RE: Public comment on TCEQ Proposed Air Quality Permit number 111724 and Prevention of Significant Deterioration (PSD) Air Quality Permit PSDTX1374 – Indeck Wharton, LLC

Gentlemen:

I am writing to you as a person potentially adversely affected by the air contaminants and hazardous air pollutants to be emitted from a facility proposed to be built by Indeck Wharton, LLC about one-half mile south of the center of Danevang, Texas, Wharton County, Texas 77432. That location and its prevailing winds will place the facility in the heart of the Danevang community. Local citizens are currently negotiating with the owners of Indeck to build the facility on a more acceptable site available nearby.

Only very recently did I learn of this proposed project. It is my understanding that negotiations between Indeck Energy Services personnel and Wharton County officials took place behind closed doors and in secret and that residents and property owners were not informed. Legal notices were sufficiently disguised and/or lacked adequate disclosure so as to have gone unnoticed by local residents until very recently.

I am concerned about how these air contaminants and hazardous air pollutants might affect me as well as other area persons, particularly those with respiratory problems and/or other health issues.

Furthermore, I wish for the TCEQ to disclose to me all tests and studies that were performed to make certain that these hazardous plant emissions will not interact with any of the hundreds of chemicals already present on that and surrounding properties, thus creating a potentially more harmful substance.

Sincerely,

*Domingo Acuna Sr* (signature)

RE: Public comment on TCEQ Proposed Air Quality Permit number 111724 and Prevention of Significant Deterioration (PSD) Air Quality Permit PSDTX1374 -- Indeck Wharton, LLC

Gentlemen:

I am writing to you as a person potentially adversely affected by the air contaminants and hazardous air pollutants to be emitted from a facility proposed to be built by Indeck Wharton, LLC about one-half mile south of the center of Danevang, Texas, Wharton County, Texas 77432. That location and its prevailing winds will place the facility in the heart of the Danevang community. Local citizens are currently negotiating with the owners of Indeck to build the facility on a more acceptable site available nearby.

Only very recently did I learn of this proposed project. It is my understanding that negotiations between Indeck Energy Services personnel and Wharton County officials took place behind closed doors and in secret and that residents and property owners were not informed. Legal notices were sufficiently disguised and/or lacked adequate disclosure so as to have gone unnoticed by local residents until very recently.

I am concerned about how these air contaminants and hazardous air pollutants might affect me as well as other area persons, particularly those with respiratory problems and/or other health issues.

Furthermore, I wish for the TCEQ to disclose to me all tests and studies that were performed to make certain that these hazardous plant emissions will not interact with any of the hundreds of chemicals already present on that and surrounding properties, thus creating a potentially more harmful substance.

Sincerely,

*Evie Aragu* (signature)

RE: Public comment on TCEQ Proposed Air Quality Permit number 111724 and Prevention of Significant Deterioration (PSD) Air Quality Permit PSDTX1374 – Indeck Wharton, LLC

Gentlemen:

I am writing to you as a person potentially adversely affected by the air contaminants and hazardous air pollutants to be emitted from a facility proposed to be built by Indeck Wharton, LLC about one-half mile south of the center of Danevang, Texas, Wharton County, Texas 77432. That location and its prevailing winds will place the facility in the heart of the Danevang community. Local citizens are currently negotiating with the owners of Indeck to build the facility on a more acceptable site available nearby.

Only very recently did I learn of this proposed project. It is my understanding that negotiations between Indeck Energy Services personnel and Wharton County officials took place behind closed doors and in secret and that residents and property owners were not informed. Legal notices were sufficiently disguised and/or lacked adequate disclosure so as to have gone unnoticed by local residents until very recently.

I am concerned about how these air contaminants and hazardous air pollutants might affect me as well as other area persons, particularly those with respiratory problems and/or other health issues.

Furthermore, I wish for the TCEQ to disclose to me all tests and studies that were performed to make certain that these hazardous plant emissions will not interact with any of the hundreds of chemicals already present on that and surrounding properties, thus creating a potentially more harmful substance.

