TEXAS COMMISSION ON ENVIRONMENTAL QUALITY

Protecting Texas by Reducing and Preventing Pollution

August 26, 2005

TO: Persons on the enclosed mailing list.

RE: Montgomery Landfill Solutions, L.P.
MSW Permit No. 2324

It has recently come to my attention that notice of the Executive Director's Final Decision and Response to Comments regarding Montgomery Landfill Solutions, L.P., MSW Permit No. 2324 was inadvertently mailed to an incomplete mailing list on July 15, 2005. Those persons who did not receive the July 15th mailing are included on the mailing list enclosed with this letter.

Also enclosed with this letter, is a copy of the July 15th notice letter, the Response to Comments, and the original mailing list. Please note that the deadline by which a person must file a request for a hearing or a request for reconsideration is September 26, 2005, which is 30 days from the date of *this* letter. Instructions regarding how to request a contested case hearing and a Request for Reconsideration are included in the enclosed July 15th notice letter. If you have any questions regarding this matter or the deadline, please call the Office of Public Assistance (800) 687-4040. I apologize if this has caused you any inconvenience.

Sincerely,

A handwritten signature in cursive script that reads "LaDonna Castañuela".

LaDonna Castañuela
Chief Clerk

TEXAS COMMISSION ON ENVIRONMENTAL QUALITY

Protecting Texas by Reducing and Preventing Pollution

July 15, 2005

TO: Persons on the attached mailing list.

RE: Montgomery Landfill Solutions, L.P.
MSW Permit No. 2324

Decision of the Executive Director.

The executive director has made a decision that the above-referenced permit application meets the requirements of applicable law. **This decision does not authorize construction or operation of any proposed facilities.** Unless a timely request for contested case hearing or reconsideration is received (see below), the TCEQ executive director will act on the application and issue the permit.

Enclosed with this letter is a copy of the Executive Director's Response to Comments. A copy of the complete application, draft permit and related documents, including public comments, is available for review at the TCEQ Central office. A copy of the complete application, the draft permit, and executive director's preliminary decision are available for viewing and copying at the Montgomery County Library, 104 I-45 North, Conroe, Texas.

If you disagree with the executive director's decision, and you believe you are an "affected person" as defined below, you may request a contested case hearing. In addition, anyone may request reconsideration of the executive director's decision. A brief description of the procedures for these two requests follows.

How To Request a Contested Case Hearing.

It is important that your request include all the information that supports your right to a contested case hearing. You must demonstrate that you meet the applicable legal requirements to have your hearing request granted. The commission's consideration of your request will be based on the information you provide.

The request must include the following:

- (1) Your name, address, daytime telephone number, and, if possible, a fax number.
- (2) If the request is made by a group or association, the request must identify:
 - (A) one person by name, address, daytime telephone number, and, if possible, the fax number, of the person who will be responsible for receiving all communications and documents for the group; and
 - (B) one or more members of the group that would otherwise have standing to request a hearing in their own right. The interests the group seeks to protect must relate to the organization's purpose. Neither the claim asserted nor the relief requested must require the participation of the individual members in the case.
- (3) The name of the applicant, the permit number and other numbers listed above so that your request may be processed properly.
- (4) A statement clearly expressing that you are requesting a contested case hearing. For example, the following statement would be sufficient: "I request a contested case hearing."

Your request must demonstrate that you are an **"affected person."** An affected person is one who has a personal justiciable interest related to a legal right, duty, privilege, power, or economic interest affected by the application. Your request must describe how and why you would be adversely affected by the proposed facility or activity in a manner not common to the general public. For example, to the extent your request is based on these concerns, you should describe the likely impact on your health, safety, or uses of your property which may be adversely affected by the proposed facility or activities. To demonstrate that you have a personal justiciable interest, you must state, as specifically as you are able, your location and the distance between your location and the proposed facility or activities.

Your request must raise disputed issues of fact that are relevant and material to the commission's decision on this application. The request must be based on issues that were raised during the comment period. The request cannot be based solely on issues raised in comments that have been withdrawn. The enclosed Response to Comments will allow you to determine the issues that were raised during the comment period and whether all comments raising an issue have been withdrawn. The public comments filed for this application are available for review and copying at the Chief Clerk's office at the address below.

To facilitate the commission's determination of the number and scope of issues to be referred to hearing, you should: 1) specify any of the executive director's responses to comments that you dispute; and 2) the factual basis of the dispute. In addition, you should list, to the extent possible, any disputed issues of law or policy.

How To Request Reconsideration of the Executive Director's Decision.

Unlike a request for a contested case hearing, anyone may request reconsideration of the executive director's decision. A request for reconsideration should contain your name, address, daytime phone number, and, if possible, your fax number. The request must state that you are requesting reconsideration of the executive director's decision, and must explain why you believe the decision should be reconsidered.

Deadline for Submitting Requests.

A request for a contested case hearing or reconsideration of the executive director's decision must be in writing and must be **received** by the Chief Clerk's office no later than **30 calendar days** after the date of this letter: You should submit your request to the following address:

LaDonna Castañuela, Chief Clerk
TCEQ, MC-105
P.O. Box 13087
Austin, Texas 78711-3087

Processing of Requests.

Timely requests for a contested case hearing or for reconsideration of the executive director's decision will be referred to the alternative dispute resolution director and set on the agenda of one of the commission's regularly scheduled meetings. Additional instructions explaining these procedures will be sent to the attached mailing list when this meeting has been scheduled.

How to Obtain Additional Information.

If you have any questions or need additional information about the procedures described in this letter, please call the Office of Public Assistance, Toll Free, at 1-800-687-4040.

Sincerely,

LaDonna Castañuela
Chief Clerk

Proposed New TCEQ MSW Permit No. 2324

Application by
**MONTGOMERY LANDFILL
SOLUTIONS, L.P.,**
for TCEQ MSW Permit No. 2324

§
§
§
§

Before the
**TEXAS COMMISSION ON
ENVIRONMENTAL QUALITY**

EXECUTIVE DIRECTOR'S RESPONSE TO PUBLIC COMMENT

The Executive Director of the Texas Commission on Environmental Quality (the Commission or TCEQ) files this Response to Public Comment (Response) on the application by Montgomery Landfill Solutions, L.P. (Applicant), for a new Municipal Solid Waste (MSW) Permit Number 2324 and on the Executive Director's preliminary decision on the application. As required by Title 30 of the Texas Administrative Code (30 TAC), Section 55.156, before a permit is issued, the Executive Director prepares a response to all timely, relevant and material, or significant, comments. The Office of Chief Clerk timely received comment letters and comments at the public meetings. The following people submitted identical comment letters and will be known as **Group 1**:

This Response addresses all comments received, whether or not withdrawn. If you need more information about this permit application or the wastewater permitting process, please call the TCEQ Office of Public Assistance at 1-800-687-4040. General information about the TCEQ can be found at our website at www.tceq.state.tx.us.

BACKGROUND

Description of Facility

Montgomery Landfill Solutions, L.P., has applied to the TCEQ for a new permit that would authorize the construction and operation of a new Type IV municipal solid waste landfill in Montgomery County, Texas. The proposed landfill will primarily serve the construction and demolition needs of Montgomery County but may also serve the surrounding counties. The total permitted facility will include 473.0 acres of land of which approximately 207.1 acres will be used for waste disposal. The final elevation of the waste fill and soil cover material will be 408.29 feet above mean sea level. Waste acceptance rate is expected to average approximately 3,000 tons per day.

The site will be authorized to accept municipal solid waste resulting from, or incidental to, construction, demolition and grounds keeping activities, including brush, construction and demolition waste, rubbish, inert material, man-made inert material, trash, yard waste that is free from putrescible and household waste, scrap tires that have been slit and quartered or shredded, but not from a tire disposer or recycler that is reimbursed from the State Waste Tire Recycling Fund, and other waste as approved on a case by case basis by the Executive Director. The site is not able to accept those waste streams that are expressly prohibited by 30 TAC, Chapter 330, including but not limited to hazardous waste, Class 1 non-hazardous industrial waste, Class 2 non-hazardous industrial waste, Class 3 non-hazardous industrial waste, regulated radioactive waste, waste containing regulated polychlorinated biphenyls, putrescible waste, household waste, liquid waste, water and wastewater treatment sludge, grease or grit trap wastes, special wastes, and waste material that may cause odor or nuisance or that may require excessive or special onsite procedures and handling requirements.

The facility will be located at 3761 North Walker Road, approximately 1.4 miles north of the intersection of North Walker Road and State Highway 105, abutting the west side of North Walker Road. The location is outside any city limits. The land within a mile of the proposed facility is 60% undeveloped or agricultural, 39% residential with some agricultural use, and 1% industrial. The structures that are within a mile of the proposed facility are primarily homes and some structures incident to agricultural uses. There are approximately 780 people that reside within a mile of the proposed facility with nine structures and habitable buildings within 500 feet of the permit boundary. The nearest structure is approximately 75 feet east of the permit boundary and about 1,150 feet east of the waste cell.

Procedural Background

The application was received March 17, 2004, and declared administratively complete April 6, 2004. Notice of Receipt of Application and Intent to Obtain a Municipal Solid Waste Permit was published April 21, 2004, in the *Conroe Courier*. Notice of Public Meeting was published July 19 and 26 and August 2 in the *Conroe Courier* and a public meeting was held in Conroe on August 9, 2004. The TCEQ Executive Director completed the technical review of the application October 21, 2004, and prepared a draft permit. Notice of Application and Preliminary Decision for a Municipal Solid Waste Permit (NAPD) was published November 25, 2004, in the *Conroe Courier* and the *Houston Chronicle*. Notice of Public Meeting was published February 17 and 24 and March 3, 2005, in the *Conroe Courier* and the *Houston Chronicle* and a second public meeting was held in Conroe on March 10, 2005, at which time the comment period closed. This application was administratively complete on or after September 1, 1999; therefore, this application is subject to the procedural requirements adopted pursuant to House Bill 801 (76th Legislature, 1999).¹

Access to Rules, Laws and Records

Secretary of State website: www.sos.state.tx.us

TCEQ rules in Title 30 of the Texas Administrative Code: www.sos.state.tx.us/tac/ (select "TAC Viewer" on the right, then "Title 30 Environmental Quality")

Texas statutes: www.capitol.state.tx.us/statutes/statutes.html

TCEQ website: www.tceq.state.tx.us (for downloadable rules in WordPerfect or Adobe PDF formats, select "Rules, Policy & Legislation," then "Rules and Rulemaking," then "Download TCEQ Rules")

Federal rules in Title 40 of the Code of Federal Regulations: www.epa.gov/epahome/cfr40.htm

Federal environmental laws: www.epa.gov/epahome/laws.htm

Commission records for this facility are available for viewing and copying and are located at TCEQ's main office in Austin, 12100 Park 35 Circle, Building E, Room 103 (Central Records, for existing or past permits), or Building F, 1st Floor (Office of Chief Clerk, for the current application), and at TCEQ's Region 12 Office in Houston at 5425 Polk Avenue, Suite H. The current application has also been available for review and copying at the Montgomery County Library in Conroe since the application was first submitted to the TCEQ, and the technical summary and draft permit have also been available at that location since publication of the NAPD.

