Dear Sirs;

We request a contested case hearing on the Water use Permit, applied for by Upper Trinity Regional Water, Application 5821, to construct and maintain Lake Ralph Hall on the North Sulphur River.

Our properties are located in the Sulphur River Basin, approximately forty miles east of the reservoir site.

The wildlife mitigation issue has not been addressed and we know it may negatively affect our properties as well as illiminate jobs in our families.

We have witnessed the negative impact the Jim Chapman Lake has had on the recreation of the Sulphur River in our area. Fishing has practically disappeared and the level of the water in the river will not enable you to travel in a small boat.

Thank you,
Citizens of Cuthand Community

Dear Sirs:

We request a contested hearing of the Upper Trinity Regional Water District, Permit 5821.

This action would take our farms and cattle. Most of this land has been past down from generation to generation. Our land is our livelihood on which we and our ancestors have worked all our lives. It would take away our recreation such as swimming and horseback riding. Our land is some of the untouched land that hasn't been affected by modern society.

Where will the wildlife go? Please help us preserve this land. It's a shame that all children can't experience the simple life of living here as my children experience it. They hear the birds sing, the frogs croaking on a summer night, the peace and quiet of this land, and they feel safe.

Please consider this request. Our land is ten miles from the Sulphur River. We live right between the North and South Sulphur Rivers in Delta County.

Yours truly,

Patsy Wicks
