RE: Wastewater permit WQ0014753001

Dear TCEQ Staff and Officials:

Please delay approval of the wastewater permit application referenced above. As you know from the numerous letters that you have received recently on this topic—many of them from my constituents—if granted, this permit would discharge treated sewage into Rock Creek.

Rock Creek flows through an incredibly unique open space: a 2,000 acre tract in SW Tarrant County that many in the area of working to make a park. The environmental impacts of this discharge need to be more fully understood before a permit is granted.

I further ask that alternatives be sought for the discharge of the treated sewage. If there is an alternative to disposing of it in Rock Creek, that alternative should be used. Rock Creek has only intermittent flows so a continuous flow of treated wastewater could significantly alter the ecosystem of this pristine creek and the surrounding ecosystem as well.

Thank you for your consideration of this very important matter.

Sincerely,

Lon Burnam
