Director determined that gage locations representative of conditions on the Brazos River and its major tributaries will account for variable rainfall events throughout the priority call area.

Flow levels at or above the 33rd percentile are at a reasonable level to allow the diversion and impoundment of water because a stream flow level below the 33rd percentile flow is one of the factors under which a "drought" exists pursuant to 30 TAC Chapter 36. The 33rd percentile flow is the streamflow value below which 33 percent of the daily streamflow observations for the period of record available for certain gages in the Brazos River can be found. For USGS Gage 08116650 Brazos River near Rosharon, a different flow value below the 33rd percentile applies because this gage is directly above Dow's diversion point and the 33rd percentile flow is more than the 290 cubic feet per second (cfs) that Dow is currently able to divert due to pump capacity. Dow's authorized diversion rate of 630 cfs is used below as the applicable rate at the USGS Gage 08116650 Brazos River near Rosharon.

These flow values will make water available for suspended water right holders during temporary higher flow levels and not impair Dow's senior priority call. This maximizes the beneficial use of water, minimizes the impact on water rights holders, and prevents waste of water. 30 Tex. Admin. Code § 36.5(b)(1) – (3).

Suspensions and corrections in January 15, 2013 order:

When the December 12, 2013 Order was issued affirming as modified the Executive Director's December 12, 2012 Order, the Executive Director had requested information from non-suspended water right holder's related to their use use of surface water and alternative water sources. Staff has also requested information concerning water needs related to public health and welfare related uses such as drinking water and water for bathing.

The memorandum attached as Exhibit C explains staff's analysis in detail in determining which water rights to suspend or adjust in this January 15, 2013 order. Staff reviewed information provided by the non-suspended water rights and other available information related to each non-suspended water right holder's amount of water use, which water rights were being used, available alternative sources, conservation efforts, and needs for public health and welfare concerns such as drinking water and bathing.

The Executive Director's Order also corrects Attachment A and C to the Executive Director's November 19, 2012 order. Attachment AA corrects the owners of several water rights and removes an expired term permit. Appendix C is corrected to remove one and to add one water right.

The Executive Director requests that the Commission also order that its December 12, 2012 order is superseded by this January 15, 2013 order which incorporates the December order by reference.

Attached to this Executive Summary are the following:

Attachment A: ED Order signed January 15, 2013.

Attachment B: Staff Memorandum dated January 15, 2013.

Attachment C: Draft Order.

ED Request: Affirm the ED's modification of the suspension order and order that the Commission December 12, 2012 order be superseded by this modification order.

ATTACHMENT A

TEXAS COMMISSION ON ENVIRONMENTAL QUALITY

ORDER **modifying an order suspending water rights on the Brazos River**

The Executive Director of the Texas Commission on Environmental Quality issued an Order on November 19, 2012, suspending water rights on the Brazos River after receiving a senior priority call from Dow Chemical Company (Dow) on November 14, 2012. On December 12, 2012, the Commission issued an order modifying and affirming the Executive Director's order (December Order).

On January 8, 2013, the Executive Director issued an order modifying the December Order to allow suspended water right holders to divert or impound water at temporary higher flow levels in the Brazos River in accordance with their water right. The primary terms of that January 8, 2013 order are incorporated into this order below and this order supercedes the January 8, 2013 order. Additionally, the Executive Director issues this modification to the December Order to adjust or suspend certain municipal or power generation water rights on the Brazos River that were not adjusted or suspended in the December Order. The Executive Director also makes other corrections and additions to the December Order.

The Executive Director makes the following Findings of Fact and Conclusions of Law:

FINDINGS OF FACT

1. The December Order (TCEQ Docket No. 2012-2421-WR), attached hereto as Attachment 1 and incorporated herein by reference, suspends certain junior water rights on the Brazos River as a result of Dow's senior priority call.
2. Dow has not rescinded or withdrawn its senior priority call on water rights in the Brazos River.
3. The requirements for the Executive Director to issue an order suspending water rights on the Brazos River as listed in 30 Texas Administrative Code (TAC) Chapter 36 continue to be met, specifically:
 - a. Without the December Order, Dow would be unable to divert the amount of water it needs and that is authorized under its water rights due to low flow in the Brazos River;

- b. Dow has a need for and can beneficially use the increased amounts of water in the river that result from suspending upstream junior water rights; and
- c. The watershed at Dow's diversion point is in a "drought" as defined in 30 TAC Section 36.2(3).

Adjustment and Suspension of Junior Water Rights

4. The Executive Director's Order that was modified and affirmed in the December Order is attached to the December Order as Exhibit A. Several water rights in Exhibit A were not suspended because they were water rights for municipal use or power generation use and there were concerns for public health, safety and welfare. Those water right holders are listed in Appendix C of Exhibit A in the December Order.
5. The Executive Director mailed questionnaires to all non-suspended water right holders in Appendix C on November 19, 2012, requesting water use data and information related to the entity's alternative water sources.
6. The Executive Director mailed or emailed follow-up questionnaires to the non-suspended water right holders on December 14, 2012, and December 27, 2012, asking for clarification or more information on certain questions and requesting each non-suspended water right holder to identify a minimum amount of water necessary for addressing public health and safety concerns.
7. The following municipal water rights with priority dates after February 14, 1942, indicated that they are not using their junior priority water rights for municipal use or that they have alternative sources that are sufficient for their needs at this time:
 - Durham Overstreet Trust, Durham Phillips Trust, Overstreet Family LP, The Shores of Granbury Inc., and Overstreet Properties LP: Certificate of Adjudication No. 12-4060
 - ADTIN LLC: Permit No. 5164
 - City of Thorndale: Certificates of Adjudication Nos. 12-3754 & 12-3757
 - HD Howard: Certificates of Adjudication No. 12-4048
 - City of Rosebud: Certificate of Adjudication No. 12-4360
 - City of Mart: Permit No. 5000
 - City of Crawford: Permit No. 4135
 - Quail Valley Associates LLC: Certificate of Adjudication No. 12-4025
 - Wingshot LP: Certificate of Adjudication No. 12-4026.
 - Bi-Stone Municipal Water District: Certificate of Adjudication No. 12-5287
 - City of Marlin: Certificate of Adjudication No. 12-4355
 - City of Graford: Certificate of Adjudication No. 12-4004
 - City of Teague: Certificate of Adjudication Nos. 12-5291 & 12-5292
 - City of Cleburne: Certificate of Adjudication No. 12-4258

8. City of Robinson, Permit No. 5085, provided information indicating that their current surface water diversion rate is greater than the minimum rate needed to protect public health, safety, and welfare and the city has access to an alternative source of water to meet some of its needs.
9. Somervell County Water District, Permit No. 5744, provided information indicating that their current surface water diversion rate from the Paluxy River is greater than the minimum rate needed to protect public health, safety, and welfare.
10. City of Clifton has Certificate of Adjudication No. 12-2291 and Permit No. 5551. The City of Clifton also diverts water under the City of Meridian's water right, Permit No. 5899, for use by the City of Meridian. The City of Clifton and the City of Meridian provided information that they each have an alternative source of water that can supply their needs at this time.
11. The City of Temple, Certificate of Adjudication No. 12-2938, has provided information that it is not using its senior priority diversion rate in its water right and that it has alternative sources of water. Based on its 2011 water use reports, the City of Temple's needs can be met by its senior water rights and alternative sources.
12. The City of Waco, Certificate of Adjudication No. 12-2315 and Permit Nos. 5840 and 5094, has provided information that it is directly reusing return flows authorized for indirect reuse by Permit No. 5840, it is using less water than is authorized under the senior portion of its water right, and its storage in Lake Waco is above the amount authorized by its senior storage right. The City of Waco indicates that all inflows to its junior impoundment authorized under Certificate of Adjudication No. 12-4340 are passed downstream.
13. Gulf Coast Water Authority, Certificate of Adjudication Nos. 12-5171 & 12-5322, did not use surface water for municipal purposes under Certificate of Adjudication 12-5322 in 2011 based on its water use report. Additionally, Gulf Coast Water Authority provided information that its needs can be met by its senior water rights.
14. Texas Water Development Board's, Brazos River Authority's, and City of Houston's Permit No. 2925 authorizes the impoundment of water in Allens Creek reservoir. This reservoir has not been constructed and therefore no water is currently used under this permit.
15. Tradinghouse Power Company, LLC, Certificate of Adjudication No. 12-4342, provided information that both its generating units are currently idle and not expected to operate within the next six to twelve months.

