Dear Sir or Madam:

I wish to notify you of my opposition to the proposed Brazos Valley Disposal Facility, MSW Permit Application No. 2376. This is the wrong site for this facility and would be a danger to our suburban neighborhood because of the pollution of our air and water. It will be unsightly and only 1300 feet from a major highway.

My address is: 1516 Hawk Creek Dr
College Station 77848

COMMENTS: The planned industrial landfill planned for the Brushy area is going to destroy an entire community. Though it may meet the TCEQ's technical requirements- the community next to it and the subdivisions near it will be ruined. It's not just the heavy truck traffic that will tear up roads, and the 11 ft planned eyesore structure just 1300 feet from Hwy #60, but the environmental hazards of such a large project on a small piece of land within a residential community. This project needs to be moved to a rural area.

Re: Notice of Application and Preliminary Decision for Municipal Solid Waste Permit – Proposed Permit No. 2376

Ms. Bohac:

I am writing to inform you that on May 24th, the College Station City Council unanimously adopted Resolution 05-24-12-06 requesting that the Texas Commission on Environmental Quality schedule a public meeting concerning a proposed municipal solid waste permit for the Brazos Valley Disposal Facility.

While the proposed facility's location is within the College Station Extraterritorial Jurisdiction, the Council believes it is important for adjacent property owners, and College Station residents to fully understand the purpose, design and ultimate impacts the proposed facility will have.

A copy of the resolution is attached to this letter. I appreciate you taking the time to consider the City Council's request. Please do not hesitate to contact me at 979-74-3500 should you have any questions.

Respectfully,

Nancy Berry
Mayor

RESOLUTION NO. 05-24-12-06

A RESOLUTION OF THE CITY COUNCIL OF THE CITY OF COLLEGE STATION, TEXAS, REQUESTING THE TEXAS COMMISSION ON ENVIRONMENTAL QUALITY EXECUTIVE DIRECTOR TO SCHEDULE A PUBLIC MEETING CONCERNING PROPOSED MUNICIPAL SOLID WASTE PERMIT NO. 2376 TO OPERATE THE BRAZOS VALLEY DISPOSAL FACILITY.

WHEREAS, CCAA, LLC has applied to the Texas Commission on Environmental Quality for a Permit to operate the Brazos Valley Disposal Facility, a Municipal Solid Waste Type IV disposal facility; and

WHEREAS, the facility is proposed to be located at 8825 Stewart Meadow, College Station Texas 77845 in Brazos County Texas; and

WHEREAS, the proposed facility location is within the City of College Station Extraterritorial Jurisdiction; and

WHEREAS, the proposed facility could significantly affect the quality of life for adjacent residents and property owners within the City of College Station Extraterritorial Jurisdiction; and

WHEREAS, on May 1, 2012, the Texas Commission on Environmental Quality Executive Director issued a Notice of Application and Preliminary Decision for a Permit to operate the Brazos Valley Disposal Facility deeming that the permit, if issued, meets all statutory and regulatory requirements; now, therefore,

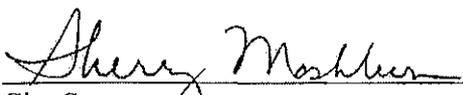

BE IT RESOLVED BY THE CITY COUNCIL OF THE CITY OF COLLEGE STATION, TEXAS:

PART 1: That the City Council hereby requests that the Texas Commission on Environmental Quality Executive Director schedule a public meeting to hear comments on the proposed permit to operate the Brazos Valley Disposal Facility.

PART 2: That this resolution shall take effect immediately from and after its passage.

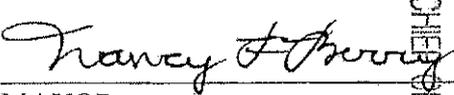

ADOPTED this 24 day of May, A.D. 2012.

COMMENTS: I am a home owner and a small business owner living adjacent to the proposed dump site. I am very concerned for many reasons. 1) One of which is that the health of my family and the other families in our neighborhood will be dramatically affected. Our subdivision is located on the North side of the dump site. We know that if this dump is approved, with the prominent South wind in this area most of the year, our families will be exposed to the asbestos and other unhealthy old construction materials that will be dumped there. Our air quality will be terrible and our lives in danger from the affects of this exposure constantly. This could lead to unwanted health issues, and then litigation. 2) I am also concerned allowing a dump to be build next to our neighborhood will only further damage our property values, which have already be depressed due to the bad economy. Many of us are counting on this to be part of our retirement investments portfollo. This would simply pour salt on the wound for those who have already seen their 401K and other Investments decline dramatically the past few years. I have been in contact with many of the other families in our subdivision next to this site and we are strongly opposed. We will be at every meeting for our family's health and future. PLEASE DON'T approve this permit, that could further damage the lives of hard working Americans in our community!

Why not use fill material to fill-in the current pit and then recover the use of that level land for productive use. Then an elevated solid waste pile can be developed farther away from this area expected to develop in residential and biomedical manufacturing operations? The long term development of this area appears to have been overlooked by this plan.

