Re: P&L Cast Stone
Air Quality Standard Permit, Registration No. 93109

To Whom It May Concern:

Northwest ISD has previously submitted an objection to Permit No. 93109 via your on-line comment system. On behalf of Northwest ISD I attended a public hearing on 11-16-2011 to object the application for permit # 93109; I wish once again to make record of NISD's objections to this permit request. There are several objections to this application, not limited to but including:

- Applicant plans to build a plant in a flood zone.
- The surrounding roads will not carry the heavy trucks traffic loads.
- Plant will recycle wastewater stored in a pond in a flood zone.
- Northwest ISD in conjunction with the City of Fort Worth constructed a new road with a culvert on Haslet – Roanoke road. This road was constructed for the opening of John M. Tidwell Middle School in the summer of 2010. The applicant stated in a meeting that he will enlarge the pond next to Haslet-Roanoke Road. Increasing the pond size will compromise the integrity of the culvert and void the maintenance agreement on it.
- Tidwell Middle School property line is within 440 yards of the plant site. There are concerns regarding the IAQ for the students and staff of Tidwell Middle School.
- There is no plan in action to monitor the air quality before and after the permit issuance.
- To the best of my knowledge, no permit application has been filed with Tarrant County and the City of Fort Worth.
- The plant is manufactured as a temporary plant on wheels which the applicant has plans to use it as a permanent facility.

Please do not hesitate to contact me at 817-215-0055 or maghili@nisdtx.org should you have any questions.

Respectfully,

A handwritten signature in black ink that reads "Mehran Aghili". The signature is written in a cursive style with a long horizontal line extending to the right.

Written comment by Charles Ashby (1207 Ridgewood Circle Southdale, TN. 76092)

My name is Charles Ashby. . .I am the Energy Manager for Northwest ISD.

Northwest ISD has previously submitted an objection to Permit No. 93109. We wish, once again, to go on record of objecting to this permit request.

NISD has several objections to this application, not limited to, but including the following:

- **The applicant plans to build a plant in a flood zone**
- **The plant plans to recycle wastewater stored in a pond in a flood zone**
- **The surrounding roads will not carry the heavy trucks traffic loads; we are concerned about the burden and tax on these roads with 100-150 trucks that will be traveling the roads each day**
- **Tidwell Middle School property line is within 440 yards of the plant site. We have a major concern regarding the indoor and outdoor air quality for the 1500+ students and staff of Tidwell Middle School who will be spending at least 8 hours a day in, and out, of this facility breathing the pollutants from the cement plant. Many of the pollutants that a cement plant releases are carcinogens. . .cancer causing pollutants. NISD objects to having our students and staff operate in a "life threatening" danger zone**
- **We are concerned about the economic impact that heavy industry will have on the surrounding community. Impact such as. . .**

CHEMICALS OFFICE

2011 JUL -1 AM 10:02

TEXAS COMMISSION ON ENVIRONMENTAL QUALITY

OPA RECEIVED

bl JUN 30 2011 AT PUBLIC MEETING

Ma

Visual blight and resulting drop in property values

People leaving the area

Deterrent to firms who might otherwise have moved to this area

Lowering of living standards and quality of life

Noise and Diesel truck emissions

- **Finally, there is no external, independent plan of action to monitor the air quality before and after the permit is issued. The industry is "self-policed." This, too, is a major concern for our school district.**

These are, but a few, of NISDs objections to this permit request.

Thank you for your time.

COMMENTS: I wish to request that this permit not be granted. Upon researching the risks and hazards associated with the proposed operation seeking approval to conduct business at the location off of Haslet Roanoke Road, it is my conclusion that the risks and hazards associated with such a business are far to dangerous to be near a school and homes. I would also like to know when the city council of Fort Worth will be conducting a meeting for it's citizens to ask questions and voice concerns? Surely the city of Fort Worth will weigh heavily the risks of placing such a facility near so many residents and the newly constructed middle school. Chronic Obstructive Pulmonary Disease (COPD) is heavily linked to the cement industry and its workers. Cilica, Alumina, Iron Oxide, Lime and Gypsum are all materials used in this industry and would be airborne hazards affecting the many citizens and school children near by. One would have to question any companies morals or ethics that would even consider putting such a facility so close to citizens and school children. In addition to the many chemical hazards, the incredibly heavy truck traffic posses yet another danger to the near by citizens and school children not to mention the increased wear and tear on our neighborhood roads, many of which are asphalt and not designed to endure such incredibly heavy loads. I'm confident that the City of Fort Worth and it's elected officials will exercise great wisdom and intelligence and not grant this operation said permit.

COMMENTS: I oppose the approval of this permit. I am a resident of the neighborhood in which this plant is proposed, and I have an elementary-aged child. We have several air-quality threats in this area, such as Alliance Airport, close proximity to I35, and several active gas well and drilling pad sites. All of these are very close to our sub-division, and research supports such a preponderance of contaminating sources as having deleterious effects on health over the long term. We can hardly entertain another possible threat, such as this batch plant, to our air quality. I ask that you deny this permit application on the basis of the potential for a reduced quality of life for the residents in this area.