16. Luminant Generation Company, LLC, Certificate of Adjudication No. 12-4345, provided information that both its generating units are currently idle and not expected to operate within the next six to twelve months.
17. The following entities have water rights for the impoundment of water with a priority date junior to February 14, 1942. These impoundment rights may be suspended without concerns relating to public health, safety and welfare. Due to the size and location of these impoundments, the water right holders should provide a pass-through plan to the Executive Director as to how it is passing inflows into these impoundments through the reservoir and releasing water downstream to satisfy Dow's senior priority call.
 - Brazos River Authority: Certificate of Adjudication Nos. 12-5156, 12-5157, 12-5158, 12-5159, 12-5160, 12-5161, 12-5162, 12-5163, 12-5164
 - City of Waco: Permit No. 5094 & Certificate of Adjudication No. 12-4340
 - City of Cleburne: Certificate of Adjudication No. 12-4106
 - Eastland County Water Supply District: Certificate of Adjudication No. 12-3470
 - Palo Pinto Co. MWD 1: Certificate of Adjudication No. 12-4031 & Permit No. 5447
 - City of Mineral Wells: Certificate of Adjudication No. 12-4039
 - Bi-Stone Municipal Water Supply District: Certificate of Adjudication No. 12-5287
18. Appendix B-1, attached hereto and incorporated herein by reference, lists the counties in which the water rights referenced in Findings of Fact Nos. 7-17 are located.

Temporary Higher Flow Levels

19. If conditions change to cause temporary higher flow levels to occur in the Brazos River watershed, water will be available for suspended water right holders to divert and impound without impairing Dow's senior priority call because at the higher flow levels the water could not all be beneficially used by Dow.
20. Modifying the December Order to allow suspended water right holders to divert and impound surface water under their water right during certain temporary higher flow events will maximize the beneficial use of water, minimize the impact on water right holders, and prevent the waste of water.
21. The Executive Director has identified seven representative flow gages on the Brazos River operated by the United States Geological Service which may be used to identify temporary higher flow levels. These gages are as follows:
 - USGS Gage 08091000 Brazos River near Glen Rose
 - USGS Gage 08095000 North Bosque River near Clifton
 - USGS Gage 08100000 Leon River near Hamilton

- USGS Gage 08106500 Little River near Cameron
- USGS Gage 08108700 Brazos River at SH 21 near Bryan
- USGS Gage 08111500 Brazos River near Hempstead
- USGS Gage 08116650 Brazos River near Rosharon

22. The 33rd percentile flow is the streamflow value below which 33 percent of the daily streamflow observations for the period of record available for the above-referenced gages in the Brazos River can be found. Flow levels at or above the 33rd percentile are at a reasonable level to allow the diversion and impoundment of water because a stream flow level below the 33rd percentile flow is one of the factors under which a “drought” exists pursuant to 30 Texas Administrative Code (TAC) Chapter 36. For USGS Gage 08116650 Brazos River near Rosharon, a different flow value below the 33rd percentile applies because this gage is directly above Dow’s diversion point and the 33rd percentile flow is more than the 290 cubic feet per second (cfs) that Dow is currently able to divert due to pump capacity. Dow’s authorized diversion rate of 630 cfs is used as the applicable rate at the USGS Gage 08116650 Brazos River near Rosharon. These flow values will make water available for suspended water right holders during temporary higher flow levels and not impair Dow’s senior priority call.
23. To ensure that water diverted or impounded during temporary higher flow levels meets the requirements of the suspension and this order, the water right holder must maintain and produce certain information relating to gage levels at the time of diversion or impoundment as well as the level of stored water.

Correction of water rights listed in December Order

24. The Executive Director’s Order that was modified and affirmed in the December Order is attached to the December Order as Exhibit A. Appendix A of Exhibit A lists those junior water rights that are suspended by the December Order. Appendix C of Exhibit A lists those junior water rights that are not suspended by the December Order.
25. Certain holders of water rights were incorrectly listed in Appendix A of the December Order and they no longer own these water rights. These water right holders are listed below with the corrected owner:

Water Right	Incorrect Owner	Correct Owner
Certificate No. 2234	Bruce E. Todd	Mac Smith Et Al
Certificate No. 2236	Bruce E. Todd	Mac Smith Et Al
Certificate No. 2285	Leonard C. Radde	R.W. Gossett
Certificate No. 2871	Trust for Seth Thomas Moore Jr.	VMK Ranch LLC
Certificate No. 2872	Trust for Seth Thomas Moore Jr.	VMK Ranch LLC

Water Right	Incorrect Owner	Correct Owner
Certificate No. 3496	Nannie Lee Thompson	Phillip V. Thompson
Certificate No. 3636	Gayland Stephens Et Ux	Natural Dairy Grower Co.
Certificate No. 3663	R.E. Basham Jr.	Billie Jean Basham
Certificate No. 3735	Henry Grady Rylander	Grace Elizabeth Rylander
Certificate No. 3736	Henry Grady Rylander	Grace Elizabeth Rylander
Certificate No. 4010	Charles W. & Jean Welch	The Dorothy J. Welch Marital Trust, Dorothy Jean Welch
Certificate No. 4063	Granpen Associates LP, Jusyrn Company Inc., The Resort at Eagle Mountain Lake LP, Alamo Builders LP	Granpen Associates LP, Jusyrn Company Inc., The Resort at Eagle Mountain Lake LP, Alamo Builders LP, and Phillip Jeffrey Ryan Et Ux
Certificate No. 4075	The RK Hanger Trust	Charca LTD
Permit No. 4124	Bruce E. Todd	Mac Smith Et Al
Permit No. 5665	Paul Weinman	Paul Weinman and Robert Starks

26. Permit No. 5729, Michael Horton, may be removed from Appendix A of the December Order because this term permit expired on December 31, 2011.
27. A revised list of suspended water rights holders, attached hereto and incorporated herein as Appendix AA, reflects corrections to Appendix A listed above and the three deleted water rights identified by the Commission in the December Order. Appendix AA does not include any other water rights suspended or adjusted by this order.
28. Two revisions should also be made to Appendix C of the December Order. Smith Bend Ranch, Certificate of Adjudication No. 12-4318, should be removed because it is senior to Dow's call with a priority date of December 31, 1921. City of Waco, Certificate of Adjudication No. 2315, should be added because it has a junior priority date of April 15, 1958 and February 21, 1979.

CONCLUSIONS OF LAW

1. The December Order may be modified by the Executive Director based on changed conditions pursuant to the December Order and 30 TAC Section 36.6(3)(C).
2. This order meets the requirements of Texas Water Code Section 11.053 and 30 TAC Chapter 36, including the requirements of Texas Water Code Section 11.053(b)(1)-(3)

and 30 TAC Section 36.5(b)(1)-(3) to maximize the beneficial use of water, minimize the impact on water right holders, and prevent the waste of water.

3. Findings of Fact Nos. 4-17 show that information received in response to questionnaires required under 30 TAC Chapter 36 and the December Order further defines the uses and needs of municipal water right holders.
4. Based on Findings of Fact No. 7 and in accordance with 30 TAC 36.3, the Executive Director has determined that the following municipal water rights with priority dates after February 14, 1942, may be suspended at this time while taking into consideration concerns related to public health, safety and welfare:
 - Durham Overstreet Trust, Durham Phillips Trust, Overstreet Family LP, The Shores of Granbury Inc., and Overstreet Properties LP: Certificate of Adjudication No. 12-4060
 - ADTIN LLC: Permit No. 5164
 - City of Thorndale: Certificates of Adjudication Nos. 12-3754 & 12-3757
 - HD Howard: Certificates of Adjudication No. 12-4048
 - City of Rosebud: Certificate of Adjudication No. 12-4360
 - City of Mart: Permit No. 5000
 - City of Crawford: Permit No. 4135
 - Quail Valley Associates LLC: Certificate of Adjudication No. 12-4025
 - Wingshot LP: Certificate of Adjudication No. 12-4026
 - Bi-Stone Muncpal Water District: Certificate of Adjudication No. 12-5287
 - City of Marlin: Certificate of Adjudication No. 12-4355
 - City of Graford: Certificate of Adjudication No. 12-4004
 - City of Teague: Certificate of Adjudication No. 12-5291 & 12-5292
 - City of Cleburne: Certificate of Adjudication No. 12-4258
5. Based on Finding of Fact No. 8 and in accordance with 30 TAC 36.3, City of Robinson, Permit No. 5085, may be adjusted while taking into consideration concerns related to public health, safety and welfare by reducing the portion of the water right junior to February 14, 1942 to a diversion rate of 1,250 gallons per minute (gpm).
6. Based on Finding of Fact No. 9 and in accordance with 30 TAC § 36.3, Somervell County Water District, Permit No. 5744, may be adjusted while taking into consideration concerns related to public health, safety and welfare by reducing the portion of the water right junior to February 14, 1942, to a diversion rate from the Paluxy River of 7,000 gpm.
7. Based on Finding of Fact No. 10 and in accordance with 30 TAC § 36.3, the City of Clifton's water rights, Certificates of Adjudication No. 12-2291, Permit No. 5551, and the City of Meridian's water right Permit No. 5899 may be adjusted to a combined diversion rate of 4 cfs from the North Bosque River while taking into consideration concerns related to public health, safety and welfare.