Sincerely,

Ann Brown (signature)

RE: Public comment on TCEQ Proposed Air Quality Permit number 111724 and Prevention of Significant Deterioration (PSD) Air Quality Permit PSDTX1374 – Indeck Wharton, LLC

Gentlemen:

I am writing to you as a person potentially adversely affected by the air contaminants and hazardous air pollutants to be emitted from a facility proposed to be built by Indeck Wharton, LLC about one-half mile south of the center of Danevang, Texas, Wharton County, Texas 77432. That location and its prevailing winds will place the facility in the heart of the Danevang community. Local citizens are currently negotiating with the owners of Indeck to build the facility on a more acceptable site available nearby.

Only very recently did I learn of this proposed project. It is my understanding that negotiations between Indeck Energy Services personnel and Wharton County officials took place behind closed doors and in secret and that residents and property owners were not informed. Legal notices were sufficiently disguised and/or lacked adequate disclosure so as to have gone unnoticed by local residents until very recently.

I am concerned about how these air contaminants and hazardous air pollutants might affect me as well as other area persons, particularly those with respiratory problems and/or other health issues.

Furthermore, I wish for the TCEQ to disclose to me all tests and studies that were performed to make certain that these hazardous plant emissions will not interact with any of the hundreds of chemicals already present on that and surrounding properties, thus creating a potentially more harmful substance.

Sincerely,

Isaias chavez (signature)

*[Handwritten signature]*

Gentlemen:

I am writing to you as a person potentially adversely affected by the air contaminants and hazardous air pollutants to be emitted from a facility proposed to be built by Indeck Wharton, LLC about one-half mile south of the center of Danevang, Texas, Wharton County, Texas 77432. That location and its prevailing winds will place the facility in the heart of the Danevang community. Local citizens are currently negotiating with the owners of Indeck to build the facility on a more acceptable site available nearby.

Only very recently did I learn of this proposed project. It is my understanding that negotiations between Indeck Energy Services personnel and Wharton County officials took place behind closed doors and in secret and that residents and property owners were not informed. Legal notices were sufficiently disguised and/or lacked adequate disclosure so as to have gone unnoticed by local residents until very recently.

I am concerned about how these air contaminants and hazardous air pollutants might affect me as well as other area persons, particularly those with respiratory problems and/or other health issues.

Furthermore, I wish for the TCEQ to disclose to me all tests and studies that were performed to make certain that these hazardous plant emissions will not interact with any of the hundreds of chemicals already present on that and surrounding properties, thus creating a potentially more harmful substance.

Sincerely,

RE: Public comment on TCEQ Proposed Air Quality Permit number 111724 and Prevention of Significant Deterioration (PSD) Air Quality Permit PSDTX1374 - Indeck Wharton, LLC

Gentlemen:

I am writing to you as a person potentially adversely affected by the air contaminants and hazardous air pollutants to be emitted from a facility proposed to be built by Indeck Wharton, LLC about one-half mile south of the center of Danevang, Texas, Wharton County, Texas 77432. That location and its prevailing winds will place the facility in the heart of the Danevang community. Local citizens are currently negotiating with the owners of Indeck to build the facility on a more acceptable site available nearby.

Only very recently did I learn of this proposed project. It is my understanding that negotiations between Indeck Energy Services personnel and Wharton County officials took place behind closed doors and in secret and that residents and property owners were not informed. Legal notices were sufficiently disguised and/or lacked adequate disclosure so as to have gone unnoticed by local residents until very recently.

I am concerned about how these air contaminants and hazardous air pollutants might affect me as well as other area persons, particularly those with respiratory problems and/or other health issues.

Furthermore, I wish for the TCEQ to disclose to me all tests and studies that were performed to make certain that these hazardous plant emissions will not interact with any of the hundreds of chemicals already present on that and surrounding properties, thus creating a potentially more harmful substance.

Sincerely,

*Rachael Goynes Elts* (signature)

RE: Public comment on TCEQ Proposed Air Quality Permit number 111724 and Prevention of Significant Deterioration (PSD) Air Quality Permit PSDTX1374 – Indeck Wharton, LLC

Gentlemen:

I am writing to you as a person potentially adversely affected by the air contaminants and hazardous air pollutants to be emitted from a facility proposed to be built by Indeck Wharton, LLC about one-half mile south of the center of Danevang, Texas, Wharton County, Texas 77432. That location and its prevailing winds will place the facility in the heart of the Danevang community. Local citizens are currently negotiating with the owners of Indeck to build the facility on a more acceptable site available nearby.