COMMENTS: This comment is in response to the City of Fort Worth's permit application 93109. I am a resident of the Ranches East neighborhood that is located directly north of the proposed location of the concrete plant. I am writing to voice my strong opposition the building of such a facility in this location. I understand TCEQ's main concern is with environmental quality, but the residents of this area need to be considered as well. Quoting from TCEQ's webpage about the agency's philosophy: The agency will "base decisions on the law, common sense, good science, and fiscal responsibility." The law may allow for the creation of such a plant but applying this philosophy will tell you that it's proximity to Tidwell middle school, single family as well as multi-family residential areas makes this a poor location and thus a bad decision. Common sense will tell you the location is simply too close to areas where there are children walking home from school and people enjoying their neighborhood's piece and quiet. This plant poses a serious threat to the safety and security of our children who attend or will attend this school. Second, good science will tell you the roads in and out of my neighborhood at times are inadequate already. During rush hour and school drop off and pick up, the intersections of Hwy 170 and Alta Vista and Hwy 170 and Haslet-Roanoke can become congested. The added truck traffic from the proposed concrete plant would only add to this congestion and would place added stress on maintaining the roads that would inevitably deteriorate due to such heavy truck traffic. A plant such as this is poorly suited for this location and belongs nowhere near a residential area. The noise, dust, and traffic that is produced from such a plant would make the living conditions in my neighborhoods undesirable and unhealthy. I am asking that you please consider the residents of this area before making a decision to allow a concrete plant in this location.

COMMENTS: I oppose the building of this Concrete Batch Plant, as a resident of Henrietta Creek Estates, which is due north of this project. Prevailing South winds will bring the emissions from this plant directly into our subdivision; and noise pollution will also be an issue. But most important, this proposed location is much too close to Tidwell Middle School, and the additional truck traffic would be a danger to the students, as well as to our residents. Haslet Roanoke Road is quite narrow, and is already in poor condition due to increased traffic.

COMMENTS:I am strongly opposed to the erection of a concrete plant at 4000 Haslet Roanoke Rd. in Roanoke, Texas. I am opposed for the following reasons: the impending air and noise pollution, the increase in traffic, and the damage to roads. My son attends the nearby school, Tidwell Middle and participates in the athletic program there. The air pollution would possibly limit outdoor reaction and could, for those with specials conditions, hamper their ability to participate and possibly worsen certain conditions such as heart murmurs (which my son has). Noise pollution would be a obvious interruption to the school and the learning process (as a teacher myself, I know). Moreover, the increase of traffic on our already narrow and dilapidated roads would further erode the streets. The increase in traffic, along with the lack of sidewalks in the area, would potentially place walkers, bicyclers, and runners, as well as school children walking to school, in danger. Please, do not allow this company to build a concrete plant in this area. Thank you, Angela Bullard

COMMENTS:The application to build a concrete batch plant in our neighborhood next to a school should not be even open to debate. This would cause untold dust, damages to our streets, danger to the school children and untold health hazards. In as much as we all understand that to build, the builders need batch plants. There are many other locations that would not imperil the health and safety of our neighborhood. Would you permit this batch plant to be located here if this were your home?

COMMENTS: I am very concerned about the proposed location for such a facility as proposed. this is directly across from a large middle school and very close to neighborhoods full of small children. Given the extensive undeveloped land in the area, it smacks of mis-placed priorities to risk the health of our children to enrich the pockets of a few. I strongly opposed this issuing this permit. There appears to be many, many more suitable locations within the general area where there are no homes or schools and have better access to major roads. Please give due consideration to the potential risks here and how you might feel if it were proposed to build a cement factory literally next to the school and within 1/2 mile of your homes. Thank you for your consideration.

COMMENTS: I am a representative of the developer of the 1,000 lots and 240 apartment units (and 348 planned apartment units), near the site of this proposed batch plant. I believe that this proposed plant will be far too close to private single family residences. I have attached a map that shows the proposed plants distance from two adjoining single family houses (both under 1000 ft), and a brand new middle school (900 ft). I have been told by two different TCEQ employees that a batch plant can not be within 440 yards of a single family residence. In this case it would be within 440 yards of; 3 homes, 240 apartment units, and a middle school. Additionally, running heavy concrete laden trucks in and out of this area will not only over burden roads, but also create a safety hazard for children walking to the new school. I have also attached a map showing that the proposed plant is wholly within the 100 yr flood plain of Henrietta creek, which should be a concern for the quality of the storm water run off from the plant, and potential for serious pollution in a 100 yr storm event. Finally, I've attached a map showing that the proposed site is in the Extra Territorial Jurisdiction of the City of Fort Worth. The applicant had incorrectly indicated on his application that he was not in the ETJ of any municipality.

TEXAS COMMISSION ON ENVIRONMENTAL QUALITY
2011 JUL -5 AM 10:35
CHIEF CLERK'S OFFICE

Dear TCEQ: P-93109

My name is Sal Espino. I serve on the Fort Worth City Council as the District 2 representative. Council District 2 encompasses the area that will be most affected by the concrete batch plant sought by P & L Cast Stone, Inc.

