TEXAS COMMISSION ON ENVIRONMENTAL QUALITY

EXECUTIVE SUMMARY

TO: Commissioners DATE: January 30, 2013

THRU: Caroline Sweeney, Deputy
Office of Legal Services

Robert Martinez, Director
Environmental Law Division
Office of Legal Services

FROM: Robin Smith, Attorney
Environmental Law Division
Office of Legal Services

SUBJECT: Executive Summary
Docket No. 2012-2421-WR
Modification of Order Suspending Water Rights Based on a Senior call from Dow Chemical Company
TWC §§ 11.053
Austin, Bastrop, Bell, Bosque, Brazoria, Brazos, Brown, Burleson, Burnet, Callahan, Colorado, Comanche, Coryell, Eastland, Erath, Falls, Fayette, Fort Bend, Freestone, Grimes, Hamilton, Harris, Hill, Hood, Jack, Johnson, Lampasas, Lee, Leon, Limestone, Madison, McLennan, Milam, Mills, Palo Pinto, Parker, Robertson, Somervell, Stephens, Travis, Waller, Washington, and Williamson Counties.

This Order allows the holders of water rights that have been suspended in the Brazos River Basin to take water at certain temporary higher flow levels. Dow Chemical Company (Dow) made a senior priority call to the Executive Director on November 14, 2012 asking that water rights junior to its water right be suspended. The Executive Director of the Texas Commission on Environmental Quality issued an Order in November 19, 2012, suspending non-municipal or power generation water rights on the Brazos River below Possum Kingdom Reservoir with priority dates after February 14 1942. On December 12, 2012, the Commission issued an order modifying and affirming the Executive Director's order (December Order).

On January 8, 2013, the Executive Director issued this order modifying the December Order to allow suspended water rights to take water at certain flow levels. Under 30 Tex. Admin. Code § 36.8(b), the Commission must hold a hearing to affirm, modify, or set aside this Order within 45 days.

Dow's Water Right: Dow is the owner of Certificate of Adjudication 12-5328, which authorizes the diversion of 20,000 acre-feet of water from the Brazos River for industrial

purposes with a priority date of February 28, 1929, the diversion of 150,000 acre-feet per year for industrial and municipal purposes with a priority date of February 14, 1942, 65,000 acre-feet per year for industrial purposes with a priority date of April 4, 1960, and 3,136 acre-feet per year for municipal purposes with a priority date of March 8, 1976. Dow's certificate also includes additional authorizations for storage in off-channel reservoirs and diversions from the San Jacinto-Brazos Coastal Basin.

Suspension Rule: Under Tex. Water Code § 11.027, older water rights have priority over more recent water rights ("first in time is first in right"). Under Tex. Water Code § 11.053 and 30 Tex. Admin. Code Chapter 36, the Executive Director, during a time of drought or emergency shortage of water, may issue a temporary order suspending or adjusting water rights based on a senior call for water. The Executive Director can modify the suspension and adjustment order pursuant to 30 Tex. Admin. Code § 36.6(3)(C).

The watershed at Dow's diversion point remains in a "drought" as defined in 30 Tex. Admin. Code § 36.2(3). Under that rule, a drought occurs when at least one of the following criteria are met:

> (A) drought conditions in the watershed or the part of the watershed subject to the executive director's Suspension or Adjustment Order are classified as at least moderate by the National Drought Mitigation Center;
> (B) streamflows at United States Geological Survey gaging stations in the drainage area are below the 33rd percentile of the period of record available for the impacted watershed; or
> (C) below normal precipitation in the watershed or part of the watershed subject to the Executive Director's Order, for the preceding three-month period, as reported in the Texas Climatic Bulletin (Office of the Texas State Climatologist), a senior call is made, and the demand for surface water exceeds the available supply as evidenced by a senior water right holder making a senior call.

The watershed above Dow is still classified as at least in a moderate drought. Dow still needs and can beneficially use the water resulting from the suspension.

