RE: Applicant: South Texas Mining Venture, LLP
Permit # WDW418 and WDW419

Location of our Property: 500 North Second, Ben Bolt, TX 78342

Activities relative to the facility: The Uranium Mining pertaining to the above name applicant is to my understanding on the same Goliad Aquifer, as that of our water well. Our well water is our primary source coming out from the Goliad Aquifer. We distribute water services to over 1900 customer including a Jr. High and a High School from this aquifer. Our chemical analysis currently states that we have uranium in our water supply and we believe that it is due to the mining located west of our water well, which is a major concern.

Sincerely,

Melida K. Rangel