If you would like to file a complaint about an existing facility concerning its compliance with provisions of its permit or with TCEQ rules, you may contact the Agency at 1-888-777-3186 or you may contact the TCEQ Region 12 Office at 1-713-767-3500. Citizen complaints may also be filed on-line at the TCEQ website (select "Reporting," then "Reporting Environmental Problems," then "Reporting an Environmental Complaint"). If the facility is found to be out of compliance it will be subject to enforcement action.

¹ See Texas Water Code, Sections (§§) 5.551 – 5.557.

COMMENTS and RESPONSES

COMMENT 1 (Notice)²

Those individuals identified in Group 10 commented that the public notice did not provide enough time for citizens to take action. Mary Jennings Hartt agreed and considered the timing of notice issue to be a violation of the due process clause of the 14th Amendment to the U.S. Constitution.

RESPONSE 1

The timing of a public notice for a TCEQ authorization is basically established by rule, with a few of the deadlines and requirements established by law. Upon receipt of an application for a solid waste facility, the Chief Clerk of the TCEQ mails notice to the state senator and representative who represent the area in which the facility will be located.³ The Applicant is required to hold a public meeting within 45 days of filing the application and the Applicant must publish notice of that meeting in compliance with TCEQ requirements.⁴ This application was received March 17, 2004.

Independent of the scheduling or publishing notice of the Applicant's public meeting, when an application is determined by the Executive Director's staff to be administratively complete, the Applicant must publish a Notice of Receipt of Application and Intent to Obtain a Permit (commonly referred to within the agency and among the regulated community as First Notice or NORI, Notice of Receipt and Intent) in compliance with TCEQ requirements.⁵ The TCEQ notice requirements dictate what publications are adequate, the specific text requirements, and individuals who must receive notice by mail. The Applicant can voluntarily provide public notice prior to this time, but the rules do not require published notice until the NORI, after the application has been determined to be administratively complete. In addition, the Chief Clerk mails the NORI to all adjacent landowners, anyone who has asked to be on the mailing list for this application, and certain public officials at the same time instructions for publication of the NORI are sent to the Applicant. The Applicant published the NORI for this application on April 21, 2004, in the *Conroe Courier*.

The TCEQ is also required to hold a public meeting for new MSW facilities.⁶ The Applicant is required to publish notice of all public meetings in compliance with the law and TCEQ rules, which require that the notice of a public meeting must be published not less than once each week

² See also related Comment 2 (Alternative Language Notice) and Comment 5 (General Comments About Process).

³ See 30 TAC § 39.501(c)(1).

⁴ See Texas Health & Safety Code § 361.0666 and 30 TAC §§ 39.405(f)(2) & 39.501(e)(3).

⁵ See 30 TAC §§ 39.418 and 39.501(c)(2)(A).

⁶ See Texas Health & Safety Code § 361.0791.

during the three weeks preceding a public meeting.⁷ The TCEQ held two public meetings on this application: the first was held in Conroe on August 9, 2004, for which the Applicant published notice on July 19 and 26 and August 2, 2004, in the *Conroe Courier*; the second was held in Conroe on March 10, 2005, for which the Applicant published notice on February 17 and 24 and March 3, 2005, in the *Conroe Courier* and the *Houston Chronicle*.

The Chief Clerk of the TCEQ will accept comments on an application beginning on the day the application is received. Normally, the comment period ends 30 days after the Applicant publishes the Notice of Application and Preliminary Decision (commonly referred to within the agency and among the regulated community as Second Notice or NAPD). The Applicant published the NAPD for this application on November 25, 2004, in the *Conroe Courier*. In addition, the Chief Clerk mails the NAPD to all adjacent landowners, anyone who has already submitted comments or asked to be on the mailing list for this application, and certain public officials at the same time instructions for publication of the NAPD are sent to the Applicant.

If the decision is made to hold a public meeting more than 30 days after publication of the NAPD, the comment period is extended until the conclusion of that public meeting. For this application, the comment period ended at the conclusion of the second public meeting on March 10, 2005. There are no gaps in a comment period; the comment period for this application opened March 17, 2004, and closed March 10, 2005. The Executive Director responds to all written comments on an application on file with the Chief Clerk and all formal comments made at a public meeting that is held by the TCEQ.

It has been determined that the Applicant has complied with the applicable public notice requirements.

COMMENT 2 (Alternative Language Notice)⁸

Gabriela Gonzalez, Francisco Moctezuma, Nora Renteria, David Tate (CAML), Rhonda Tate, and Jacqueline Woychesin commented that the TCEQ did not provide public notice in Spanish. Francisco Moctezuma would have liked the opportunity to speak and give his opinion in Spanish.

RESPONSE 2

At this time, the law only requires air permit applications to provide notice in an alternative language, but not waste or water permit applications.⁹ However, the TCEQ has recently proposed rules that would require alternative language notice for waste and water permits, similar to the

⁷ See Texas Health & Safety Code § 361.0791(e) and 30 TAC § 39.501(c)(2)(A).

⁸ See also related Comment 1 (Notice) and Comment 5 (General Comments About Process).

⁹ See Texas Health & Safety Code § 382.056.

requirements for air permits.¹⁰ The TCEQ will be accepting public comments regarding the proposed rules through June 13, 2005, and will adopt new rules later this fall. The new rules for alternative language notice will only apply to waste and water applications received after adoption of the new rules.

For this application, 18 individuals made written or formal comments in Spanish. All comments on this application, whether they were made in English or in Spanish, are responded to in this Response to Public Comment.

COMMENT 3 (Public Meetings and Contested Case Hearings)

Jeff Allman, Raymond Atkinson, Darryl and Linda Barnhill, Martha Barr, Thomas Beers, Ken Burling, Dianna Carter, Jenise Cemino, Phillip Cemino, Ann Cheatham, Evelyn Collins, David Lynn Dauzart, Terry Dauzart, Dean Duskin, Janice Ferrer, Pat Ferrer, Charles Fitzgerald, Tanci Foster, Bill Franks, Susan Franks, Jessica Gonzalez, Judith Horne, Claudia Hubbard, Mary and Robert Hutseal, Gloria Jensen, Minnie and Normane Kaatz, Ernest Kanak, Jr., Shelagh Kasinger, Mary Lou Kirves (Texas Real Estate Group), Joseph Kocurek, Alexandria, Antonia, and Tasha Lacina, Frank Lee, Leona Lee, Reverend Jim Luton, Stella Luton, Susana Magana, Esmeralda McCleane, Jose Mejia, Alisa Murphy, Ellen Nelson, Marigrace O'Neil, Edward Parten, Billy Pickering, Deborah Pickering, Greg Poole, Oscar Ramirez, Lois Reiszner, Sandy Relander, Link Reneau, Nora Renteria, Normo Reyes, Jack Safford, Gary and Sandra Sullivan, Rhonda Tate, Debra Teekamp, Vicki Thompson, James and Kathy Trevathan, Frances Underwood, Michael Walton, and Jacqueline Woychesin commented that the public meeting facilities were inadequate for the number of people.

Martha Barr, Gabriela Gonzalez, and Rhonda Tate commented that cancellation of the informal part of the public meeting denied some individuals a chance to ask questions. Those individuals identified in Group 3, Group 7, Group 9, and Group 10, and Charles Buzbee, Mary Carter (CAML), Mel Fife, Maria Figueroa, Linda Standley, Linda Stegenga, David Tate (CAML), David and Rhonda Tate, and Jacqueline Woychesin commented that the public meeting was unsatisfactory because the Applicant's representative could not answer basic questions and there should be another meeting so that the owner could answer the public's questions and concerns. Mary Carter (CAML) requested that the Applicant hold another public meeting rather than replying by e-mail to written questions. Linda Standley was concerned that the Applicant refused to answer general questions. Mary Jennings Hartt asked the TCEQ to take into account the Applicant's refusal to answer questions at the public meeting and commented that the Applicant's lack of responsibility to the community might bear upon the facility's environmental compliance once it is built. William Carter commented that the protesters at the public meeting were being treated like a mushroom.

Those individuals identified in Group 3, Group 7, Group 10, and Mel Fife, Judith Horne, Melody Logan, and Carol Parten commented that the public meeting should be in Montgomery

¹⁰ See Rule Project Number 2005-014-039-LS on TCEQ's internet website at www.tceq.state.tx.us (select "Rules, Policy & Legislation," then "Rules and Rulemaking," then "Rule Proposals and Adoptions," then "Proposals." Scroll down to the Rule Project Number and select WordPerfect or Adobe PDF format for downloading.

County. Denise Bell, Linda Collins, Tina Collins, Norma Gibson, Duane and Tracy Hamilton, Albert and Shelia Nelson, Billy Wagnon, and Karen Welch commented that the contested case hearing should be in Montgomery County. Rhonda Tate commented that the Applicant was allowed to control the public participation process from the beginning and that TCEQ ignored requests for a different venue.

RESPONSE 3

Three public meetings have been held in Montgomery County regarding this permit application. The first meeting was held by the Applicant pursuant to law and TCEQ rules. This first public meeting is intended to be strictly between an applicant and the concerned public; no one from the TCEQ attends this first public meeting. A representative of the Applicant attended this first public meeting because a family emergency prevented the Applicant's personal attendance. Those attending that meeting have indicated to the Executive Director that the Applicant's representative was unable to answer all questions posed during the meeting.

The second meeting was conducted by the TCEQ at Conroe Tower in Conroe on August 9, 2004. The Applicant and TCEQ staff were led to believe this venue was an appropriate facility for the public meeting based on the amount of interest shown in the permit, the accessibility of the location, and the venue's proximity to the facility. Unfortunately, Conroe Tower was unable to accommodate the number of people who wished to attend that meeting. Based on the dissatisfaction expressed at that meeting and thereafter, TCEQ conducted another meeting in order to accommodate all interested parties. It is the responsibility of the Applicant to arrange the venue for a public meeting.

The format of the second meeting was altered on the spot and at the last minute by eliminating the informal question and answer period in order to allow more time for people to rotate into and out of the meeting room to make formal comment. The informal period of the meeting is not required by rule and the meeting was in compliance with all applicable rules.

During the formal comment period of a public meeting, members of the public may state their formal comments into the official record. A written response to all written and formal comments will be prepared by the Executive Director and considered by the Commissioners before they reach a decision on the permit. A copy of the response will be sent to each person who submits written comments or a formal comment on an application or who requested to be on the mailing list for an application and provides an address. Only relevant and material issues raised in writing or during the formal comment period can be considered if a contested case hearing is granted.

The third meeting was conducted by TCEQ on March 10, 2005 at Caney Creek High School in Conroe. The Applicant attended this meeting but did not answer questions during the informal session. TCEQ rules require an applicant to attend the public meeting but do not require an applicant to respond to questions. While it is unusual for an applicant not to answer questions, all public meetings were in compliance with TCEQ rules.

If the Commission grants a contested case hearing request, the permit application will be referred to the State Office of Administrative Hearings (SOAH), which will determine an appropriate time and place for the hearing. In the past, SOAH judges have held preliminary hearings in the local community as a courtesy, but nothing requires it. The full hearing on the merits in a contested case

may be held in the local community or at SOAH's offices in Austin, depending on the parties' wishes and the judge's discretion.