8. Based on Finding of Fact No. 11 and in accordance with 30 TAC § 36.3, the portions of the City of Temple's Certificate of Adjudication No. 12-2938 that are junior to February 14, 1942, may be suspended while taking into consideration concerns related to public health, safety and welfare.
9. Based on Finding of Fact No. 12 and in accordance with 30 TAC § 36.3, the portions of the City of Waco's Certificate of Adjudication Nos. 12-2315 and 12-4340 and Permit Nos. 5840 and 5094 that are junior to February 14, 1942, may be suspended while taking into consideration concerns related to public health, safety and welfare.
10. Based on Finding of Fact No. 13 and in accordance with 30 TAC § 36.3, the portion of Gulf Coast Water Authority's Certificates of Adjudication Nos. 12-5171 and 12-5322 that are junior to February 14, 1942, may be suspended while taking into consideration concerns related to public health, safety and welfare. Gulf Coast Water Authority's diversions from the Brazos River under Certificate of Adjudication No. 12-5322 are limited to the portion of the diversion rate that is senior to February 14, 1942.
11. Based on Finding of Fact No. 14 and in accordance 30 TAC § 36.3, Texas Water Development Board, Brazos River Authority, and City of Houston, Permit 2925, may be suspended while taking into consideration concerns related to public health, safety and welfare.
12. Based on Findings of Fact Nos. 15 and 16 and in accordance 30 TAC § 36.3, the portions of Tradinghouse Power Company, LLC's Certificate of Adjudication No. 12-4342 that are junior to February 14, 1942, and Luminant Generation Company, LLC's Certificate of Adjudication No. 12-4345 may be suspended while taking into consideration concerns related to public health, safety and welfare.
13. Based on Finding of Fact No. 17 and in accordance 30 TAC § 36.3, the following water rights for impoundment of water may be suspended and the water right holders should provide pass-through plans to the Executive Director by January 25, 2013.
 - Brazos River Authority: Certificate of Adjudication Nos. 12-5156, 12-5157, 12-5158, 12-5159, 12-5160, 12-5161, 12-5162, 12-5163, 12-5164
 - City of Waco: Permit No. 5094 & Certificate of Adjudication No. 12-4340
 - City of Cleburne: Certificate of Adjudication No. 12-4106
 - Eastland County Water Supply District: Certificate of Adjudication No. 12-3470
 - Palo Pinto Co. MWD 1: Certificate of Adjudication No. 12-4031 & Permit No. 5447
 - City of Mineral Wells: Certificate of Adjudication No. 12-4039

- Bi-Stone Municipal Water Supply District: Certificate of Adjudication No. 12-5287

14. Findings of Fact Nos. 19-22 show that changed conditions, such as rainfall events, could temporarily provide water to suspended water right holders as well as Dow and there is a reasonable method available for allowing such temporary diversion and impoundment.
15. Based on Finding of Fact No. 23, it is reasonable for the Executive Director to require information to be maintained and produced by the water right holders to enforce the provisions of this order.
16. The corrections in Findings of Fact Nos. 24-28 are necessary and reasonable corrections to fulfill the intent of the December Order and this order.

Now, therefore, be it ordered by the Executive Director of the Texas Commission on Environmental Quality that:

1. The following water rights are suspended:
 - Durham Overstreet Trust, Durham Phillips Trust, Overstreet Family LP, The Shores of Granbury Inc., and Overstreet Properties LP: Certificate of Adjudication No. 12-4060
 - ADTIN LLC: Permit No. 5164
 - City of Thorndale: Certificates of Adjudication Nos. 12-3754 & 12-3757
 - HD Howard: Certificates of Adjudication No. 12-4048
 - City of Rosebud: Certificate of Adjudication No. 12-4360
 - City of Mart: Permit No. 5000
 - City of Crawford: Permit No. 4135
 - Quail Valley Associates LLC: Certificate of Adjudication No. 12-4025
 - Wingshot LP: Certificate of Adjudication No. 12-4026
 - Bi-Stone Municipal Water District: Certificate of Adjudication No. 12-5287
 - City of Marlin: Certificate of Adjudication No. 12-4355
 - City of Graford: Certificate of Adjudication No. 12-4004
 - City of Teague: Certificate of Adjudication No. 12-5291 & 12-5292
 - City of Cleburne: Certificate of Adjudication No. 12-4258
2. The portion of City of Robinson's Permit No. 5085 that is junior to February 14, 1942 is adjusted to a diversion rate of 1,250 gpm.
3. The portion of Somervell County Water District's Permit No. 5744, that is junior to February 14, 1942, is adjusted to a diversion rate from the Paluxy River of 7,000 gpm.

4. The City of Clifton's water rights, Certificates of Adjudication No. 12-2291 & Permit No. 5551, and the City of Meridian's water right, Permit No. 5899, are adjusted to a combined diversion rate of 4 cfs from the North Bosque River.
5. The portions of City of Waco's Certificate of Adjudication Nos. 12-2315 and 12-4340 and Permit Nos. 5840 and 5094 that are junior to February 14, 1942, are suspended.
6. The portion of the City of Temple's Certificate of Adjudication No. 12-2938 that is junior to February 14, 1942 is suspended.
7. The portion of Gulf Coast Water Authority's Certificate of Adjudication Nos. 12-5171 and 12-5322 that are junior to February 14, 1942, are suspended. Gulf Coast Water Authority's diversions from the Brazos River under Certificate of Adjudication 12-5322 are limited to the portion of the diversion rate that is senior to February 14, 1942.
8. Texas Water Development Board's, Brazos River Authority's, and City of Houston's Permit No. 2925 is suspended.
9. The portions of Tradinghouse Power Company, LLC's Certificate of Adjudication No. 12-4342 that are junior to February 14, 1942 and Luminant Generation Company, LLC's Certificate of Adjudication No. 12-4345 are suspended. However, if these companies need to use their suspended water rights for power generation purposes, they must give written notification to the Executive Director. After such notification, the companies may use their suspended water rights.
10. The following water rights for impoundment of water are suspended and the water right holders shall prepare and submit a pass-through plan to the Executive Director by January 25, 2013, that is sufficiently specific for the Executive Director to ensure that junior inflows are not being unlawfully impounded and are being released downstream to satisfy Dow's priority call:
 - Brazos River Authority: Certificate of Adjudication Nos. 12-5156, 12-5157, 12-5158, 12-5159, 12-5160, 12-5161, 12-5162, 12-5163, 12-5164
 - City of Waco: Permit No. 5094 & Certificate of Adjudication No. 12-4340
 - City of Cleburne: Certificate of Adjudication No. 12-4106
 - Eastland County Water Supply District: Certificate of Adjudication No. 12-3470
 - Palo Pinto Co. MWD 1: Certificate of Adjudication No. 12-4031 & Permit No. 5447
 - City of Mineral Wells: Certificate of Adjudication No. 12-4039
 - Bi-Stone Municipal Water Supply District: Certificate of Adjudication No. 12-5287

