COMMENTS: I along with several other parties live along the "unnamed tributary" named in this application. Our concern is that a new power plant is being built below the Doshier Farms and the power plant is going to pipe the discharge water out of the plant for their use. We use the water from the treatment plant to water our livestock. Our concern is that the power plant does not use all of the discharge water, leaving us without a water source for our livestock. We have been dependent on this water source since the treatment plant went into

CM

operation. Is there a stipulation that a certain amount of water is to be let run on down stream for our use?
Please put me on your permanent mailing list concerning Doshier Farms. Thank you. Larry Greger