Fort Worth residents will be most greatly affected by the operation of this plant. The Fort Worth communities known as The Ranches and The Ranches East (also known as Lost Spurs and Lost Creek or Lost Creek Ranch) are in very close proximity to this property.

The approximate number of homes is close to 1,400. In addition, there is a Northwest ISD school essentially across the road from the proposed batch plant: John M. Tidwell Middle School @ 3937 Haslet-Roanoke Rd.

On behalf of my constituents, I am OPPOSED to the granting of a permit for a concrete batch plant operation. It is too close to neighborhoods and to the school.

Moreover, road infrastructure is a challenge in this area of Fort Worth. Haslet Roanoke Rd. has insufficient capacity to handle additional truck traffic. An industrial use of this type next to an educational institution and to residential communities is inappropriate. Please deny the permit request.

Respectfully,

Sal Espino

COMMENTS:I live in the Ranches East subdivision off Ridgetop Rd. where I've just learned a concrete company has filed this permit with plans to build a plant. I totally object to this proposal for several reasons -- Ridgetop is a small two-lane road and is the only direct exit out of two subdivisions; the road itself is already in a state of disrepair and could hardly take the weight of what I understand to be the traffic of up to 600 truckloads of concrete per day; there is a new middle school on Ridgetop and Roanoke-Haslet road which will handle up to 600 students and the associated traffic - again, all on a two-lane road; the air here is already being saturated with chemicals and gases released from the multiple natural gas drilling sites; finally, but certainly one of the biggest concerns is how this will affect our home values. While this site does have some light industry, the location of this plant will have a direct negative impact to the hundreds of homes within just one-quarter mile. Please do not allow this to happen. Would you want it next to your home threatening your home value or next to your children's school? My subdivision is only half way built out and placing a concrete plant in the path of our only direct exit will surely lower our home values and all but stop the desire of other families to want to build here. There is a lot of empty space still out in this area. Surely this company can find a more suitable site that is industrial and would not pose the same threats to a residential area. Thank you for your consideration. Jennifer Esser

Re: Concrete Batch Plant - Permit No. 93109

Dear Mr. Vickery:

It is my understanding that P. & L. Cast Stone has applied for a concrete batch plant to be built in an unincorporated area of northeast Tarrant County. Residents in this area of the county have voiced strong concerns about the impact such a facility would have on the local environment.

The plant is to be located within 440 yards of a middle school, with numerous trucks travelling on the same congested road used by children and parents going to and from school. The surrounding area is densely populated and lies directly in the path of the prevailing winds which will spread the pollutants throughout the neighborhood.

In addition, the plant is to be situated in a flood zone. The recycled waste water will be stored in a pond that is also in the flood zone. This creates the potential for impurities to enter the local water system.

I would ask the TCEQ to consider these concerns when making decisions in cases where approval of the permit can so negatively impact a community.

Sincerely,

Gary Fickes

Re: Concrete Batch Plant – Permit No. 93109

Dear Mr. Vickery:

It is my understanding that P & L Cast Stone has applied for a concrete batch plant to be built in an unincorporated area of northeast Tarrant County. Residents in this area of the county have voiced strong concerns about the impact such a facility would have on the local environment.

The plant is to be located within 440 yards of a middle school, with numerous trucks travelling on the same congested road used by children and parents going to and from school. The surrounding area is densely populated and lies directly in the path of the prevailing winds which will spread the pollutants throughout the neighborhood.

In addition, the plant is to be situated in a flood zone. The recycled waste water will be stored in a pond that is also in the flood zone. This creates the potential for impurities to enter the local water system.

I would ask the TCEQ to consider these concerns when making decisions in cases where approval of the permit can so negatively impact a community.

Sincerely,

Gary Fickes

June 30, 2011

I would like to oppose the permit on P+L Cast to start a Cement batch plant.

My reasons are:

1. Pollutants
2. Within a few feet of a school
3. Health of the children in school and the neighborhood.
4. It will affect my property value.
5. Monitoring is almost non-existent.
6. Increase of illnesses can have a monetary affect.

COMMENTS: As President of the Lost Creek Ranch neighborhood association, we would like to protest the approval of the permits allowing P&L Cast Stone to build a batch plant next to a neighborhood of 1000 homes and across the street from a school. We feel that this type of business could be harmful to those around and also would contribute to the decline in values of all the homes around it. We already are almost encircled with gas wells and a batch plant would just end any opportunity that we would ever see the value in our homes. For many in the neighborhood - if a batch plant is built - they would like to try and sell their homes and move somewhere else. Please do not approve their request for a permit. Thank you,

MCD

COMMENTS: I can't believe anyone would even consider putting a batch plant in across the street from a neighborhood, much less a school. The dominant wind annually is even from the south which would carry all contaminants and pollution directly from the plant to the school and then on to the houses. This doesn't even mention the noise pollution that would have a huge negative effect on the neighborhood as well. The list of reasons this is a BAD IDEA is immense, such as the current road isn't designed to handle the loads, the physical danger of the trucks, pollution, dust, litter from trucks, etc. etc. I challenge anyone to come up with a list of even 3 things on the positive side. This is not a financial matter, this is a matter of safety and environmental quality and the answer is obvious.

