RE: Permit No. WQ0003395000

BY *ll*

Office of the Chief Clerk:

The purpose of this letter is to RESCIND our public comments regarding permit no. WQ0003395000; Jim and Keith Broumley of County Road 240, Hico, TX.

Our original public comments letter was based on the initial doubling of the dairy herd size. Since the new revised application is for an increase herd size from 990 to 1,499 and a change from Holstein cows to Jersey cows our concerns have been met.

Please accept this RESCIND letter.

A copy of our original letter is attached. A copy of this RESCIND letter has also been sent to Keith Broumley.

Thank you.

Doug Anderson

RE: Permit No. WQ0003395000

Office of the Chief Clerk:

The purpose of this letter is to submit our public comments regarding permit no. WQ0003395000; Jim and Keith Broumley of County Road 240, Hico, TX, are applying for an increase of dairy cattle from 990 to 1,950.

As neighbors of this operation we are currently impacted on a daily basis by the continuous smell of this dairy. Our first concern is that by granting this increase in operation, doubling the size of the dairy herd, will DOUBLE the amount of the noxious odors that we have to deal with everyday. Doubling the smell from this dairy will have a negative affect on our quality of life and negatively affect our property value.

The smell from this dairy affects many people, not just adjacent neighbors. This operation is less than 2 miles from the city of Hico where most everyone currently deals with the odor. Doubling the herd and therefore the smell would have a lasting and negative affect on our family, our way of life, and the actual value of our property; not to mention the other families of Hico.

A second concern is the doubling of the waste water generated by the operation. As citizens of Hamilton County we are concerned with the quality of our drinking water and truly concerned that this dramatic increase in discharge will negatively affect our water supply; not to mention any runoff that would go directly into the Bosque River.

A final concern is the increase of truck traffic to and from the operation. The additional traffic from doubling the operation would cause doubling the amount of dust from the unpaved county road that would affect neighboring properties, pastures, and livestock.

For these reasons that affect our quality of life and property value, I request that you do not grant this increase in operation for Permit No. WQ0003395000.