Executive Director's Evaluation:

If conditions change to cause temporary higher flow levels to occur in the Brazos River watershed, water will be available for suspended water right holders to divert and impound without impairing Dow's senior call because at the higher flow levels the water could not all be beneficially used by Dow. The Executive Director decided that modifying the December Order to allow suspended water right holders to divert and impound surface water under their water right during certain high flow events will maximize the beneficial use of water, minimize the impact on water right holders, and prevent the waste of water.

The Executive Director determined that multiple flow gages would be appropriate because of the large area affected by the call. Using multiple gages accounts for the fact that it can take as long as two weeks for water to travel from locations in the upper portion of the priority call area to Dow's diversion point. The Executive Director determined that gage locations located on both

the main stem of the Brazos and on its major tributaries will take into account both varying travel times to the location of the priority call and the fact that rainfall events can vary throughout the priority call area.

Flow levels at or above the 33rd percentile are at a reasonable level to allow the diversion and impoundment of water because a stream flow level below the 33rd percentile flow is one of the factors under which a "drought" exists pursuant to 30 TAC Chapter 36. The 33rd percentile flow is the streamflow value below which 33 percent of the daily streamflow observations for the period of record available for certain gages in the Brazos River can be found. For USGS Gage 08116650 Brazos River near Rosharon, a different flow value below the 33rd percentile applies because this gage is directly above Dow's diversion point and the 33rd percentile flow is more than the 290 cubic feet per second (cfs) that Dow is currently able to divert due to pump capacity. Dow's authorized diversion rate of 630 cfs is used in the order as the applicable rate at the USGS Gage 08116650 Brazos River near Rosharon.

These flow values will make water available for suspended water right holders during temporary higher flow levels and not impair Dow's senior priority call. This maximizes the beneficial use of water, minimizes the impact on water rights holders, and prevents waste of water in accordance with 30 Tex. Admin. Code § 36.5(b)(1) – (3).

Attached to this Executive Summary are the following:

Attachment A: ED Order issued January 8, 2013.

Attachment B: Letter to water right holders affected by the ED's Order.

Attachment C: Map of the gages used.

ED Request: Affirm the ED's modification of the suspension order.

Proposed Caption:

Consideration of whether to affirm, modify, or set aside the Executive Director's January 8, 2013, order modifying a Commission Order issued December 12, 2012. The December 12, 2012 Order modifies and affirms the Executive Director's November 19, 2012, Order. The November 19, 2012 Order suspends water rights in the Brazos River Basin in response to a senior priority call by Dow Chemical Company.

The Executive Director's modification to the December 12, 2012 Order allows diversion and impoundment during certain temporary higher flow levels on the Brazos River. These flows are calculated to protect Dow Chemical Company's senior call but allow suspended water right holders to take water during higher flows. The order was issued by the Executive Director pursuant to Texas Water Code Section 11.053 and 30 Tex. Admin. Code Chapter 36. Austin, Bastrop, Bell, Bosque, Brazoria, Brazos, Brown, Burleson, Burnet, Callahan, Colorado, Comanche, Coryell, Eastland, Erath, Falls, Fayette, Fort Bend, Freestone, Grimes, Hamilton, Harris, Hill, Hood, Jack, Johnson, Lampasas, Lee, Leon, Limestone, Madison, McLennan, Milam, Mills, Palo Pinto, Parker, Robertson, Somervell, Stephens, Travis, Waller, Washington, and Williamson Counties. Kellye Rila, Robin Smith.

ATTACHMENT A

TEXAS COMMISSION ON ENVIRONMENTAL QUALITY

ORDER **modifying an order suspending water rights on the Brazos River**

The Executive Director of the Texas Commission on Environmental Quality issued an Order in November 19, 2012, suspending water rights on the Brazos River after receiving a senior priority call from Dow Chemical Company (Dow) on November 14, 2012. On December 12, 2012, the Commission issued an order modifying and affirming the Executive Director's order (December Order). The Executive Director issues this modification to the Order to allow diversion and impoundment during certain higher flow levels on the Brazos River.