11. If a suspended water right holder with a municipal use believes that it should be allowed to take water that is under suspension because there are public health, safety and welfare concerns, such as drinking and fire suppression, those entities must provide information to the Executive Director detailing the need and the reasons why the suspended surface water right must be used.
12. Corrections to Appendix A of the December Order are reflected in Appendix AA to this order. All provisions in the December Order that refer to Appendix A now refer to Appendix AA.
13. Appendix C of the December Order is corrected as follows: Smith Bend Ranch, Certificate of Adjudication No. 12-4318, is removed from Appendix C and the City of Waco, Certificate of Adjudication No. 2315, is added to Appendix C.
14. In the event of possible temporary higher flow levels in the Brazos River, the water rights listed in Appendix AA of this order, any water rights suspended by this order, and any subsequently suspended or adjusted water rights may divert and impound water in accordance with the diversion or storage authorization in the water right if the flow level at the following gage in the affected area of the water right at issue is at or above the following streamflow level:

Gage	Affected Area	Streamflow Level (cfs)
USGS Gage 08091000 Brazos River near Glen Rose	All water rights on the main stem of the Brazos River and its tributaries below Lake Possum Kingdom and above Lake Whitney	108
USGS Gage 08095000 North Bosque River near Clifton	All water rights on the North Bosque River and its tributaries	10
USGS Gage 08100000 Leon River near Hamilton	All water rights on the Leon River and its tributaries above Lake Belton	6
USGS Gage 08106500 Little River near Cameron	All water rights on the Little River and its tributaries below Lake Belton and above its confluence with the Brazos River, including the Lampasas River	202

Gage	Affected Area	Streamflow Level (cfs)
USGS Gage 08108700 Brazos River at SH 21 near Bryan	All water rights on the main stem of the Brazos River and its tributaries (excluding the Little River watershed) below Lake Whitney and above USGS gage 08108700, Brazos River at SH 21 near Bryan	904
USGS Gage 08111500 Brazos River near Hempstead	All water rights on the main stem of the Brazos River and its tributaries, including Yegua Creek and the Navasota River, below USGS Gage 081108700, Brazos River at SH 21 near Bryan and above USGS gage 08111500, Brazos River near Hempstead	1430
USGS Gage 08116650 Brazos River near Rosharon	All water rights on the main stem of the Brazos River and its tributaries below USGS gage 08111500, Brazos River near Hempstead	630

15. If any of the gages listed in the chart in Ordering Provision No. 14 is inoperable, water right holders shall use the next downstream gage that is listed in the chart during the inoperable period to determine if it can divert water or store inflows under this order.
16. If the streamflow levels are below the gage values in the chart in Ordering Provision No. 14 above, the water right holder must immediately cease diverting or impounding water.
17. Any water right holder impounding water under the terms of this order must record the level of water impounded as of November 19, 2012. For any additional water impounded under Order Provision No. 14, the water right holder shall record the streamflow level at the applicable gage when each impoundment is initiated, the time of the gage reading, and the level of impounded water. The water right holder shall record the latter level at the time that diversion and impoundment has ceased based on streamflow conditions outlined in this order or available capacity. The water right holder shall maintain these records for a minimum of two years from the issue date of this order and shall provide them to the Executive Director within 48 hours of a written request.
18. Any water right holder diverting water under the terms of this order must record the streamflow level at the applicable gage when the diversion is initiated and the time of the gage reading. The water right holder shall maintain these records for a minimum of two

years from the issue date of this order and shall provide them to the Executive Director within 48 hours of a written request.

19. Any water lawfully stored prior to suspension or during temporary higher flow levels under the terms of the Executive Director's January 8, 2013 order or this order are not required to be released.
20. This order shall be in effect until May 18, 2013, unless modified or terminated.
21. This order may be extended once for 90 days.
22. All other provisions of the December Order not expressly modified by this order remain in full effect, including any deadlines for water right holders.
23. The commission will hold a hearing to determine whether to affirm, modify, or set aside this Executive Director order on January 30, 2013, at the Texas Commission Environmental Quality, 12100 Park 35 Circle, Building E, Room 201S, Austin, Texas. This order constitutes notice for that hearing. Any affected water right holder may attend the hearing and provide oral comment.

Attachment 1

TEXAS COMMISSION ON ENVIRONMENTAL QUALITY

AN ORDER affirming and modifying the Executive Director's Order suspending water rights in the Brazos River Basin; TCEQ Docket No. 2012-2421-WR

On December 5, 2012, the Texas Commission on Environmental Quality ("TCEQ" or "Commission") considered whether to affirm, modify, or set aside an Order issued by the Executive Director suspending water rights below Possum Kingdom Reservoir in the Brazos River Basin on November 19, 2012. Notice of this December 5, 2012 hearing to affirm, modify or set aside the Emergency Order was mailed to all affected water right holders in the Brazos River Basin more than ten days and less than 45 days before the hearing. The Commission determined that the Executive Director appropriately issued the Order and that the requirements for a suspension order in Tex. Water Code § 11.053 and 30 Tex. Admin. Code Chapter 36 have been satisfied.

The Commission determined to affirm but modify the Executive Director's Order based on two determinations. First, based on the Executive Director's recommendation, the Commission determined that three junior water rights upstream of Possum Kingdom Lake were inadvertently included in Appendix A, the list of the suspended water rights in the Executive Director's Order, and should be deleted from the Executive Director's Order. These water rights are Certificates of Adjudication Nos. 12-4134, 12-4135, and 12-4141 issued to Billy Doan, CKS Properties, LP, and Dolly Keesee, respectively.

Second, the Commission determined that the Executive Director's Order should have included additional provisions within the Order. The Commission determined to add an additional Conclusion of Law which states: "The Executive Director may require each of the junior water rights holders in Appendices C and D to: 1) provide information demonstrating that it has made reasonable efforts to obtain alternative water supplies to the Executive Director within 14 days; 2) provide its water use data to the Executive Director every 14 days; and 3) provide information on what it has done to identify long-term additional or alternative water sources within 30 days in accordance with 30 TAC § 36.5(c)." The Commission determined to add a new ordering provision which states: "The junior water rights in Appendices C and D must submit the following information to the Executive Director within 14 days concerning efforts to

conserve water and obtain additional or alternative sources: 1) Water use data indicating the amount, rate of diversion, place and purposes of use on a daily basis; 2) Information demonstrating that the water rights holder has made reasonable efforts to obtain alternative water sources within 14 days; and 3) Information on what the water rights holder has done to identify long-term additional or alternative water sources within 30 days.”

NOW, THEREFORE, IT IS ORDERED BY THE TEXAS COMMISSION ON ENVIRONMENTAL QUALITY THAT:

- 1) The November 19, 2012 Order issued by the Executive Director, attached hereto as Exhibit A and incorporated into this Order by reference, is affirmed, but modified to delete three water rights, Certificates of Adjudication Nos. 12-4134, 12-4135, and 12-4141 issued to Billy Doan, CKS Properties, LP, and Dolly Keesee, respectively, from the list of suspended water rights.
- 2) The November 19, 2012 Order issued by the Executive Director is modified to include an additional Conclusion of Law No. 9 which states: “The Executive Director may require each of the junior water rights holders in Appendices C and D to: 1) provide information demonstrating that it has made reasonable efforts to obtain alternative water supplies to the Executive Director within 14 days; 2) provide its water use data to the Executive Director every 14 days; and 3) provide information on what it has done to identify long-term additional or alternative water sources within 30 days in accordance with 30 TAC § 36.5(c).”
- 3) The November 19, 2012 Order issued by the Executive Director is modified to include an additional Ordering Provision which states: “The junior water rights in Appendices C and D must submit the following information to the Executive Director within 14 days concerning efforts to conserve water and obtain additional or alternative sources:
 - 1) Water use data indicating the amount, rate of diversion, place and purposes of use on a daily basis;
 - 2) Information demonstrating that the water rights holder has made reasonable efforts to obtain alternative water sources within 14 days; and
 - 3) Information on what the water rights holder has done to identify long-term additional or alternative water sources within 30 days.”