COMMENTS: I am opposed to this proposed landfill and respectfully request the commission to vote against the permit. This community has been subject to several projects over the last decade that have degraded the quality of life and negatively impacted property values. These negative projects include a concrete plant which has resulted in concrete waste piles and gravel all along HWY 60; an oil services company with heavy trucks driving up and down the highway; a county trash collection facility; mining for sand resulting in sand and gravel all over the road; and the current recycling facility. These projects have added noise, dust, and possible contamination of ground water. This list does not include the attempt of Texas A&M University to locate a pig farm in the area about 10 years ago which was ultimately stopped after the community was forced to file a lawsuit in district court. Additionally, this project will result in several trucks an hour hauling construction debris driving through the heart of the to be developed bio-corridor between the Texas A&M Health Science Center located on HWY 47 (off HWY 60) and Texas A&M University. The State of Texas' (under Governor Perry's leadership) has invested millions of dollars to begin the develop the bio-corridor (investment in TAMU for the Texas Institute of Genomic Medicine and the Texas A&M Preclinical Studies Institute) which has resulted in the initial award of a BARDA grant which is expected to have an economic impact to Texas, and this area, of well over \$1 billion dollars. Allowing a landfill to operate just west of the bio-corridor would be a detriment to additional investment to the west of the bio-corridor bringing further economic harm to the residents of the Brushy Community. Lastly, the cities of Bryan and College Station have recently opened a new landfill in Grimes county with adequate capacity for the immediate as well as future needs of the area, therefore, this facility is not necessary.

The Texas Commission on Environmental Quality TCEQ
Landowner Charles Mancuso

112 feet height Easterwood Airport Bio Medical Corridor

1. A portion of the property lies within the 100 year floodplain, a Letter of Map Revision will need to be submitted to FEMA for the large area of fill proposed in the floodplain. The Letter of Map Revision will need to be submitted by the owner.
2. I have serious concerns about the ability of our roadways around the landfill to withstand the increased truck traffic seeking ingress to and egress from the landfill. We can invest the capital to provide for the increased weights and increased roadway widths – we just will have to re-prioritize our Pct. 4 projects (if the landfill is approved and has your support).
3. Surface Runoff Water Quality is more of a Health Department concern than a Road and Bridge item, but it is something that the County probably should expect to monitor. TCEQ does not have the staff to monitor these local type issues, but they may expect the County to monitor it (a similar type of issue which we just experienced with the County Underground Fuel Tanks).
4. the proposed height and location of the landfill
5. invested millions of dollars in the western part of Bryan-College Station in hopes of luring biomedical companies to the area.

Dear Sir or Madam:

I wish to notify you of my opposition to the proposed Brazos Valley Disposal Facility, MSW Permit Application No. 2376. This is the wrong site for this facility and would be a danger to our suburban neighborhood because of the pollution of our air and water. It will be unsightly and only 1300 feet from a major highway.

My address is: ~~113~~

Dear Sir or Madam:

I wish to notify you of my opposition to the proposed Brazos Valley Disposal Facility, MSW Permit Application No. 2376. This is the wrong site for this facility and would be a danger to our suburban neighborhood because of the pollution of our air and water. It will be unsightly and only 1300 feet from a major highway.

My address is: 404 May St.
Bryan, TX
77802

cc

My email address is: sharptll@yahoo.com

Sincerely,

J. J. [Signature]

Dear Sir or Madam:

I wish to notify you of my opposition to the proposed Brazos Valley Disposal Facility, MSW Permit Application No. 2376. This is the wrong site for this facility and would be a danger to our suburban neighborhood because of the pollution of our air and water. It will be unsightly and only 1300 feet from a major highway.

My address is: 8701 VINCENT RD
Collegestation 77845

My email address is: _____

Sincerely,

Isreal Lee Green

COMMENTS: I have under contract, as buyer, 290 acres (current owner is Roseanne Foster Albritton) immediately north of the proposed landfill site. I have the following comments and requests regarding the proposed landfill, permit number 2376. Thank you for this opportunity to comment. Hours of Operation -- Noise & Light Pollution My concern is the noise levels and light pollution spilling over to adjoining properties during night operations, particularly after the mound climbs above ground level to 90 feet (399msl). I request that the permit limit operations from the requested 24/7 operations and state that the permitted hours of operation to be within normal standards for landfills of 7 am to 7pm weekdays and half day (daytime) operations on one weekend day. "Part IV - Site Operating Plan" 4.6 Facility Operating Hours §330.135. The facility will be authorized for waste acceptance and operation 24 hours per day, 7 days per week. These operating hours include the times when the facility may transport materials on- or off-site, when the on-site waste management activities may be conducted, when heavy equipment may operate, and when the facility may conduct any other activities or operations. Part II 2.1.2 Projected Waste Acceptance Rate Based on the current operations at the adjacent recycling center, approximately 200 tons per day (500 cubic yards, assuming an in-place density of 0.4 tons per cubic yard per 30 TAC §330.675(a)(2)(B)(iii)) of waste by-product per day is generated. Based on the anticipated growth of the recycling facility and the addition of the public and private haulers, it is estimated that the waste disposal rate will range from 400 tons per day (1,000 cubic yards per day) in the first year of operation to 800 tons per day (2,000 cubic yards per day) projected for the fifth year of operation, therefore, the estimated maximum annual waste acceptance rate for the facility is 800 tons per day (2,000 cubic yards per year), assuming 286 days of operation per year (5 ½ days per week). However, this estimated disposal rate may change during the life of the facility and should not be considered as a limit on the rate of waste that may be received by the facility. Detailed volume and site life calculations are included in Part III, Attachment 3, Appendix A. Traffic My concern is for the possible increase of truck traffic on Lacy Well Road, a gravel road, generating a lot of dust. I request that the permit state that Lacy Well Road cannot be used. Part III Site Development Plan, 2.1 2nd paragraph "The proposed Brazos Valley Disposal Facility (BVDF) will share the existing entrance of the adjacent Brazos Valley Recycling (BVR) operation" [currently via Stewart's Meadow]. This is mentioned several times and indicates they cannot use Lacy Well Road. Noise, dust and odors My concern is operating equipment such as screens, grinders, and crushers that would be loud and cause dust. Odors can be associated with processing and blending materials. I request that the permit state that no processing of materials shall take place within the landfill property. Part III Site Development Plan, 2.2 4th paragraph "Processing of materials will not occur within the landfill boundary". Odors & Types of materials being brought to landfill This application asks for Class III industrial solid waste, Class II that is like construction/demolition waste, yard waste, man-made inert materials, and scrap tires in addition to the boiler plate wastes listed in §330.5(a)(2). The yard waste and brush are the likely culprits for odors.....although the man-made inert materials include plastics that could blow in the wind. Of course the roll-off box that is sent from a new home construction site will contain a little bit of everything. Theoretically it stops at the recycling center first and gets sorted, but who really knows? I request that the permit state that Class III and Class II materials that are likely to produce odors be restricted from the landfill site. Part 1, 2.2.1 Waste accepted at the facility is limited to brush, construction-demolition waste, rubbish (trash) that is free of putrescible wastes and free of household waste, inert material, non-regulated asbestos-containing material (non-RACM), Class 3 industrial solid waste, Class 2 industrial solid waste consistent with the limitations established in 30 TAC §330.5(a)(2), man-made inert material, yard waste, scrap tires that have been split and quartered or shredded and do not come from a tire disposer/recycler who is reimbursed from the state Waste Tire Recycling Fund, and dredged material after it has been tested to determine that it is not a special waste. In §330.5(a)(2) there is no mention of Class II industrial solid waste.....as there would not be since the rule is for