COMMENTS: Dear Board members, I would like to express my concern for permit application #93109 for the proposed concrete batch plant along Haslet-Roanoke and Ridgetop road. My first concern is for our children and public safety, do you realize a middle school is across the street and 600 truck trips a day will elevate the risk to our most precious resource? My second concern is I am a home owner in the area, I made an investment into Fort Worth when I chose to move to Fort Worth from Lewisville and I am counting on you to return the favor and help me protect my investment. With several neighborhoods surrounding this proposed facility I am concerned about the pollution, the noise, the congestion and the eyesore that such a facility will create. Perhaps I was a bit Naïve when I chose to move to Fort Worth but Ive been very disappointed with the lack of development strategy that I see going on throughout the North sector as this is prime time real estate for building nice homes and family infrastructure not for eye sore facilities smack dab in the middle of all of this. Please do the right thing and deny this permit. We need some shopping in the area not a cement producing plant which will in turn lead to other crap facilities moving in, which in turn will lead to another Fort Worth slum area. Please do the right thing and preserve the integrity of area by allowing proper development that in turn will spur additional development and more long term tax revenue not drive that revenue elsewhere. Thanks for your attention on this matter!

COMMENTS: I have lived in this neighborhood for 10 years. I pre-date the P&L Cast stone business. If I had been aware that my voice could be heard I would have protested the business from the start. I live a half-mile from the business currently. When I bought my house I thought those business would lend themselves to Hwy 170 closer to the industrial area, not in my backyard. I feel as if Fort Worth treats us like a afterthought. We live in "Fort Worth", pay Denton school taxes and have a Roanoke address. Wow. Can we be swept under the rug any more than that? No More. There are a great many good people living in this neighborhood and we care about our health, the health of our children and do not want to meet cement trucks coming down a road barely big enough for two cars to pass. Or worse, coming through our neighborhood because the roads are better and it is a more direct route to the highway. Please consider the families and the neighborhood adjacent to this business and do not allow these plans to proceed.

COMMENTS: I moved into a residential neighborhood to live in a quiet community that is safe for my family. I do not believe that a concrete batch plant will be either quiet, or safe if it is built with such proximity to family residences or a middle school. Many of us use Ridgetop to enter our neighborhood, and as it stands the road is already in bad need of repair for potholes and the fact that there are many unlevel patches. Large trucks making multiple trips every day will further damage these roads. Furthermore, these kinds of trucks are already a concern on 170 as they often run lights because they are going too fast, or they slow down already congested traffic because they are cumbersome and start off travelling slowly from complete stops. Not to mention the damage concrete trucks spew onto cars and roads around them (ex. broken windshields). These trucks also have many blind spots. Having these trucks so close to children (near the middle school) does not feel safe and it will be a major traffic issue as well. There is barely enough room on the road for two normal sized cars as it is. Please consider the many families that will be affected by this permit request and please deny it. Thank you.

COMMENTS: Please accept this comment as a plea for NO for the concrete batch plant on or near Haslet-Roanoke Rd. I am a residence of Ranches East just behind our new middle school Tidwell Middle School. We are a family of individuals who suffer from extreme allergies and asthmatic tendencies and this would be a detriment to our family not to mention the hundreds of students who attend Tidwell Middle School. In addition to the health concerns, traffic would be a huge issue for students, parents and teachers and residence of this area. From my research this plant could produce excessive traffic and is NOT a positive growth to our neighborhood. We ALL are extremely upset as to the possibility of this plant.

Protestant Comments

I in not in favor of this permit. It will be a traffic issue for our subdivision, not to mention a safety issue for the children who attend school. The plant with this much production will have approximately 600 truck trips a day, that includes cement and raw delivery trucks. Our roads in our area are already in poor condition and in need of repair. Our cars are constantly in need of repair of frontend alignments and balancing due to the poor road conditions. This permit needs to be rejected due to the above situations and consequences

COMMENTS:I oppose to the building of a concrete batch plant. I live in the residential community north of the plant site. Traffic on Roanoke-Haslet is horrible not enough room for pickups to pass school busses and the road is a rural county road that is full of pot holes and eroding from the sides of the road with tree and brush overgrowth. There is small bridges and mail boxes that make passing a nightmare. I was witness to 2 pickups hitting mirrors while passing due to narrow roadway. The road is not safe for small cars much less large trucks. There is a sign posted saying no truck!! The adjacent school has children with bikes and walking with no sidewalks on a country road. The pollution and noise will drive down our property values as well. Our water is already under seige from gas drilling much less contamination and usage from industrial usage. Cement operations can use over 100,000 gallons per day. The runoff would contaminate stock ponds down stream as there are no gutters along rural roads only ditches that run off to streams. The health risk as well to livestock and humans in the area is a concern as cement is a known carcinogen. This is a hazard for residents and students alike in our neighborhood and I oppose this type of activity in our neighborhood.