The Executive Director makes the following Findings of Fact and Conclusions of Law:

FINDINGS OF FACT

1. The December Order (TCEQ Docket No. 2012-2421-WR), attached hereto and incorporated herein by reference, suspends certain junior water rights on the Brazos River as a result of Dow's senior priority call.

2. Dow has not rescinded or withdrawn its senior priority call on water rights in the Brazos River.

3. The requirements for the Executive Director to issue an order suspending water rights on the Brazos River as listed in 30 Texas Administrative Code (TAC) Chapter 36 continue to be met, specifically:
    a. Without the December Order, Dow would be unable to divert the amount of water it needs and that is authorized under its water rights due to low flow in the Brazos River;
    b. Dow has a need for and can beneficially use the increased amounts of water in the river that result from suspending upstream junior water rights; and
    c. The watershed at Dow's diversion point is in a "drought" as defined in 30 TAC Section 36.2(3).

4. However, if conditions change to cause temporary higher flow levels to occur in the Brazos River watershed, water will be available for suspended water right holders to divert and impound without impairing Dow's senior call because at the higher flow levels the water could not all be beneficially used by Dow.

5. Modifying the December Order to allow suspended water right holders to divert and impound surface water under their water right during certain high flow events will maximize the beneficial use of water, minimize the impact on water right holders, and prevent the waste of water.

6. The 33rd percentile flow is the streamflow value below which 33 percent of the daily streamflow observations for the period of record available for certain gages in the Brazos River can be found. Flow levels at or above the 33rd percentile are at a reasonable level to allow the diversion and impoundment of water because a stream flow level below the 33rd percentile flow is one of the factors under which a "drought" exists pursuant to 30 TAC Chapter 36. For USGS Gage 08116650 Brazos River near Rosharon, a different flow value below the 33rd percentile applies because this gage is directly above Dow's diversion point and the 33rd percentile flow is more than the 290 cubic feet per second (cfs) that Dow is currently able to divert due to pump capacity. Dow's authorized diversion rate of 630 cfs is used below as the applicable rate at the USGS Gage 08116650 Brazos River near Rosharon. These flow values will make water available for suspended water right holders during temporary higher flow levels and not impair Dow's senior priority call.

7. The gages on the Brazos River and associated flow levels for which junior water right holders may divert and impound while not impairing Dow's senior priority call are:

Gage	Affected Area	Streamflow Level (cfs)
USGS Gage 08091000 Brazos River near Glen Rose	All water rights on the main stem of the Brazos River and its tributaries below Lake Possum Kingdom and above Lake Whitney	**108**
USGS Gage 08095000 North Bosque River near Clifton	All water rights on the North Bosque River and its tributaries	**10**
USGS Gage 08100000 Leon River near Hamilton	All water rights on the Leon River and its tributaries above Lake Belton	**6**
USGS Gage 08106500 Little River near Cameron	All water rights on the Little River and its tributaries below Lake Belton and above its confluence with the Brazos River, including the Lampasas River	**202**
USGS Gage 08108700 Brazos River at SH 21 near Bryan	All water rights on the main stem of the Brazos River and its tributaries (excluding the Little River watershed) below Lake Whitney and above USGS gage 08108700, Brazos River at SH 21 near Bryan	**904**

Gage	Affected Area	Streamflow Level (cfs)
USGS Gage 08111500 Brazos River near Hempstead	All water rights on the main stem of the Brazos River and its tributaries, including Yegua Creek and the Navasota River, below USGS Gage 081108700, Brazos River at SH 21 near Bryan and above USGS gage 08111500, Brazos River near Hempstead	**1430**
USGS Gage 08116650 Brazos River near Rosharon	All water rights on the main stem of the Brazos River and its tributaries below USGS gage 08111500, Brazos River near Hempstead	**630**

CONCLUSIONS OF LAW

1. The December Order may be modified by the Executive Director based on changed conditions pursuant to the December Order and 30 TAC Section 36.6(3)(C).