msw

municipal waste, not industrial waste. However, I take that to mean that only Class II waste likethe solids mentioned above can be accepted. What is coming in that might catch on fire? Part IV Site Operating Plan, 4.3.2.1 Landfill Working Face, 4th Paragraph, "A truck discovered.....to be carrying a load of waste on fire or smoldering....." There is some concern with this issue. What are they bringing in that will blow away? Part IV Site Operating Plan, 4.8 Control of Windblown Solid Waste and Litter §330.139

I have under contract, as buyer, 290 acres (current owner is Roseanne Foster Albritton) immediately north of the proposed landfill site. I have the following comments and requests regarding the proposed landfill, permit number 2376. Thank you for this opportunity to comment.

Hours of Operation -- Noise & Light Pollution

My concern is the noise levels and light pollution spilling over to adjoining properties during night operations, particularly after the mound climbs above ground level to 90 feet (399msl).

I request that the permit limit operations from the requested 24/7 operations and state that the permitted hours of operation to be within normal standards for landfills of 7 am to 7pm weekdays and half day (daytime) operations on one weekend day.

“Part IV – Site Operating Plan” 4.6 Facility Operating Hours §330.135. The facility will be authorized for waste acceptance and operation 24 hours per day, 7 days per week. These operating hours include the times when the facility may transport materials on- or off-site, when the on-site waste management activities may be conducted, when heavy equipment may operate, and when the facility may conduct any other activities or operations.

Part II 2.1.2 Projected Waste Acceptance Rate

Based on the current operations at the adjacent recycling center, approximately 200 tons per day (500 cubic yards, assuming an in-place density of 0.4 tons per cubic yard per 30 TAC §330.675(a)(2)(B)(iii)) of waste by-product per day is generated. Based on the anticipated growth of the recycling facility and the addition of the public and private haulers, it is estimated that the waste disposal rate will range from 400 tons per day (1,000 cubic yards per day) in the first year of operation to 800 tons per day (2,000 cubic yards per day) projected for the fifth year of operation, therefore, the estimated maximum annual waste acceptance rate for the facility is 800 tons per day (2,000 cubic yards per year), assuming 286 days of operation per year (5 ½ days per week). However, this estimated disposal rate may change during the life of the facility and should not be considered as a limit on the rate of waste that may be received by the facility. Detailed volume and site life calculations are included in Part III, Attachment 3, Appendix A.

Traffic

My concern is for the possible increase of truck traffic on Lacy Well Road, a gravel road, generating a lot of dust.

I request that the permit state that Lacy Well Road cannot be used.

Part III Site Development Plan, 2.1 2nd paragraph “The proposed Brazos Valley Disposal Facility (BVDF) will share the existing entrance of the adjacent Brazos Valley Recycling (BVR) operation” [currently via Stewart’s Meadow]. This is mentioned several times and indicates they cannot use Lacy Well Road.

Noise, dust and odors

My concern is operating equipment such as screens, grinders, and crushers that would be loud and cause dust. Odors can be associated with processing and blending materials.

I request that the permit state that no processing of materials shall take place within the landfill property.

Part III Site Development Plan, 2.2 4th paragraph “Processing of materials will not occur within the landfill boundary”.

Odors & Types of materials being brought to landfill

This application asks for Class III industrial solid waste, Class II that is like construction/demolition waste, yard waste, man-made inert materials, and scrap tires in addition to the boiler plate wastes listed in §330.5(a)(2). The yard waste and brush are the likely culprits for odors.....although the man-made inert materials include plastics that could blow in the wind. Of course the roll-off box that is sent from a new home construction site will contain a little bit of everything. Theoretically it stops at the recycling center first and gets sorted, but who really knows?

I request that the permit state that Class III and Class II materials that are likely to produce odors be restricted from the landfill site.

