RE: **Potter Ready Mix, LLC's application for air permit #52168L019**

To Whom It May Concern,

It is my understanding that Potter Ready Mix, LLC, intends to construct a concrete batch mixing plant within a very short distance from my home and Johnson Elementary School in Southlake Texas.

I oppose this, for the following reasons. The dust that would be kicked up in the normal course of operations would be detrimental to our health, the health of hundreds of children at the school, and our property value. We've seen how bad it can get at the facility at Brumlow and Highway 26. We have to roll up our windows before we drive by. Living near such a facility would be intolerable. This is a residential area - not a commercial area. Also, there would be increased noise, smog and traffic caused by a steady stream of concrete mixer trucks coming and going from the facility.

I would like the applicant and the permitting staff to conduct a PUBLIC MEETING and I also request a CONTESTED CASE HEARING.

Sincerely,

Danny and Gina Blaser

RE: Application No. 52168L019
Potter Ready Mix, LLC

Dear Ms. Castanuela:

My understanding is that Potter Ready Mix, LLC, has submitted an application for a permit to operate a cement batching plant on East Highland St. in Southlake, Texas, on property owned by the Gateway Church.

I hereby request a contested case hearing to allow the nearby residents to express their opinions about locating a cement batching plant immediately across the street from a residential neighborhood established in 1981 and very close to Johnson Elementary School (Carroll ISD), which opened in 1980.

We live at 1201 Ashmoore Ct., which is located at the corner of East Highland St. and Ashmoore Ct. in Southlake, clearly satisfying the 440 yard requirement for requesting a hearing.

Please contact me if any additional information is needed regarding our opposition to the approval of this permit.

Sincerely,

Boyd & Susan Herndon

RE: Potter Ready Mix, LLC's application for air permit #52168L019

To Whom It May Concern,

It is our understanding that Potter Ready Mix, LLC, intends to construct a concrete batch mixing plant. Our home is within one-quarter (1/4) of a mile distance from the proposed site and Johnson Elementary school in Southlake Texas.

We oppose this, for the following reasons. I am disabled with a heart condition. Our neighbor, who also lives within the 1/4 mile distance from the proposed site is also a heart attack victim. The dust that would be kicked up in the normal course of operations would be detrimental to my wife, grandson (who lives with us full-time), our neighbor's health and my health. Plus the health of hundreds of children at the Johnson Elementary School.

We've seen how bad it can get at the facility at Brumlow and Rt 26. We have to roll up our windows before we drive by. Living near such a facility would be intolerable. This is a residential area – not a commercial area. Also, there would be increased noise, smog and traffic caused by a steady stream of concrete mixer trucks coming and going from the facility.

We would like the applicant and the permitting staff to conduct a PUBLIC MEETING and we also request a CONTESTED CASE HEARING.

RE: Potter Ready Mix, LLC's application for air permit #52168L019

To Whom It May Concern,

I understand from signage that Potter Ready Mix, LLC, intends to construct a concrete batch mixing plant within a very short distance from my home and Johnson Elementary school in Southlake Texas (76092).

I oppose this, for the following reasons. The dust that would be kicked up in the normal course of operations would be detrimental to our health, the health of hundreds of children at the school, and our property value. We've seen how bad it can get at the facility at Brumlow and Rt 26. We have to roll up our windows and hit recycle before we drive by. Living near such a facility would be intolerable. This is a residential area – not a commercial area. The prevailing southwest winds would blow the dust right into our neighborhood. Also, there would be increased noise, smog and traffic caused by a steady stream of concrete mixer trucks coming and going from the facility. Not at all safe for a school environment.

I would like the applicant and the permitting staff to conduct a PUBLIC MEETING and I also request a CONTESTED CASE HEARING.

Sincerely,

Jeff C. Pannell

RE:
Potter Ready Mix, LLC's application for air permit #52168L019

Dear Ms Castanuela,

It is my understanding that Potter Ready Mix, LLC, intends to construct a concrete batch mixing plant around the corner from my home.

I oppose this, for the following reasons. There is an elementary school, Johnson Elementary, and a Pre-school within walking distance of the site. The dust that would be kicked up in the normal course of operations would be detrimental to our children's health, our own health and our property value. We've seen how bad it can get at the facility at Brumlow and Rt 26. We have to roll up our windows before we drive by. Living near such a facility would be intolerable. This is a residential area - not a commercial area. The construction site which is on State HWY 114 allows easy access for cement vehicles to bring in supplies. There is no justification for putting our children at jeopardy by opening an industrial site on a residential street next to schools. Also, there would be increased noise, smog and traffic caused by a steady stream of concrete mixer trucks coming and going from the facility with children playing nearby.

I would like the applicant and the permitting staff to conduct a PUBLIC MEETING and I also request a CONTESTED CASE HEARING.

Sincerely,

Alex and Karen Zaal