FAX:

COMMENTS: PLease do not allow this concrete plant to be built in residential areas and a school zone. There would be way too much traffic on our little Haslet Roanoke Road, the problems for asthma sufferers would be very bad for the neighborhoods of Henrietta Creek and Lost Spurs (the constant south wind would be blowing dust all day and night), and this is way too close to a school. The other thing is that there is already a concrete plant off Hwy 170 and Denton Road. This is not a good idea for our neighborhoods. By the way, our zip code is 76262-5818, meaning we live in Tarrant county, just next to the border of Denton County. Roanoke is only our mailing address. We are directly in the area that would be affected by this concrete plant. Thank you for your consideration.

COMMENTS: My wife and I are against this concrete plant. It's location next to the school and adjacent to our housing addition is too close to a heavily traveled area with 2 lane black top roads is not good. There is another concrete plant located a few miles down hwy 170 that is not located in an area like this one and is not . This plant could be located next to that one or incorporated within it.

COMMENTS: I oppose the building of a Concrete Batch Plant at 4000 Haslet Roanoke Road, Roanoke, TX for the following reasons: Traffic: P & L Cast Stone estimates that the proposed plant would have a maximum capacity of 150 yards of concrete per hour, running a 12 hour shift. There would also be roughly 20 trucks bringing raw materials to the plant per hour or 240 per day. School: There is a new school, Tidwell Middle School, NISD very close by. Batch plants have a history of polluting nearby areas. Emissions from the concrete plant would envelop the school, teachers and children due to the southern winds carrying the dust and particulate. Health Risk: Portland cement is a known carcinogen. There is a mix for danger for the students across the street and the residents in this neighborhood.

COMMENTS:I urge you to turn down the proposed permit for this business. I did not purchase my first home with the intent of dealing with increased traffic, noise and pollution. The newly built Tidwell Middle School is directly across from the proposed site and in my opinion, offers the potential for many safety hazards for the area school children. Increased traffic alone is cause for alarm when dealing with the expectation of trucks on the road. Additionally, the contaminants released into the air, no matter how small the micron, is simply not something our children should be faced with. With regard to the surrounding communities, the families that have established themselves here have done so with the purpose of being away from major industry, i.e. noise, traffic etc. I personally purchased here because of the tranquility that allows me to see stars at night, hear the coyotes, cows and horses. Once again, I urge you to not allow the acceptance of this permit as it would readily destroy the community growing up in what is left of a "country" atmosphere.

COMMENTS:I am a member of the Tidwell/ Ranches East community and am aware of a permit 93109. This would be a huge mistake for our community. First and for most there are kids young kids that walk to and from school on Ridgetop Road. This permit will allow additional traffic that can be extremely dangerous to our children. Also the toxins that will emit into the environment will not be any good and could potentially bring about future law suits to the company. I ask that you all think first about the kids, community, and the residents in the area. Also the road conditions are currently not the best on a majority of Ridgetop and to add the additional weight of delivery trucks and cement trucks will further damage the roads along with bring about future accidents. Those things could be prevented by having a future outlook and not allowing for this permit to take place. I am against this permit being granted and should be denied due to that area now being predominately residential with young children and families. Thank you and I pray that the best and safest decision is made for our Ranches East community. Signed, A much concerned resident of interest in her community!

TEXAS
COMMISSION
ON ENVIRONMENTAL
QUALITY

2010 NOV 19 PM 2:07

Dear Texas Commission on Environmental Quality Staff:

CHIEF CLERKS OFFICE

We would like to register a Formal Comment in protest to P & L Cast Stone, Inc.'s proposed facility to be located at 4000 Haslet-Roanoke Rd, Roanoke, Tarrant County, TX 76262.

Our daughter, Grace age 5, has been diagnosed with Reactive Airway Disease (RAD). She has suffered from RAD since she was a month old. The symptoms she experiences include wheezing, coughing, and fast, shallow breathing due to a lack of bronchio-dilation. The symptoms are perpetuated by two main causes: upper respiratory illnesses and environmental factors.

We are extraordinarily concerned about the environmental factors this concrete plant will create for Grace. Her health is our number one priority. The emission of air contaminants the concrete plant will generate result in an increase of chronic conditions. The existence of these air contaminants cause us urgent health concerns for our daughter's breathing and well-being.

We are vehemently opposed to the construction of P & L Cast Stone in Roanoke as it presents environmental hazards to our daughter's health.

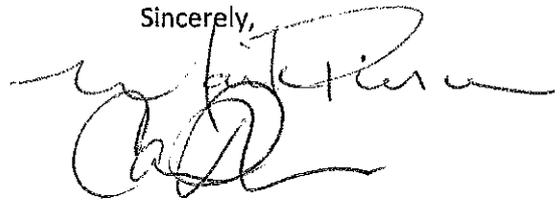

We urge you to deny the authorization of P & L Cast Stone, Inc.'s construction in Roanoke, TX. We trust you will make the most appropriate decision to preserve air quality and ensure a safe community.

it is a really bad idea to locate a cement plant so close to a public school and residential areas.

My son is 12 and plays football at Tidwell. I cannot imagine that his lungs will not suffer ~~the~~ long term damage from the 2.5 μ m particulate matter.