Part 1, 2.2.1 Waste accepted at the facility is limited to brush, construction-demolition waste, rubbish (trash) that is free of putrescible wastes and free of household waste, inert material, non-regulated asbestos-containing material (non-RACM), Class 3 industrial solid waste, Class 2 industrial solid waste consistent with the limitations established in 30 TAC §330.5(a)(2), man-made inert material, yard waste, scrap tires that have been split and quartered or shredded and do not come from a tire disposer/recycler who is reimbursed from the state Waste Tire Recycling Fund, and dredged material after it has been tested to determine that it is not a special waste.

In §330.5(a)(2) there is no mention of Class II industrial solid waste.....as there would not be since the rule is for municipal waste, not industrial waste. However, I take that to mean that only Class II waste likethe solids mentioned above can be accepted.

What is coming in that might catch on fire?

Part IV Site Operating Plan, 4.3.2.1 Landfill Working Face, 4th Paragraph, "A truck discovered.....to be carrying a load of waste on fire or smoldering....."

There is some concern with this issue. What are they bringing in that will blow away?

Part IV Site Operating Plan, 4.8 Control of Windblown Solid Waste and Litter §330.139

Dear Sir or Madam:

I wish to notify you of my opposition to the proposed Brazos Valley Disposal Facility, MSW Permit Application No. 2376. This is the wrong site for this facility and would be a danger to our suburban neighborhood because of the pollution of our air and water. It will be unsightly and only 1300 feet from a major highway.

COMMENTS: I wanted to go on record as opposing this permit. I feel like the people that will be affected by this were not notified. I know the law states that owners within a certain distance must receive letters, but if you have property that doesn't adjoin the proposed project you don't receive any notification. This landfill will affect a lot of property owners that would have been at the first meeting if they had received proper notification. Our county already has a facility that is in operation off of Highway 30 that is an excellent facility that is suitable for their needs. I'm also concerned about ground water contamination. Many wells in the area are existing at the depth he is proposing to start the dumping. Clay liners are not sufficient enough to hold back the leakage. Thank you for your consideration.

An Eleven-Story High Trash Dump Is About To Be In Our Neighborhood

Dear Neighbor:

Like you, I cherish the fact that my neighborhood combines the proximity to city conveniences with the beauty and tranquility of the countryside. But the quality of life we enjoy in this peaceful part of the Brazos Valley is being threatened. If the powers that be have their way, we can say goodbye to many of the benefits we've come to love in our rural neighborhood.

I don't want to see that happen—and I'm certain you don't, either. So I'm asking you to join me in fighting the construction of a massive dump site that will bring noise, dust, increased traffic and potential water pollution to our homes.

On July 19, 2012, the Texas Commission on Environmental Quality (TCEQ) called a public hearing to discuss the proposed development of this solid waste dump site. The permit request allows dumping waste to a height of 11 stories in an area roughly 10 times that of Kyle Field.

Our local Solid Waste Advisory Board—a committee of the Brazos Valley Councils of Government—unanimously opposed the request. The TCEQ has ignored the recommendation and plans to go ahead with this dump site.

This site will negatively and permanently impact our quality of life in this neighborhood, and our voices must be heard.

The proposed 42-acre dump site is on the north side of Highway 60, one-half mile west of the Precinct 4 Brushy Volunteer Fire Station. Concerns about the site include negative effects on our property values and long-term maintenance issues. Large truck and heavy equipment traffic on Highway 60 and Jones Road is estimated to increase from 49 additional vehicles per day to more than 196 by the seventh year of the dump's operation.

And, of course, there's the pollution that inevitably accompanies a project like this. With such a massive size, this is not a facility that can be hidden by trees. It will be a huge, ugly addition to the beauty we've come to appreciate in this area. Most of the material scheduled to be dumped here consists of construction debris, resulting in a constant assault on our air quality. Water pollution and other health and environmental threats are also of critical concern.

Plans to construct this dump site have been in the works for more than a year. News of the project, however, has been suspiciously silent. Only recently were project plans revealed to those of us who would be most impacted by the dump's operation.

Notification of the July 19 TCEQ meeting was sent only to the 23 property owners within one-quarter mile of the proposed dump site---the minimum required by law. No consideration or direct communication was given to the hundreds of other residents who live within a mile or two of the proposed trash dump. Support for the project was sought and gained, however, from several businesses with non-resident owners. Regrettably, most of these business owners selfishly ignored the impact their support would have on the people who actually live in the area.

Publicity for the July 19 meeting consisted of an announcement in the classified section of *The Eagle* and a short statement on KBTX news. The meeting was therefore poorly attended and had more attendees speak in favor of the dump than against it.

We cannot let that happen again.

Although the permitting process by the TCEQ is already under way, we still have the opportunity to voice our concerns and defeat this self-serving scheme. If those who support the dump site project get their way, this could very well be a catastrophic blow to the value and quality of life in our neighborhood—forever.

A meeting for concerned citizens will take place at 7 p.m. on Tues., Aug. 28, at the Precinct 4 Brushy Volunteer Fire Department. This is our opportunity to voice our opposition to this outlandish proposal.

A large turnout is our best chance for success.

Included is a sample letter of notification to the TCEQ of our opposition to the dump.

Dear Sir or Madam:

I wish to notify you of my opposition to the proposed Brazos Valley Disposal Facility, MSW Permit Application No. 2376. This is the wrong site for this facility and would be a danger to our suburban neighborhood because of the pollution of our air and water. It will be unsightly and only 1300 feet from a major highway.

