To the TCEQ Executive director,

BY al

My Name is Ismael Guzman and I live at 12001 New Sweden Church Rd, Manor Texas, 78653. My phone number is 512-272-9999

I would like to request a contested case hearing involving Permit number WQ0014642001

My property is located about 300 yards down stream from the proposed location of waste water treatment plant. I will be adversely effected by the release of 3,000,000 gallons of water per day.

On the back 15 acres. The cows don't have a problem crossing the creek now because it is dry in some areas where water does not pool. With the release of 3 million gallons of water per day, it will make it impossible for my animals to cross and reach water and shelter by my barn.

The creek where the release of the water will happen directly bisects my land, making the rear of my property non accessible. When there is a nominal rain to the north of my property, the back of my property over flows with the excess water. If there is more water released on top of the rain, I will have devastating soil erosion causing severe property damage. My fences will be damaged and my cattle will be loose.

Please consider my situation before allowing the change to the current permit. Thanks for your time.

Regards,
Ismael Guzman

DEC 10 2007

My property is located about 300 yards down stream from the proposed location of the
waste water treatment plant. I am concerned that the release of 3,000,000 gallons of
water per day will cause further soil erosion on my property. I have cattle currently
On the back 15 acres. The cows don't have a problem crossing the creek now because it is
dry most of the year. With the release of 3 million gallons of water per day, will make it
impossible for my animals to cross and reach water and shelter by my barn.

BY 

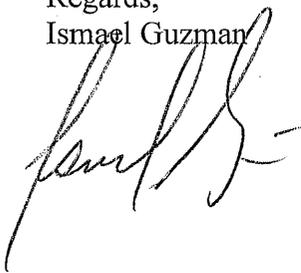

The creek where the release of the water will happen, directly bisects my land, making
the rear of my property not accessible. When there is a nominal rain to the north of my
property, the back of my property over flows with the excess water. If there is more water
released on top of the rain, I will have devastating property damage. My fences will be
damaged and my cattle will be loose.

I don't believe the applicant has not adequately shown a need to increase the proposed
flow from one million to three million. The first application for the initial permit was for
certain number of homes plus extra for future homes. Increasing to 3 million is way
beyond the need. What is the applicant not disclosing?

Please consider my situation before allowing the change to the current permit.
Thanks for your time.

Regards,

Ismael Guzman
