I Michael T. Lumpkin, one of the residents and affected persons that permanently resides well within the 440 yard perimeter and will be adversely affected by the proposed ReadyMix cement plant located on County Rd. 441/15, Mathis, Tx. in San Patricio County wish to protest and hereby request a contested case hearing. I live in my primary residence located at 9541 CR 505, Mathis, Tx. less than the 1,000 feet of the proposed plant according to the topographical map used at the TCEQ Public Comment meeting.

The proposed plant along with the airborne particulate matter that will be emitted by said plant will prohibit me and many other affected residents to the enjoyment of our homes and properties. I suffer from a rare lung disorder called "IDIOPATHIC PLASTIC BRONCHITIS" which fills my bronchial tubes with a rubber like substance called castings. Any additional particulate matter or contaminants will not only make breathing more difficult but could result in hospitalization or even death.

During the public question and answer session of the TCEQ meeting, I inquired as to what the cement portion consists of and what chemicals or hazardous material it contains. The ReadyMix people just laughed it off and stated that they didn't know what it was made of but they were told not eat it. I exclaimed, "That would mean you are not suppose to inhale it either". During the Public Comment session I disclosed that after further research, I discovered that the primary component in cement is crystalline silica which is a known carcinogen and has been determined by several agencies to cause cancer. The sources that I quoted are the International Agency for Research of Cancer (IARC), National Toxicology Program (NTP), The State of California and the Occupational Safety and Health Administration (OSHA) bulletin # 3177. The OSHA bulletin states that "The seriousness of the health hazards associated with silica exposure is demonstrated by the fatalities and disabling illnesses that continue to occur. Crystalline silica has been classified as a human lung carcinogen. Additionally, breathing crystalline silica dust can cause **silicosis**, which in severe cases can be disabling, or even fatal. The respirable silica dust enters the lungs and causes the formation of scar tissue, thus reducing the lungs' ability to take in oxygen. There is no cure for silicosis. Since silicosis affects lung function, it makes one more susceptible to lung infections like **tuberculosis**." The State of California Prop 65 takes it even further stating that "Airborne particles of respirable crystalline silica are known by the state of California to **CAUSE** cancer."

MW

In light of my research, I asked ReadyMix how they would control the emission of particulate matter to prevent it from contaminating the air and our ground water. I was informed that there will be no efforts to control runoff of contaminants like other concrete companies have implemented. They stated that they were not required to take any safeguards such as using a permanent concrete foundation for the plant along with concrete roadways leading in and out of the plant with retention ditches for hazardous runoff that could be reclaimed and disposed of or recycled as to not contaminate our ground water. According to ReadyMix, they will not even implement a wash down system to limit the dust and particulate matter emitted by the trucks hauling materials to and from the sight.

As you can see from the turnout of people opposing this plant, we are not against Concrete batch plants and we welcome the addition of new industries to our community but not at the risk of our health and welfare. There are many nearby locations that are not in such close proximity to neighborhoods and homes. This facility could be built within just a few miles of this location without the negative impact that we are protesting. If they insist on this particular location then they can implement the safeguards outlined above to reduce the impact on the health of the community.

This is being emailed and I will also send a copy certified mail.

Sincerely,

Michael T. Lumpkin

Please review the attached protest of Mathis Texas residents and property owners that are apposed to the construction of a Ready Mix cement plant in our neighborhood. The proposed location is less than a mile up wind from Lake Corpus Christi which is our primary source of drinking water not to mention the number of retired and elderly residents that will be negatively affected by the increase of particulate matter and pollutants that such a plant would create. I and many others have filed written protests and requests for a public hearing and feel that our concerns warrant not only a public hearing but a rejection of their TCEQ permit request. There are plenty of other locations for this facility in South Texas that are not in such close proximity to residential neighborhoods and would not affect the health and welfare of an entire community.

I Michael T. Lumpkin, one of the residents that will be adversely affected by the proposed ReadyMix cement plant located on County Rd. 441/15, Mathis, Tx. in San Patricio County wish to protest and hereby request a contested case hearing. I live in my primary residence within 440 yards of the proposed plant and my health would be negatively affected by the addition of the particulate matter that would be created with the proposed plant. I have chosen this area to retire and own my property free and clear located at 9541 County Rd. 15, Hidden Acres, Mathis, Tx. Due to my diagnosis of a rare lung disorder called Idiopathic Plastic Bronchitis, any foreign matter introduced into the air will prohibit me from the enjoyment of my home and property.

Many of the residents that surround the proposed plant are elderly and suffer from many ailments primarily breathing disorders. Not only I but many people would be affected, not to mention the Cenizo Hill Cemetery located a stones throw away from this sight. I can't even imagine attending a funeral for one of my neighbors or loved ones at this cemetery and having to endure the dust and particulate matter that would be created. This is a very windy area and with the dry conditions we have experienced the past few years the dust definitely will affect residents well beyond the 440 yards mandated by the State.

This is being emailed and I will also send a copy certified mail.

Sincerely,

Michael T. Lumpkin

RE: Quality Readymix, LTD., LLP
Permit # 85181

Dear Ms. Castanuela,

We, the above people, request a contested hearing for the permit for Quality Readymix, LTD., LLP.

We have a permanent residence within 440 yards of the proposed batch plant site.

I am a disabled veteran with numerous health problems. I am 64 years old with diabetes, high blood pressure, arthritis, bone spurs, and currently losing my eyesight.

I feel that I cannot afford any other physical conditions due to the emissions and environmental impact of a concrete batch plant.

