COMMENTS: I want to take this opportunity to once again notify TCEQ that the information given on Permit # 97199 by FML Sand showing there are no people living with a mile of the proposed emission site of the proposed silica mine in Katemcy is completely WRONG. There are at least 6 different families within a mile of the given site for silica sand processing. Perhaps you could stop depending on the information being given to you by FML Sand and send a live person to look at the area where the plant is going to be. I would appreciate a

response to this request. I would like to know that TCEQ is more concerned about public health than the profits to be made by FML Sand Inc. And also a individual response from the project head as well as the board members that the information has been confirmed by a onsite study and not the papers sent by the applicant.
Thank you Sharon Thomason
