COMMENTS: To whom it may concern: I strongly encourage the commissioners to have a public meeting and a contested case hearing in the matter of the wastewater plant at the Matagorda Bay Nature Park and Preserve. My family and I have been regular visitors and now, part time retirees since my mother-in-law built her cabin in the late 60's.

COMMENTS:I am writing to formally request a public meeting and contested case hearing concerning the wastewater application of the proposed White Stallion Coal Plant (permit # WQ0014404001). My family has owned property in Matagorda County for nearly 50 years. It has always been a peaceful and pristine environmental oasis where we have enjoyed bird watching/counting, fishing, swimming, kayaking, and most of all eating the abundance of fresh seafood that is available. I am very familiar with the ecosystem of the area, which contains fragile bays and estuaries literally teeming with wildlife. With the unfortunate disaster overtaking the eastern part of the Gulf of Mexico, we can't afford to take liberties with the remaining precious natural resources and habitats. I am concerned that this proposed coal plant will harm the environment and feel that the permitting process needs to be thoroughly vetted to make sure this will not happen and that proper safeguards are in place to prevent dangerous chemicals from being introduced to the ecosystem. Therefore, please hold a public hearing and require a contested case hearing for this permit. Sincerely, Lance Cain

COMMENTS:I think a public meeting and a contested case hearing are absolutely necessary. The public meeting would allow the public to become more educated of the possible effects. A contested case hearing would allow more thorough study of the ramifications of the waste water permit. This extensive study and education is imperative, especially when the environmental effects could be devastating.

COMMENTS: As a landowner in close proximity to the proposed White Stallion plant location I would like to express concern that the water quality of the Colorado River and other surrounding areas will be negatively impacted including the wildlife living on or near the river. I am also concerned that the discharge will negatively impact adjacent and downstream landowners. I would like to request a public meeting and a contested case hearing regarding the issuance of permits for White Stallion plant.

COMMENTS: As a resident of Houston, I am concerned about the effects the White Stallion coal plant will have on seafood caught in Matagorda Bay & then served in Houston. I am concerned about any heavy metals, especially mercury, that the plant would emit into surrounding waterways that would be then carried into the bay. Also, I am concerned on the effects the plant will have on wild birds in the area, especially migratory birds & marine birds. I ask the TCEQ to hold a public contested hearing on this draft wastewater permit. Thank you for your time.

COMMENTS: I request a public meeting and a contested case hearing regarding White Stallion's draft wastewater permit recently filed with TCEQ. They claim to 'recycle' the water five times, but to me that means they are making it five times more contaminated. Don't let them contaminate our water; it's not worth the consequences to our environment nor to the health of local people.
Sincerely, Julie Sullivan