My second son is almost 18 months, and we live very close to the school. I can imagine wind blowing cement particles onto our property and exposing us, and him, to danger for many years to come.

I would like to request, implore, demand that the permit be denied.

Sincerely,

✓

To the T.C.E.P
re: P/L Stone

JUN 30 2011

30 June 2011

AT PUBLIC MEETING

Good evening and thank you for your time this evening, June 30, 2011, the air quality meeting

TEXAS COMMISSION ON ENVIRONMENTAL QUALITY
2011 JUN -1 AM 10:00
CHIEF CLERKS OFFICE

I, Sherrin Prosky, on behalf of the Ranchos Neighborhood Association, representing Lost Creek Ranch, strongly oppose the concrete batch plant.

We understand that P/L has the ~~best~~ right to conduct business and do not oppose the pursuit of business. What we oppose is the location of the proposed batch plant

First and foremost, the location is across the street from Tidwell Middle School. Regardless of how long P/L has been at its present location, the fact is a school now exists across the street. The school educates several hundred students, we find it to be a travesty that this is being considered at all.

CM

OPA RECEIVED

bl JUN 30 2011

AT PUBLIC MEETING

Second, the lack of monitoring (Concern)
US There is no baseline testing that
we are aware of and we have been
told the nearest monitoring center is
in Denton. That is too far to
properly conduct micro particle testing.

Third, the permit itself. We understood
that the owner intends to use far
less than ~~than~~ the permit calls for, we
know the next date on the calendar the
owner can increase production to the level
of the permit which is significant

fourth and finally, geography. The
batch plant is south of our neighborhood
and the winds predominately flow from
the south the majority of the year.
That simply exposes us to more
emissions.

Thank you for your time,

Shawn Presley

COMMENTS: Thank you for your time this afternoon. I would like to share my thoughts on behalf of the proposed cement batch plant. Though I am aware that P & L was here long before the new Tidwell Junior High School was built, the fact is there is now a Junior High School across from where P & L is located and from where the proposed concrete batch plant is. I understand from the public meeting last November that the owner has purchased equipment to prevent/greatly reduced the content emitted. However, there are no controls in the vicinity to ensure that the equipment is working properly and to alert if an emergency situation arises such as a catastrophic equipment failure. In addition to the junior high, there is an elementary school nearby, two neighborhood subdivisions, and a major highway. How can anyone ensure that the general public is 100% safe considering that as far as it is known that there is no base line air quality test and there is no nearby monitoring site. I think that despite the desires for the owner of P & L to conduct further business operations and that he was there first, the demographics of the area have changed. To allow an industrial development so near to a school with no regard of the students, faculty, and the workers as well the neighborhoods is in poor taste. I urge you to reject this and all other permits for a concrete batch plant at its present location. Our neighbors and their families as well as the students of today and tomorrow deserve to be protected by the state.

COMMENTS: I moved to this area two year ago for It family oriented, it is peaceful environment. I am very concern with the safety of our children walking to the Middle schools and having all this traffic carrying tons of cement. We have the Henrietta creek nearby and lots of wild life around this area. A lot of the residence rely on well water and this companies require a lot of water usage. Pollution due to chemical use and noise pollution is inevitable. Please consider in not issuing the permit to the company. Sincerely, Sandra Reddy

COMMENTS:Dear Sirs, It is my understanding that this permit is for a fairly busy concrete batch plant that would require several hundred trucks a day to carry out its business. I live in the Ranches East development very near here and think this plant would pose several significant issues concerning my neighborhood. First, safety would be compromised. We have a brand new school that would basically be across the street from this plant. It is a middle school and a number of students walk to and from school. In addition, the roads in this area are in bad enough shape as it is, a sharp increase in truck traffic would make a bad situation even worse. Access to our neighborhood is limited and this plant would add traffic we don't need and would consist of heavily laden vehicles which would no doubt cause further damage to streets that are already in bad shape. Second it would affect quality of life for the neighborhood and school. Concrete plants and trucks are not quiet and would severely alter the environment in this area with noise and air quality issues. I would like to be able to spend time in my backyard without having to hear the constant movement of heavy vehicles and the machinations of a concrete plant a few hundred yards away. I can not imagine trying to study with that sort of activity directly across the street. My wife and I would encourage you to deny this permit due to the safety hazard from increased truck traffic, poor road conditions, and proximity of the school. We would also ask you to take into consideration the quality of life for the surrounding neighborhoods that would be affected by the noise and air pollution that would result from the construction of this plant. Sincerely, Richard Schlepphorst

COMMENTS: I believe that having a concrete batch plant in this location is not safe. This location is in close proximity to a middle school and residential living. The proposed plant would significantly add to the existing traffic on Ridgetop Rd. The additional traffic would be mostly large, heavy, slow moving trucks. I believe this will be a safety issue to the children and the residents of this area. In addition it has been estimated that one concrete truck does as much damage to the existing road as 9,600 cars. I believe this size plant will have approximately 600 truck trips per day which will cause significant damage to the existing road. There is potential of air pollution due to wind-borne Portland cement powder and dust from the piles of aggregate waiting to be used to make concrete. Portland cement is a known carcinogen and poses a variety of other serious health risks. For information, read the Material Safety Data Sheet.