COMMENT 4 (State and Local Government Involvement)¹¹

David Henderson, Linda Standley, and Michael Walton commented that the citizens unanimously disapproved of the landfill. County Commissioner Ed Rinehart said that the landfill was being forced on a community that did not want it. Judge Alan Sadler commented that the Montgomery County Court was not aware of certain issues when it supported the site. Jim Dawson and Linda Standley commented that state and local officials had spoken out against the site and that there was no resolution supporting the site by a local governing body. Jacqueline Woychesin commented that the community and governmental entities were not involved in the siting process. Linda Standley, Linda Stegenga, David Tate (CAML), and David and Rhonda Tate commented that the City of Conroe resolution in favor of the landfill was meaningless because Conroe was not a relevant area. CAML commented that the Houston-Galveston Area Council of Governments made specific substantive comments regarding the application. Mr. and Mrs. Joe Esposito commented that they were tired of being dumped on by the public servants of Conroe. Monte Lane commented that he believed the Applicant contributed to Commissioner Rinehart's campaign fund. Linda Standley commented that the application seemed inconsistent with regional planning goals. David Tate (CAML) commented that the Applicant had not shown that it would comply with the regional solid waste plan.

State Representative Ruben Hope, Jr., commented that he would be working with the County Attorney to revise Texas Health and Safety Code, Sections 361.122 and 361.123. Linda Standley commented that the application seemed to be prohibited by the Health and Safety Code. Angus Lupton commented that Senator Staples would be looking into whether this area needed another landfill.

RESPONSE 4

A waste permit application is required to demonstrate compliance with the applicable rules and regulations of all other state and local governmental entities.¹² TCEQ rules do not require a resolution in support of the application by any governmental entity. A resolution is not a statutory or regulatory factor to deny an application, but is treated the same as any public comment in support of or in opposition to a facility. The TCEQ does not look beyond what is written in the resolution or try to discern the governmental officials' or entities' motives for their support or opposition.

¹¹ See also related Comment 8 (Location) and Comment 10 (Land Use Compatibility).

¹² See Texas Health & Safety Code § 361.096.

The Applicant is required to demonstrate compliance with the regional solid waste plan.¹³ The regional solid waste plan that includes Montgomery County, developed by the Houston-Galveston Area Council of Governments (H-GAC), calls for a Type IV landfill in Montgomery County to serve the region's waste disposal needs. Pursuant to TCEQ rules, H-GAC was provided with a copy of the application summary. Subsequently it issued a statement that the proposed facility was "neither consistent nor inconsistent with the regional plan." Based on the provided information, the Executive Director concluded that the application complies with the regional solid waste plan.

More specific comments raised by CAML regarding H-GAC's substantive comments on this application are answered throughout this Response.

During the recently completed regular session of the 79th Texas Legislature, State Representative Ruben Hope, Jr., introduced House Bill (HB) 1053 that would amend the Texas Health and Safety Code by adding a new Section 361.123, similar to the restrictions on approval of Type IV landfill applications in Section 361.122. HB 1053 was amended in the Senate with floor amendments proposed by Senator Todd Staples. The amended HB 1053 was passed by both houses and was signed by the Governor on June 18, 2005, effective upon his signature. That bill affects new Type IV applications in a county like Montgomery County that are received by the TCEQ after June 18, 2005. The new law would not affect the current application.

COMMENT 5 (General Comments About Process)¹⁴

Samantha Baumgarten and County Commissioner Ed Rinehart commented that the permit process took too long and that TCEQ was not acting wisely or efficiently. Linda Standley commented that the application should be carefully scrutinized for mistakes.

RESPONSE 5

Review times for the permitting process are defined in TCEQ rules in accordance with state law. The Executive Director on this occasion has reviewed a four-volume application in accordance with all appropriate TCEQ rules. This application review has gone well beyond the typical time frame due to extension of the public comment period as a result of requests for a second TCEQ-led public meeting. Every application received by the TCEQ is reviewed to ensure compliance with all applicable rules.

¹³ See 30 TAC § 330.51(c)(10).

¹⁴ See also related Comment 1 (Notice) and Comment 2 (Alternative Language Notice).

COMMENT 6 (Environmental Public Defender)

Frankie Milley asked why the community had to raise \$250,000 to fight a landfill and that the state should have to provide an attorney like in criminal cases.

RESPONSE 6

An attorney is not necessary to participate in the public participation process. However, a citizen is free to employ legal counsel if he or she wishes. The state is not required to provide counsel under federal or state laws or constitutions.

COMMENT 7 (Previous Application)

Dino Villarreal commented that there were inconsistencies between Applicant's permit numbers 2324 and 2312.

RESPONSE 7

The Applicant initially filed application number 2312, but withdrew that application on January 30, 2004, after failing to hold the applicant-led public meeting within 45 day after filing the application.¹⁵ Once an application is withdrawn it is no longer considered in any capacity. TCEQ rules do not require consistency between current applications and withdrawn applications.

COMMENT 8 (Location)¹⁶

Those individuals identified in Group 1, Group 2, Group 6, Group 9, and Phillip Branch, Mary Carter (CAML), Elvira and Yolanda Cervantez, Vallye Chandler, Linda Collins, Tina Collins, Jim Dawson, Deborah Doran, Barbara, Leamon, and David Dowden, Mel Fife, Norma Gibson, Mary Jennings Hartt, Laurie Headings, David Henderson, Tony Herrin and Pattie McGee, State Representative Ruben Hope, Jr., Devin Kaatz, Minnie and Normane Kaatz, Shelagh Kasinger, Monte Lane, Phillip Lindsey, Reverend Jim Luton, Ronald Maffett, Patsy Matthews, Barbara Mayeux, Albert and Shelia Nelson, R. M. Palmer (International Paper, Realty Division), Greg Poole, Danielle Reich, Lois Reiszner, James Reneau, Leona Reneau, Nora Renteria, County Commissioner Ed Rinehart, Pedro Rosales, Jr., Judge Alan Sadler, Bob and Lynda Sasser, Travis Selph, James Shropshire, John and

¹⁵ See 30 TAC § 39.501(e)(B).

¹⁶ See also related Comment 4 (State and Local Government Involvement) and Comment 10 (Land Use Compatibility).

Leah Smith, Linda Standley, Linda Stegenga, Donald Stockton (Conroe I.S.D.), David Tate (CAML), David and Rhonda Tate, Faustino Villarreal, Billy Wagnon, Michael Walton, Janice Watkins, Joann and Thomas Welch, Karen Welch, Jacqueline Woychesin, Ladgie Zotyka, Jr., and Paul Zylman commented that East Montgomery County did not need an additional landfill. Also, concern was expressed that landfills and other waste facilities were being targeted and clustered in East Montgomery County. CAML commented that the Applicant had not been able to identify any clear benefit this proposed landfill would provide to the community and that the impact to low income and minority communities was disproportionate to the population in Montgomery County and the four surrounding communities. Nora Renteria and Rhonda Tate asked if the county had any recourse to limit the number of landfills that locate in an area. Amarian Castillo, Aaron Flores, Claudia Flores, and Judith Gonzalez commented that they didn't want a landfill nearby. Superintendent Leon Cubillas (Splendora I.S.D.), Mel Fife, Mary Jennings Hartt, Nora Renteria, John and Leah Smith, Linda Stegenga, David Tate (CAML), David and Rhonda Tate, and Jacqueline Woychesin commented that the landfill was environmental racism, classism, and unjust.

RESPONSE 8

The regional solid waste plan that includes Montgomery County, developed by the Houston-Galveston Area Council of Governments (H-GAC), calls for a Type IV landfill in Montgomery County to serve the region's waste disposal needs. The Executive Director does not have authority or jurisdiction to consider alternative locations, benefits to the community, or disproportionate impact within a region under state law. TCEQ rules were promulgated to ensure that the facility does not pose a risk to the surrounding community. The issues of equity and concerns about clustering of MSW facilities are more appropriately addressed to planning authorities such as the county, city, and H-GAC.

A county may prohibit by ordinance the processing or disposal of solid waste in certain areas of the county under provisions of state law and the Commission is required by that law to consider that county ordinance.¹⁷ However, that law does not allow a county to prohibit the processing or disposal of solid waste in an area for which the Commission has already issued a solid waste permit or in an area for which an application for a solid waste permit is pending before the Commission.

COMMENT 9 (Old Landfills)

Frankie Milley thought that old landfills should be cleaned up before permitting a new landfill.

¹⁷ See Texas Health & Safety Code §§ 363.112 and 364.012.

RESPONSE 9

Effective in 1993, Subtitle D of the federal Resource Conservation and Recovery Act (RCRA) caused landfills receiving municipal solid waste throughout Texas and the nation to upgrade or close. All facilities permitted in Texas since Subtitle D was enacted must have, as appropriate for the types of waste received, a liner system, leachate collection, landfill gas management, storm water run-on and run-off control, a final cover system, and financial assurance to close and monitor the facility. MSW rules require final cover for pre-Subtitle D facilities if they stopped receiving waste before Subtitle D was promulgated.¹⁸ Pre-Subtitle D facilities that continued to receive waste after promulgation of Subtitle D must meet the more stringent final cover requirements.¹⁹ It is not clear from the comment which old landfills should be “cleaned up,” but MSW rules require some form of final cover for all MSW landfill units.²⁰

COMMENT 10 (Ownership)

Linda Standley commented that the Applicant did not have sufficient ownership interest required by TCEQ rules and the Applicant should reveal all of its owners. David Tate (CAML) and David and Rhonda Tate considered it wrong to allow a corporate veil to hide the names of the true owners of the Applicant.

RESPONSE 10

TCEQ rules require the property owner of record to acknowledge the possibility of being held jointly or severally responsible for the operation, maintenance, closure, and post-closure care of the site. Before the facility begins operating, the owner has the responsibility to file an affidavit with the county deed records stating that the property had been used for a solid waste facility.²¹ Additionally, the application requires disclosure of all persons having more than 20% ownership in the proposed facility. This application was revised in response to the Executive Director’s second Notice of Deficiency to include two persons with greater than 20% interest. The application is a public document that has been available for review at the Montgomery County Library in Conroe or at the TCEQ in Austin since First Notice.²²

¹⁸ See 30 TAC § 330.251.

¹⁹ See 30 TAC § 330.253.

²⁰ As defined by 30 TAC § 330.2(80).

²¹ See 30 TAC § 330.52(a)(7)(B) & (C).

²² See also related Comment 1 (Notice).