My address is: 9893 Runaway Road
College Station, TX
77845

My email address is: Sdeeolson@yahoo.com

Dear Sirs;

The residents of the Franklin Estates community near College Station are vehemently opposed to MSW Permit Application No. 2376 and will do everything in our power to see that this application is rejected.

Please cancel any permitting that may be underway. Please see the enclosed letter to the editor of the Bryan/College Station Eagle, from E. Dean Gage, which clearly states the reasons for our opposition to this permit.

Again, we the residents of this area, less than 2 miles from the proposed site and the people that will be most impacted by this dump, are united in our opposition to this permit and say **NO to MSW Permit Application No. 2376.**

Best regards,

Bob and Sue Ann Palmore

Landfill site wrong, wrong, wrong

By E. DEAN GAGE
Special to *The Eagle*

The *Eagle's* editorial on Sept. 9, the unanimous opposition of the Solid Waste Advisory Board of the Brazos Valley Council of Governments and the letter by Andreas Kronenberg (*Eagle*, Sept. 26) were right on target regarding the unbelievable proposed location for the Brazos Valley Disposal Facility in the middle of our populated area and rural subdivisions just off F.M. 60 West.

In real estate, the operating principle is location, location, location. It is no different for this proposed dump site.

Location should be the operating principle. Our health, safety, historic home life, traffic, noise, air pollution and lifetime investments by hundreds of residents would be impacted dangerously and permanently if this location is approved.

It is inconceivable, incomprehensible and irresponsible that this specific location for an industrial dump site should even be proposed and considered. It is only 1,300 feet from F.M. 60, a major corridor and window to College Station and Texas A&M University. It is less than two miles from the ever-expanding College Station city limits and within the city's extraterritorial jurisdiction.

The location is in the middle of a populated area of several hundred residents, three churches, a daycare center and the historic Brushy Community. While there may be a need for this dump, it should be given approval only for a more remote location.

The executive director of the Texas Commission on Environmental Quality (TCEQ) now has ruled that the application for this dump meets the technical requirements. This still does

not meet the minimum requirements, but are they appropriate and right? This location is another example of one that is not. Residents may remember the Elf Atochem disaster in Bryan which did not seem to pose health hazards when built, but later became a horrific albatross impacting the lives and health of many residents.

The whole application process for this dump has been flawed in relationship to the residents surrounding the location and it proceeded almost in secrecy until it was exposed that the dump would be built to a height of 11 feet or some 11 stories high. Only residents within one-quarter mile from the location were sent direct communications about the one and only public hearing on July 19.

If the dump were to be grade level (not 11 stories), the legal notification in *The Eagle* might have sufficed. If all safety and health hazards could be met for a grade level dump site in the existing sand pits, most residents could be accepting. But, a dump the height of Kyle Field will impact hundreds of residents for more than a mile or two adjacent to the location.

Greater dangers and problems will occur when the dump site comes out of the ground and starts to grow to its proposed 11-story height. The buffer zone for an 11-story dump of 32 acres on a site of only 42 acres may in time prove to be inadequate. Anyone can observe how this would impact us by driving on Interstate 45 North past the city of Ennis and seeing the unsightly dump mountain, not even in a populated area. While the solid waste material there might be different than this location, the dump mountain is not.

When our concerned residents became aware of this application and the magnitude of the project, a homeowners meeting was held on Aug. 28 with more than

our homeland.

Does the proposed dump owner think the homes in the minority community closest to the site are not worthy to be considered or that the residents would not have the know-how and finances to resist and fight?

The owner should find a more appropriate location or propose and accept a variance to only fill the dump site to grade level which, in our opinion and research, may still hold health and environmental dangers.

It is interesting to note that the owner does not live near the dump location and can retreat to his home and escape the health dangers, noise, dust, potential water runoff and heavy truck traffic he would create. Many of our concerned residents who live south of F.M. 60 and within a mile or two of this location and who have invested their life's savings into beautiful homes in the Franklin Estates and other rural subdivision would not have the opportunity to escape unless they sell their homes and move.

Is this right? No! We selected our rural subdivisions just as our neighbors in the city to have good neighbors, beautiful landscapes and quiet streets. When we invested our hard earned money over many years into our dream homes and family lifestyle, we never thought that we would be threatened by an 11-story high industrial waste dump.

This application (TCEQ No. 2376) was presented to the Solid Waste Advisory Board of the Brazos Valley Council of Governments, which unanimously voted against approval. Why would TCEQ not do the same? Why has TCEQ let this move forward? Do local governments and their citizens not have any rights left? Have big money and politics overruled common sense and the integrity of public trust and local residency?

Unless there are known

an 11-story dump site in the middle of his neighbors?

An owner still could make plenty of money by moving the location to a more appropriate location. Money and goodwill toward neighbors, however, do not always go together.

Are behind-the-scenes factors moving this improper location forward?

Our concerned residents have asked, "Is this location being submitted at this specific time to receive the tons and tons of debris from the demolition of the Kyle Field decks?" No answer has been given to our knowledge. If this is to be the dump site, then take the refuse materials to the remote and unpopulated hundreds of acres on the west side of the Riverside Campus. If this is not the case and the location is to serve the whole Brazos Valley as the name suggests, then it still should be moved for all the right reasons and for regional industrial waste. This would be good responsible citizenship and a lot of goodwill demonstrated.

We can trust only that money and power politics outside our homeland in Brazos County are not driving this unsafe and inappropriate location when there are many remote alternative locations.

Our concerned residents are asking and petitioning TCEQ and the owner to take responsibility and do the right thing by not approving this location or to find a more appropriate remote location or an acceptable compromise for the benefit of everyone impacted.