COMMENTS:I adamantly oppose the proposition of the plant being considered in permit #93109. With two nearby schools and several existing and developing neighborhoods, I am highly concerned about the added health and safety risk associated with such nearby industry. Between the change in air quality and the constant movement of trucks, I believe that this poses unnecessary risk to the countless children walking through the neighborhoods and the many families who have chosen this area to make their home.

COMMENTS: In response to the permit application with the number 93109, I would like to voice my concern as a resident of the Ranches East Community. As it is understood, the application in question is for the construction of a concrete plant that will be producing approximately 150 yards of concrete per hour. Additionally, there will be roughly 600 truck trips in and out of the neighborhood per day associated with the proposed concrete plant. I find this deeply troubling for the community on several levels and must protest the existence of such installation. 1. Air Quality: On days where the wind is blowing from the south, our neighborhood will be in the fallout pattern for the dust and other air contaminants associated with the production of concrete. This is not acceptable to people such as myself who suffer from asthma. This raises a major quality of life issue. 2. The roads (specifically Haslet-Roanoke Road) in and out of the neighborhood are already insufficient for the flow of existing traffic. There is simply not enough space for big rig haulers and the rest of the residents. Additionally, the traffic and type of traffic the plant will bring in, creates a hazard to the students attending classes at Tidwell Middle School. School hours begin and end during what will likely be normal working hours for the plant so there will be high traffic from the plant while the children are in transit between home and school. 3. There will be no guarantee of the type of people that will be working at the plant. Are they background checked? Are the drivers of the big trucks experienced commercial drivers? Are they licensed commercial drivers? What will their safety record be? 4. Property values/curb appeal of the community: The homes in our community have already devalued in the past year or so without the detractor of a concrete plant. Not to mention the potential to lose money when selling a home in the neighborhood. Potential buyers are going to be less likely to buy a house that is in such close proximity to this or any other type of industrial activity. Had the concrete plant been in place when we were looking to build a house, we would have decided against building/buying at Ranches East. Sincerely, John Skeels

COMMENTS: We do not want P&L Cast Stone to receive a permit to operate a concrete batch plant. We have several health issues in our family that this will greatly effect. I have a daughter with severe asthma and allergies. I also have another daughter with heart issues. I, myself, have allergies and health issues. I can not help, but think out of the nine hundred plus students at Tidwell Middle School that someone in that school could have lung issues, or other health problems, that this concrete batch will directly harm. These kids go to school nine months out of the year and five days a week. They will constantly be exposed. My daughter is one of those kids that attend TMS. We are so incredible disappointed this could take place. If this did not cause health concerns, it would be a different story. We have many people in this neighborhood that have health issues and with the batch plant so close to schools and homes. The economy is awful and our property does not have the value it once did. It is not like we can all move and get a decent amount for our homes. No one is going to want to move into the area, knowing a batch plant is right down the street. I hope you will consider how many people this will directly effect. We think this will do much harm to our community and especially our children who will be right across from this batch plant, nine months out of the year, five days a week. We know a lady that lives right across from the school, who has severe lung problems. She moved here, knowing it was a safe place for her to live. I know this will greatly cause lung issues for her. We are asking that you reconsider allowing P&L to receive a permit for a batch plant. Please feel free to contact me with any questions you may have. Thank you for your consideration. Sincerely, Jacqueline Slonaker

COMMENTS: I oppose the building of the concrete batch plant at 4000 Haslet Roanoke road in Roanoke, Texas for the following reasons: - It is a safety issue for the children at the Northwest ISD Tidwell Middle School for any child that will walk or ride to school. - It is also a health risk for the children and teachers - both air and noise pollution. - It will create traffic issues on a street that is already narrow. - It will create additional road damage on a street that is not well maintained. - The plant will use a lot of water and will create a shortage of water in the summer months in the nearby residential area. This plant is dangerous for the students as well as the residents in this neighborhood. Sincerely, Carline Smith

Handwritten signature/initials

My name is Fall Stone and I reside in Ranches East at 4008 Lazy River Ranch Rd Roanoke, TX 76262. My home is located right behind Tidwell Middle School. I live with my husband and our two children, ages 5 and 2 years old. Our children ~~always~~ suffer from air allergies. I suffer from asthma. During the time the middle school was being built, all three of us had to take medication for our allergies and my asthma. Since the time the school was has been finished we are all three off our medication. Our youngest daughter also suffers from severe skin allergies. We moved to Roanoke to get away from the DFW air pollution for our children and my health reasons. Our main concerns for this meeting is our health. With both of our childrens air induced ~~allergies~~ allergies, our youngest daughters severe skin allergies and my asthma. We fear ~~with~~ with this plant coming in that our health issues will become more ~~severe~~ severe and will be forced out of our home. We are also ~~so~~ concerned of long term effects if the company is here ~~as far as~~ as far as silicosis, lung disease and so forth. Thank for your time and listening and taking our concerns into considerations.

