Subject: North Texas Municipal Water District Request Permit 53A – Lookout Transfer Station

Re: North Texas Municipal Water District Request Permit 53A – Lookout Transfer Station

To Whom It May Concern:

Several months back, I submitted communication via email requesting a Public Hearing regarding Permit 53A. This was in error, and I wish to correct myself now. What I wanted to request, and do so now, is a Public Meeting. Please take the appropriate action to correct the public record regarding this matter.

COMMENTS: December 29, 2011 Subject: TECQ Permit #53A To Whom It May Concern: The purpose of this correspondence is to request that the hearing regarding the above referenced permit be held in the City of Richardson. This will allow for full citizen input and permit the hearing committee to fully appreciate the interest and involvement of the community that is primarily impacted by the traffic, noise, and smell created by the transfer station. My wife and I reside in Richardson, and our home is approximately less than a half a mile from the transfer station. We experience the traffic generated by the heavy load trucks, hear the noise created by the goings-on of the transfer station, and get to smell the odors and smells generated by the trash. Our first-hand experience can only be effectively conveyed if the hearing is held in Richardson. Thank you for your attention to this request. Robert Vargas