This would save us all months of unnecessary confrontations, expenses, delays and unwanted media exposure.

There are many things that are right for the right reasons. There are many things that are wrong for the right reasons. This proposed dump location is wrong for the right reason: location, location, location.

RE: Landfill Permit # MSW-2376

To Whom It May Concern:

We are responding to the above mentioned landfill request with the following concern.

We strongly object to the proposed height of 112 feet. We feel 15-20 feet would be more appropriate. Our reason for objecting to the 112 feet is we feel this would greatly reduce our property value.

Please kindly respond.

In response to the County Commissioner's complaint about the increased road use, I believe that the landfill will actually reduce road use. From my understanding, debris is brought to the site & sorted. Debris that cannot be recycled is then transported to an off-site facility. Having a landfill on site will decrease traffic, save fuel & extend the life of the local municipalities' landfills.

Secondly, I would like to address people's concern over the height of the landfill. It was postulated that the height would pose a danger to Easterwood Field Airport, Kyle Field, the Oceanographer Building, & numerous cranes being used in nearby construction projects are all as close or closer than the landfill & pose no threat.

Finally, I would like to state for the record that I hold a B.S. & M.S. in Regional Ecology & mgmt, and I see no detrimental effects from this proposal.

Earl Lott, Director
Waste Permits Division
TCEQ
P.O.Box 13087
Austin, Texas 78711-3087

Re: Brazos Valley Disposal Facility - Brazos County
Municipal Solid Waste - Permit Application 2376

Dear Mr.Lott:

Although this letter is "late in the day" concerning the process of evaluating Permit Application 2376, I need to go on record concerning an air pollution problem likely to occur at the proposed landfill. As you can see, I live on Old Jones Road, less than a third of a mile from Mr.Mancuso's recycling plant and site for the proposed landfill. Even before the latter goes into operation, my neighbors and I have suffered from plumes of dust from the grinding of construction material at the recycling plant.

In April, 2011, I complained to Mr.Mancuso about this problem. He assured me that I would receive a letter from TCEQ explaining this matter to me. About a month later, when the problem recurred, I again complained and asked when I would receive the letter from TCEQ. Mr.Mancuso again reassured me that it was forthcoming. After a third incident, about a month later, with a similar result, I gave up, finally recognizing that Mr.Mancuso would do nothing about the problem.

I realized my mistake in not informing TCEQ about the problem after I attended meetings of neighbors concerned with the proposed landfill operation. If the grinding of construction materials at the recycling plant caused plumes of dust to invade nearby homes, grinding of tons of such material in the future will produce far more particulates in the atmosphere, which could cause many serious health problems. For this reason alone, the permit request for the landfill should be rejected, or the scale of operations curtailed, by not allowing the landfill to rise above the surface.

Sincerely yours,

Cora Rogers

EXECUTIVE DIRECTOR

Dear Mr. Covar,

I'm writing in regard to the "Brazos Valley Disposal Facility MSW Permit Application No.2376." Some of the information in this document is misleading since it states that only 12% of the land within one mile of the proposed facility is residential. This statement ignores the many families living near the proposed landfill site. Approximately twenty to thirty families live on Old Jones Road, and various side streets, within a half mile of the proposed facility, in addition to the few homes on Stewart's Meadow. These families live in modest homes and were not notified by letter from TCEQ about the request for an application for the solid waste disposal facility. Sir, with all due respect, TCEQ is responsible for not informing residents of a landfill that will greatly influence their daily lives.

Moreover, there are approximately fifteen to twenty families along highway 60 within a mile from the proposed landfill. A little over a mile to the west, is the Brushy Community, one if not the oldest black community in Brazos County, with a church and cemetery, and well over fifty families, many of whose residents are in their sixties, seventies and older, and also suffer from a variety of ailments. On the opposite side of the highway, the side where the day care facility is located, close to a dozen families live on Lightsey, and Twelve Oaks, within a mile of the proposed landfill. Between a mile and a mile and a mile and a half, where I and many others reside, along River Road, Dogwood Trail, Las Robles, and Runaway, are another sixty or more families. Moreover, my next door neighbor, Mr. Storrs, has been battling lung cancer for several years. This facility will make his struggle to defeat this horrible disease even more difficult and problematic.

It does not take great imagination to understand how these families, especially children and the elderly, will be impacted by the landfill. The noise from the trucks to and from the facility, the dumping of their loads, the operation of earth moving equipment for many hours every day will cause terrible noise pollution and greatly disrupt their daily lives. The noise alone will cause great stress and increase their susceptibility to both physical and mental illness.

DUE DATE NRR

ARTS # 16096535

PM S Odil

MSW

Furthermore, since TCEQ does not have the manpower to frequently and regularly supervise the operation of this facility, which will include asbestos and other materials containing a variety of chemicals, residents have only the operator's assurance that the rules for handling these contaminants will be strictly followed. Under the pressure of disposing of up to 200 tons of waste materials a day, and no TCEQ investigator in sight, it is not unreasonable to assume that much will go wrong. No one from TCEQ will be on site to prevent this disaster from happening. The men, women and children who live in this area, myself included, and I am 84, will pay a heavy price physically and psychologically from the noise, contaminants and the knowledge that we are second class citizens, for this landfill will turn our area into one huge, operational garbage dump. Beyond a doubt, unlike many friends and acquaintances, we will have the misfortune not to live near golf courses and country clubs.

