Re: Renewal of Permit No. WQ0012074001

Dear Chief Clerk,

I am a property owner and resident of Canyon Lake, and my family and I regularly use Canyon Lake for recreation. Our drinking water comes from the Triple Peak Inlet. We have a vested interest in water quality for Canyon Reservoir and the Guadalupe River. Like many here, I have seen a steady decline in overall quality, exacerbated by the current decline in lake level and river flow due to drought and increased diversion.

You are aware that we have recently succeeded in efforts to improve Canyon Lake WWT as exemplified by the current Canyon Park Estates facility upgrade (5-2-2-1). You may also recall that we demanded a public hearing on a proposed large size WWTP on the south side of the lake, resulting in that permit application being withdrawn by the submitter, SJTX, Inc., dba Canyon Lake Water Service Company.

We therefore respectfully request that you **approve** the FSH renewal. The volume is small and this is for our soldiers.

Last, I call your attention to the current restrictions on ANY level of wastewater discharge into the Highland Lakes and the ongoing rationale for non approval of permits by Leander and Granite Shoals. We see no reason why the Lower Colorado should receive more favorable treatment to that afforded the Guadalupe.

We sincerely hope you share our desire to improve water quality in the surface waters of our state, and that you stand with us to take reasonable actions to do so.

Sincerely,

Ronald M. Bishop, MPH, CIH

OPA RECEIVED

JUN 24 2010

My name is Tom Hodge.
I am general manager of **AT PUBLIC MEETING**
Water Service Company (CLWSC).

CLWSC is the retail water utility for
the Canyon Lake and Belverde areas of
Comal County. We serve approximately
22,000 people daily with treated
water. About 2/3 of the water
we supply our customers is treated
surface water drawn from

Canyon Lake via two surface water
treatment plants. Our permitted
capacity is 6.5 MGD from Canyon Lake.
As such, CLWSC has a strong
interest in preserving the quality of
water in Canyon Lake.

While I appreciate the fact that
the area's wastewater plant has met
the requirements of its current permit,
I recommend that the standards be
raised to a 5 BOD 5 TSS 2 N 1 P.
to do your part to increase the quality
of water in the lake. Tom Hodge

Re: Renewal of Permit No. WQ0012074001

Dear Chief Clerk,

I am a property owner and resident of Canyon Lake, and my family and I regularly use Canyon Lake for recreation. Our drinking water comes from the Triple Peak Inlet. We have a vested interest in water quality for Canyon Reservoir and the Guadalupe River. Like many here, I have seen a steady decline in overall quality, exacerbated by the current decline in lake level and river flow due to drought and increased diversion.

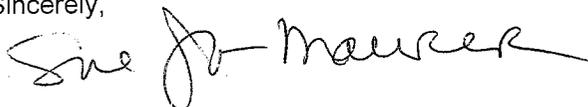

We have investigated the permitted treatment parameters of the old Fort Sam Houston Recreation Area wastewater treatment plant (Permit No. WQ0012074001) and believe that treatment level to be minimal (15-10). Although the permitted discharge quantity is small, it represents an issue we must challenge if we are to be consistent in attempts to assist the state in improving overall Guadalupe River quality.

We respectfully request that you NOT approve the FSH renewal until that agency agrees to upgrade the Recreation Area WWTP to at least a 5-2-2-1 level.

I call your attention to the current restrictions on ANY level of wastewater discharge into the Highland Lakes and the ongoing rationale for non approval of permits by Leander and Granite Shoals. We see no reason why the Lower Colorado should receive more favorable treatment to that afforded the Guadalupe.

We sincerely hope you share our desire to improve water quality in the surface waters of our state, and that you stand with us to take reasonable actions to do so.

Sincerely,

Sue Johnson Maurer