Only very recently did I learn of this proposed project. It is my understanding that negotiations between Indeck Energy Services personnel and Wharton County officials took place behind closed doors and in secret and that residents and property owners were not informed. Legal notices were sufficiently disguised and/or lacked adequate disclosure so as to have gone unnoticed by local residents until very recently.

I am concerned about how these air contaminants and hazardous air pollutants might affect me as well as other area persons, particularly those with respiratory problems and/or other health issues.

Furthermore, I wish for the TCEQ to disclose to me all tests and studies that were performed to make certain that these hazardous plant emissions will not interact with any of the hundreds of chemicals already present on that and surrounding properties, thus creating a potentially more harmful substance.

Sincerely,

Venessa Gaona (signature)

RE: Public comment on TCEQ Proposed Air Quality Permit number 111724 and Prevention of Significant Deterioration (PSD) Air Quality Permit PSDTX1374 – Indeck Wharton, LLC

Gentlemen:

I am writing to you as a person potentially adversely affected by the air contaminants and hazardous air pollutants to be emitted from a facility proposed to be built by Indeck Wharton, LLC about one-half mile south of the center of Danevang, Texas, Wharton County, Texas 77432. That location and its prevailing winds will place the facility in the heart of the Danevang community. Local citizens are currently negotiating with the owners of Indeck to build the facility on a more acceptable site available nearby.

Only very recently did I learn of this proposed project. It is my understanding that negotiations between Indeck Energy Services personnel and Wharton County officials took place behind closed doors and in secret and that residents and property owners were not informed. Legal notices were sufficiently disguised and/or lacked adequate disclosure so as to have gone unnoticed by local residents until very recently.

I am concerned about how these air contaminants and hazardous air pollutants might affect me as well as other area persons, particularly those with respiratory problems and/or other health issues.

Furthermore, I wish for the TCEQ to disclose to me all tests and studies that were performed to make certain that these hazardous plant emissions will not interact with any of the hundreds of chemicals already present on that and surrounding properties, thus creating a potentially more harmful substance.

Sincerely,

*Fred Boynes* (signature)

Gentlemen:

I am writing to you as a person potentially adversely affected by the air contaminants and hazardous air pollutants to be emitted from a facility proposed to be built by Indeck Wharton, LLC about one-half mile south of the center of Danevang, Texas, Wharton County, Texas 77432. That location and its prevailing winds will place the facility in the heart of the Danevang community. Local citizens are currently negotiating with the owners of Indeck to build the facility on a more acceptable site available nearby.

Only very recently did I learn of this proposed project. It is my understanding that negotiations between Indeck Energy Services personnel and Wharton County officials took place behind closed doors and in secret and that residents and property owners were not informed. Legal notices were sufficiently disguised and/or lacked adequate disclosure so as to have gone unnoticed by local residents until very recently.

I am concerned about how these air contaminants and hazardous air pollutants might affect me as well as other area persons, particularly those with respiratory problems and/or other health issues.

Furthermore, I wish for the TCEQ to disclose to me all tests and studies that were performed to make certain that these hazardous plant emissions will not interact with any of the hundreds of chemicals already present on that and surrounding properties, thus creating a potentially more harmful substance.

Sincerely,

Myrna Hansen (signature)

RE: Public comment on TCEQ Proposed Air Quality Permit number 111724 and Prevention of Significant Deterioration (PSD) Air Quality Permit PSDTX1374 – Indeck Wharton, LLC

Gentlemen:

I am writing to you as a person potentially adversely affected by the air contaminants and hazardous air pollutants to be emitted from a facility proposed to be built by Indeck Wharton, LLC about one-half mile south of the center of Danevang, Texas, Wharton County, Texas 77432. That location and its prevailing winds will place the facility in the heart of the Danevang community. Local citizens are currently negotiating with the owners of Indeck to build the facility on a more acceptable site available nearby.