ISSUED: DEC 12 2012

TEXAS COMMISSION ON
ENVIRONMENTAL QUALITY

Bryan W. Shaw, Ph.D. Chairman

Exhibit A

The November 19, 2012 Order issued by the Executive Director

TEXAS COMMISSION ON ENVIRONMENTAL QUALITY

ORDER suspending water rights on the Brazos River

The Executive Director of the Texas Commission on Environmental Quality received a senior priority call from Dow Chemical Company (Dow), on November 14, 2012. Dow is the owner of Certificate of Adjudication 12-5328, which authorizes the diversion of 20,000 acre-feet of water from the Brazos River for industrial purposes at a priority date of February 28, 1929, the diversion of 150,000 acre-feet per year for industrial and municipal purposes with a priority date of February 14, 1942, 65,000 acre-feet per year for industrial purposes with a priority date of April 4, 1960, and 3,136 acre-feet per year for municipal purposes with a priority date of March 8, 1976.

FINDINGS OF FACT

Having considered the facts provided by Dow, staff investigations and review, and public information, the Executive Director makes the following Findings of Fact and Conclusions of Law:

1. Dow is the owner of Certificate of Adjudication 12-5328, which authorizes the diversion of 20,000 acre-feet of water from the Brazos River for industrial purposes at a priority date of February 28, 1929, the diversion of 150,000 acre-feet per year for industrial and municipal purposes with a priority date of February 14, 1942, 65,000 acre-feet per year for industrial purposes with a priority date of April 4, 1960, and 3,136 acre-feet per year for municipal purposes with a priority date of March 8, 1976. Dow's certificate also includes additional authorizations for storage in off-channel reservoirs and diversions from the San Jacinto-Brazos Coastal Basin.
2. Dow is currently unable to divert the amount of water it needs and that is authorized under its water rights due to low flow in the river.
3. Dow has a need for and can beneficially use increased amounts of water in the river that result from suspending upstream junior water rights.
4. Seventy-five percent of the watershed at or above the senior call location is in at least moderate drought as classified by the National Drought Mitigation Center. The 33rd percentile flow at U. S. Geological Survey gaging station 08116650, Brazos River near Rosharon, Texas, based on a period of record from April 1, 1967 to present is 1,610 cfs. Average streamflow for the period October 12, 2012 to November 12, 2012 was 535 cfs. Average streamflow for the week of November

- 5, 2012 to November 11, 2012 was 264 cfs. Therefore, the watershed at Dow's diversion point is in a "drought" as defined in 30 Tex. Admin. Code § 36.2(3).
5. Under 30 TAC 297.58(b), if a water right has appropriations with different priority dates, water shall be credited against the oldest priority date first.
 6. Based on water use information submitted by Dow and Brazosport Water Authority, Dow has used 84,898 acre feet of its authorized water. Therefore, the priority date of Dow's call is February 14, 1942. Dow indicates its current consumptive demand is 225 cfs and it has 41 days of reservoir storage.
 7. There are several water rights, excluding those for municipal use or power generation, upstream of Dow's Permit that are junior in priority to February 14, 1942. These rights are listed in Appendix A of this Order, which is incorporated in this Order and is part of this Order.
 8. Appendix B, which is incorporated into this Order and is part of this Order, lists the counties that are covered by the junior water rights being suspended.
 9. There are several junior water rights that are for municipal use or power generation upstream of Dow. The Executive Director has determined that these rights should not be suspended at this time due to concerns about public health, safety and welfare. These water rights are listed in Appendix C, which is incorporated into this Order and is part of this Order.
 10. Attachment D lists those water right holders with authorizations for non-exempt domestic use. These water rights are not being suspended for the same reasons described in Finding of Fact No. 9. This Appendix is incorporated in this Order and is part of this Order.
 11. If the water rights in Finding of Fact No. 7 are suspended as described above, the resulting change in streamflow conditions should allow Dow to divert some of the water that these water rights do not take. This is an amount that could be beneficially used by Dow for municipal and industrial purposes.
 12. This suspension order maximizes the beneficial use of water, minimizes the impact on water rights holders, prevents the waste of water, conforms to the order of preferences established by the Texas Water Code § 11.024 to the greatest extent practicable, considers the efforts of the affected water right holders to develop and implement the water conservation plans and drought contingency plans required by Tex. Water Code Chapter 11, and does not require the release of water that is lawfully stored in a reservoir under a valid water right.

CONCLUSIONS OF LAW

1. Based on the priority doctrine in Tex. Water Code § 11.027, Dow has a right to call on water rights that are junior to it if the call is not futile.
2. Based on Findings of Fact Nos. 2, 3, 6, and 11, due to low flows Dow is unable to take water it is authorized to take under its permit, and suspending the water rights in this order may result in water Dow can beneficially use.

3. Based on Finding of Fact No. 4, the Brazos River in the watershed above Dow's diversion point is in a drought as defined by 30 Tex. Admin. Code § 36.2(3).
4. This Suspension Order meets the requirements of Tex. Water Code § 11.053.
5. The junior water rights in Appendix A should be suspended.
6. The junior water rights in Appendix C, are municipal and power generation water rights that the Executive Director has determined should not be suspended at this time due to concerns about public health, safety and welfare.
7. The junior water rights in Appendix D authorize non-exempt domestic use and should not be suspended at this time due to concerns about public health, safety and welfare.
8. This Order constitutes notice of the hearing to affected water right holders required by 30 Tex. Admin. Code § 36.8.

Now, therefore, be it ordered by the Executive Director of the Texas Commission on Environmental Quality that:

1. The water rights listed in Appendix A are suspended for 180 days.
2. This order shall be in effect for 180 days from the date of issuance.
3. This order may be extended once for 90 days.
4. This order is subject to modification or termination by the Executive Director based on changed conditions. Changed conditions include, but are not limited to, notification by Dow that Dow is rescinding or withdrawing its call, or the Executive Director has information that the call is no longer needed due to higher streamflow, or conditions in the watershed no longer meet the definition of "drought."
5. Dow shall notify the Executive Director immediately if its need for water can be met without the suspensions. If Dow notifies the Executive Director in writing that it rescinds or withdraws its call, this Order automatically terminates upon receipt by the Executive Director.
6. The commission will hold a hearing to determine whether to affirm, modify, or set aside this Executive Director order on December 5, 2012 at the Texas Commission Environmental Quality, 12100 Park 35 Circle, Building E, Room 2018, Austin, Texas.

ATTACHMENT B

TCEQ Interoffice Memorandum

To: Commissioners

Date: January 15, 2013

Thru: Bridget Bohac, Chief Clerk
Zak Covar, Executive Director
L'Oreal W. Stepney, P.E., Deputy Director, Office of Water
Ramiro Garcia, Jr., Deputy Director, Office of Compliance and Enforcement
Kellye Rila, Director, Water Availability Division
Ron Ellis, Manager, Water Rights Permitting and Availability Section

From: Kathy Alexander, Ph.D., Technical Specialist, Water Rights Permitting and Availability Section

Background

The Executive Director (ED) received a priority call from Dow Chemical Company (Dow) on November 14, 2012. On November 19, 2012, the Executive Director issued an Order suspending certain diversions in the Brazos River Basin below Lake Possum Kingdom. On December 5, 2012, the Commission voted to affirm that Order and modified it to include the requirements under 30 TAC Chapter 36.5. Junior surface water rights for municipal and power generation use were not suspended at that time for public health, safety, and welfare reasons.

Pursuant to the Commission Order, the Executive Director requested junior water right holders to provide information under 30 TAC Chapter 36.5, including information on water use and any available alternate sources of water. Staff reviewed the information provided by the junior water right holders under 30 TAC Chapter 36.5 and recommends suspensions and adjustments to certain junior water rights as discussed below.

On January 8, 2013, the Executive Director issued a modified order allowing suspended water rights to divert and impound water when flows at certain United States Geological Survey (USGS) gages were above specific levels. On January 15, 2013, the Executive Director issued an Order incorporating the terms of the January 8, 2013 order and adjusting or suspending certain municipal or power generation water rights on the Brazos River that were not adjusted or suspended in the December Order.

Adjustment of Water Rights

Based on information under 30 TAC Chapter 36.5, staff recommends an adjustment to the diversion rate for the following junior water rights:

1. Somervell County Water District – Water Use Permit 5744 authorizes a 4,118 acre-foot impoundment on Wheeler Branch, tributary of the Paluxy River. The permit further authorizes the District to divert water from the Paluxy River to the Wheeler Branch Reservoir at a diversion rate of 22,500 gpm. The priority date of the permit is June 27, 2001. Streamflow restrictions apply to the diversion from the Paluxy River.

