COMMENTS: Office of the Chief Clerk MC105 TCEQ PO Box 13087 Austin TX 78711-3087 TPDES Permit No. WQ0004857000 To Whom It May Concern, I request a public hearing on the above permit application and preliminary decision. As a resident of Eunice NM and as a concerned citizen I believe that more information needs to be forthcoming on the proposed changes to previous application and now a serious major amendment is proposed. I do not understand why a nuclear dump facility located in Texas wants to discharge fluids that are

MW

possibly and probably contaminated by radioactivity into my state of New Mexico. Are there no other alternatives? Can these contaminated materials be contained on site in Texas? Surely, as Waste Control Specialists continues to grow and accumulate more hazardous and nuclear waste, they have more than enough property on site, adjacent, or even across the highway in Texas to handle this water/fluid discharge from their own facility. Is the TCEQ willing to accept the discharge waters from the Urenco enrichment facility located within yards of WCS site into Texas? They also have the same issues, why must Eunice, New Mexico be the sacrifice zone for this contamination. It is only the beginning of the WCS open door policy for nuclear waste and hazardous materials, they must stand on their feet and take care of this issue on their side of the state line. My concern is and always will be for the community of Eunice NM and also my personal property and ground water. There are other ranches in and around this area and our water is at about 200 ft. I am very concerned when these facilities start discharging water into the environment, especially since it was never there before. I am also concerned about the lack of information coming from the NM Environment Department, that this entity would agree to something like this is certainly putting the industry before people and animals. Sincerely, Rose Gardner Box 514 Eunice, NM 88231 (nmlady2000@hotmail.com)