Only very recently did I learn of this proposed project. It is my understanding that negotiations between Indeck Energy Services personnel and Wharton County officials took place behind closed doors and in secret and that residents and property owners were not informed. Legal notices were sufficiently disguised and/or lacked adequate disclosure so as to have gone unnoticed by local residents until very recently.

I am concerned about how these air contaminants and hazardous air pollutants might affect me as well as other area persons, particularly those with respiratory problems and/or other health issues.

Furthermore, I wish for the TCEQ to disclose to me all tests and studies that were performed to make certain that these hazardous plant emissions will not interact with any of the hundreds of chemicals already present on that and surrounding properties, thus creating a potentially more harmful substance.

Sincerely,

Paisley Hlavaty (signature)

RE: Public comment on TCEQ Proposed Air Quality Permit number 111724 and Prevention of Significant Deterioration (PSD) Air Quality Permit PSDTX1374 – Indeck Wharton, LLC

Gentlemen:

I am writing to you as a person potentially adversely affected by the air contaminants and hazardous air pollutants to be emitted from a facility proposed to be built by Indeck Wharton, LLC about one-half mile south of the center of Danevang, Texas, Wharton County, Texas 77432. That location and its prevailing winds will place the facility in the heart of the Danevang community. Local citizens are currently negotiating with the owners of Indeck to build the facility on a more acceptable site available nearby.

Only very recently did I learn of this proposed project. It is my understanding that negotiations between Indeck Energy Services personnel and Wharton County officials took place behind closed doors and in secret and that residents and property owners were not informed. Legal notices were sufficiently disguised and/or lacked adequate disclosure so as to have gone unnoticed by local residents until very recently.

I am concerned about how these air contaminants and hazardous air pollutants might affect me as well as other area persons, particularly those with respiratory problems and/or other health issues.

Furthermore, I wish for the TCEQ to disclose to me all tests and studies that were performed to make certain that these hazardous plant emissions will not interact with any of the hundreds of chemicals already present on that and surrounding properties, thus creating a potentially more harmful substance.

Sincerely,

Brianna Jensen (signature)

RE: Public comment on TCEQ Proposed Air Quality Permit number 111724 and Prevention of Significant Deterioration (PSD) Air Quality Permit PSDTX1374 – Indeck Wharton, LLC

Gentlemen:

I am writing to you as a person potentially adversely affected by the air contaminants and hazardous air pollutants to be emitted from a facility proposed to be built by Indeck Wharton, LLC about one-half mile south of the center of Danevang, Texas, Wharton County, Texas 77432. That location and its prevailing winds will place the facility in the heart of the Danevang community. Local citizens are currently negotiating with the owners of Indeck to build the facility on a more acceptable site available nearby.

Only very recently did I learn of this proposed project. It is my understanding that negotiations between Indeck Energy Services personnel and Wharton County officials took place behind closed doors and in secret and that residents and property owners were not informed. Legal notices were sufficiently disguised and/or lacked adequate disclosure so as to have gone unnoticed by local residents until very recently.

I am concerned about how these air contaminants and hazardous air pollutants might affect me as well as other area persons, particularly those with respiratory problems and/or other health issues.

Furthermore, I wish for the TCEQ to disclose to me all tests and studies that were performed to make certain that these hazardous plant emissions will not interact with any of the hundreds of chemicals already present on that and surrounding properties, thus creating a potentially more harmful substance.

Sincerely,

*Mary Jane Kaiser* (signature)

RE: Public comment on TCEQ Proposed Air Quality Permit number 111724 and Prevention of Significant Deterioration (PSD) Air Quality Permit PSDTX1374 -- Indeck Wharton, LLC

Gentlemen:

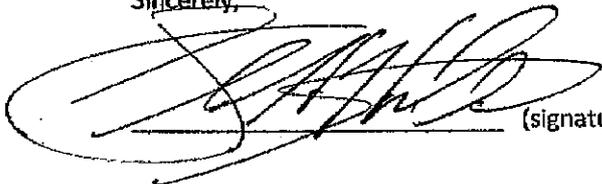

I am writing to you as a person potentially adversely affected by the air contaminants and hazardous air pollutants to be emitted from a facility proposed to be built by Indeck Wharton, LLC about one-half mile south of the center of Danevang, Texas, Wharton County, Texas 77432. That location and its prevailing winds will place the facility in the heart of the Danevang community. Local citizens are currently negotiating with the owners of Indeck to build the facility on a more acceptable site available nearby.