I plead with you, in the name of justice, fair play and common decency, not to approve the request for a license and not to impose this huge landfill on the good citizens living in this area of Brazos County.

Sincerely,

A handwritten signature in cursive script that reads "Albert Schaffer".

College Station, Texas 77845

Re: Brazos Valley Disposal Facility – Brazos County
Municipal Solid Waste (MSW) – Permit Application No. 2376

Dear Dr. Schaffer:

Thank you for your letter, dated August 21, 2012, to Texas Commission on Environmental Quality (TCEQ) Executive Director, Zak Covar, concerning the permit application for the proposed Brazos Valley Disposal Facility located at 8825 Stewarts Meadow, College Station, Texas 77845. Your letter was forwarded to me for response.

The comment period for this application ended on June 19, 2012. However, this does not end your opportunity to be a part of the public participation process. You may still request a Motion for Reconsideration and/or a Contested Case Hearing.

My staff delivered a copy of your letter to the TCEQ Office of the Chief Clerk so that you will be included on the Interested Parties list for this application. Within the next two weeks, the Executive Director's Response to Comments (RTC) will be published and mailed to you and to all parties who have identified themselves as Interested Parties. The RTC will include specific instructions for requesting a Motion for Reconsideration or a Contested Case Hearing.

The permit application has been found to be technically complete by my staff, indicating that it meets all applicable rules and technical requirements. As part of this review, staff evaluated application information related to some of the concerns raised in your letter. Regarding notice, MSW rules require notification of property owners within one-quarter mile of the proposed permit boundary. To reach others beyond this distance, signs and newspaper publication of the notice are required.

The information in your letter regarding residences proximate to the proposed facility is either addressed in the application or is not required by our rules. The application is available online at <http://bvrpermits.weebly.com> or at the Larry J. Ringer Public Library at 1818 Harvey Mitchell Parkway South. Please see Parts I/II, Figure 3-1. The residences to which you refer on Old Jones Road and Stewarts Meadow appear to be illustrated on this figure. Land use evaluation beyond one mile is not required by our rules.

With regard to your traffic concerns, TCEQ regulations require MSW landfill applicants to provide data on the availability and adequacy of roads that would be used to access the site; provide data on the volume of vehicular traffic on access roads within one mile of the proposed facility, both existing and expected, during the expected life of the proposed facility; and project the volume of traffic expected to be generated by the facility on the access roads within one mile of the proposed facility. The applicant is also required to coordinate with the Texas Department of Transportation for traffic and location restrictions and provide this information to the TCEQ.

P.O. Box 13087 • Austin, Texas 78711-3087 • 512-239-1000 • tceq.texas.gov

How is our customer service? tceq.texas.gov/customersurvey

Dr. Albert Schaffer

Page 2

September 6, 2012

The traffic information provided in the application meets rule requirements. Please note that the traffic volume data in the application addresses vehicles coming to and going from a recycling facility located adjacently to the proposed landfill. The only waste going to the landfill will be rejected materials from the adjacent recycling facility. These materials would be transported from the recycling facility to the adjacent landfill rather than to some other authorized facility.

You are correct that TCEQ investigators are not required to be present at MSW landfills on a daily basis. However, all complaints including but not limited to nuisance odor and dust will be investigated by TCEQ regional office staff. If this permit is issued and you or your neighbors observe any activity or condition that you feel is a violation of state rules or regulations, please contact the TCEQ Waco regional office at (254) 751-0335. You may also file a complaint online at: <http://www.tceq.texas.gov/compliance/complaints/index.html>.

The TCEQ appreciates your interest in environmental issues. If you have any questions concerning this matter, please contact Mr. Steve Odil of the MSW Permits Section at mail code MC 124, P.O. Box 13087, Austin, Texas 78711; telephone number (512) 239-4568.

RE: Brazos Valley Disposal Facility-Brazos County
Municipal Solid Waste (MSW)-Permit Application No.2376

TEXAS
COMMISSION
ON ENVIRONMENTAL
QUALITY
2012 SEP 26 PM 3:40
CHIEF CLERKS OFFICE

Dear Mr.Lott,

Thanks for your letter of September 6, 2012, responding to my concerns about the proposed solid waste landfill at Stewart's Meadow in Brazos County.

Essentially your letter stated that the applicant has met TCEQ's regulations for a solid waste landfill. From my standpoint, these regulations are technical and narrow and do not give proper weight to the health and safety concerns of residents, to say nothing of property devaluation, which is of no interest to TCEQ staff. They might feel otherwise if they lived close to the landfill.

You seem to justify TCEQ's inability, due to lack of staff, to frequently monitor operation of the landfill by putting the onus on residents to complain about serious irregularities or disturbances. But residents, as you know, lack the technical expertise and the equipment to detect conditions such as arsenic in the fill used to cover the waste, whether or not the containers of asbestos materials leak, and similar landfill features. Furthermore, if TCEQ lacks staff for monitoring operation of the landfill, one could hardly expect a staff member to respond quickly to resident complaints. Several days or weeks might elapse before an investigator arrived at the landfill. By that time, the conditions that troubled the residents might not be readily observable.

I'm also distressed by the fact that TCEQ ignores objections from the local COG, County Commissioner Cauley, The Eagle, as well as residents, which indicate that public opinion in the Twin Cities is firmly opposed to the landfill at Highway 60 and Old Jones Road. Needless to say, should the permit be granted, we will request a Motion for Reconsideration or a contested case hearing. We will continue to fight if we do not prevail at the contested case hearing.

