Re: City of Victoria Proposed TPDES Permit No. - WQ0010466002

To Whom It May Concern:

Thank you for being in Victoria the evening of July 21, 2011 for the public hearing you conducted on the permit application referenced above. Your hearing was conducted in the most professional manner and I have heard several compliments from citizens on both sides of the issue in your behalf.

Victoria is poised for a growth spurt. The 75/90 rule dictates that we move forward with this wastewater treatment plant, but that's based on past history. Looking forward with our anticipated growth, it is obvious that we need to act now and create additional wastewater treatment capacity by 2015. In this manner, we will be in full compliance with the TCEQ's rules and will also have the appropriate amount of treatment plant capacity to meet the needs of our citizens and to protect our environment.

Our application for this wastewater discharge permit is based on sound science produced by a reputable engineering firm. The issues raised by opponents of the permit at the hearing seemed to be a not-in-my-backyard issue. No one would request that a wastewater treatment plant be built in their neighborhood, but science and economics dictate where proper sites should be found. We have identified the proper site for Victoria.

Another obvious benefit of this new wastewater treatment plant project is that the Willow Street plant is going to be closed and not enough was made of the fact that we will be doing that neighborhood a gigantic favor in closing that obsolete facility.

If you have any questions or if we can assist you in any way, please don't hesitate to contact me at (361) 550-4245 or Mr. Lynn Short, our Director of Public Works at (361) 485-3381.

Sincerely,

Will Armstrong
Mayor

COMMENTS: I live on the south side of Victoria, not far from Odem street. I know that the interim construction will cause some congestion, and confusion. I also know that is temporary. I would love to have it somewhere else than my back yard, but, it has to go somewhere. For the community as a whole, I believe that the city has acted in the best interest of all concerned by choosing a site objectively. I have worked around sewage plants and the old ones did have odor. The new technology has all but eliminated these odors. I have worked on the financing end of water and waste water systems and I have inspected some new plants on very hot days, and there isn't any odor I could detect. Unfortunately I have a touchy nose, so, believe me, it would have alerted THE NOSE! The old plant on Willow Street needs to be decommissioned without delay. The poor people there have suffered for 50+ years with a lot of odor. I am not discounting the rights of other land owners on Odem street. However, I am concerned about the cost of this plant if we have more hearings, and only say we did it twice, or to put it somewhere else. Either circumstance and the cost goes up considerably. Our water and sewer rates are already so high we can hardly afford them. If the only objection these people have is the odor, it is unfounded and biased by their own bad experiences. Maybe they should go and tour some of these newer plants and see if they can even tell there is a sewer plant running. I have been out there before the biologicals are added and after, and after real sewage is introduced, and there was no noticable difference. I realize that you have to do your due diligence and I wouldn't want it any other way. If the plant is moved or held up, it will cost the rest of the residents of Victoria dearly in economic times that are already rough on the pocketbook. Not to mention we will go out of compliance because our plant will be overloaded if we are not on line with the new plant by 2015. The city and other persons responsible for the planning on this should be commended for their pro-active and dedicated response. From what I have heard, they had engineers look at other sites and considered every alternative several years ago and have followed every rule along the way with publications. We should be happy that we are on track and will be prepared. If people didn't know until now, they haven't done their due diligence as home owners and kept up with the activities of the community. The alleged odors or our rates going sky high, please consider carefully. Thank you for your time.

Reference : Proposed Sewer Plant
Permit #WQ0010466002

Dear Sir:

I am writing in favor of Victoria locating the new Sewer Plant on Odem Street near Hand Road. That location is out of the flood plain and adjacent to an already existing large sewer line.

The City has promised complete odor suppression and to plant shrubbery for concealment.

I predict that, within three years of its completion, the neighbors will forget it's there.

Prior to the City's purchase, anybody could have bought the site; such as a 24 trucking operation, a mobile home park developer or a commercial waste management company.

If I lived in that neighborhood, an odorless sewer plant would be a better choice.

Sincerely,

John Crews

COMMENTS: I would like to commend the City of Victoria for the forward planning that has gone into the design, site selection and eventual implementation of this new waste water treatment facility. The Victoria Community is a growing community and will need new infrastructure such as waste treatment to continue to sustain the high quality of life that is currently experienced. I am also pleased that the new plant with its new technology will replace an old plant with old technology that is currently located in a more densely populated area than the new location. I hope TCEQ will be favorable toward this application.

COMMENTS: Please give strong consideration to approving this pending permit. The proposed treatment plant is essential to the growth of our City. The effluent discharge will be in the same place as the old plant. Advancements in the technology utilized in these facilities will assure that odors and other problems which often plague older sewer treatment facilities will not affect residents who live in proximity to the proposed facility. This additional capacity is necessary to provide for the needs of both residential and industrial customers in the near future, and I urge you to approve the pending permit.

RE: Proposed Permit No. WQ0010466002

TO WHOM IT MAY CONCERN:

The Sisters of the Incarnate Word and Blessed Sacrament, 1101 NE Water Street, Victoria, TX 77901-9233 wish to voice our dissatisfaction with the location of the proposed (Proposed Permit No. WQ0010466002; EPA I.D. No. TX0132829) new sewer plant (waste water treatment facility) within approximately 1/8 mile of our residence for approximately 80 Sisters and our Amor Meus Spirituality Center.

Incarnate Word Convent, the residence at 1101 NE Water Street, serves as the Congregation's home for the entire membership of almost 80 women religious. Incarnate Word Convent also serves as a center for the Formation of our future women religious as well as a 24-hour residential care for our Congregation's aged and infirm Sisters. In addition, Incarnate Word Convent serves as a Congregation's center for the Amor Meus Spirituality Center.

Our dissatisfaction or concern springs from the following reasons:

- There is fear that emission could generate more diseases and consequently more illnesses. Besides being a permanent residence, our concern is for other families who live in the area, for all of the children at Hopkins School, the City Park, for our Winter Texans at Dad's RV Park, and for the numerous businesses who contribute to the economic welfare in Victoria.
- In times of flooding, untreated waste water may escape into the streets and into the river (Guadalupe River) causing unsafe water quality downstream
- Unpleasant smells may escape from the waste water treatment creating a nuisance for property owners. (We and fellow residents have vivid memories of the horrible smells that were wafted our way by South Winds on hot summer days when the city landfill was located between us and the proposed facility. We have concerns that possible foul odors may be an inhibiting factor from attracting people to our Spirituality Center, and adversely affect the future of education and businesses in this area..

We take this opportunity to thank you for letting us voice our opinion in this regard.

Sincerely,

Sister M. Evelyn Korenek, IWBS
General Superior

P.S. We request a public meeting on this application