Fall Stone -

Additional ^{to} questions - the trucks will not be cleaned going in and out, this will cause particals to be thrown in the air. Who will be responsible if there is an accident? Thank you.

COMMENTS:We purchased our land in 1982 off Roanoke Haslet Rd and in the 32 years we have seen so many things build nearby that has changed the view of our land since we bought it. We now deal with a airport, a racetrack, a truckstop, industrial district, housing backing up to our acreage and a new school. This beats it all, Really a concrete plant near housing additions and more important across from a school where kids have to breath the contaminated air and deal with traffic of the trucks coming and going while kids are walking and riding bikes to the school! We are so aginst thisfor the safety and health of those kids as well as those who live around the immediate area.

COMMENTS:How is it that a plant of this nature is going to be constructed directly across the street from a middle school and we are just finding out about it at the last minute? A grandparent who was walking happened to see the little permit sign. I have driven by there several times and never notice the "little" sign. This is not a good place for a concrete plant. There are hundreds of kids in the building across the street trying to learn. We need to have a chance to voice concerns about this plant before it is approved.

COMMENTS: Permit 93109 needs to be turned down. This should not be approved for several reason relating to air quality. 1) This location is in very close proximity to several neighborhoods, an apartment complex and a NWISD middle school. This means the total number of people exposed to the harmful chemicals in the air related to this proposed cement plant is extensive. 2) The number of cement and delivery trucks that will be driving on Haslet Ronaoke Rd on a daily basis also introduces a high level of exhaust fumes to our neighborhood. 3) The exposure to both the chemicals/products used in the cement and the exhaust fumes will be detrimental to the heath of everyone In the vicinity. Most cement plants I have seen such as the one up Interstate 35 are NOT located within an easy walk of populated residential areas. Additionally, the company/person applying for the permit have been purposefully deceitful in the posting of the notification of this permit. First the sign was well hidden by tress. Then when they got complaints about it being hidden they moved it out to a more noticeable location but the phone number posted was incorrect. This shows without a doubt that the person applying had something to hide, knowing that this was not a business the local population would support and had to use deceit to try and slip it by without notice. Let me tell you, they failed. All local neighborhoods who could be impacted depending on the proximity and varying Texas winds have been alerted and we expect a sizeable attendance for the meeting on 11/16. Additionally, I will say that as a resident who spent her entire childhood with asthma, I am more susceptible than most people to impact from exposure to the toxins/dust that would be created by this plant. I do plan on speaking to that at the meeting. Thank you, Dana Walter

COMMENTS:I live at 14151 allen tr Roanoke. There i a permit being sought for this batch plant. I live less tahn 3/4 mile from this site. Tidwell Middle school just opened across the strett from site.Due to traffic and school children this is not a good site. There are a subdivision less than 100 yards from this location. The street is only 2 lanes wide in and out of location. Our roads will not be able to handle the weight of this kind of truck traffic. The pollution from this plant could have a effect on air and water in this area. The water run off from plant would go into Henretta creek. The creek runs into lake Grapevine, This batch plant is to close to houses and schools(less than 100 yards).Our quality of life will be changed if approved. There is a batch plant at the corner of Old Denton Rd and Hwy 170 that is closed and for sell.This is less than 2 miles away. This location is next to a major highway which does not effect the safety of school children. There is no houses across street from batch plant that is for sell. The

I am personally worried that this man is allowing a company to use his land for something that can cause people (young children) health issues that could be prevented. I don't want my 7 1/2 month old son to have to stay inside to play because of all the dust that this cement batch company will accumulate. ~~I don't even know it was~~ I shouldn't be about what is convenient for a company but the health issues for people (children, pets, etc.)

COMMENTS: We vehemently oppose. We have just invested in a new home in a new community which is less than 1/4 mile away from the proposed site. This is a residential community. We do NOT want to live next to a nasty and toxic industrial site. Quality of life and property values will be negatively impacted. Deny the application. The cement plant business model is one of disdain for the environment and contempt for public health and safety. Cement plants are toxic and operate in TX in flagrant violation of State and Federal air quality laws. A cement plant located at Midlothian, TX is known to operate in perpetual violation of federal EPA regulations, choosing to pay a small fine daily to continue operating out of compliance. That arbitrary action places the health and welfare of those in the surrounding area at risk. The Midlothian model is not an aberration. It is the industry standard. This proposal places the health and safety of our children and our community at risk. The proposal is harmful to our community and to development agendas within the Alliance corridor long term. The proposal is patently offensive and unconscionable. Do NOT approve.

COMMENTS: I am extremely concerned about this permit for a concrete batch plant right in the middle of our community, homes, and schools. I am concerned for various reasons. The major concern is the traffic safety issues for both the residence of Ranches East and most importantly the school kids whom are across the street. The road will not be able to handle the 600 truck trips being made a day. It is bad enough. I am speaking for my family and others stating that we do not want this permit to go through but feel that this would cause our community to be in harms way. Plus it doesn't help make the community attractive for those who try to sale their house later on or those who would like to build here. Please take our concerns into consideration and give us feedback. Thanks in advance, Jeffery R. Wolf