COMMENT 11 (Land Use Compatibility)²³

Samantha Baumgarten, Denise Bell, Mary Carter (CAML), Jim Dawson, Kenneth and Mary Everitt, Mary Jennings Hartt, Ernest Kanak, Jr., Barbara Meche, Frankie Milley, Dennise O'Neil, Danielle Reich, David Rendon, Beth Reneau, James Reneau, Leona Reneau, James Shropshire, John and Leah Smith, David and Rhonda Tate, Vicki Thompson, Karen Welch, and Jacqueline Woychesin commented that the character of the surrounding area was residential with little industry and stated that there were other locations better suited for a landfill. Those individuals identified in Group 1, Group 2, Group 5, Group 6, and Paul Bacque, Vallye Chandler, Patricia and Paul Clark, Linda Collins, Tina Collins, Superintendent Leon Cubillas (Splendora I.S.D.), Deborah Doran, Barbara, Leamon, and David Dowden, Mel Fife, Norma Gibson, Dan Glassel (Blessing Residential, Inc.), Sandy and Steve Hamilton, David Henderson, Tony Herrin and Pattie McGee, State Representative Ruben Hope, Jr., Judith Horne, Ernest Kanak, Jr., Mary Lou Kirves (Texas Real Estate Group), Monte Lane, Melody Logan, Stella Luton, Ronald Maffett, Frankie Milley, Albert and Shelia Nelson, R. M. Palmer (International Paper, Realty Division), Billy Pickering, Deborah Pickering, Nora Renteria, Judge Alan Sadler, Cassandra Smith, John and Leah Smith, Jan Stallworth, Linda Stegenga, Nancy Steward, David Tate (CAML), David and Rhonda Tate, Vicki Thompson, Billy Wagnon, Michael Walton, Marcia Warner, Karen Welch, Sabrina Westerfeld, Margie Wood, and Paul Zylman commented that residential and economic development had been and would continue to be negatively affected if the permit was granted. R. M. Palmer (International Paper, Realty Division), David Tate (CAML), and Michael Walton were concerned that a landfill would restrict future land use and development. David Rendon and Nora Renteria were concerned that the landfill would attract other industrial activity, low-quality development, and more landfills. County Commissioner Ed Reinhart said that the area was rapidly growing and the application should have looked farther than a one-mile radius. Judge Alan Sadler commented that additional development in the area was being planned.

Mary Carter (CAML), Deborah Doran, Duane and Tracy Hamilton, Reverend Jim Luton, County Commissioner Ed Reinhart, Linda Standley, Rhonda Tate, Michael Walton, and Jacqueline Woychesin were concerned about where the site was located and its compatibility with surrounding land use. Specifically, concern was expressed about the site's proximity to residences, daycare facilities, churches, and community centers; if the location complied with TCEQ rules; and if the Applicant could demonstrate compatibility with existing land uses and development patterns. Additionally, there were concerns that TCEQ based its approval on site engineering and not on land use compatibility and that the application was inconsistent with regional planning goals. David Tate (CAML) was concerned that the Applicant had not shown that the landfill would be compatible with existing land use or community growth patterns.

Those individuals identified in Group 10 and CAML, Deborah Doran, Mary Jennings Hartt, Wayne Kocurek, Judge Alan Sadler, Linda Standley, and Linda Stegenga commented that the area had experienced recent growth, the application misrepresented the actual population because the Applicant used an outdated land use development study, and the aerial count of houses was inaccurate due to the dense tree cover. County Commissioner Ed Reinhart, John and Leah Smith, and

²³ See also related Comment 4 (State and Local Government Involvement) and Comment 8 (Location).

Michael Walton commented that the application did not reflect the rapid residential growth of the communities of Security and Midway. CAML commented that the facility failed to conform with the regional solid waste management plan by H-GAC.

Those individuals identified in Group 10 and Minnie and Normane Kaatz, Wayne Kocurek, Steven Matthews, Albert and Shelia Nelson, Nora Renteria, Judge Alan Sadler, Anita Severa, John Smith, Rhonda Tate, Billy Wagnon, Karen Welch and Jacqueline Woychesin commented that Montgomery County should not be the dumping ground for Houston. Linda Standley believed that the landfill's service area should only encompass Montgomery County.

RESPONSE 11

State law and TCEQ rules do not provide any authority to evaluate alternative locations as part of an MSW landfill permit application review. The rules state that "a primary concern is that the use of any land for an MSW site not adversely impact human health or the environment. The impact of the site upon a city, community, group of property owners, or individuals must be considered in terms of compatibility of land use, zoning in the vicinity, community growth patterns, and other factors associated with the public interest."²⁴ The Applicant is required to submit information regarding: zoning at the site and in the vicinity; character of surrounding land uses within one mile of the proposed facility; growth trends of the nearest community with directions of major development; proximity to residences and other uses, such as schools, churches, cemeteries, historic structures and sites, archaeologically significant sites, and sites having exceptional aesthetic quality; the approximate number of residences and business establishments within one mile of the proposed facility and distances and directions to the nearest residences and businesses; and a description and discussion of all known wells within 500 feet of the proposed site to assist the Executive Director in determining potential adverse impact.

The initial application indicated that there were "an estimated 410 residences or other habitable structures" within one mile of the proposed facility. This number was based primarily on aerial photographs; however, before the final revision of the application, new land use studies were performed, including a field survey of residences. The final revision of the application indicates that, of those approximately 410 structures, there are 256 residences. The Applicant has provided the required information and, based on that information, the Executive Director has determined that the draft permit is protective of human health and safety, and the environment, in the surrounding community. Issues of community morale and environmental justice are not addressed by TCEQ rules.

The Executive Director is unaware of an existing day care or church within one mile of the proposed facility. A comment provided at the first TCEQ public meeting indicated a church on State Highway 105 was being planned within one mile of the proposed facility, but the rules do not require reporting, or the authority to consider the impact on, planned or proposed facilities.²⁵ A facility's

²⁴ 30 TAC § 330.53(b)(8).

²⁵ See 30 TAC § 330.53(b)(8).

impact on a community is a primary concern in reviewing an application. However, the rules do not ban locating landfills within one mile of churches or day care facilities.

The H-GAC did not provide any information that would lead the Executive Director to conclude that the facility would not comply with the regional solid waste plan.

COMMENT 12 (Access and Community Safety)

Those individuals identified in Group 1, Group 2, Group 4, Group 5, Group 6, and Group 9, and Enedina Alvarez, Willie Mae Atkinson, Melissa Barton, Thomas Beers, Denise Bell, Phillip Branch, Mary Carter (CAML), Vallye Chandler, Linda Collins, Tina Collins, Patricia Crofton, Superintendent Leon Cubillas (Splendora I.S.D.), Terry Dazart, Jim Dawson, Deborah Doran, Mel Fife, Norma Gibson, Duane and Tracy Hamilton, Sandy and Steve Hamilton, Mary Jennings Hartt, Laurie Headings, David Henderson, Tony Herrin and Pattie McGee, State Representative Ruben Hope, Jr., Mary Lou Kirves (Texas Real Estate Group), Wayne Kocurek, Monte Lane, Phillip Lindsey, Melody Logan, Christene Ludwig, Ronald Maffett, Patsy Matthews, Steven Matthews, Barbara Mayeux, Travis Mayeux, Barbara McCleane, Barbara Meche, Frankie Milley, Lee Moulder, Albert and Shelia Nelson, Marigrace O'Neil, Trudilee O'Neil, R. M. Palmer (International Paper, Realty Division), Billy Pickering, Deborah Pickering, Greg Poole, Jason Reaves, Danielle Reich, Beth Reneau, James Reneau, Kyle Reneau, Leona Reneau, Nora Renteria, County Commissioner Ed Rinehart, Carla Robles, Pedro Rosales, Jr., Judge Alan Sadler, Bob and Lynda Sasser, Anita Severa, James Shropshire, Arlinda and Billy Smith, Cassandra Smith, Jaren and Logann Smith, John and Leah Smith, Robert Smith, Linda Standley, Linda Stegenga, Nancy Steward, Thomas Steward, Donald Stockton (Conroe I.S.D.), David Tate (CAML), John Tate, Jr., Rhonda Tate, Vicki Thompson, Billy Wagnon, Michael Walton, Janice Watkins, Jacqueline Woychesin, Clifford Welch, Joann and Thomas Welch, Karen Welch, Sabrina Westerfeld, Charlotte Williams, Ladgie Zotyka, Jr., and Paul Zylman commented that the roads that provided access to the landfill and to the community were the same and the increased use would cause the roads to have safety and structural problems endangering all who used the road. Special concern was expressed regarding children at play and children traveling to and from school. CAML specifically expressed concern about the Caney Creek-Moorehead-Grangerland Regional School Complex, Austin Elementary, and New Caney Elementary-Keefer Crossing Middle School. CAML commented that the Applicant had failed to provide adequate documentation on the availability and adequacy of roads. County Commissioner Ed Rinehart and Judge Alan Sadler commented that, because of the residential character of the neighborhood, reconstruction of the road would not ensure safety.

Kelli and Lee Moulder asked if there would be a way to monitor and maintain the speed limit on the road for the safety of children and pedestrians and asked if there would be a four-way stop light at Walker Road and State Highway 105. Penny Cooper commented that the truckers should be paid hourly instead of per load to decrease their incentive for speeding, traffic should be monitored, and speed bumps should be installed. Patricia Crofton commented that underpaid and overworked truckers posed a threat to the community's safety. CAML, County Commissioner Ed Rinehart, John and Leah Smith, Linda Stegenga, and Karen Welch commented that if the permit was granted there should be a dedicated road that provided direct access for landfill traffic to State

Highway 105. John Smith asked if trucks would use State Highway 105 to access the landfill or if the trucks would take short cuts. CAML and John and Leah Smith commented that any plan to abate traffic should consider the expansion of existing landfills and traffic studies should be performed while school was in session. Ken Burling and Charles Buzbee inquired into traffic fatalities on North Walker and if those fatalities would be increased with the addition of landfill traffic. Melvin Sharpe commented that the discussion on widening Walker Road did not consider the accident rate and other issues. CAML commented that H-GAC stated the permit should be conditioned on North Walker Road being improved to accommodate 80,000-pound weight-loads and increasing the sight distance at the reverse curve. CAML commented that firm plans and agreements addressing this requirement should be incorporated into the permit; and that traffic studies should be completed concerning the need for additional traffic controls and safety measures. David Tate (CAML) and David and Rhonda Tate commented that the application was based on an unrealistic plan for four lanes for Highway 105.

Johnny and Karen Beall, Mary Carter (CAML), Sheila Freeman, and Paul Zylman asked who would provide the funds to widen North Walker Road and who determined the value of condemned land. Mary Carter (CAML) and Terry Dautart asked who would bear the cost to repair North Walker Road and commented that it should not be the taxpayer's burden. Terry Dautart was concerned that the road bed of North Walker Road was corrupt because of standing water that was present for most of the year. Melvin Sharpe commented that the information from Texas Department of Transportation (TXDOT) regarding State Highway 105 was inaccurate and should not be used. CAML and Jacqueline Woychesin commented that SH 105 had been documented as one of the most dangerous roads in Montgomery County due to the growth of the area. Karen Welch commented that TXDOT traffic studies did not seem to be accurate.