This plant will affect our water well with the leeching of contaminants into the sub-soil and will not only affect drinking water for our household, but also our animals and wildlife. These emissions will affect our lungs and ability to breath quality air.

MW

At the last meeting Quality Ready-mix, by their own admission, stated that they will operate the plant six days a week and up to sixteen hours per day. This will provide constant contaminants for us and the environment. The impact of dust from the plant and trucks will impact our property values and also us.

I have cleared brush from this property to give a site for animals and wildlife to exist in a non-contaminated environment. Not only will the emissions and noise affect them, but us and our neighbors, which include funerals at the adjoining cemetery.

This property has been in Mary Jane's family for almost 40 years and we feel that this batch will be a negative impact in this area.

We feel that this batch plant will affect our standard of living and possibly the longevity of our lives.

Your attention in this matter will be greatly appreciated.

Thank you!

Gentlemen:

We would like to protest the placement of the for-mentioned concrete ready-mix plant.

This plant will be located within the 440 yard limit to our permanent residence, and with the emissions of dust, noise, close proximity to the lake, water wells, senior citizens with breathing problems and wildlife, it will affect our everyday existence. This plant will be next to a cemetery, which will be a hindrance to funerals.

We are extremely against you giving this company a permit to locate this plant next to our residence.

We are anxious to hear from you regarding this matter.

Thanking you in advance.

RE: Permit # 85181 – Quality Readymix, Ltd

Dear Sir or Madam:

This letter is an addendum to the original letter, which stated our concerns, comments, and listed signatures against the building of a concrete plant on CR 441/15 in San Patricio County Texas. In this addendum, I am requesting a public meeting and a contested case hearing if necessary.

I would also like to clarify the fact that the air quality of hundreds of families within a mile or so would be greatly affected. There are many elderly citizens in the area as well with health problems. Please see following signatures. The proximity of wildlife and Lake Corpus Christi is also a concern. The predominant southeast wind would blow the plant dust directly to the lake and our residences. Because we do not have city water service, all residences have their own water wells. These are not very deep due to the shallow water table and could be easily contaminated by runoff into our aquifer system.

Please contact me by phone at (361) 547-5761 or by mail at the above address to discuss these issues further.

Respectfully,

Robert W. Szalwinski

CHIEF CLERKS

RE: Permit # 85181 – Quality Readymix, Ltd

Dear Sir or Madam:

We are writing to state our concerns about the concrete company that has requested a permit, registration #85181, to construct a plant on our county road 441/15 in San Patricio County Texas. We are not against the growth of business; however, the proposed site of building would have an adverse effect on the following entities

- Residential subdivisions, located within a half mile
- A cemetery that is visited frequently
- Lake Corpus Christi, which is the water supply for the City of Corpus Christi
- Wildlife, livestock, and farming land

All of these existing areas will be affected by the dust, heavy truck traffic, and noise that the plant will generate. We would like to know why Quality Readymix chose this particular road and area to build their plant. It does not seem logical. Our county road is not constructed to withstand such traffic of large semis and concrete mixing trucks on a daily basis. There are school buses and cars/pickup trucks commuting traffic on this road. This area is rural residential, not a commercial industrial area. We feel there are other properties, other than on our county road, better suited for this company, which would have less effect on nature and residences.

Respectfully,

Shawna K Szalwinski

RE: Permit # 85181 – Quality Readymix, Ltd

BY *SM*

Dear Sir or Madam:

We are writing to state our concerns about the concrete company that has requested a permit registration #85181, to construct a plant on our county road 441/15 in San Patricio County, Texas. We are not against the growth of business; however, the proposed site of building would have an adverse effect on the following entities

TEXAS
COMMISSION
ON ENVIRONMENTAL
QUALITY
2008 NOV 12 10 23
CHIEF CLERK'S OFFICE

- Residential subdivisions, located within a half mile
- A cemetery that is visited frequently
- Lake Corpus Christi, which is the water supply for the City of Corpus Christi
- Wildlife, livestock, and farming land

All of these existing areas will be affected by the dust, heavy truck traffic, and noise that the plant will generate. We would like to know why Quality Readymix chose this particular road and area to build their plant. It does not seem logical. Our county road is not constructed to withstand such traffic of large semis and concrete mixing trucks on a daily basis. There are school buses and cars/pickup trucks commuting traffic on this road. This area is rural residential, not a commercial industrial area. We feel there are other properties, other than on our county road, better suited for this company, which would have less effect on nature and residences.

Respectfully,

Shawna K Szalwinski

RE: Permit # 85181 - Quality Readymix, Ltd

Dear Sir or Madam:

This letter is an addendum to the original letter, which stated our concerns, comments, and listed signatures against the building of a concrete plant on CR 441/15 in San Patricio County Texas. In this addendum, I am requesting a public meeting and a contested case hearing if necessary.

I would also like to clarify the fact that the air quality of hundreds of families within a mile or so would be greatly affected. There are many elderly citizens in the area as well with health problems. Please see following signatures. The proximity of wildlife and Lake Corpus Christi is also a concern. The predominant southeast wind would blow the plant dust directly to the lake and our residences. Because we do not have city water service, all residences have their own water wells. These are not very deep due to the shallow water table and could be easily contaminated by runoff into our aquifer system.

Please contact me by phone at (361) 547-5761 or by mail at the above address to discuss these issues further.

Respectfully,

Robert W. Szalwinski

Re: Permit # 85181	CC:

Please consider the following letters and signatures in reference to the Air Quality Standard Permit Registration # 85181, which Quality Readymix Ltd has applied for .

Thank you

Shawna Szalwinski