Only very recently did I learn of this proposed project. It is my understanding that negotiations between Indeck Energy Services personnel and Wharton County officials took place behind closed doors and in secret and that residents and property owners were not informed. Legal notices were sufficiently disguised and/or lacked adequate disclosure so as to have gone unnoticed by local residents until very recently.

I am concerned about how these air contaminants and hazardous air pollutants might affect me as well as other area persons, particularly those with respiratory problems and/or other health issues.

Furthermore, I wish for the TCEQ to disclose to me all tests and studies that were performed to make certain that these hazardous plant emissions will not interact with any of the hundreds of chemicals already present on that and surrounding properties, thus creating a potentially more harmful substance.

Sincerely,

Anthony Mahalite (signature)

RE: Public comment on TCEQ Proposed Air Quality Permit number 111724 and Prevention of Significant Deterioration (PSD) Air Quality Permit PSDTX1374 – Indeck Wharton, LLC

Gentlemen:

I am writing to you as a person potentially adversely affected by the air contaminants and hazardous air pollutants to be emitted from a facility proposed to be built by Indeck Wharton, LLC about one-half mile south of the center of Danevang, Texas, Wharton County, Texas 77432. That location and its prevailing winds will place the facility in the heart of the Danevang community. Local citizens are currently negotiating with the owners of Indeck to build the facility on a more acceptable site available nearby.

Only very recently did I learn of this proposed project. It is my understanding that negotiations between Indeck Energy Services personnel and Wharton County officials took place behind closed doors and in secret and that residents and property owners were not informed. Legal notices were sufficiently disguised and/or lacked adequate disclosure so as to have gone unnoticed by local residents until very recently.

I am concerned about how these air contaminants and hazardous air pollutants might affect me as well as other area persons, particularly those with respiratory problems and/or other health issues.

Furthermore, I wish for the TCEQ to disclose to me all tests and studies that were performed to make certain that these hazardous plant emissions will not interact with any of the hundreds of chemicals already present on that and surrounding properties, thus creating a potentially more harmful substance.

Sincerely,

Antonio Mendez (signature)

RE: Public comment on TCEQ Proposed Air Quality Permit number 111724 and Prevention of Significant Deterioration (PSD) Air Quality Permit PSDTX1374 – Indeck Wharton, LLC

Gentlemen:

I am writing to you as a person potentially adversely affected by the air contaminants and hazardous air pollutants to be emitted from a facility proposed to be built by Indeck Wharton, LLC about one-half mile south of the center of Danevang, Texas, Wharton County, Texas 77432. That location and its prevailing winds will place the facility in the heart of the Danevang community. Local citizens are currently negotiating with the owners of Indeck to build the facility on a more acceptable site available nearby.

Only very recently did I learn of this proposed project. It is my understanding that negotiations between Indeck Energy Services personnel and Wharton County officials took place behind closed doors and in secret and that residents and property owners were not informed. Legal notices were sufficiently disguised and/or lacked adequate disclosure so as to have gone unnoticed by local residents until very recently.

I am concerned about how these air contaminants and hazardous air pollutants might affect me as well as other area persons, particularly those with respiratory problems and/or other health issues.

Furthermore, I wish for the TCEQ to disclose to me all tests and studies that were performed to make certain that these hazardous plant emissions will not interact with any of the hundreds of chemicals already present on that and surrounding properties, thus creating a potentially more harmful substance.

Sincerely,

*Julia A. Ontiveros* (signature)

RE: Public comment on TCEQ Proposed Air Quality Permit number 111724 and Prevention of Significant Deterioration (PSD) Air Quality Permit PSDTX1374 – Indeck Wharton, LLC

Gentlemen:

I am writing to you as a person potentially adversely affected by the air contaminants and hazardous air pollutants to be emitted from a facility proposed to be built by Indeck Wharton, LLC about one-half mile south of the center of Danevang, Texas, Wharton County, Texas 77432. That location and its prevailing winds will place the facility in the heart of the Danevang community. Local citizens are currently negotiating with the owners of Indeck to build the facility on a more acceptable site available nearby.