RESPONSE 12

TCEQ rules state that "a primary concern is that the use of any land for an MSW site not adversely impact human health or the environment. The impact of the site upon a city, community, group of property owners, or individuals must be considered in terms of compatibility of land use, zoning in the vicinity, community growth patterns, and other factors associated with the public interest."²⁶ In accordance with this requirement, an applicant must: provide data on the availability and adequacy of roads that the applicant will use to access the site; provide data on the volume of vehicular traffic on access roads within one mile of the proposed facility, both existing and expected, during the expected life of the proposed facility; and project the volume of traffic expected to be generated by the facility on the access roads within one mile of the proposed facility.²⁷ An applicant is also required to submit documentation of coordination with TXDOT for traffic and location restrictions.²⁸ These rules do not require an applicant to provide information about highway fatalities

²⁶ 30 TAC § 330.53(b)(8).

²⁷ See 30 TAC § 330.53(b)(9).

²⁸ See 30 TAC § 330.51(b)(6).

on nearby roads. The Applicant provided the required information and transportation study as required by the application. This information was supplemented after each of two technical notices of deficiency in response to requests for clarification. The Applicant has fulfilled the informational requirements.

North Walker Road is currently weight-restricted and contains a sight-restricted "S" curve at Parker Road, between State Highway 105 and the proposed landfill entrance. The Applicant has proposed, and the Draft Permit requires, improvements to North Walker Road in accordance with Montgomery County requirements before acceptance of waste at the landfill. Improvements will allow maximum gross vehicle weight of 80,000 pounds and, at a minimum, will include a 24-foot-wide pavement section with six-foot-wide shoulders, a six-inch stabilized sub-grade, an eight-inch-thick base course, and a four-inch-thick asphaltic surface course, or an equivalent design as approved by Montgomery County. These improvements should also improve visibility at the "S" curve. The Draft Permit includes a provision that prevents the Applicant from accepting waste until all improvements to North Walker Road are complete.

The Executive Director does not consider or value property taken by eminent domain for the purpose of widening roads used as a route to and from an MSW facility. North Walker Road is a county road and maintenance is provided by Montgomery County.

TCEQ rules do not address violations of traffic safety regulations. Violations of traffic laws should be directed to local law enforcement agencies or to the Texas Department of Public Safety (DPS). As North Walker Road is a county road, Montgomery County personnel overseeing public roads should be contacted with recommendations regarding traffic control devices, such as traffic lights or speed bumps. DPS should be contacted for similar issues on State Highway 105.

COMMENT 13 (Drivers)

Laurie Headings was concerned that the landfill would bring truck drivers with criminal histories and sexual predators into the community.

RESPONSE 13

TCEQ rules do not require criminal backgrounds on management and employees of a proposed landfill. Truck drivers delivering waste to a landfill are not necessarily employees of that landfill. Criminal behavior of any sort unrelated to those activities authorized under an MSW permit should be directed immediately to a local law enforcement agency.

COMMENT 14 (Disasters)

Claudia Hubbard, Nora Renteria, Carla Robles, Jacqueline Woychesin commented that they were concerned about a fire at the facility. Specifically, how it would affect residents; the evacuation

route for North Walker, and fire fighters' access to the landfill. Penny Cooper was concerned about the height of the landfill and how it would withstand a tornado.

RESPONSE 14

The Applicant must provide a Fire Protection Plan that identifies the fire protection standards to be used at the facility and how personnel are trained in fire-fighting techniques.²⁹ The rules also require that the owner or operator maintain a soil stockpile within 2,500 feet of the working face or active disposal area that is sufficient to cover the entire working face or active disposal area.³⁰ The Applicant has provided a facility Fire Protection Plan and has agreed to maintain at least a 1,000-cubic-yard soil stockpile no more than 2,500 feet from the working face for weekly cover and fire-fighting purposes. TCEQ rules do have any provisions that require a contingency plan in the event of a tornado.

COMMENT 15 (Accepted Waste)

Those individuals identified in Group 10 and Doug Crofton commented that the public should be furnished with a list of what the landfill would accept because some construction material contained toxic substances. Jacqueline Woychesin was concerned that the landfill would accept trash. Doug Crofton was concerned about who would monitor the waste accepted. Vallye Chandler, Barbara Leamon, and David Dowden, L. V. Dowden, Ernest Kanak, Jr., Barbara Mayeux, Frankie Milley, Nora Renteria, Anita Severa, Thomas Steward, Michael Walton, and Jacqueline Woychesin commented about the adequacy of security measures and monitoring to prevent illegal dumping. John and Leah Smith were concerned with what counties the accepted waste stream originated.

RESPONSE 15

The application requires a Site Operating Plan (SOP) that sets forth the facility's basic procedures to comply with procedures prescribed by TCEQ rules. The proposed SOP indicates that the facility will be fenced and access will be controlled at the site entrance by a gate that is locked outside normal operating hours. During operating hours a gate attendant will be stationed in the gatehouse adjacent to the landfill access road to screen incoming waste loads to prevent the disposal of prohibited wastes. Facility employees will also receive training on screening incoming waste. The operational standards and the submitted SOP should ensure that only allowed waste is accepted at the facility.

²⁹ See 30 TAC § 330.114(6).

³⁰ See 30 TAC § 330.115.

TCEQ rules impose restrictions on the acceptable waste stream for Type IV landfills.³¹ The need for MSW facilities is generally guided by councils of governments and the Houston-Galveston Area Council has developed a regional plan indicating an additional Type IV MSW landfill is needed in Montgomery County. The application indicates that the service area for the proposed facility is estimated to include Montgomery, Liberty, Harris, Walker and San Jacinto Counties.

COMMENT 16 (Debris)

Johnny and Karen Beall, Norma Gibson, Linda Collins, Tina Collins, Terry Dauzart, Mary Jennings Hartt, Barbara Mayeux, Barbara Meche, Lee Moulder, Albert and Shelia Nelson, Kyle Reneau, Judge Alan Sadler, Daniel Vargas, Billy Wagnon, Michael Walton, Karen Welch, and Ladgie Zotyka, Jr., commented that they were concerned about who would clean up debris from trucks traveling on North Walker.

RESPONSE 16

The rules require that windblown material and litter must be collected and returned to the active disposal area or working area as necessary to minimize unhealthy, unsafe or unsightly conditions.³² This includes windblown materials resulting from unloading, spreading, and compacting operations and litter scattered from vehicles. Facility owners or operators are also required to take steps to ensure that vehicles hauling waste to their sites are enclosed or provided with tarpaulins, nets, or other means to prevent the escape of any part of the load.³³ The SOP submitted with the application indicates that waste transportation vehicles using the facility will be encouraged to have adequate covers or other means of containment for the wastes they transport; repeat offenders will be reported to the Texas Department of Public Safety and the Montgomery County Sheriff's Department; and solid waste that has been deposited at the working face will be spread and compacted as rapidly as possible to minimize the amount of time that waste is exposed to wind. Additionally, the SOP indicates that landfill personnel will collect litter or waste materials weekly

³¹ The site will be authorized to accept municipal solid waste resulting from, or incidental to, construction, demolition and grounds keeping activities, including brush, construction and demolition waste, rubbish, inert material, man-made inert material, trash, yard waste that is free from putrescible and household waste, scrap tires that have been slit and quartered or shredded, but not from a tire disposer or recycler that is reimbursed from the State Waste Tire Recycling Fund, and other waste as approved on a case by case basis by the Executive Director. The site is not able to accept those waste streams that are expressly prohibited by 30 TAC, Chapter 330, including but not limited to hazardous waste, Class 1 non-hazardous industrial waste, Class 2 non-hazardous industrial waste, Class 3 non-hazardous industrial waste, regulated radioactive waste, waste containing regulated polychlorinated biphenyls, putrescible waste, household waste, liquid waste, water and wastewater treatment sludge, grease or grit trap wastes, special wastes, and waste material that may cause odor or nuisance or that may require excessive or special onsite procedures and handling requirements.

³² See 30 TAC § 330.120.

³³ See 30 TAC § 330.123.

along North Walker Road to the intersection with State Highway 105 and ½ mile to the east and west of North Walker Road along State Highway 105. North Walker Road will also be inspected and cleaned for two miles north of the site entrance.

COMMENT 17 (Nuisance)

Paul Bacque, Elvira and Yolanda Cervantez, Vallye Chandler, Ernest Kanak, Jr., Deborah Doran, Wayne Kocurek, Phillip Lindsey, Francisco Ramirez, Danielle Reich, Rhonda Tate, and Michael Walton were concerned that the landfill would emit bad odors and be an eyesore. Michael Walton was concerned that the landfill would attract rodents and vermin that would affect the health and property of nearby residents. Travis Selph was concerned that the retention ponds would contribute to insect-borne disease. Sandy and Steve Hamilton, Phillip Lindsey, Melody Logan, Steven Matthews, Ruben Selph, Rhonda Tate, Michael Walton and Paul Zylman commented that they were concerned about the increase of noise due to the landfill. CAML, Steven Matthews, Anita Severa, and John and Leah Smith were concerned about the size of the landfill being too large. CAML and John and Leah Smith were concerned that the landfill's aerial build-up would exceed tree cover resulting in the destruction of a natural buffer between the landfill and the community.

RESPONSE 17

TCEQ rules have no specific limits on noise or requirements for noise control; however, a minimum 50-foot buffer zone is required and is expected to provide some reduction in noise at the facility boundary. The proposed facility meets the requirements and the buffer distance as proposed greatly exceeds the 50-foot minimum, including a 300-yard buffer from North Walker Road.

There are several TCEQ rules aimed at reducing odors including: control of windblown waste and litter,³⁴ establishment of buffer zones,³⁵ prohibiting burning solid waste,³⁶ control of ponded water,³⁷ use of all-weather roads,³⁸ dust suppression,³⁹ and weekly cover to control disease vectors, fires, odors, windblown litter or waste, and scavenging.⁴⁰ The Applicant's SOP describes procedures that, if complied with, should address and reduce possible nuisance conditions.

³⁴ See 30 TAC § 330.120.

³⁵ See 30 TAC § 330.121.

³⁶ See 30 TAC § 330.5.

³⁷ See 30 TAC § 330.125(b).

³⁸ See 30 TAC § 330.127(a).

³⁹ See 30 TAC § 330.127(b).

⁴⁰ See 30 TAC § 330.133(a).

TCEQ rules do not address the area a landfill may cover. The height of the landfill is not determined directly by rule, but is dependent on the geometry of the landfill footprint using the mandated 4:1 horizontal:vertical maximum side slope. TCEQ guidance limits side slopes of the final cover to no more than one foot vertically for every four feet horizontally. Therefore, the shortest dimension of the waste unit limits the height of the landfill.

COMMENT 18 (Flood Plain Maps)

Those individuals identified in Group 3 and Ken Burling, Mary Carter (CAML), Jim Dawson, Mel Fife, Ernest Kanak, Jr., Wayne Kocurek, Travis Mayeux, Carla Robles, Judge Alan Sadler, John and Leah Smith, Linda Standley, David Stegenga, Linda Stegenga, David Tate (CAML), and Karen Welch commented that the application was reviewed using old flood plain maps. Those individuals identified in Group 3 commented that TCEQ should request new flood plain maps from FEMA. Wayne Kocurek commented that a current survey of flooding in the area needs to be considered. Ernest Kanak, Jr., asked what the consequences would be if the landfill was in an identified flood plain after FEMA revised the flood plain maps.

RESPONSE 18

The Applicant provided information, based on Federal Emergency Management Agency (FEMA) maps, concerning the 100-year floodplain as called for in the TCEQ rules.⁴¹ However, the FEMA maps were based on 1996 data and the floodplain in the northern section of the proposed permit boundary was estimated without baseline elevations. Out of concern for these issues and pursuant to TCEQ rules, the Executive Director required the Applicant to re-estimate the 100-year floodplain.⁴² The floodplain was expanded as a result of this process to include areas on the north side of the proposed facility. Therefore, the changes that have occurred in the area since the FEMA maps were updated have been addressed so that the landfill footprint will be protected from the 100-year floodplain.

An application is not reassessed if conditions of the application, such as but not limited to storm water discharge, defined flood plains, and impervious surfaces, change after completion of technical review. Under federal statutes, county governments are authorized to petition FEMA for an update of FEMA's flood hazard maps. The TCEQ has no authority to override a county's decision to request or not to request an update of those maps.

⁴¹ See 30 TAC § 330.56(f)(4)(B)(i).

⁴² See 30 TAC § 330.56(f)(4)(B)(i).

COMMENT 19 (Flooding)

Sheila Freeman, State Representative Ruben Hope, Jr., David Rendon, Melvin Sharpe, David Tate (CAML), and Karen Welch commented that the site was naturally prone to flooding. Those individuals identified in Group 3 and Jim Dawson, Ernest Kanak, Jr., Wayne Kocurek, Travis Mayeux, Carla Robles, Judge Alan Sadler, John and Leah Smith, Linda Standley, Linda Stegenga, Karen Welch, and Jacqueline Woychesin commented that the facility was located in a flood plain. Jim Dawson was concerned that the site was in a lowland subject to flooding and uncontrollable runoff. Mary Carter (CAML) commented that H-GAC noted local governmental officials' concerns that the landfill would increase run-off and flood risks and that there were serious drainage problems on and near North Walker Road, despite adequate maintenance of drainage ditches and that Applicant should demonstrate that the facility would not exacerbate local flooding. Those individuals identified in Group 1, Group 2, Group 6, and CAML, Phillip Lindsey, and Carla Robles commented that when the timber was removed from the site a natural flood barrier would be lost and would contribute to additional flooding. Those individuals identified in Group 2 and CAML commented that the destruction of wetlands would result in more flooding. Those individuals identified in Group 4, Group 7, Group 8, Group 9, and Johnny Beall, Patricia Crofton, Deborah Doran, Terry Dauzart, Sheila Freeman, Duane and Tracy Hamilton, Laurie Headings, David Henderson, Tony Herrin and Pattie McGee, Phillip Lindsey, Barbara Mayeux, Travis Mayeux, County Commissioner Ed Rinehart, Anita Severa, Melvin Sharpe, John and Leah Smith, Robert Smith, Linda Standley, Nancy Steward, Thomas Steward, Michael Walton, and Karen Welch commented that the facility would cause more flooding. CAML commented that Security and Midway may be exposed to contaminated water if flooding was not addressed. Melvin Sharpe commented that TCEQ needed to address the flooding on the northwest side of the site. Karen Welch asked what effect the flooding would have on existing sewer lines. Those individuals identified in Group 8 were concerned about the possibility of property loss due to increased flooding. Laurie Headings asked what recourse a property owner would have if landfill run-off entered private property. Judge Alan Sadler, Linda Standley, David Stegenga, and David Tate (CAML) commented that the application did not contain adequate flood control and that the application was contrary to TCEQ rules that prohibit a permitted facility from altering natural drainage patterns. Those individuals identified in Group 10 and Nora Renteria commented that there needed to be more studies of the effect of flooding. Melvin Sharpe commented that the facility would have a negative effect on surface water flow in the area.

Mary Carter (CAML) was concerned that increased impermeable surfaces at the proposed facility would increase runoff. CAML commented that the Applicant had failed to provide adequate information to demonstrate compliance with TCEQ rules regarding flood prevention and control during peak discharge from at least a 25-year storm. CAML commented that the Applicant failed to provide adequate information to demonstrate compliance with TCEQ rules regarding location and quantities of surface drainage entering, exiting, or internal to the site and the area subject to flooding by a 100-year frequency flood, including Lawrence Creek, tributary to Lawrence Creek, and the West Fork of Spring Branch. CAML commented that the current landfill design did not address surface water runoff and frequent flooding from two creeks along the east and west boundaries that flood frequently and flow into Security and Midway. Sheila Freeman was concerned about erosion from

flooding. Kelli and Lee Moulder asked how drainage would be handled after the landfill was built and when North Walker Road was widened.

RESPONSE 19

An unregulated landfill may adversely affect flooding in two ways: by reducing flow or storage capacity of the floodplain, or by creating peak runoff in excess of natural (pre-construction) rates. TCEQ rules require extensive information with regard to the effect on the 100-year floodplain and the effect that the discharge of the 25-year/24-hour storm event will have on the surrounding area in order that these adverse effects may be avoided. As stated in Response 18, the Executive Director considered additional information and made additional requirements to address the 100-year floodplain. The Applicants designed the facility to avoid all identified 100-year floodplain areas and the plan provides for surrounding levees with three feet of freeboard above the 100-year floodplain elevation. Information provided in the application indicates that the peak runoff rate from the landfill after a 25-year/24-hour storm is less than the runoff from the same event at the property in its current condition. Based on the information provided by the Applicant, the avoidance of the 100-year floodplain, and the decrease of the peak runoff rate after landfill construction, the Executive Director concludes that flooding will not be worsened by construction of this facility.

COMMENT 20 (Liner)

Marigrace O'Neil and James Shropshire commented that the facility should be required to have a liner and asked how water quality would be affected without a liner. Those individuals identified in Group 9 and Mel Fife commented that the excavation was near a fault line that could cause the land to shift and the liner to crack. Linda Collins, Tina Collins, Mel Fife, Norma Gibson, Duane and Tracy Hamilton, Ernest Kanak, Jr., Albert and Shelia Nelson, John and Leah Smith, Billy Wagon, and Karen Welch were concerned that the liner may not be sufficient and crack. John and Leah Smith asked if the liner for this site was usual for this type of landfill. CAML commented that Applicant had failed to provide adequate information to demonstrate compliance with TCEQ rules that the contaminated storage pond will have an approved liner covering the bottom and side slopes. Leah Smith commented that there was no design possible that would protect health and safety of the community and natural resources and that the landfill could not be designed to fit the hydrology and geology of the area. Mary Carter (CAML) questioned and adequacy of the proposed liner.

RESPONSE 20

The proposed facility is designed to minimize contamination of groundwater by the installation of a liner system and a groundwater monitoring system. The liner system design consists of a 36-inch-thick compacted clay liner with a maximum hydraulic conductivity of 1×10^{-7} centimeters per second (cm/sec) overlain by a 12-inch-thick layer of protective cover soil. The proposed liner

meets the requirements for Type IV landfills and is typical for this type of facility.⁴³ The Applicant has proposed a dual groundwater monitoring system that will monitor both the Chicot and Evangeline aquifers, identified in the application as strata II and IV. Nearly all of the 165 wells identified within 1 mile of the proposed facility are screened in one of these aquifers.

In the unlikely event of a liner failure, such as a slope failure, the permittee will be required to remove and reconstruct the damaged liner area and submit a Soil Liner Evaluation Report to the Commission for review. In the event that a release of leachate to the groundwater is determined, the permittee would be required to take corrective measures.⁴⁴

The liner meets the requirements of TCEQ rules that were written to protect the underlying aquifers. The floor liner will be constructed in stratum III, which lies between the Chicot and Evangeline aquifers and is reported to have an average vertical hydraulic conductivity of 9.8×10^{-8} cm/sec. The Applicant has also designed a 36-foot-thick compacted clay plug that will be installed behind the side wall liner to prevent infiltration of groundwater from stratum II (Chicot Aquifer) into the landfill unit and to minimize the effects of contaminants from the unit on groundwater in stratum II. The Applicant has estimated contaminant travel time through the compacted clay plug and liner to be 1,000 years.

The Applicant provided a fault study conducted by Dr. Carl Norman concluding that within one mile of the proposed facility there are no active faults that have had displacement during Holocene times (within the last 10,000 years). The nearest fault is reported to be the Bishop Fault, located 6.2 miles south-southwest of the proposed facility.

COMMENT 21 (Water and Soil Contamination)

Those individuals identified in Group 1, Group 2, Group 3, Group 4, Group 5, Group 6, Group 7, Group 8, Group 9, Group 10, and Willie Mae Atkinson, Paul Bacque, Denise Bell, Ken Burling, Patricia and Paul Clark, Vallye Chandler, Linda Collins, Robert Collins, Tina Collins, Patricia Crofton, Jim Dawson, Deborah Doran, Barbara, Leamon, and David Dowden, Terry Dautart, Janet Flores, Sheila Freeman, Norma Gibson, Jackalyne Gonzalez, Jessica Gonzalez, Duane and Tracy Hamilton, Sandy and Steve Hamilton, Laurie Headings, David Henderson, Tony Herrin and Pattie McGee, State Representative Ruben Hope, Jr., Judith Horne, Ernest Kanak, Jr., Shelagh Kasinger, Mary Lou Kirves (Texas Real Estate Group), Wayne Kocurek, Phillip Lindsey, Melody Logan, Christene Ludwig, Ronald Maffett, Barbara Mayeux, Travis Mayeux, Barbara Meche, Frankie Milley, Albert and Shelia Nelson, Marigrace O'Neil, Trudilee O'Neil, R. M. Palmer (International Paper, Realty Division), Carol Parten, Billy Pickering, Deborrah Pickering, Danielle Reich, County Commissioner Ed Rinehart, Carla Robles, Pedro Rosales, Jr., Judge Alan Sadler, Jack Safford, Bob and Lynda Sasser, Ruben Selph, Travis Selph, Anita Severa, Cassandra Smith, John and Leah Smith, Linda Standley, Nancy Steward, Thomas Steward, David Tate (CAML), Rhonda Tate, Vicki Thompson, Daniel Vargas, Billy Wagnon, Michael Walton, Clifford Welch, Joann and

⁴³ See 30 TAC § 330.200(e).

⁴⁴ See 30 TAC §§ 330.236–330.238.

Thomas Welch, Karen Welch, Sabrina Westerfeld, Jacqueline Woychesin, Ladgie Zotyka, Jr., and Paul Zylman commented that they were concerned that the facility might contaminate surface and groundwater in the surrounding area. Mary Carter (CAML) was especially concerned that water wells serving several hundred families that live within one mile of the site were in danger because they used water wells screened at depths ranging from 30 to 200 feet and the wells were perforated in either the Chicot or Evangeline aquifers that were primary sources of drinking water for the area. Judge Alan Sadler was concerned that there had been an increase in actual and proposed water wells in the area since the application was put together. David Tate (CAML) commented that the Applicant used old water well information because the application indicated the last well drilled was 6 years ago. Terry Dauzart was concerned that the landfill would be deeper than areas wells and asked if the Applicant would pay to deepen private wells in the area. CAML, Judge Alan Sadler, John and Leah Smith, Linda Standley, and David Stegenga commented that the application had not adequately identified the uppermost aquifer, hydraulically connected aquifers, or the aquiclude beneath the groundwater system or the wells, bodies of water, and springs within one mile. Jim Dawson commented that nearby waterways fed into the Houston water supply. CAML, Ronald Maffett, Rhonda Tate, and Jacqueline Woychesin commented that Lawrence and West Fork Spring Branch Creeks flowed into Caney Creek and Lake Houston. Amarian Castillo, Patricia Crofton, Kenny Hamby, and Sandy and Steve Hamilton commented that they were concerned about soil contamination.

Rhonda Tate commented that the landfill would be placed near the recharge zone of Evangeline Aquifer. Those individuals identified in Group 10 and Nora Renteria commented that there needed to be more studies of the effect on water contamination. Donald Stockton (Conroe I.S.D.) commented that he was concerned about water quality. Barbara McCleane commented that there could be lead contamination of groundwater. Frankie Milley commented that the area was a hotspot for meningitis bacteria and other bacteria and viruses that were found in contaminated dump materials that could end up in sources that supply the community's drinking water. Those individuals identified in Group 3 and Melissa Barton, Patricia Crofton, Jim Dawson, Sheila Freeman, Laurie Headings, Judith Home, Carla Robles, Ruben Selph, Travis Selph, Linda Standley, Ladgie Zotyka, Jr., and Paul Zylman commented that water contamination would result in the contamination of livestock and humans. Those identified in Group 10 and Jim Dawson, Carla Robles, and Linda Standley commented that gardens and crops would be exposed and damaged by contaminated flood water from the landfill. Kenny Hamby commented that water contamination would worsen the condition of the chronically ill. Those individuals identified in Group 9 and David Tate (CAML) commented that the Applicant would contaminate the water so that the Applicant could install a commercial water system that residents would be forced to buy. Those individuals identified in Group 3 and Group 10 and Melissa Barton, Mel Fife, David Tate (CAML), and Karen Welch were concerned that, if the water did get contaminated, would the residents receive adequate and timely notice. Travis Selph asked who bore the cost of testing water facility run-off water and wells. CAML commented that the Applicant had not provided a comprehensive groundwater monitoring plan for the site sufficient to protect the neighborhood down gradient of the site. Ernest Kanak, Jr., asked if TCEQ was aware that the seasonal groundwater was in the area of 18 inches. Linda Collins, Tina Collins, Terry Dauzart, Jim Dawson, Norma Gibson, Phillip Lindsey, Travis Mayeux, Albert and Shelia Nelson, Carol Parten, Travis Selph, John and Leah Smith, Rhonda Tate, Billy Wagnon,

Karen Welch, Sabrina Westerfeld, and Ladgie Zotyka, Jr. were concerned about possible contaminated runoff.

RESPONSE 21

The Applicant has indicated in the geology report of the application that the recharge area for the Evangeline aquifer lies approximately 10 to 14 miles northwest of the proposed landfill site. Pursuant to TCEQ rules, the Applicant indicated aquifer outcrop areas within 5 miles of the proposed landfill site.⁴⁵

If groundwater contamination is determined to have occurred, the Executive Director may order a corrective action appropriate to protect human health and the environment.⁴⁶ As part of the corrective action, the owner or operator must discuss the results of a corrective measures assessment in a public meeting with interested and affected parties. Within 30 days of completing the assessment of corrective action the permittee must submit an assessment report to the Commission that includes a schedule for the implementation of a corrective action program.

The Applicant provided information on 165 known groundwater wells and identified creeks and wetlands within one mile of the proposed site location. The application specifies a below grade excavation of approximately 47 feet to an elevation of 167.4 feet above mean sea level. Wells identified within one mile of the proposed site range in depth from 23 to 485 feet below ground surface. Of the 165 wells identified, three wells are drilled to a depth of 23 or 30 feet below ground surface. The majority of wells within one mile are drilled to a depth of greater than 100 feet. TCEQ rules do not require an Applicant to pay to deepen surrounding wells. After review of the information provided, the Executive Director determined that the Applicant had provided the information required by TCEQ rules.

The proposed landfill design will include levees with a three-foot freeboard to provide extra height above the anticipated flood levels to prevent the 100-year flood event from reaching waste to comply with TCEQ rules.⁴⁷ The proposed facility will channel storm water that has not contacted waste through sedimentation/detention ponds to minimize suspended solids from the effluent before discharge. Leachate, condensate, and storm water that has contacted waste are considered to be contaminated water. In accordance with rules and Texas Pollutant Discharge Elimination System (water quality) regulations, contaminated water may not be discharged from the facility without written authorization.⁴⁸ The owner or operator must handle, store, treat, and dispose of surface or groundwater that has contacted a working face of the landfill or has contacted leachate.⁴⁹ The SOP provides a Leachate and Contaminated Water Plan for the proposed facility. The Applicant has

⁴⁵ See 30 TAC § 330.56(d)(4)(i).

⁴⁶ See 30 TAC § 330.239(b)(7).

⁴⁷ See 30 TAC § 330.55(b)(7).

⁴⁸ See 30 TAC § 330.139.

⁴⁹ See 30 TAC § 330.56(b)(6).

proposed to construct a berm downhill of the working face and areas will be covered by weekly cover to collect contaminated water. Contaminated water will be maintained within lined cells and pumped directly to vacuum trucks for disposal as soon as practicable. Berms will provide storage for the 25-year/24-hour storm event (9.8 inches). The Executive Director concludes that requirements to protect surface water and to prevent surface water from being affected by waste have been met and should be sufficient to protect nearby water wells and surface water bodies downstream of the proposed facility.

COMMENT 22 (Wetlands and Habitat)

Those individuals identified in Group 1, Group 2, Group 6 and Melissa Barton, Phillip Branch, Jim Dawson, Deborah Doran, Mel Fife, Claudia Hubbard, Steven Matthews, David Rendon, Carla Robles, John and Leah Smith, Thomas Steward, David Tate (CAML), Rhonda Tate, Karen Welch, Sabrina Westerfeld, and Jacqueline Woychesin commented that the facility would be built on wetlands, that it immediately bordered or was too close to 21 officially protected or jurisdictional wetlands, and that the destruction would negatively affect wildlife including migratory birds such as falcons, geese, ducks, and sandhill cranes as well as having other negative environmental impacts. CAML, Claudia Hubbard, Patsy Matthews, Thomas Steward, and Jacqueline Woychesin commented that the facility site provided habitat to the endangered red-cockaded woodpecker. David Tate (CAML) commented that the Applicant had not demonstrated that the facility would not destroy or adversely impact critical habitat of endangered or threatened species. CAML commented that MLS chose not to mitigate 11 wetlands that the U.S. Army Corps of Engineers found to be non-jurisdictional wetlands. Patricia and Paul Clark, Travis Selph, and James Shropshire were concerned that the facility would be a danger to wildlife and livestock. Jim Dawson suggested that TCEQ should do an amphibious tour of the site before granting the permit.

RESPONSE 22

In response to the first technical notice of deficiency, the Applicant reduced the area of the waste unit to avoid jurisdictional wetlands (i.e., wetlands that are under the jurisdiction of the U.S. Corps of Engineers under the federal Clean Water Act). Non-jurisdictional wetlands would be affected by the proposed design, but the TCEQ does not have authority to regulate and protect non-jurisdictional wetlands under its MSW program.

TCEQ rules require the Applicant to submit an Endangered Species Act compliance demonstration.⁵⁰ The Applicant contacted Texas Parks and Wildlife Department and the U.S. Department of the Interior, Fish and Wildlife Service, regarding the proposed facility. These agencies indicated that several federal- and state-listed species could be affected by proposed activities and recommended further investigation. The Applicant then hired Crouch Environmental Services, Inc., to perform a Protected Species Site Investigation. The conclusion of this investigation

⁵⁰ See 30 TAC § 330.53(b)(13)(B).

was that “no threatened or endangered plants or animals will be affected by the proposed construction” and “the subject property contains no critical habitat to support any endangered plant or animal species.”⁵¹ TCEQ staff concluded that the applicant has satisfied this requirement.

COMMENT 23 (Air Pollution)

Linda Collins, Tina Collins, Jim Dawson, Norma Gibson, Duane Hamilton, David Henderson, Wayne Kocurek, Phillip Lindsey, Albert and Shelia Nelson, Trudilee O’Neil, R. M. Palmer (International Paper, Realty Division), Carol Parten, Francisco Ramirez, Karen Ramirez, Carla Robles, Pedro Rosales, Jr., Ruben Selph, Travis Selph, Linda Standley, Donald Stockton (Conroe I.S.D.), David Tate (CAML), Billy Wagnon, Michael Walton, and Karen Welch commented that they were concerned about how air quality would be affected by dust from trucks accessing the facility. Those individuals identified in Group 4 and Thomas Beers, Denise Bell, Phillip Branch, Elvira and Yolanda Cervantez, Tina Collins, Linda Collins, Barbara, David, and Leamon Dowden, L. V. Dowden, Kenneth and Mary Everitt, Carla Robles, Bob and Lynda Sasser, Travis Selph, and Michael Walton commented that the increased air pollution due to the facility would affect the health of elderly, children, and people with lung conditions. Kenneth and Mary Everitt were concerned about air pollution caused by burning at the facility. Travis Selph commented that he was concerned about how air pollution would affect plant life and was concerned about the health effects from mold and mildew. Those individuals identified in Group 10 and Nora Renteria commented that there needed to be more research conducted on how the landfill would affect air quality.

RESPONSE 23

The State of Texas requires air emission sources to obtain a permit. Emissions from MSW facilities, including waste processing and vehicle exhaust, are permitted by rule.⁵² Although air emissions at facilities are not specifically limited, there are many rules intended to reduce air emissions to mitigate any effect on the surrounding community. These include establishment of buffer zones,⁵³ prohibiting the burning of solid waste,⁵⁴ use of all-weather roads,⁵⁵ dust suppression;⁵⁶ and application of weekly cover to control disease vectors, fires, odors, windblown litter or waste

⁵¹ See Part II, Appendix H, of the application.

⁵² See 30 TAC § 106.534.

⁵³ See 30 TAC § 330.121.

⁵⁴ See 30 TAC § 330.5.

⁵⁵ See 30 TAC § 330.127(a).

⁵⁶ See 30 TAC § 330.127(b).

and scavenging.⁵⁷ The Applicant addressed these items in the proposed facility SOP, as required by TCEQ rules.

COMMENT 24 (General Concerns)

Gabriela Gonzalez, Jackalyne Gonzalez, Tony Herrin and Pattie McGee, Monte Lane, Stella Luton, Danielle Reich, Nora Renteria, Paul Simmons, Arlinda Smith, Billy Smith, Michael Walton, Joann and Thomas Welch, Margie Wood, and Jacqueline Woychesin were concerned about short and long-term health effects on the residents. Patricia and Paul Clark and Mary Lou Kirves (Texas Real Estate Group) were concerned about the general environmental quality of the area and the environmental safety of the landfill.