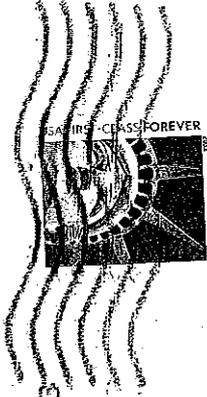

Sincerely,

Albert Schaffer

EXECUTIVE DIRECTOR

Dear Mr. Covar,

I'm writing in regard to the "Brazos Valley Disposal Facility MSW Permit Application No.2376." Some of the information in this document is misleading since it states that ~~only 12% of the land within one mile of the proposed facility is residential.~~ This statement ignores the many families living near the proposed landfill site. Approximately twenty to thirty families live on Old Jones Road, and various side streets, within a half mile of the proposed facility, in addition to the few homes on Stewart's Meadow. These families live in modest homes and were ~~not notified by letter~~ from TCEQ about the request for an application for the solid waste disposal facility. Sir, with all due respect, TCEQ is responsible for not informing residents of a landfill that will greatly influence their daily lives.

Moreover, there are approximately fifteen to twenty families along highway 60 within a mile from the proposed landfill. A little over a mile to the west, is the Brushy Community, one if not the oldest black community in Brazos County, with a church and cemetery, and well over fifty families, many of whose residents are in their sixties, seventies and older, and also suffer from a variety of ailments. On the opposite side of the highway, the side where the day care facility is located, close to a dozen families live on Lightsey, and Twelve Oaks, within a mile of the proposed landfill. Between a mile and a mile and a mile and a half, where I and many others reside, along River Road, Dogwood Trail, Las Robles, and Runaway, are another sixty or more families. Moreover, my next door neighbor, Mr. Storrs, has been battling lung cancer for several years. This facility will make his struggle to defeat this horrible disease even more difficult and problematic.

It does not take great imagination to understand how these families, especially children and the elderly, ~~will be impacted by the landfill.~~ The noise from the trucks to and from the facility, the dumping of their loads, the operation of earth moving equipment for many hours every day will cause terrible noise pollution and greatly disrupt their daily lives. The noise alone will cause great stress and increase their susceptibility to both physical and mental illness.

Dear Sir or Madam:

I wish to notify you of my opposition to the proposed Brazos Valley Disposal Facility, MSW Permit Application No. 2376. This is the wrong site for this facility and would be a danger to our suburban neighborhood because of the pollution of our air and water. It will be unsightly and only 1300 feet from a major highway.

My address is: *5597 LISTER Ln*

COMMENTS: My property is located directly across the street from this proposed solid waste management facility. I deeply oppose this facility in our neighborhood. I am sure that the mess that this company has created in our neighborhood with all of the digging of soil has already effected our property value enough. I was one of the first residence in this subdivision and have been dismayed about what this company has done to our neighborhood. I have documents from when I purchased the property that those plots were only to be used for a place of residence in the Stewart's Meadow subdivision. However, the plots were purchased for commerical use and in the process destroyed what could have been a pleasant community without the eye sore of "deep holes" surrounding nice homes. Please do not allow this commercial property in what should have been a nice suburban neighborhood.

RE: Application No. 2376 - Charles Mancuso
Dump Ground

TO WHOM IT MAY CONCERN:

I own property very close to the area where this dump wants to go in. This construction dump site is within the 2 mile limit that the City of College Station has jurisdiction. They refused to let me put in a mini storage unit or a RV park because of the Health Science Center that is directly behind my property. This construction dump location is going to be not only a eye sore for the Health Science Center and Community but it will pose a health hazard for the Brazos River and the underground water systems. It will also degrade all of the property in this area as well as lower our property value. Each year the County raises our property taxes by raising the value of our property. So, do you think that the County will lower the value of our property so the taxes won't be so outrageous? I seriously doubt it. I vote NO to MSW Permit Application No. 2376. Brazos County does not need another health problem. Please deny this request for this dump.

Sincerely,

Jim G. Welch

RE: Application No. 2376 - Dump Ground

TO WHOM IT MAY CONCERN:

My name is L. Scott Welch and I own property within 1½ miles of the site that is trying to get a permit No. 2376 to have a dump ground in Brazos County. I vote NO on this proposal due to health reasons from this dump. ==

Hoping this request for a permit will be denied, I remain

RE: Application No. 2376 - *Charles Mancuso*

TO WHOM IT MAY CONCERN:

I, Sylvia Welch, am a home owner at 4856 Raymond Stotzer Pkwy. College Station, Texas, Brazos County, and I wish to state that I vote NO on the dump ground that is wanting to go in near my residence due to the following:

1. Will devalue my home
2. Present a health problem
3. Too close to Brazos River
4. Dangerous materials may drain into this river bringing harm to wildlife as well as human life

I wish to vote NO to MSW Permit Application No. 2376:

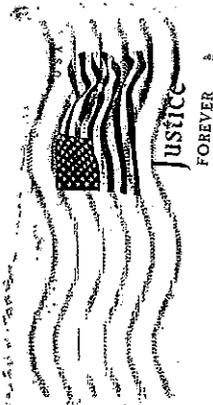

Hoping you will listen

Dear Sir or Madam:

I wish to notify you of my opposition to the proposed Brazos Valley Disposal Facility, MSW Permit Application No. 2376. This is the wrong site for this facility and would be a danger to our suburban neighborhood because of the pollution of our air and water. It will be unsightly and only 1300 feet from a major highway.

My address is: 2101 Pantera
Bryan, TX

My email address is: rafterzranch@hotmail.com

Sincerely,

Donna Batopek