Only very recently did I learn of this proposed project. It is my understanding that negotiations between Indeck Energy Services personnel and Wharton County officials took place behind closed doors and in secret and that residents and property owners were not informed. Legal notices were sufficiently disguised and/or lacked adequate disclosure so as to have gone unnoticed by local residents until very recently.

I am concerned about how these air contaminants and hazardous air pollutants might affect me as well as other area persons, particularly those with respiratory problems and/or other health issues.

Furthermore, I wish for the TCEQ to disclose to me all tests and studies that were performed to make certain that these hazardous plant emissions will not interact with any of the hundreds of chemicals already present on that and surrounding properties, thus creating a potentially more harmful substance.

Sincerely,

Carlos Rangel (signature)

RE: Public comment on TCEQ Proposed Air Quality Permit number 111724 and Prevention of Significant Deterioration (PSD) Air Quality Permit PSDTX1374 – Indeck Wharton, LLC

Gentlemen:

I am writing to you as a person potentially adversely affected by the air contaminants and hazardous air pollutants to be emitted from a facility proposed to be built by Indeck Wharton, LLC about one-half mile south of the center of Danevang, Texas, Wharton County, Texas 77432. That location and its prevailing winds will place the facility in the heart of the Danevang community. Local citizens are currently negotiating with the owners of Indeck to build the facility on a more acceptable site available nearby.

Only very recently did I learn of this proposed project. It is my understanding that negotiations between Indeck Energy Services personnel and Wharton County officials took place behind closed doors and in secret and that residents and property owners were not informed. Legal notices were sufficiently disguised and/or lacked adequate disclosure so as to have gone unnoticed by local residents until very recently.

I am concerned about how these air contaminants and hazardous air pollutants might affect me as well as other area persons, particularly those with respiratory problems and/or other health issues.

Furthermore, I wish for the TCEQ to disclose to me all tests and studies that were performed to make certain that these hazardous plant emissions will not interact with any of the hundreds of chemicals already present on that and surrounding properties, thus creating a potentially more harmful substance.

Sincerely,

*Ben Rumbaugh* (signature)

CHIEF CLERKS OFFICE

RE: Public comment on TCEQ Proposed Air Quality Permit number 111724 and Prevention of Significant Deterioration (PSD) Air Quality Permit PSDTX1374 – Indeck Wharton, LLC

Gentlemen:

I am writing to you as a person potentially adversely affected by the air contaminants and hazardous air pollutants to be emitted from a facility proposed to be built by Indeck Wharton, LLC about one-half mile south of the center of Danevang, Texas, Wharton County, Texas 77432. That location and its prevailing winds will place the facility in the heart of the Danevang community. Local citizens are currently negotiating with the owners of Indeck to build the facility on a more acceptable site available nearby.

Only very recently did I learn of this proposed project. It is my understanding that negotiations between Indeck Energy Services personnel and Wharton County officials took place behind closed doors and in secret and that residents and property owners were not informed. Legal notices were sufficiently disguised and/or lacked adequate disclosure so as to have gone unnoticed by local residents until very recently.

I am concerned about how these air contaminants and hazardous air pollutants might affect me as well as other area persons, particularly those with respiratory problems and/or other health issues.

Furthermore, I wish for the TCEQ to disclose to me all tests and studies that were performed to make certain that these hazardous plant emissions will not interact with any of the hundreds of chemicals already present on that and surrounding properties, thus creating a potentially more harmful substance.

Sincerely,

CHIEF CLERKS OFFICE

RE: Public comment on TCEQ Proposed Air Quality Permit number 111724 and Prevention of Significant Deterioration (PSD) Air Quality Permit PSDTX1374 – Indeck Wharton, LLC

Gentlemen:

I am writing to you as a person potentially adversely affected by the air contaminants and hazardous air pollutants to be emitted from a facility proposed to be built by Indeck Wharton, LLC about one-half mile south of the center of Danevang, Texas, Wharton County, Texas 77432. That location and its prevailing winds will place the facility in the heart of the Danevang community. Local citizens are currently negotiating with the owners of Indeck to build the facility on a more acceptable site available nearby.