RESPONSE 24

To protect human health and the environment, MSW rules have many requirements. These include, but are not limit to, a liner designed to protect against releases from the types of waste accepted at the facility, groundwater monitoring, landfill gas management, storm water run-on and run-off control, access control, and limitations on the types of wastes that can be accepted.

COMMENT 25 (Waste Reduction, Reuse, Recycling)

David Henderson and Jacqueline Woychesin commented that they were concerned that the facility did not have a sustainable solid waste management plan (to reduce, reuse, recycle) and they thought it should.

RESPONSE 25

The TCEQ encourages source reduction, reuse, and recycling in many ways, such as the Texas Recycling Program and Urban Recycling Events held throughout the state. Additionally, TCEQ rules provide incentives for facilities to recycle, but recycling is discretionary and not a mandatory requirement for a landfill permit. The regional or local solid waste management plan must establish recycling rate goals appropriate to the area covered by the plan.⁵⁸ According to "Municipal Solid Waste in Texas: A Year in Review, 2003 Data Summary and Analysis," Texans

⁵⁷ See 30 TAC § 330.133(a).

⁵⁸ See Texas Health & Safety Code § 363.064(a)(8).

produced over 45 million tons of solid waste during the 2003 fiscal year.⁵⁹ Approximately 35% of this material was recycled (statewide), leaving about 29 million tons for disposal. These rates are expected to increase with population. Landfills are still needed and the Regional Solid Waste Plan calls for a Type IV landfill in Montgomery County.

COMMENT 26 (Notices of Deficiency)

Linda Standley was concerned that the facility had received 51 notices of deficiency.

RESPONSE 26

TCEQ rules allow an applicant to address and correct deficiencies in an application identified by the Executive Director in a Notice of Deficiency (NOD) within a certain period of time.⁶⁰ In no instance may the Executive Director issue more than two NODs before returning the application.

The first technical NOD for this application included 51 items, many of which were duplications due to the fact that MSW rules often cover an issue in more than one location. After the Applicant responded to the first NOD, a second NOD was issued. Before determination of technical completeness, all deficiencies were resolve to the satisfaction of Executive Director.

COMMENT 27 (Future Change of Status)

Denise Bell, Tony Herrin and Pattie McGee, Wayne Kocurek, R. M. Palmer (International Paper, Realty Division), Linda Standley, and Karen Welch were concerned about the possibility of the landfill changing its status from a Type IV to a Type I.

RESPONSE 27

A permittee may submit an application for a permit amendment to operate the proposed facility as a Type I landfill. This would require redesigning the facility to comply with all requirements applicable to Type I landfills, including a composite liner system, a leachate collection system, a groundwater monitoring system, and a landfill gas monitoring system. The permittee would be required to follow all public notice and public meeting requirements during the review process of

⁵⁹ See TCEQ Publication AS-187/04, available on-line in Adobe PDF format at http://www.tceq.state.tx.us/cgi-bin/comm_exec/publications.pl. A single printed copy is available for free. To order, please call 512/239-0028, or send an order form (available on-line) by fax to 512/239-4488 or by mail to TCEQ Publications, MC 195, P. O. Box 13087, Austin, TX 78711-3087.

⁶⁰ See 30 TAC § 281.19(c). An applicant must address and correct the deficiencies within 75 days of the first NOD and 60 days of the second NOD.

the permit amendment application. And a permit amendment to change the status of a landfill from Type IV to Type I would be subject to the procedural requirements regarding public participation in TCEQ permitting adopted pursuant to House Bill 801 passed by the 76th Legislature in 1999 including an opportunity for a contested case hearing.

COMMENT 28 (Mineral Rights)

Lennice Cargill (Keystone Natural Resources), Mel Fife, Leah Smith, and David Tate (CAML) commented that the landfill would interfere with individual mineral rights that were not under the control of the Applicant, specifically, four drill sites located at the four corners of the property.

RESPONSE 28

Mineral rights are dominant over the surface estate in Texas. Surface property owners are required to provide access so that mineral owners may exercise their rights. TCEQ does not have jurisdiction from the legislature to regulate mineral rights or to interfere with access to exercise those rights. Questions about mineral rights should be directed to the Texas Railroad Commission, the state agency with authority delegated by the Texas Legislature to regulate such matters. Waste disposal authorizations from the TCEQ do not grant any vested rights to property or confer any special privileges to the holder of that authorization to impact or impair mineral rights of others.

COMMENT 29 (Property Value)

Those individuals identified in Group 2 and Group 5, and Vallye Chandler, Patricia and Paul Clark, Linda Collins, Tina Collins, Superintendent Leon Cubillas (Splendora I.S.D.), Deborah Doran, Mel Fife, Norma Gibson, Dan Glassel (Blessing Residential, Inc.), Sandy and Steve Hamilton, David Henderson, Tony Herrin and Pattie McGee, Judith Horne, Shelagh Kasinger, Mary Lou Kirves (Texas Real Estate Group), Melody Logan, Stella Luton, Ronald Maffett, Frankie Milley, Albert and Shelia Nelson, R. M. Palmer (International Paper, Realty Division), Billy Pickering, Deborrah Pickering, Nora Renteria, Bob and Lynda Sasser, Cassandra Smith, John and Leah Smith, Linda Stegenga, Nancy Steward, David Tate (CAML), David and Rhonda Tate, Billy Wagnon, Michael Walton, Marcia Warner, Karen Welch, Sabrina Westerfeld, Margie Wood, and Paul Zylman commented that the facility would cause lower property values. R. M. Palmer (International Paper, Realty Division), Jan Stallworth, Michael Walton, David Henderson, Bob and Lynda Sasser, and Linda Stegenga commented that the facility would negatively affect the tax base and result in less money funding the school district. Billy Pickering and Deborrah Pickering commented that the landfill would cause an increase in insurance costs. Barbara, David, and Leamon Dowden, and L. V. Dowden commented that they would suffer economically from having to move from the area and that this would cause them to file bankruptcy. Dan Glassel (Blessing Residential, Inc.) was

concerned that the facility would lead to a decline in area development and a corresponding loss of business and profit.

RESPONSE 29

The Texas Legislature has tasked the TCEQ with regulating the management of municipal solid waste in the state. The TCEQ does not have jurisdiction to consider property values in the municipal solid waste application process under Texas Health and Safety Code Chapter 361.

COMMENT 30 (Community)

Vicki Thompson, Susana Magana Tony Herrin and Pattie McGee, and Michael Walton commented that the landfill would have a detrimental effect on heritage, morale, and quality of life in the community.

RESPONSE 30

TCEQ rules were promulgated to protect human health and safety, and the environment. State law does not allow the TCEQ to consider heritage, morale, or quality of life in a community when the TCEQ reviews an application.

COMMENT 31 (Closure)

R. M. Palmer (International Paper, Realty Division) was concerned because the Applicant was organized as a limited partnership and might not have enough assets available for site clean-up. Linda Stegenga and David Tate (CAML) commented that Applicant had not addressed all the closure and post-closure costs for permit.

RESPONSE 31

An applicant for a new facility is required to provide, sixty days before the facility receives waste, evidence of financial assurance that covers closure and post-closure costs.⁶¹ The financial requirement is based on the cost of hiring a third party to provide final cover for the landfill based on the largest possible area and to conduct post-closure care activities for the facility in accordance with the post-closure plan. The costs are updated annually for inflation. Currently, the Applicant

⁶¹ See 30 TAC § 330.52(b)(11).

estimates \$5,848,534 for closure and \$583,879 for post-closure. The Executive Director determined that the Applicant has complied with the closure and post-closure requirements.

COMMENT 32 (Competency)

David Stegenga commented that the Applicant was not competent to operate the facility because the Applicant had not operated or owned a facility within the past 10 years. David and Rhonda Tate asked for an investigation into the personal and financial competence of the Applicant.

RESPONSE 32

The application indicates that, within the state of Texas, Montgomery Landfill Solutions, L.P., has not owned or operated any MSW sites within the last ten years and does not have a direct financial interest in any other MSW management sites. The rules do not require an applicant to have operated a solid waste site in the last ten years.

COMMENT 33 (Business Organization & Anti-trust Laws)

David Stegenga, David Tate (CAML), and David and Rhonda Tate commented that the Applicant was not in good standing with the Texas Secretary of State. Mel Fife and David Tate (CAML) commented that the Applicant was known to sell permits to Browning-Ferris Industries, Inc. (BFI), after issuance, and that BFI may have violated anti-trust laws.

RESPONSE 33

The application requires the legal status of the Applicant. However, TCEQ rules do not require an applicant to be any particular type of business organization.

The Applicant provided its Certificate of Filing with the Texas Secretary of State that documents the Applicant as Montgomery Landfill Solutions, L.P. The status of "good standing" does not apply to limited partnerships.

A compliance background check found no history for Montgomery Landfill Solutions, L.P. The Executive Director has no information to indicate that the Applicant intends to sell the application on issuance; however, TCEQ rules do not prevent such a transaction as long as it is appropriately documented through a permit modification, approved by the Executive Director. The transferee must provide adequate proof of financial assurance and may not operate the facility before Executive

Director approval is given.⁶² Any approval by the Executive Director of a transfer is subject to a motion to overturn the Executive Director's action.⁶³

TCEQ rules do not address possible antitrust violations by operators or owners of MSW facilities. Therefore, the Executive Director has no basis to consider such issues when reviewing an application and preparing a draft permit.

COMMENT 34 (Other Business & Research Concerns)

Steven Matthews commented that Waste Management had a reputation for developing landfills without thorough environmental, ecological, and residential research. Linda Standley commented that she thought that the Applicant should be investigated. She also asked if Metroplex was a turnkey contractor and commented that MetroPlex conducted a very negligent and irresponsible study. Jacqueline Woychesin questioned the engineers' credibility. Those individuals identified in Group 10 commented that this landfill was a form of environmental terrorism and corporate intimidation.

RESPONSE 34

Waste Management is not the Applicant, nor is it listed as an owner. With the exception of regulatory compliance reviews, TCEQ rules and procedures do not require investigations of Applicants. Metroplex Industries, Inc., is an engineering and consulting firm that would likely not be considered a turnkey contractor, as they are unlikely to provide many aspects of site development, such as liner installation, though they could conceivably provide engineering oversight. The specific investigation intended by this comment is not clear; however, each required study was reviewed by the Executive Director and determined to be in compliance with applicable regulations.

⁶² See 30 TAC § 305.64.

⁶³ See 30 TAC § 50.139.

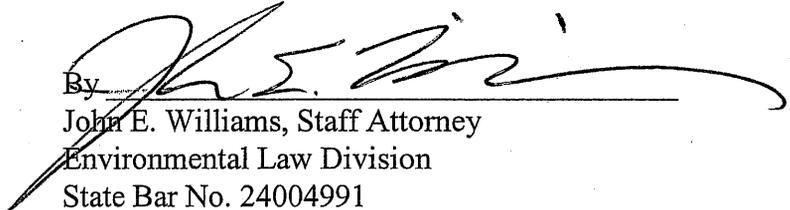

No changes to the draft permit have been made.

Respectfully submitted,

Texas Commission on Environmental Quality

Glenn Shankle
Executive Director