The District indicates it is currently diverting stored water from the Wheeler Branch Reservoir, which is approximately 80% full. When its streamflow restrictions are met, the District diverts water from the Paluxy River at a rate of up to 14,000 gpm; however, no water has been diverted from the Paluxy River since May of 2012 because of the streamflow restrictions in the water right. The District is currently under voluntary restrictions in its Drought Contingency Plan.

Staff recommends reducing the diversion rate from the river to 7,000 gpm when water is available under the water right. Under the Executive Director's January 15, 2013 Order, the District can divert under the terms and conditions of its water right if flows at USGS Gage 08091000, Brazos River at Glen Rose exceed 108 cfs.

2. City of Robinson – Water Use Permit 5085 authorizes diversion of water from the Brazos River to off channel reservoirs at a priority date of August 14, 1986. The permit authorizes a diversion rate of 46,100 gpm. Streamflow restrictions apply to the diversion from the Brazos River.

The City of Robinson (City) indicates it also supplies water to the City of Lorena. The City has five groundwater wells and can divert surface water for the City of Lorena under the City of Lorena's water supply contract with the Brazos River Authority. The City is currently under mandatory restrictions in its Drought Contingency Plan. Surface water is currently diverted at a rate of 5,100 gpm. The City also indicated that its minimum system need is 1,042 gpm.

Because the City has additional sources of water, staff recommends adjusting the diversion rate from the Brazos River under the City's Permit 5085 to the minimum system need plus a 20% margin of safety, thereby adjusting the diversion rate for this water right to 1,250 gpm. Under the Executive Director's January 15, 2013 Order, the City can divert under the terms and conditions of its water right if flows at USGS Gage 08108700, Brazos River at SH 21 near Bryan exceed 904 cfs.

3. City of Clifton/City of Meridian – Clifton's Certificate of Adjudication 12-2291 authorizes diversion of water from the North Bosque River at a diversion rate of 4.01 cfs at a priority date of March 14, 1963. Clifton's Permit 5551 authorizes diversion of water from the diversion location authorized in Certificate 12-2291 on the North Bosque River at a diversion rate of an additional 8 cfs at a priority date of April 3, 1996. Meridian's Permit 5899 authorizes diversion of water from the North Bosque River from the diversion location authorized in Clifton's water rights at a diversion rate of an additional 8 cfs at a priority date of September 8, 2005. The maximum combined diversion rate from the North Bosque River under Clifton's and Meridian's water rights is 20 cfs. Streamflow restrictions apply to Clifton's Permit 5551 and Meridian's Permit 5899.

Clifton diverts water from the North Bosque River under Meridian's water right for use by Meridian. Clifton indicates that it has a groundwater supply. Clifton further indicates that it needs 1.3 acre-feet per day to maintain its surface water storage; however diversions from the river are limited during drought conditions due to special conditions in its water rights. Clifton only diverted water from the North Bosque River on 38 out of the past 365 days because of low flow conditions.

Clifton indicates that it diverts water from the North Bosque River at a rate between 4 and 8 cfs. Clifton and Meridian state that their groundwater can support their water needs, that surface water supply is used when the groundwater wells are undergoing maintenance or to provide additional water when available from the river. Clifton and Meridian are under mandatory restrictions in their Drought Contingency Plans. Based

on the availability of the alternate source, staff recommends that the diversion rate from the North Bosque River be adjusted to 4.0 cfs during time the water right holder could otherwise divert under its water right. Under the Executive Director's January 15, 2013 Order, the City can divert under the terms and conditions of its water right if flows at USGS Gage 08095000, North Bosque River near Clifton exceeds 10 cfs.

Partial Suspension of Junior Portion of Water Rights with Multiple Priority Dates

The following water rights authorize multiple priority dates for diversion and impoundment. Based on responses under 30 TAC Chapter 36.5, these water right holders indicated that all or portions of their water rights that are senior to February 14, 1942 are sufficient to meet their demands. Staff recommends that the junior portion of these water rights be suspended.

1. City of Temple – Certificate of Adjudication 12-2938 authorizes diversion of 15,804 acre-feet of water at a diversion rate of 31 cfs with a priority date of October 30, 1915. This diversion and diversion rate are senior to the call. The Certificate also authorizes diversion of 20,000 acre-feet of water at an additional diversion rate of 30.7 cfs with a priority date of January 11, 1957, which is junior to the call.

The City indicates it is in voluntary restrictions under its Drought Contingency Plan. The City also indicates it has two contracts with the Brazos River Authority for 11,953 acre-feet of water per year. The City states that it is diverting water at a rate less than the senior diversion rate authorized in its certificate. The City indicates that its minimum needs for public health, safety, and welfare is all of the water under its certificates and its contracts. The City's water use report for 2011 indicates that it used less than 20,000 acre-feet of water. Based on the City's reported water use, its senior water right and its contract (27,757 acre-feet) should be sufficient to meet its needs. Staff recommends suspension of those portions of Certificate 12-2938 that are junior to February 14, 1942.

2. City of Waco – The City of Waco owns multiple water rights. Certificate of Adjudication 12-2315 authorizes storage of 104,100 acre-feet of water in Lake Waco and diversion of 39,100 acre-feet of water per year from Lake Waco with a priority date of January 10, 1929. The Certificate also authorizes diversion of 19,100 acre-feet of water from Lake Waco with a priority date of April 16, 1958. Water Use Permit 5094 authorizes the storage of an additional 87,962 acre-feet of water in Lake Waco, and diversion of an additional 20,770 acre-feet of water from Lake Waco. The additional storage has a priority date of September 12, 1986 and the additional diversion has priority dates of September 12, 1986 and January 21, 1988. Water Use Permit 5840 authorizes the reuse of up to 42,175 acre-feet of Waco's surface water based return flows at a priority date of July 13, 2004.

The City is currently in voluntary restrictions under its Drought Contingency Plan. Regarding Permit 5840, the City indicates that it is directly reusing its return flows and is not using return flows under its water right. Regarding Lake Waco, the City indicates that it is using less water than the 39,100 acre-feet authorized under its senior water right. Storage in Lake Waco is above the amount authorized under the junior priority date in Permit 5094. Staff recommends that the City's water rights junior to February 14, 1942 under Certificate of Adjudication 12-2315 and Permits 5840 and 5094 be suspended. This would result in the suspension of a total of 82,045 acre-feet of diversions. Staff also recommends that the City submit a pass through plan for Lake

Waco to ensure that inflows available for impoundment under its junior priority date are passed downstream to the senior call.

3. Gulf Coast Water Authority- GCWA owns three certificates that authorize diversion of water from the Brazos River.
 - a. Certificate of Adjudication 12-5168 authorizes diversion of 99,932 acre-feet of water authorized under the certificate or contract water purchased from the Brazos River Authority from two diversion points on the Brazos River at a maximum combined diversion rate of 685 cfs and a priority date of January 15, 1926, which is senior to the priority call.
 - b. Certificate of Adjudication 12-5171 authorizes diversion of 125,000 acre-feet of water authorized under the certificate or contract water purchased from the Brazos River Authority from the diversion points authorized under Certificate 12-5168 at a maximum combined diversion rate of 600 cfs. The first 75,000 acre-feet has a priority date of February 1, 1939, which is senior to the priority call. The remaining 50,000 acre-feet has a priority date of December 12, 1950, which is junior to the priority call. These water rights authorize interbasin transfers and GCWA indicates it has additional water rights in other basins that can be used to meet its demand.
 - c. Certificate of Adjudication 12-5322 authorizes diversion of 155,000 acre-feet from the Brazos River at a diversion rate of 900 cfs. The first 40,000 acre-feet of water and the first 400 cfs of the diversion rate have a priority date of February 8, 1929 and are senior to the priority call. The second 40,000 acre-feet and an additional 268 cfs of the diversion rate have a priority date of March 14, 1955 and are junior to the priority call. The remaining 75,000 acre-feet and an additional 232 cfs of the diversion rate have a priority date of July 25, 1983 and are junior to the priority call.

GCWA indicates it is in voluntary restrictions under its Drought Contingency Plan. Based on GCWA's 2011 Water Use Report it did not use surface water for municipal purposes under Certificate 12-5322. Based on this, staff recommends that junior diversion authorizations under this permit be completely suspended. This would result in the suspension of 115,000 acre-feet of junior diversion rights under Certificate 12-5322. GCWA would need to ensure that its diversion rate at the location of the water right did not exceed its senior rate of 400 cfs.