Only very recently did I learn of this proposed project. It is my understanding that negotiations between Indeck Energy Services personnel and Wharton County officials took place behind closed doors and in secret and that residents and property owners were not informed. Legal notices were sufficiently disguised and/or lacked adequate disclosure so as to have gone unnoticed by local residents until very recently.

I am concerned about how these air contaminants and hazardous air pollutants might affect me as well as other area persons, particularly those with respiratory problems and/or other health issues.

Furthermore, I wish for the TCEQ to disclose to me all tests and studies that were performed to make certain that these hazardous plant emissions will not interact with any of the hundreds of chemicals already present on that and surrounding properties, thus creating a potentially more harmful substance.

Sincerely,

Danivan Taylor (signature)

RE: Public comment on TCEQ Proposed Air Quality Permit number 111724 and Prevention of Significant Deterioration (PSD) Air Quality Permit PSDTX1374 -- Indeck Wharton, LLC

Gentlemen:

I am writing to you as a person potentially adversely affected by the air contaminants and hazardous air pollutants to be emitted from a facility proposed to be built by Indeck Wharton, LLC about one-half mile south of the center of Danevang, Texas, Wharton County, Texas 77432. That location and its prevailing winds will place the facility in the heart of the Danevang community. Local citizens are currently negotiating with the owners of Indeck to build the facility on a more acceptable site available nearby.

Only very recently did I learn of this proposed project. It is my understanding that negotiations between Indeck Energy Services personnel and Wharton County officials took place behind closed doors and in secret and that residents and property owners were not informed. Legal notices were sufficiently disguised and/or lacked adequate disclosure so as to have gone unnoticed by local residents until very recently.

I am concerned about how these air contaminants and hazardous air pollutants might affect me as well as other area persons, particularly those with respiratory problems and/or other health issues.

Furthermore, I wish for the TCEQ to disclose to me all tests and studies that were performed to make certain that these hazardous plant emissions will not interact with any of the hundreds of chemicals already present on that and surrounding properties, thus creating a potentially more harmful substance.

Sincerely,

*Danny Tupa* (signature)

2014 MAY 14 PM 1:20

CHIEF CLERKS OFFICE

I have some questions about the pending application # 111724 which you received on 6/18/13.

How can I get a copy of TCEQ Form # 20244 for this application. I just found out about this plant yesterday and I live across Highway 71 from the proposed site. I have not seen any newspaper notices, there are no required signs on the proposed property and I need to know when the public comment period started and when it ends. I have not seen the draft permit nor have I had any way to review it.

I cannot understand why our little community has been left in the dark about this major undertaking that can not only effect our quality of life, but also our property values. My name is mentioned in every thing that I have researched and says I will not be effected but my question is, Why wasn't I notified.

Please take the time to help answer these questions.

Respectfully Submitted,  
Betty and Eddie Vacek

Only very recently did I learn of this proposed project. It is my understanding that negotiations between Indeck Energy Services personnel and Wharton County officials took place behind closed doors and in secret and that residents and property owners were not informed. Legal notices were sufficiently disguised and/or lacked adequate disclosure so as to have gone unnoticed by local residents until very recently.

I am concerned about how these air contaminants and hazardous air pollutants might affect me as well as other area persons, particularly those with respiratory problems and/or other health issues.

Furthermore, I wish for the TCEQ to disclose to me all tests and studies that were performed to make certain that these hazardous plant emissions will not interact with any of the hundreds of chemicals already present on that and surrounding properties, thus creating a potentially more harmful substance.

Sincerely,

RE: Public comment on TCEQ Proposed Air Quality Permit number 111724 and Prevention of Significant Deterioration (PSD) Air Quality Permit PSDTX1374 – Indeck Wharton, LLC

Gentlemen:

I am writing to you as a person potentially adversely affected by the air contaminants and hazardous air pollutants to be emitted from a facility proposed to be built by Indeck Wharton, LLC about one-half mile south of the center of Danevang, Texas, Wharton County, Texas 77432. That location and its prevailing winds will place the facility in the heart of the Danevang community. Local citizens are currently negotiating with the owners of Indeck to build the facility on a more acceptable site available nearby.

Only very recently did I learn of this proposed project. It is my understanding that negotiations between Indeck Energy Services personnel and Wharton County officials took place behind closed doors and in secret and that residents and property owners were not informed. Legal notices were sufficiently disguised and/or lacked adequate disclosure so as to have gone unnoticed by local residents until very recently.

I am concerned about how these air contaminants and hazardous air pollutants might affect me as well as other area persons, particularly those with respiratory problems and/or other health issues.

Furthermore, I wish for the TCEQ to disclose to me all tests and studies that were performed to make certain that these hazardous plant emissions will not interact with any of the hundreds of chemicals already present on that and surrounding properties, thus creating a potentially more harmful substance.

Sincerely,

Local citizens are currently negotiating with the owners of Indeck to build the facility on a more acceptable site available nearby.

Only very recently did I learn of this proposed project. It is my understanding that negotiations between Indeck Energy Services personnel and Wharton County officials took place behind closed doors and in secret and that residents and property owners were not informed. Legal notices were sufficiently disguised and/or lacked adequate disclosure so as to have gone unnoticed by local residents until very recently.

I am concerned about how these air contaminants and hazardous air pollutants might affect me as well as other area persons, particularly those with respiratory problems and/or other health issues.

Furthermore, I wish for the TCEQ to disclose to me all tests and studies that were performed to make certain that these hazardous plant emissions will not interact with any of the hundreds of chemicals already present on that and surrounding properties, thus creating a potentially more harmful substance.

Sincerely,

Cecilia (signature)

RE: Public comment on TCEQ Proposed Air Quality Permit number 111724 and Prevention of Significant Deterioration (PSD) Air Quality Permit PSDTX1374 – Indeck Wharton, LLC

Gentlemen:

I am writing to you as a person potentially adversely affected by the air contaminants and hazardous air pollutants to be emitted from a facility proposed to be built by Indeck Wharton, LLC about one-half mile south of the center of Danevang, Texas, Wharton County, Texas 77432. That location and its prevailing winds will place the facility in the heart of the Danevang community. Local citizens are currently negotiating with the owners of Indeck to build the facility on a more acceptable site available nearby.

Only very recently did I learn of this proposed project. It is my understanding that negotiations between Indeck Energy Services personnel and Wharton County officials took place behind closed doors and in secret and that residents and property owners were not informed. Legal notices were sufficiently disguised and/or lacked adequate disclosure so as to have gone unnoticed by local residents until very recently.

I am concerned about how these air contaminants and hazardous air pollutants might affect me as well as other area persons, particularly those with respiratory problems and/or other health issues.

Furthermore, I wish for the TCEQ to disclose to me all tests and studies that were performed to make certain that these hazardous plant emissions will not interact with any of the hundreds of chemicals already present on that and surrounding properties, thus creating a potentially more harmful substance.

RE: Public comment on TCEQ Proposed Air Quality Permit number 111724 and Prevention of Significant Deterioration (PSD) Air Quality Permit PSDTX1374 – Indeck Wharton, LLC

Gentlemen:

I am writing to you as a person potentially adversely affected by the air contaminants and hazardous air pollutants to be emitted from a facility proposed to be built by Indeck Wharton, LLC about one-half mile south of the center of Danevang, Texas, Wharton County, Texas 77432. That location and its prevailing winds will place the facility in the heart of the Danevang community. Local citizens are currently negotiating with the owners of Indeck to build the facility on a more acceptable site available nearby.

Only very recently did I learn of this proposed project. It is my understanding that negotiations between Indeck Energy Services personnel and Wharton County officials took place behind closed doors and in secret and that residents and property owners were not informed. Legal notices were sufficiently disguised and/or lacked adequate disclosure so as to have gone unnoticed by local residents until very recently.

I am concerned about how these air contaminants and hazardous air pollutants might affect me as well as other area persons, particularly those with respiratory problems and/or other health issues.

Furthermore, I wish for the TCEQ to disclose to me all tests and studies that were performed to make certain that these hazardous plant emissions will not interact with any of the hundreds of chemicals already present on that and surrounding properties, thus creating a potentially more harmful substance.

Sincerely,

Manuel Yanez Bally (signature)