2. This order meets the requirements of Texas Water Code Section 11.053 and 30 TAC Chapter 36, including the requirements of Texas Water Code Section 11.053(b)(1)-(3) and 30 TAC Section 36.5(b)(1)-(3) to maximize the beneficial use of water, minimize the impact on water right holders, and prevent the waste of water .

3. Findings of Fact Nos. 4 - 7 show that changed conditions, such as rainfall events, could temporarily provide water to suspended water right holders as well as Dow and there is a reasonable method available for allowing such temporary diversion and impoundment.

Now, therefore, be it ordered by the Executive Director of the Texas Commission on Environmental Quality that:

1. The water rights listed in Appendix A of Exhibit A of the attached December Order and any subsequently suspended or adjusted water rights may divert and impound water in accordance with the diversion or storage authorization in the water right if the flow level at the following gage in the affected area of the water right at issue is at or above the following streamflow level:

Gage	Affected Area	Streamflow Level (cfs)
USGS Gage 08091000 Brazos River near Glen Rose	All water rights on the main stem of the Brazos River and its tributaries below Lake Possum Kingdom and above Lake Whitney	**108**
USGS Gage 08095000 North Bosque River near Clifton	All water rights on the North Bosque River and its tributaries	**10**
USGS Gage 08100000 Leon River near Hamilton	All water rights on the Leon River and its tributaries above Lake Belton	**6**
USGS Gage 08106500 Little River near Cameron	All water rights on the Little River and its tributaries below Lake Belton and above its confluence with the Brazos River, including the Lampasas River	**202**
USGS Gage 08108700 Brazos River at SH 21 near Bryan	All water rights on the main stem of the Brazos River and its tributaries (excluding the Little River watershed) below Lake Whitney and above USGS gage 08108700, Brazos River at SH 21 near Bryan	**904**
USGS Gage 08111500 Brazos River near Hempstead	All water rights on the main stem of the Brazos River and its tributaries, including Yegua Creek and the Navasota River, below USGS Gage 081108700, Brazos River at SH 21 near Bryan and above USGS gage 08111500, Brazos River near Hempstead	**1430**
USGS Gage 08116650 Brazos River near Rosharon	All water rights on the main stem of the Brazos River and its tributaries below USGS gage 08111500, Brazos River near Hempstead	**630**

2. Water impounded pursuant to Ordering Provision No. 1 may be stored and is not required to be released.

3. If the streamflow levels are below the gage values in the chart in Ordering Provision No. 1 above, the water right holder must immediately cease diverting or impounding water.

4. Any water right holder impounding water under the terms of this order must record the level of water impounded as of November 19, 2012, as well as the level of impounded water each time additional water is impounded based on this order. The water right holder shall record the latter level at the time that diversion and impoundment has ceased based on streamflow conditions outlined in this order or available capacity. The water right holder shall maintain these records for a minimum of two years from the issue date of this order.

5. This order shall be in effect until May 18, 2013, unless modified or terminated.

6. This order may be extended once for 90 days.

7. All other provisions of the December Order not expressly modified by this order remain in full effect, including any deadlines for water right holders to submit information.

8. The commission will hold a hearing to determine whether to affirm, modify, or set aside this Executive Director order on January 30, 2013, at the Texas Commission Environmental Quality, 12100 Park 35 Circle, Building E, Room 201S, Austin, Texas. This order constitutes notice for that hearing. Any affected water right holder may attend the hearing and provide oral comment.

Executive Director

Attachment A

TEXAS COMMISSION ON ENVIRONMENTAL QUALITY

AN ORDER affirming and modifying the Executive Director's Order suspending water rights in the Brazos River Basin; TCEQ Docket No. 2012-2421-WR

On December 5, 2012, the Texas Commission on Environmental Quality ("TCEQ" or "Commission") considered whether to affirm, modify, or set aside an Order issued by the Executive Director suspending water rights below Possum Kingdom Reservoir in the Brazos River Basin on November 19, 2012. Notice of this December 5, 2012 hearing to affirm, modify or set aside the Emergency Order was mailed to all affected water right holders in the Brazos River Basin more than ten days and less than 45 days before the hearing. The Commission determined that the Executive Director appropriately issued the Order and that the requirements for a suspension order in Tex. Water Code § 11.053 and 30 Tex. Admin. Code Chapter 36 have been satisfied.

The Commission determined to affirm but modify the Executive Director's Order based on two determinations. First, based on the Executive Director's recommendation, the Commission determined that three junior water rights upstream of Possum Kingdom Lake were inadvertently included in Appendix A, the list of the suspended water rights in the Executive Director's Order, and should be deleted from the Executive Director's Order. These water rights are Certificates of Adjudication Nos. 12-4134, 12-4135, and 12-4141 issued to Billy Doan, CKS Properties, LP, and Dolly Keesee, respectively.

Second, the Commission determined that the Executive Director's Order should have included additional provisions within the Order. The Commission determined to add an additional Conclusion of Law which states: "The Executive Director may require each of the junior water rights holders in Appendices C and D to: 1) provide information demonstrating that it has made reasonable efforts to obtain alternative water supplies to the Executive Director within 14 days; 2) provide its water use data to the Executive Director every 14 days; and 3) provide information on what it has done to identify long-term additional or alternative water sources within 30 days in accordance with 30 TAC § 36.5(c)." The Commission determined to add a new ordering provision which states: "The junior water rights in Appendices C and D must submit the following information to the Executive Director within 14 days concerning efforts to

conserve water and obtain additional or alternative sources: 1) Water use data indicating the amount, rate of diversion, place and purposes of use on a daily basis; 2) Information demonstrating that the water rights holder has made reasonable efforts to obtain alternative water sources within 14 days; and 3) Information on what the water rights holder has done to identify long-term additional or alternative water sources within 30 days."

NOW, THEREFORE, IT IS ORDERED BY THE TEXAS COMMISSION ON ENVIRONMENTAL QUALITY THAT:

1) The November 19, 2012 Order issued by the Executive Director, attached hereto as Exhibit A and incorporated into this Order by reference, is affirmed, but modified to delete three water rights, Certificates of Adjudication Nos. 12-4134, 12-4135, and 12-4141 issued to Billy Doan, CKS Properties, LP, and Dolly Keesee, respectively, from the list of suspended water rights.

2) The November 19, 2012 Order issued by the Executive Director is modified to include an additional Conclusion of Law No. 9 which states: "The Executive Director may require each of the junior water rights holders in Appendices C and D to: 1) provide information demonstrating that it has made reasonable efforts to obtain alternative water supplies to the Executive Director within 14 days; 2) provide its water use data to the Executive Director every 14 days; and 3) provide information on what it has done to identify long-term additional or alternative water sources within 30 days in accordance with 30 TAC § 36.5(c)."

3) The November 19, 2012 Order issued by the Executive Director is modified to include an additional Ordering Provision which states: "The junior water rights in Appendices C and D must submit the following information to the Executive Director within 14 days concerning efforts to conserve water and obtain additional or alternative sources:
   1) Water use data indicating the amount, rate of diversion, place and purposes of use on a daily basis;
   2) Information demonstrating that the water rights holder has made reasonable efforts to obtain alternative water sources within 14 days; and
   3) Information on what the water rights holder has done to identify long-term additional or alternative water sources within 30 days."

ISSUED: DEC 1 2 2012

TEXAS COMMISSION ON
ENVIRONMENTAL QUALITY

Bryan W. Shaw, Ph.D. Chairman

Exhibit A

The November 19, 2012 Order issued by the Executive Director

TEXAS COMMISSION ON ENVIRONMENTAL QUALITY

ORDER **suspending water rights on the Brazos River**

The Executive Director of the Texas Commission on Environmental Quality received a senior priority call from Dow Chemical Company (Dow), on November 14, 2012. Dow is the owner of Certificate of Adjudication 12-5328, which authorizes the diversion of 20,000 acre-feet of water from the Brazos River for industrial purposes at a priority date of February 28, 1929, the diversion of 150,000 acre-feet per year for industrial and municipal purposes with a priority date of February 14, 1942, 65,000 acre-feet per year for industrial purposes with a priority date of April 4, 1960, and 3,136 acre-feet per year for municipal purposes with a priority date of March 8, 1976.

FINDINGS OF FACT

Having considered the facts provided by Dow, staff investigations and review, and public information, the Executive Director makes the following Findings of Fact and Conclusions of Law:

1. Dow is the owner of Certificate of Adjudication 12-5328, which authorizes the diversion of 20,000 acre-feet of water from the Brazos River for industrial purposes at a priority date of February 28, 1929, the diversion of 150,000 acre-feet per year for industrial and municipal purposes with a priority date of February 14, 1942, 65,000 acre-feet per year for industrial purposes with a priority date of April 4, 1960, and 3,136 acre-feet per year for municipal purposes with a priority date of March 8, 1976. Dow's certificate also includes additional authorizations for storage in off-channel reservoirs and diversions from the San Jacinto-Brazos Coastal Basin.

2. Dow is currently unable to divert the amount of water it needs and that is authorized under its water rights due to low flow in the river.

3. Dow has a need for and can beneficially use increased amounts of water in the river that result from suspending upstream junior water rights.

4. Seventy-five percent of the watershed at or above the senior call location is in at least moderate drought as classified by the National Drought Mitigation Center. The 33rd percentile flow at U. S. Geological Survey gaging station 08116650, Brazos River near Rosharon, Texas, based on a period of record from April 1, 1967 to present is 1,610 cfs. Average streamflow for the period October 12, 2012 to November 12, 2012 was 535 cfs. Average streamflow for the week of November

5, 2012 to November 11, 2012 was 264 cfs. Therefore, the watershed at Dow's diversion point is in a "drought" as defined in 30 Tex. Admin. Code § 36.2(3).

5. Under 30 TAC 297.58(b), if a water right has appropriations with different priority dates, water shall be credited against the oldest priority date first.

6. Based on water use information submitted by Dow and Brazosport Water Authority, Dow has used 84,898 acre feet of its authorized water. Therefore, the priority date of Dow's call is February 14, 1942. Dow indicates its current consumptive demand is 225 cfs and it has 41 days of reservoir storage.

7. There are several water rights, excluding those for municipal use or power generation, upstream of Dow's Permit that are junior in priority to February 14, 1942. These rights are listed in Appendix A of this Order, which is incorporated in this Order and is part of this Order.

8. Appendix B, which is incorporated into this Order and is part of this Order, lists the counties that are covered by the junior water rights being suspended.

9. There are several junior water rights that are for municipal use or power generation upstream of Dow. The Executive Director has determined that these rights should not be suspended at this time due to concerns about public health, safety and welfare. These water rights are listed in Appendix C, which is incorporated into this Order and is part of this Order.

10. Attachment D lists those water right holders with authorizations for non-exempt domestic use. These water rights are not being suspended for the same reasons described in Finding of Fact No. 9. This Appendix is incorporated in this Order and is part of this Order.

11. If the water rights in Finding of Fact No. 7 are suspended as described above, the resulting change in streamflow conditions should allow Dow to divert some of the water that these water rights do not take. This is an amount that could be beneficially used by Dow for municipal and industrial purposes.

12. This suspension order maximizes the beneficial use of water, minimizes the impact on water rights holders, prevents the waste of water, conforms to the order of preferences established by the Texas Water Code § 11.024 to the greatest extent practicable, considers the efforts of the affected water right holders to develop and implement the water conservation plans and drought contingency plans required by Tex. Water Code Chapter 11, and does not require the release of water that is lawfully stored in a reservoir under a valid water right.

CONCLUSIONS OF LAW

1. Based on the priority doctrine in Tex. Water Code § 11.027, Dow has a right to call on water rights that are junior to it if the call is not futile.

2. Based on Findings of Fact Nos. 2, 3, 6, and 11, due to low flows Dow is unable to take water it is authorized to take under its permit, and suspending the water rights in this order may result in water Dow can beneficially use.

3. Based on Finding of Fact No. 4, the Brazos River in the watershed above Dow's diversion point is in a drought as defined by 30 Tex. Admin. Code § 36.2(3).

4. This Suspension Order meets the requirements of Tex. Water Code §.11.053.

5. The junior water rights in Appendix A should be suspended.

6. The junior water rights in Appendix C, are municipal and power generation water rights that the Executive Director has determined should not be suspended at this time due to concerns about public health, safety and welfare.

7. The junior water rights in Appendix D authorize non-exempt domestic use and should not be suspended at this time due to concerns about public health, safety and welfare.

8. This Order constitutes notice of the hearing to affected water right holders required by 30 Tex. Admin. Code § 36.8.

Now, therefore, be it ordered by the Executive Director of the Texas Commission on Environmental Quality that:

1. The water rights listed in Appendix A are suspended for 180 days.

2. This order shall be in effect for 180 days from the date of issuance.

3. This order may be extended once for 90 days.

4. This order is subject to modification or termination by the Executive Director based on changed conditions. Changed conditions include, but are not limited to, notification by Dow that Dow is rescinding or withdrawing its call, or the Executive Director has information that the call is no longer needed due to higher streamflow, or conditions in the watershed no longer meet the definition of "drought."

5. Dow shall notify the Executive Director immediately if its need for water can be met without the suspensions. If Dow notifies the Executive Director in writing that it rescinds or withdraws its call, this Order automatically terminates upon receipt by the Executive Director.

6. The commission will hold a hearing to determine whether to affirm, modify, or set aside this Executive Director order on December 5, 2012 at the Texas Commission Environmental Quality, 12100 Park 35 Circle, Building E, Room 2018, Austin, Texas.

TEXAS COMMISSION ON ENVIRONMENTAL QUALITY

Protecting Texas by Reducing and Preventing Pollution

January 8, 2013

Re: Modification of Restrictions on Junior Water Right Holders in the Brazos River Basin

Dear Water Right Holder:

As you are aware, Texas is experiencing widespread drought conditions. As a result of these conditions, on November 19, 2012, I issued an Order suspending certain junior water rights in the Brazos River Basin below Lake Possum Kingdom in response to a senior priority call. On December 5, 2012, the Commission voted to affirm that Order and modified it to include the requirements under 30 TAC Chapter 36.5(c). No long-term drought relief is projected notwithstanding current weather conditions.

However, given the current rainfall conditions, I have issued a modified order, effective immediately, that allows suspended junior water rights to divert and impound water under the terms and conditions of their water right during certain temporary higher flow levels. The enclosed modified order sets forth the streamflow levels that apply to specific areas when streamflow at certain gages are at or above a certain streamflow level.

If you are a junior municipal water right holder that was not suspended under the November 19, 2012 Order, please be advised that TCEQ is reviewing your responses under the Commission's December 5, 2012 Order and 30 TAC Section 36.5 and will take action to suspend or adjust these junior water rights, if appropriate, based on the information provided in those responses.

A hearing before the Commission will be held to affirm, modify, or set aside the order. This matter is scheduled for consideration at the Commission Agenda on January 30, 2013 at 9:30 a.m. at 12100 Park 35 Circle, Building E, Room 201S, Austin, Texas 78753.

The TCEQ continues to monitor the situation closely. Water is a precious resource – all Texans are encouraged to conserve, especially during times of drought. Should senior needs not be fulfilled as a result of these suspensions, please be aware that TCEQ may take additional actions to enforce the priority call. If conditions improve, we may be able to lift restrictions.

You may find additional drought information on TCEQ's drought web page at: www.tceq.texas.gov/response/drought or by contacting the TCEQ Drought Hotline at 1-800-447-2827. You may find information on flow levels at USGS Gages on USGS's web page at: http://waterdata.usgs.gov/tx/nwis/current/?type=flow. You may also contact your TCEQ Regional Office or Ms. Melissa Keller at 512-239-1768 should you have additional questions on this matter.

Sincerely,

Zak Covar
Executive Director