GCWA's 2011 Water Use Report also indicates that it used 124,817 acre-feet per year from the two diversion points authorized in Certificate of Adjudication Nos. 12-5168 and 12-5171. The amount of water authorized GCWA's senior water right (12-5168 for 99,932 acre-feet) and the senior portion of its rights under Certificate 12-5171 (75,000 acre-feet) total 174,932 acre-feet. Based on this, GCWA's senior water rights are sufficient to meet its needs and staff recommends that the junior portion of Certificate 12-5171 (50,000 acre-feet) be completely suspended.

Pass Through Plans

The following water rights divert stored water under their junior water rights. Under 30 TAC Chapter 36.5 the Executive Director's Order does not apply to water in storage on the date of the Order. These water rights are likely diverting stored water. However, new inflows that would refill storage at a priority date junior to February 14, 1942 would need to be passed downstream to the senior call. Staff recommends that the following water right holders submit pass through plans demonstrating compliance with the Order.

Brazos River Authority - Lakes Granbury, Whitney, Aquila, Proctor, Belton, Stillhouse Hollow, Georgetown, Granger, Limestone, and Somerville.

City of Waco - Junior portion of Lake Waco under Permit 5094 and Lake Brazos

Eastland County – Lake Leon
City of Cleburne – Lake Pat Cleburne
Palo Pinto Municipal Water District – Lake Palo Pinto
City of Mineral Wells – Lake Mineral Wells
Bi-Stone Municipal Water District – Lake Mexia

No Adjustment at This Time

1. Brazosport Water Authority (BWA) – Certificate of Adjudication 12-5366 authorizes the diversion of 45,000 acre-feet from the Brazos River at a priority date of April 4, 1960. Dow diverts water from the Brazos River for BWA under its existing diversion rate. BWA indicates that it is a wholesale water supplier to 7 cities, 2 state prisons and it provides potable water to Dow's facilities. Four of its customers (Brazoria, Freeport and 2 state prisons, Clemens and Wayne Scott units) have no other source of water. BWA is in mandatory restrictions under its Drought Contingency Plan and is holding its customers to reduced flows. BWA indicates that its water is diverted at a rate of 15.1 cfs, as part of Dow's diversion under its water right, and that its minimum system need is 14.08 cfs. Based on information provided under 30 TAC Chapter 36.5, BWA's physical diversion location (coincident with the diversion point for the senior call), and the fact that there is little difference between BWA's current diversion rate and its minimum need, staff is recommending no suspension or adjustment at this time.

2. City of Gordon – Certificate of Adjudication 12-4024 authorizes diversion of water from reservoirs on Panther Creek and an unnamed tributary of Gibson Creek at a combined diversion rate of 1.56 cfs. The certificate has priority dates of June 4, 1973 and May 22, 1978. The City also has additional storage and diversion rights at a priority date of October 31, 1991 from the reservoir on Panther Creek. The City's total authorized diversion amount from its two reservoirs is 405 acre-feet of water.

The City indicates it has no alternate sources of water. The City is in mandatory restrictions under its Drought Contingency Plan and has between 180 and 240 days of water supply. The City is on TCEQ's high priority (180 day) water system list. The City's water use reports indicate it diverted 242 acre-feet of water in 2011. Based on the information provided under 30 TAC Chapter 36.5, staff recommends no suspension or adjustment at this time.

3. U.S. Department of the Army – Certificate of Adjudication 12-2936 authorizes the Army to store 12,000 acre-feet of water in Lake Belton and divert 12,000 acre-feet of water from that storage. The diversion of stored water from Lake Belton has priority dates of August 24, 1953 and August 23, 1954.

The Army indicates that it has no feasible alternate sources. It is in mandatory restrictions under its Drought Contingency Plan. The Army indicates that Fort Hood has not been fully manned for the past 3 years due to the deployment of a significant number of troops overseas. As a result, there could be some increase in future water use as deployed units return to Fort Hood in 2013 and 2014. Based on information provided under 30 TAC Chapter 36.5 and because the Army diverts stored water from Lake Belton, staff recommends no suspension or adjustment at this time.

4. City of Waco - Certificate of Adjudication 12-4340 authorizes storage of 3,537 acre-feet of water in Lake Brazos and diversion of 5,600 acre-feet of water. The priority date for diversion of water is June 29, 1914, which is senior to the priority call. The priority date for storage of water is January 8, 1968, which is junior to the call.

The City indicates that it is not using water under its senior diversion right. In addition, the City indicates that Lake Brazos is a passive structure operated with an uncontrolled spillway which passes all inflows in the Brazos River downstream. Based on information provided under 30 TAC Chapter 36.5 indicating that any flows are passed downstream; however, inflows to Lake Brazos should be monitored under the City's pass through plan. Staff recommends no suspension or adjustment at this time.

Complete Suspension of Junior Municipal Water Rights

Not Using Junior Water Right for Municipal Purposes

The following water right holders indicated that they were not using surface water under their water rights for municipal purposes. These water rights have not reported water use for municipal purposes on their water use reports for the past five years. Staff recommends that these water right holders' surface water rights that are junior to February 14, 1942 be completely suspended:

1. Durham Overstreet Trust, Durham Phillips Trust, Overstreet Family, LP, The Shores of Granbury Inc., and Overstreet Properties, LP – The water right holders own Certificate of Adjudication 12-4060, which authorizes diversion from the Brazos River at a combined diversion rate of 1 cfs at a priority date of July 31, 1950. The water right holders state that they are not using water for municipal purposes under their water right. Staff recommends that the water right be completely suspended.
2. ADTIN LLC – Water Use Permit 5164 authorizes diversion from a reservoir on Wilson Creek at a diversion rate of 0.36 cfs and a priority date of December 11, 1987. ADTIN states that it is not using water under its water right for municipal purposes. Staff recommends that the water right be completely suspended.
3. City of Thorndale – Certificate of Adjudication 12-3754 authorizes diversion from a reservoir on Rocky Creek at a diversion rate of 1.11 cfs and a priority date of June 20, 1961. Certificate of Adjudication 12-3757 authorizes diversion from a reservoir on Spring Branch at a diversion rate of 1.56 cfs. The diversion rate and diversion of 100 acre-feet of water have a priority date of September 15, 1966 and the diversion of an additional 150 acre-feet of water has a priority date of September 20, 1982. The City states that it uses groundwater to meet its needs and has not diverted surface water since 1990. The City does not have the infrastructure to divert and use its surface water right. Staff recommends that the water right be completely suspended.
4. HD Howard – Certificate of Adjudication 12-4048 authorizes diversion from a reservoir on Kickapoo Creek at a diversion rate of 2.89 cfs and a priority date of November 8, 1976. The water right holder indicates it is not using surface water under its water right for municipal purposes. Staff recommends that the water right be completely suspended.
5. City of Rosebud – Certificate of Adjudication 12-4360 authorizes the diversion of water from City Lake, located on an unnamed tributary of Pond Creek at a diversion rate of 0.66 cfs and from Pond Creek at a diversion rate of 6 cfs. The priority dates of the water right are November 28, 1961 and July 15, 1974. The City states that it does not divert water from City Lake and meets its demand from water supplied by Central Texas

Waterworks Systems from the Brazos River Authority's Lake Stillhouse Hollow. Staff recommends that the water right be completely suspended.

6. City of Mart – Water Use Permit 5000 authorizes diversion of water from New Lake Mart, located on an unnamed tributary of Tradinghouse Creek at a priority date of September 3, 1985.

The City indicates it is in mandatory restrictions under its Drought Contingency Plan. It also indicates that it using groundwater wells to meet its demands. Staff recommends that the water right be completely suspended.

7. Texas Water Development Board, Brazos River Authority, and City of Houston – Permit 2925 authorizes Allens Creek reservoir. This reservoir is not constructed so water is not currently used under the Permit. Staff recommends that the water right be completely suspended.
8. City of Cleburne – Water Use Permit 4258 authorizes diversion from a reservoir on West Buffalo Creek at a priority date of May 21, 1985. The City indicates that there are no connections and it is not using surface water under this permit for municipal purposes. Staff recommends that the water right be completely suspended.

