Dear Sir:

Please consider the pleas of members of the Save the South San Gabriel requesting a hearing regarding Liberty Hill's plans to increase the volume of treated sewage they will be dumping into the South San Gabriel. I live on the river just beyond the discharge point and I can assure you that they need to clean up their current act before they have any business handling a bigger load.

We've been dealing with family health issues so I'm not completely up to speed on the status of this hearing request but I do know that others in Save the South San Gabriel have already provided documentation to remind your office of past penalties, etc., imposed on that plant; I won't repeat that information. However, enclosed are pictures taken this Fall - a couple more or less behind my house *below* the discharge site and a couple ¼ mile or so *upstream* from the discharge. These pictures are a stark illustration of what a nasty, slimy mess this plant is making of the waters of the South San Gabriel downstream from thier discharge.

Thank you,

Wendell & Sally Barrick

COMMENTS: Dear Texas Commission of Environmental Quality, Recently i spent a day with my family on the South San Gabriel River. I posted a short video of it here - <http://gravityandthedog.com/2013/04/30/of-rivers-and-men-field-notes/> I hope it might be pertinent to the question concerning The City of Liberty Hill's permit amendment application. Thank you for your consideration. Sincerely, Jackson Cassady

COMMENTS: I live on South San Gabriel River. It stinks where The City of Liberty Hill, Texas currently holding a Texas Pollutant Discharge Elimination System permit to discharge up to 1 million gallons per day of treated sewage into the South San Gabriel River! And Liberty Hill wants to increase it to 4 million gallons a day. Green slime is growing. Fish are dying. I can't believe you are letting this happen. The news media might like to see this and report it. This would not look good for TCEQ and the city of Liberty Hill!

COMMENTS: I am currently in Germany. My spouse is in the Army. We make our home in TX. We love TX. The situation in the South San Gabriel is unacceptable to us. We both have fished and played in that river and hope to take our kids and grandkids to the same spots. But, you are allowing discharge into the river that is changing it so that it is no more than a sewer line. You are changing the ecosystem and, by virtue of that change, changing our lives and the community that surrounds the South San Gabe. Please don't allow the this new application to go thru. We need this river and others like it as close to natural as possible. I can tell you it helps to know you're coming home to fish, hunt and just enjoy the outdoors in your communtiy with out having to worry about if it's clean and/or safe. Please consider the impact it will have on the ecosystem and community before allowing this. The 1 million gallon a day discharge is already bad enough. Thank you.

Dear Sir or Madam:

I have received the NOTICE OF APPLICATION AND PRELIMINARY DECISION FOR TPDES PERMIT FOR MUNICIPAL WASTEWATER AMENDMENT . . . Permit No. WQ0014477001

It states:

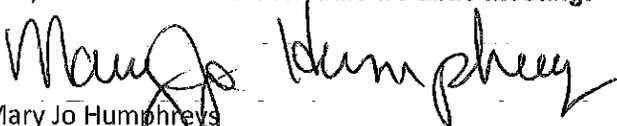

A Tier 1 antidegradation review has preliminarily determined that existing water quality uses will not be impaired by this permit action. Numerical and narrative criteria to protect existing uses will be maintained. A Tier 2 review has preliminarily determined that no significant degradation of water quality is expected in the South Fork San Gabriel River, which has been identified as having high aquatic life. Existing uses will be maintained and protected.

The river is full of green muck and scum. These people have not seen the river or they are in total DENIAL about what they have done with our backyards.

We have been *pleading* for a Public Comment Meeting. Senator Charles Schwertner and Representative Marsha Farney have requested the meeting in our behalf.

If "*Existing uses will be maintained and protected*" we are doomed. You have allowed a beautiful river with a white limestone bed to become a reeking, green, sludge filled horror.

Yes, we would like to schedule a Public Meeting.

Dear Sir/Madame:

I wrote in the spring to tell you about the green scum in our beautiful South Gabriel River or dry river bed as it is now. We recently had some rain and the green scum was gone for almost a week. However, it returned. Now it is green and scummy again and full of coliforms. How would you like to live next to a small body of water that is full of bacteria that can sicken your children, grandchildren and pets?? You are welcome to visit and go wading in the sewage which Liberty Hill is dumping into the river/river bed.

It is my understanding that Liberty Hill has begun to sell more water treatment rights to neighborhoods, even though the TCEQ has not yet approved the request to increase the amount of sewage being dumped into our backyards.

Please do not approve any more sewage dumps into the South Gabriel River as requested by Liberty Hill, and please help us "fix" the problems that are already exist with the sewage.

Thank you.

COMMENTS: The LCRA swore to our neighborhood, High Gabriel Estates, that there would be no adverse affect on the South Gabriel River which runs through our backyards. It is horribly polluted now with green algae growing everywhere below the discharge. I moved here in 1993 to a pristine river. I was proud to show my friends and relatives my neighborhood and the river. The sewage runoff from Liberty Hill has destroyed portions of this river. They must fix what they have already done and not continue to polute what remains.

COMMENTS: And you want to put 4 million more gallons of sewage into our river? Look what you have done already. We went to the dog and pony show that LCRA put on when they first started this project. We were told and assured that the discharged water would be so clean it would look like our tap water and have no effect on the river. Compare the river upstream from the discharge point to the nasty mess from the discharge downstream. It needs to be cleaned up and stopped. What LCRA wants LCRA gets.