Not Using Junior Water Right For Power Generation But May in the Future

The following water right holders indicate that they were not using surface water under their water rights but may need to use that water in the future. These water right holders indicated their generating units are currently idle and not expected to operate within the next six to twelve months. Staff recommends that these water right holders' surface water rights that are junior to February 14, 1942 be completely suspended at this time. However, if these water right holders need to use their suspended water rights for power generation purposes, they may notify the Executive Director.

1. Tradinghouse Power Company, LLC - Certificate of Adjudication No. 12-4342 authorizes diversion of 12,000 acre-feet of water from the Brazos River with a priority date of August 21, 1926. The certificate also authorizes a 37,800 acre-foot impoundment on Tradinghouse Creek and diversion of 15,000 acre-feet of water from the reservoir with a priority date of September 16, 1966.

The water right holder states that it is not using water for power generation purposes at this time. Staff recommends that the junior portion of the water right be completely suspended.

2. Luminant Generation Company, LLC - Certificate of Adjudication No. 12-4345 authorizes diversion of 8,996 acre-feet of water from the Brazos River, a reservoir on Manos Creek impounding 8,500 acre-feet of water, and diversion of 10,000 acre-feet of water from the reservoir. The priority date for diversion of water from the Brazos River, diversion of water from the reservoir and 8,000 acre-feet of storage is March 6, 1951. The priority date for impoundment of the remaining 500 acre-feet of water is March 5, 1952.

The water right holder states that it is not using water for power generation purposes at this time. Staff recommends that the water right be completely suspended.

Not Using Junior Water Right For Municipal Purposes But May in the Future

The following water right holders indicate that they were not using surface water under their water rights but may need to use that water in the future. These water right holders indicated that surface water under their water rights was not needed at this time to protect public health, safety, and welfare but that they might need to use their surface water for this reason in the future. Staff recommends that these water right holders' surface water rights that are junior to February 14, 1942 be completely suspended at this time. These water right holders could divert water they currently have in storage. Should surface water under these water rights be needed to protect public health, safety, and welfare at a future date, staff could re-evaluate the suspension:

1. Bi-Stone Municipal Water Supply District – Certificate of Adjudication 12-5287 authorizes diversion from Lake Mexia, which impounds 9,600 acre-feet of water, on the Navasota River at a diversion rate of 6.67 cfs and a priority date of April 15, 1957.

Bi-Stone states that it currently meets its demands from groundwater and uses its surface water right to meet additional demands in the summer months although it did not quantify how much surface water it needed under its water right. Bi-Stone further indicates that it is asking its customers to consider implementing Stage 1 of their Drought Contingency Plans.

On January 9, 2013, Lake Mexia was full and spilling. Bi-Stone's reservoir storage should be sufficient to meet its additional needs in the summer. Staff recommends that the water right be completely suspended at this time.

2. City of Crawford – Water Use Permit 4135 authorizes the City to divert water from Tonk Creek to an off-channel reservoir at a diversion rate of 4.5 cfs at a priority date of May 15, 1984. The City can divert water from Tonk Creek under its water right when the flow of Tonk Creek is greater than 14 cfs from October through March and greater than 28 cfs from April through September.

The City indicates that it is in voluntary restrictions under its Drought Contingency Plan and that it has groundwater to meet its demands. The City estimates it has 300 days of storage, which should be sufficient to meet its additional 65 gpm of demand during the summer months. Staff recommends that the water right be completely suspended at this time.

3. Quail Valley Associates LLC – Certificate of Adjudication 12-4025 authorizes diversion of 60 acre-feet of water for municipal purposes from a 700 acre-foot reservoir located on Gibson Creek at a diversion rate of 1 cfs and a priority date of October 15, 1973. The use of the reservoir is also authorized under Certificate 12-4026.

The water right holder indicates it is not diverting surface water for municipal use at this time because the lake is dry due to dam repairs. Staff recommends that the water right be completely suspended at this time.

4. Wingshot LP – Certificate of Adjudication 12-4026 authorizes diversion from a 700 acre-foot reservoir located on Gibson Creek at a diversion rate of 0.33 cfs with a priority date of October 15, 1973. The use of the reservoir is also authorized under Certificate 12-4025.

The water right holder indicates it is not diverting surface water for municipal use at this time because the lake is dry due to dam repairs. Staff recommends that the water right be completely suspended at this time.

Not Using Junior Water Right for Municipal Purposes and Have Alternate Sources

The following water right holders indicated that their contract water or groundwater was sufficient to meet their needs. Staff recommends that these water right holders' surface water rights that are junior to February 14, 1942 be completely suspended at this time. These water right holders could divert water they currently have in storage. Should surface water under these water rights be needed to protect public health, safety, and welfare at a future date, staff could re-evaluate the suspension:

1. City of Marlin – Certificate of Adjudication 12-4355 authorizes two reservoirs on Big Sandy Creek, a reservoir on Brushy Creek and diversions from the Brazos River at a diversion rate of 12 cfs. The certificate has multiple priority dates (1948, 1956, 1976, 1982 and 1990). The priority date for diversion of 6.2 cfs from the Brazos River is November 27, 1956, the priority date for the additional 5.8 cfs is December 3, 1990, and a seasonal limitation applies (October 1-April 30).

The City indicates that its contract water from the Brazos River Authority is sufficient to meet its demands and that it is in voluntary restrictions under its Drought Contingency Plan. The City would also be able to divert stored water from its reservoirs. Staff recommends that the diversion of water from the Brazos River be completely suspended at this time.

2. City of Graford – Certificate of Adjudication 12-4004 authorizes the diversion of 55 acre-feet of water from a reservoir located on Keechi Creek. The City has five acre-feet of water with a priority date of March 18, 1932, which is senior to the priority call. The remainder of the City's water right has a priority date of February 1, 1957. The City indicates it has not used surface water under its water right for 12 years. The City gets its water supply from the City of Mineral Wells. Staff recommends that the junior portion of the water right be completely suspended.
3. City of Teague – Certificate of Adjudication 12-5291 authorizes diversion from Teague City Lake located on Holman Creek with priority dates of August 14, 1952 and March 11, 1957 for the diversion and impoundment. Certificate of Adjudication 12-5292 authorizes diversion of water from Lower Club Lake located on Jeter Creek with priority dates of January 6, 1975 and September 10, 1985. The City indicates that it is not using its surface water right and gets its water supply entirely from groundwater. Staff recommends that the water right be completely suspended.

ATTACHMENT C

AN ORDER affirming an order issued by the Executive Director modifying a Commission order suspending water rights in the Brazos River Basin

On January 30, 2013, the Texas Commission on Environmental Quality ("TCEQ" or "Commission") considered whether to affirm, modify, or set aside an order issued on January 15, 2013, by the Executive Director modifying the Commission's December 12, 2012 Order suspending water rights below Possum Kingdom Reservoir in the Brazos River Basin. On January 8, 2013, the Executive Director issued an order modifying the December order by allowing suspended water right holders to divert and store water at certain water levels at specified gages in the lower Brazos River. In the January 15, 2013, order the Executive Director incorporated the Commission's December 12, 2012 order by reference and issued a modification of the order by suspending or adjusting several municipal and power generation water rights that had not been suspended in the December order. The Executive Director also incorporated the primary terms of the January 8, 2013 order into the January 15, 2013 order, determined that the January 15, 2013 order supersedes the January 8, 2013 order, and made several corrections to the December order. Notice of the January 30, 2013 hearing date to affirm, modify or set aside the January 15, 2013 Order was mailed to all affected water right holders in the Brazos River Basin more than ten days and less than 45 days before the hearing.

The Commission finds that the Executive Director appropriately issued the Order and that the requirements for this modification of the suspension order in Tex. Water Code § 11.053 and 30 Tex. Admin. Code Chapter 36 have been satisfied.

THEREFORE, THE TEXAS COMMISSION ON ENVIRONMENTAL QUALITY ORDERS THAT:

- 1. The Executive Director's January 8, 2013 order is superseded by the January 15, 2013 order.**
- 2. The Executive Director's January 15, 2013 order, which incorporates the primary terms of the January 8, 2013 order, is affirmed.**
- 3. The Commission's December 12, 2012 order that incorporates the Executive Director's November 19, 2012 Order, as modified, by reference, is superseded by this Order.**

TEXAS COMMISSION ON ENVIRONMENTAL QUALITY

For the Commission

Issue Date:
