COMMENTS: I am adamantly opposed to this water use application permit as well as any other requests relating to the additional consumption of water from Lake Granbury. Untill such time that the magnitute and extent of this drought and other circumstances causing the historically low lake levels has been fully studied and evaluated.....additional consumption or permitting of water rites would be unconscionable and ludacris. Over the past 3 years, our community and surrounding counties have suffered an immeasurable economic crisis

me

resulting from over water consumption and mismanagement. It is TCEQ's unquestionable responsibility to aid in a resolution to this emergency.

This lake should be list at a higher drought level than it is currently. Only so that the BRA can continue to profiteer and draw down at pre drought rates. Now these plants may adversely affect the water that is left?

COMMENTS: This past Saturday hidden on the back page of the Hood County News was a Public Notice from TCEQ. According to the Public Notice, Luminant is requesting 1 billion gallons of water per day from Lake Granbury for the Decordova Power Plants. When is enough - enough? Not only should we be concerned about already devastated water levels but we must address concerns for water quality, game fish issues, and safety concerns. i guess safety isn't a concern since no one can get on the lake anymore. Why wouldn't Luminant want

Handwritten: MW

to build another plant on Lake Granbury instead of transferring water to another site. It is probably cheaper to build another site off the lake than start up another project on the lake. But they should be concerned about the good of the community, not just their bottom line. What htey request will devastate our lake. Finally killing it.

COMMENTS: TCEQ, please hold a public meeting in Granbury, TX concerning any request for additional water from the Brazos River Basin. Lake Granbury has been devastated by the Brazos River Authority's mismanagement of the current water rights they possess and the closing of the hydroelectric generating plant at Possum Kingdom Lake. Giving them or anyone else rights to more water will only worsen the problem.

COMMENTS: Dear TCEQ We have a house on Lake Granbury and very concerned that TCEQ or the BRA are not looking at the total economic impact the low lake level is having on Hood County and City of Granbury. The BRA is the one that developed the economic base around the lake over the last 30-40 years and now with new drawdown protocol ratio of 1.75 versus history of 2.9 to 3.5. Lake Granbury is given at a higher rate/% to

M R

economic impact and losing more shore line than any of the other BRA lakes. Please do not ask Lake Granbury to give up any more. Thanks R. Danny Campbell President Henry Resources LLC

COMMENTS: As a waterfront owner on Lake Granbury I would like to request a public meeting to address all the Granbury residents and businesses concerns over the taking of 1 Billion gallons a day by Luminant for use at the power plan. This removal would further devastate property values as well as businesses in the City of Granbury.

COMMENTS: When I heard that Luminant is requesting 1 billion gallons of water from Lake Granbury PER DAY, I thought it was an April Fool's joke. This is over ten times the amount they currently use (I've read they use anywhere from 15B to 40B gallons per year presently). The lake is down ten feet from normal now, due to both the draught and the Brazos River Authority's sell-off of lake water to make good profits. Meanwhile, the lake is essentially unusable. Most docks, including ours, have dry land under them and public ramps are closed.

mm

The few boats that do venture out are in danger of hitting stumps just below the surface. Marinas and other lake-oriented businesses are suffering and waterfront property owners are seeing dropping property values. We limit watering the lawn, washing the car, and other use of water while a mercenary business endeavor wants to use one billion gallons of water PER DAY? At that rate, Lake Granbury will be no more and the lure of Granbury as a destination for visitors and lake lovers will literally "dry up." I strongly request a public meeting to be held in Granbury with TECQ and Luminant to address our serious concerns.

COMMENTS: I was dismayed to read that Luminant is requesting ONE BILLION GALLONS OF WATER EVERY DAY to be taken from Lake Granbury. Over the past three years of owning lakefront property, we have watched the water levels continually go down, even after rain!!! We have "beach" that was never anticipated and our beach has to grow only five more feet to reach the end of our dock. We are in the mainbody part of the lake and NEVER could have seen this coming. Yes, we understand drought and its impact on Texas lakes, but

Handwritten: MW

what we don't understand is the continued sell-off of our water - it is a precious and limited commodity! The BRA is already depleting the lake causing loss of businesses, jobs, and property values. PLEASE, deny Luminant their request and give Granbury a chance to survive. PLEASE don't forget about the "little people" in lieu of big business. Please honor the request for a Public Meeting in Granbury with TCEQ and Luminant for concerns to be addressed. Thank you.

There has been massive changes in Lake Granbury from a lake level perspective since the BRA's new water management plan has been in effect.

These changes are very visible, I now have a swamp instead of lake frontage. It's not just affected the lake level, it is ecologically unhealthy. It's a perfect breeding ground for West Nile virus mosquitoes, and as the water is allowed to recede from the coves, another massive fish kill.

How is the TCEQ looking at the Lake Granbury area (as a whole, including both water & air) for all new or re-newal permits that are or could be going through the system in the near future?

COMMENTS: There must be a public meeting to discuss this very important issue. The impact of this request has the potential to bring more devastation to Hood county and all residents. Due to mismanagement and over sale of water we stand on the brink of losing not just any chance of having a lake again but more environmental damage. I am very much in opposition to this request!

COMMENTS: Last week, we received a Public Notice from TCEQ. Luminant has applied for a renewal of their power plant license on Lake Granbury Luminant's electrical power plant was dismantled last year and they now want to build 2 gas-fired power plants. Luminant is requesting 1 million acre ft/year of cycled water. We have done some research and have concerns about the loss of water during this process and especially water quality. We would like to request a Public Meeting to have our questions addressed.

COMMENTS: I am writing to protest the Luminant application for rights to additional water usage from Lake Granbury. My protest is made for three reasons: 1. Lake Granbury is an economic engine for the city of Granbury, attracting tourists and spending around the lake. Numerous small businesses will be further impacted as the lake is further impacted by such requested water usage. 2. Property values for lake-front and lake-view properties will continue to plummet. The decrease in property tax revenues will put a strain on city and county

MW

services, causing cuts in services, or increases in property tax rates. 3. At some point, the rights of property owners must be considered by the courts. Decisions made by appointed, not elected, officials should not be unilateral and self-serving when so many citizens are impacted financially. The lake is essentially unusable now at more than 10 feet low. We continue to hope and pray for rain. If this application is approved, we will lose all hope.

COMMENTS: Those elected and appointed officials entrusted with our precious water supply must be concerned about already devastated water levels in Lake Granbury and must address concerns for water quality, game fish issues, and safety concerns. Please grant a public meeting in Granbury with members of the Lake Granbury Waterfront Owners Association, TCEQ and Luminant to address our concerns.

COMMENTS: Clearly, water is the "new" liquid gold, and water rights will become the most debated in the not-so-distant future. Preventing water waste should take the front stage, but is not. The prolonged drought has placed demands on what little water we have and many sources struggle to find enough to meet their needs. What is troubling is seeing electric power plants being destroyed so there is a monopoly for electricity and water needs. The water in the Brazos River is becoming toxic from its lack of flow. This affects all of our

MW

wildlife as well as our quality of life. The BRA has taken more than it's share and now wants more in what is clearly an unsustainable situation. At some point logic must take over. The solutions must be long term, and taking water from the ocean seems the most logical. Rather than place blame and divide citizens versus organizations, it would be best to impose watering restrictions and deny any further draws from ANY organization. Thank you for your consideration.

DM

April 3, 2014

Office of the Chief
MC 105 TCEQ
PO Box 13087
Austin, Texas 78711-3087

To whom it may concern:

Luminent has requested a permit (#WQ0001481000) for 1,000,000,000 gallons of water per day from Lake Granbury. A lake which has been nearly destroyed from water sales. This is irresponsible, negligent, selfish and shows a lack of respect to the City of Granbury and its residents. I beg you to deny this permit and any others which may be presented to TCEQ for any water sales, distribution or diversion until a comprehensive review can be analyzed and completed.

Do you realize the thousands of people who have invested their life savings to retire and enjoy Lake Granbury? These are the people who bought and invested in Granbury due to the "constant lake levels" being marketed by realtors and was even posted years ago on the BRA website (obviously, BRA has removed and adamantly denies ever having this wording appear).

I urge you to make an informed decision and review the abnormalities and inconsistencies within the BRA management of Lake Granbury. I am disgusted at the back door deals, dirty politicians/CEO's, and companies which have chosen to look the other way in order to serve their own agenda at any cost to the environment, safety, economic impact and strategic destruction of our beloved city of Granbury.

I challenge TCEQ to "step up" and be a partner to this community (and others) rather than solely be driven by monetary gain. I would hope at the end of the day, TCEQ would have a conscious and truly investigate the facts to obtain the truth of what has transpired over the last decade. From what I have seen and read, the mismanagement of BRA is an embarrassment and should be held accountable for the gross negligence. Why is the smallest lake with the highest economic impact being hit the hardest? Why does TCEQ seem to support an organization which has been proven to be poorly operated and managed? Does TCEQ have the authority to request a thorough audit and hold the decision makers responsible for their actions? If not, would you make a motion for an audit of BRA to the entity which has the power to perform and carry out an audit?

We are in a drought. Yes we are, but can you explain how mother nature can pick and choose which lakes can be full or empty within a 100 mile radius? BRA has caused "man made" drought conditions which they have placed 100% of the blame on nature without taking any responsibility. My last question... Is TCEQ in favor and support of wiping out the communities devastated by the lake levels?

Thank you for your time,

Debra J. Davis

ACCORDING TO HOOD COUNTY NEWS
THE WATER PERMIT REQUESTED
BY LUMINANT IS TO PUT WATER
INTO THE LAKE RATHER THAN
DISCHARGE IT. FRANKLY I DO
NOT UNDERSTAND THIS ISSUE.

IF THIS IS TRUE WHY WOULD
YOU NEED A PERMIT AND
WHY WOULD ANYONE OPPOSE
GETTING MORE WATER? HOWEVER,
WHERE WOULD THE WATER COME
FROM? AT ONE POINT I WAS
TOLD LUMINANT WAS BUILDING
A PLANT DOWN STREAM AND
RELEASING LAKE WATER. WHAT
ARE THE FACTS AND ISSUES??

COMMENTS: Property Values have plummeted with no way to sell dry lake front property. Both wildlife and fish population has suffered for years. Meetings should have been held a long time ago to let the citizens know of the takeover of most of the water in Lake Granbury and the Brazos River. The impact to the ecosystem should have been studied before the kill off of the fish within the Brazos Rivers. The Halff Study was fraudulent

mw

and TCEQ should have question this study. There needs to be Public Meeting here in Granbury and the TCEQ needs to address our concerns.

TCEQ MEETING GRANBURY JULY 8, 2014

QUESTION:

With Hood County on the border becoming Non-Attained for air quality monitored by the EPA, has a "Pre-Attainment New Source Review" been performed by the State of Texas to make certain that the two new power plant sources do not further degrade the air-quality and if it has been studied can you share with us what the predicted results will be on Hood County's air quality?

COMMENTS: I am writing to "oppose Luminant Power's application for 1 Billion gallons of water/day" for New Decordova Gas Fired Plants or for any other request for water from Lake Granbury. It staggers the imagination of how the Brazos River Authority has mishandled the water from Lake Granbury and asking for one drop more of water from a lake that has already been devastated in lake level, water quality, game and fish issues and safety concerns is ludicrous at best. Please do not approve and request from Luminant, the BRA or

WJ

any other entity for additional water from Lake Granbury. Thanks for the opportunity to speak on this important issue to all citizens of Hood County. Walter Garlington

COMMENTS: I am requesting a public meeting regarding this water permit in Granbury. Lake Granbury water management has been radically changed by the BRA since this permit was originally done. In addition, the quality of water in Granbury is one of the worst in Texas. Adding an additional pollution potential by cooling towers is not a good idea. Please have the meeting in Granbury so we can voice our concerns and ask questions.

COMMENTS: I am outraged at the continued applications to use water from an already depleted lake Granbury. While I understand and agree that Drought is having an impact it is also clear that the mismanagement of water is also a critical factor. The Economy of the City of Granbury is at Risk and Independant reports have documented this. I will like to request a Public Meeting with TCEQ and Lumiant so that the people of Granbury can make their views and concerns known. I look to the TCEQ to be fair and

MJ

equitable and to balance the needs of Industry with those that are Safety, Environmentally and Economically viable.

COMMENTS: I would think that the only way to fairly assist both Luminant and Granbury residents would be to parse the water according to the AVAILABILITY of water based on some acceptable criteria such as the lake's water LEVEL on a six month measurement basis. However, some confirmation needs to be made of whether the amount of gallons of water asked for by Luminant is in keeping with actual needs: also, whether other sources are being used and to what extent.

COMMENTS: I am writing to voice my protest and concern over your latest request for additional water out of Lake Granbury. I know you get tired of hearing from Granbury residents but I urge you to put yourselves in our place for a moment. The Lake is already devastated for most property owners around the Lake and users of the Lake. Boats lie dormant, docks unused, dry creek channels everywhere, debris and grass taking over. And to say the least, loss of property value and loss of revenue for the town. And please don't try to justify the lake level

MW

with drought, yes it has contributed, but not to the extent we are seeing now. Please, I ask you along with many others to reconsider. We can't use the Lake for ourselves, our kids, or for any recreational activities, plus it is costing the town too. Have a heart instead of being greedy.

TCEQ Hearing 7/8/14 PERMIT 5857 BY BRA

Ken Hackett <ken@granburysquareplaza.com>

Tue, Jul 8, 2014 at 6:10 PM

Draft To: khackett@swbell.net

Mr. Don Montgomery

Informal Session:

Global Question: "IT'S A DROUGHT, _____"

1. Purpose of Lake Granbury related to this deCordova Plant Permit. What is the TCEQ's understanding of Lake Granbury's original purpose for establishment of the Decordova Plant vs. it's new and current purpose as the makeup water supply for Squaw Creek Reservoir and Comanche Peak Units 1 & 2, and the proposed Units 3 & 4? Meaning, was Lake Granbury originally established to ultimately become the makeup water reservoir for such a large nuclear facility?

2. It is our understanding that the current permit for the Decordova is now expired. Is Luminant Energy operating on some type of temporary extension by the TCEQ, or are they currently operating outside their most recent 2005 permit renewal?

3. The current drought has demonstrate and placed great pressure on our water resources for local municipalities, here in the Upper Basin of the Brazos River.

- How will this permit renewal lessen the pressure on this natural resource.?
- Is Luminant required by TCEQ to explore more efficient ways to design, operate and the use of discharge water in to our reservoirs?

AND 1

Formal Session:

Moving target? Mr. Montgomery _____

1. In Appendix D of Appendix E-1 of the BRA's WMP, references the TXU's Comanche Peak & Decordova Plants Intake Structures Minimum Operation Levels of 678' and 675' respectfully:

- Quote the foot note of Appendix D.
- Please explain the what "start to be compromised" means for these intake levels.

RECEIVED

JUL 08 2014

AT PUBLIC MEETING

Public Interest Council: 512 239-6823

See #3 first.

local

Given Luminant's plans to install C-CTs

2. According to power plant engineers, all power plants are mandated by EPA to install cooling towers on all power plants that discharge into any stream and/or reservoir of the US by 2017. Due to it's water quality impact of this permit renewal, would you please confirm this mandate and if any such towers will be required at the Decordova Plant and/or Comanche Peak since Lake Granbury is the make up water as earlier referenced? —

3. Beginning in 1990, Luminant Energy installed 4 gas turbines at the Decordova Steam Generation Plant. Why does Luminant now need to renew such a large water permit today for cooling water, when the gas steam generation unit has been out of service since 2009, and demolished in 2013?

Combined Turbines Cycle

4. Why are we not talking about an amended permit today, since the cooling water for unit one @ Decordova is no longer required? *Not by the gas turbines in use today?*

3. *Permit tied to site;*

Comment:

Has the new water management scheme and the adoption of the "zonal draw down" post 2011 (developed & implemented by the BRA under the Halff Report) been reviewed and approved by the TCEQ or other Texas Regulatory Agencies and adheres to the Texas Water Code?

COMMENTS: I really hope the request for more water is turned down. Our lake is extremely low and pretty much unusable. If we keep selling water, pretty soon we won't have any water for our personal needs at our houses. Until the lake is back up to normal, and it looks like it will stay normal for the foreseeable future, we just spare any more water. Please turn this permit down.

COMMENTS: I definitely think we should get together and discuss the impact that the powers to be are inflicting on the property owners, business owners, and workers. It is my opinion I definitely think a meeting should be called. It seems to me that the 'powers to be' have no idea or just don't care what happens to Lake Granbury. It is a shame that due to greed some have no feelings for the Lake property owners, the businesses that depend on the lake and the people that have or had jobs at these businesses. The time has come for the people of the whole Brazos river to come together. We need to bring our lake back to a great place to live and work. The people responsible for keeping it in constant turmoil need to be identified and voted out no matter how long it takes. The world has already became too corrupt and the me, me, me, concept taken over.

people of the whole Brazos river to come together. We need to bring our lake back to a great place to live and work. The people responsible for keeping it in constant turmoil need to be identified and voted out no matter how long it takes. The world has already become too corrupt and the me, me, me, concept taken over.

COMMENTS: I am opposed to further sale of Brazos River water and support public hearings prior to any such sales. My wife and I have owned the property since 1997 and were planning to make Granbury our retirement home. Depletion of lake water has not only depressed property values but has also made Granbury a less attractive retirement location. Thank you.

COMMENTS: I strongly object to this request for 1 Billion gallons more water from Lake Granbury. You are requesting water from a drought parched county with record low lake levels. The City is in terrible financial distress due to the loss of revenue from the use of the lake and the environment is struggling, as well. We have fish kills, algae blooms and dying animals dependent on this water. This is a ridiculously bold request and the consequences of your corporation receiving this amount of water would be staggering. Quite honestly I am

M

horrified by your audacity and the way you snuck the request in the back of the newspaper. You are the worst neighbors, ever.

COMMENTS: I have lived in Granbury since 1980, and worked at CPSES for 21 years. I am both aware of the need for clean electricity and clean water. I am appalled, however, at the misuse of Lake Granbury, and allowing it to deplete to the point of the current very low lake level. Is Lake Granbury the only source of water in Texas? Is there not a balance that could be struck to help each entity? Are there no technologies to be used by a very rich company to keep our lake alive and thriving? Many issues need to be explored, and the input from

GMH

the Lake Granbury community should be part of the discussion and perhaps solution(s). We all live here (in Texas) and are affected by all these issues. When reason, not greed, prevails, I believe solutions will become clearer. Please arrange for a meeting in Granbury to bring awareness, participation, and involvement. No citizen should be left "in the dark" on these issues that affect us so directly or even indirectly. We should all act like true American and Texas citizens and "reason together." Thank you for this opportunity to communicate with you on this matter.

Knowing that Luminant wants to be a good citizen and successful in their business, can they request a specific level of water to be held in Lake Crabrun for successful operation of their plant, ~~no~~ matter what they do. Wouldnt this allow for a win-win situation for all of us?

Thank you
Bryce Johnson

COMMENTS: I would like to request a TCEQ public meeting here in Granbury to discuss Luminant's recent request. Lake Granbury is practically empty now. For Luminant to request 1 billion gallons per day for its 2 new gas-fired plants is outrageous. Taking more water from the already critically low lake will crucify the town of Granbury. With no lake, this town will dry up (possibly even quicker than the lake already has).

COMMENTS: I am totally distressed to learn that Luminant is requesting permits for more water from Lake Granbury. Our Lake has been devastated by the drought and the BRA's poor water management. For the first time in the history of the smallest and shallowest lake in the system, the BRA has permitted the lake levels to twice go below usable levels - 2011 and 2012 to present. While I understand that the lakes are reservoirs, Lake

MW

Granbury is unique in its value to the community and its impact on property values - the highest of any other lake on the Brazos River. Current low lake levels will be a health and safety issue this summer. I live on the main body and have observed the apparently punitive management of lake levels by the BRA - the most notable was the 3.5 foot drop over two days the week PRIOR to the 2012 Labor Day weekend, making the lake inaccessible to most homeowners - coincidental to the community's efforts to get a water management plan for the BRA water permit application. If Lake Granbury is to be the source of additional water, then a long term requirement to keep this high economic value lake at historical accessible levels should be a part of the permits - not unreasonable for a small shallow lake (reservoir) between two larger and deeper reservoirs. It seems to me that "environmental quality" applies to healthy water, wildlife, safety, community and PEOPLE. Please do the right thing for the PEOPLE of the Lake Granbury community.

COMMENTS: With the current conditions that we are experiencing with the drought, and the BRA selling more water than we can afford to supply, this request for a billion more gallons of water from Lake Granbury is the height of irresponsibility. Will somebody with a little common sense take over the leadership of this out of control office and bring it back to reality. I bought my lot on Lake Granbury in 1975 and have lived here since 1977, so I have seen droughts and low Lake levels, but never anything like what we are experiencing with this

DL

current leadership of the BRA. Hopefully we can stop this current administration before it is too late for the Brazos Basin to recover. Respectfully Dan Leach

COMMENTS: . Luminant has applied for a renewal of their power plant license on Lake Granbury Luminant's electrical power plant was dismantled last year and they now want to build 2 gas-fired power plants. Luminant is requesting 1 million acre ft/year of cycled water. We have done some research and have concerns about the loss of water during this process and especially water quality. We would like to request a Public Meeting to have our questions addressed.

COMMENTS: We moved to Granbury in February 2012 from the Cedar Creek Texas area with high expectations that lake living would be much improved. There has been a steady decline in the lake level to its current decline since the summer of 2012 which was the only time we were able to enjoy lake living like we expected. I can't stress enough how heartbroken we are. The July 4th holiday is our family reunion time that all kids and grand kids come to Grandma & Grandpa's for summer fun. There was no boating, fishing or watching

MW

fireworks from the boat last year and the water levels have declined rapidly since then. Granbury is a wonderful community and it will be a death sentence to the community to give Luminant one billion gallons per day from Lake Granbury! I don't understand the logic! Is it the goal to kill the Granbury community? Our property values are declining and many homes for sale in our neighborhood indicated lakefront property is no longer valuable. PLEASE STOP THIS INSANITY! We need to find ways to get water into Lake Granbury, not take it out!

COMMENTS: Lake Grabury is suffering enough with low water levels now. The lake is the lowest it has ever been since its inception. How could anyone ever consider requesting additional water from the lake? Already, the low lake levels are affecting wildlife, quality of life, property values, and ultimately the long term existence of the City of Granbury as it is today. As in global warming, when man begins to take more than he returns,

MW

there are severe consequences. We need to work to preserve the water we have and reduce the amount already being taken rather than looking for ways to take more!! This deficit thinking needs to change!!

COMMENTS: I find it incomprehensible that an electric company would drain a lake that people paid large sums of money so they can have waterfront property and find themselves high and dry. It seems as though you can do some research and find another source of water. Our electric company, in order to keep from drilling a well and lowering the aquifer, uses the recycled water from the nearest city to cool their condensers, which I'm

me

assuming that is what the water will be used for, and nothing will be wasted. I sure hope you will look to find another source of water instead of lake Granbury.

COMMENTS: Why can't the cooling of the plant be like the cooling of any engine? Use a radiator or heat exchanger. It's stupid to waste 1 billion gallons of water per day just to generate electricity. I feel strongly you will have a hue and cry over this. I want to say so much more but you'd have me arrested for "hate speech". I've already lost \$75,000.00 of value on my home/property. The hood county economy is being affected negatively. local businesses are facing another (3rd year) of lost sales because people don't come here for vacation/visits

M

anymore, and the people left are on fixed income and only purchase subsistence items. You call yourself Texas Comm. on Environmental Quality, well, you've stood idly by while millions of fish, birds and shellfish have died, now you want to make it infinitely worse! Shame. You should not even consider this request except for the fact that you and the crony capitalists are using YOU as a tool for their GREED MACHINE. That's enough, you get the picture.

COMMENTS: Where is the wisdom in leaching our water? Who is benefiting financially from this deal? ...which is the real question. Money is the driving motivator. Shame on the people who are involved. Please make wise decisions regarding the sale of any more water from our lake.

COMMENTS: Here is a picture of what we see every day, no sounds of boats or people going by, just the geese. The businesses are hurting and there was only one family at the City Beach during spring break week when we were there showing our family who came to visit how sad it all is. This is a Travasty! Who ever was responsible for letting our lake to come to this for WHAT!!! should be found out and put out of office!!!!

COMMENTS: In the current drought condition, I feel this application should be rejected until the Brazos River Authority and the TECQ can satisfactorily answer the following questions: 1. The de Cordova Power Plant was operational prior to 2010 and had a water allotment. What happened to that water? Was it sold to someone else? 2. The Brazos River Authority has declared this to be a Stage II drought. In their Drought Contingency Plan, it is stated that in this stage, the usage should be reduced 10%. Under these circumstances, how can they justify

mm

increasing the water usage? 3. How does this application fit in with the State Water Plan and the newly created state agency for oversight of the Brazos River Authority and other river authorities? We are in a drought. We are all being asked to conserve water. How can any responsible party consider increasing their water usage? Do we have to wait until all the reservoirs are dry before we bring the Brazos River Authority under control?

COMMENTS: The Brazos River Authority and the power companies are killing my community by draining Lake Granbury. You are devistating our property values. My property taxes keep going up because I have waterfront property but I haven't been able to get my \$40K boat in the water for two years. Sure the drought has impacted the water lever but I have been on Lake Granbury for 14 years and never seen it below 3 or 4 feet low and it always filled back up in the spring. Think of all the lives that are being ruined by selling the water and

Handwritten signature: MW

drying up the lake. Think of all of the small businesses adversely affected by the loss of boating and the resulting loss of business from tourism. Granbury was packed on Memorial Day, July 4th, and Labor Day in years past. The lake was packed with boats. The shores were packed with people grilling and celebrating. Not now.

COMMENTS: I am requesting a public meeting in Granbury, TX regarding the issue of Luminant's request for additional water. I do not understand how Luminant has the audacity to continue to request more water. Luminant needs to be a more responsible company and build their power plants where there is a larger water source or create their own water source. Why does Luminant continue to try to drain Granbury?

COMMENTS: We would like TECQ to have a public meeting to explain what effects this plant will have on the water quality. It does not seem like a positive thing for our lake and we already have enough problems with our lake and BRA. Our lake home is becoming worthless from BRA and now one more negative. Homes should not have been allowed on Granbury if it was built for industrial use. Our dream of living on the lake have been destroyed by the drought & selfish industrial water hogs.

REGULATED ENTITY NAME DECORDOVA STEAM ELECTRIC STATION

RN NUMBER: RN100664812

PERMIT NUMBER: WQ0001481000

DOCKET NUMBER:

COUNTY: HOOD

PRINCIPAL NAME: DECORDOVA POWER COMPANY LLC

CN NUMBER: CN603264433

FROM

NAME: MRS Glenda Sargent

E-MAIL: gsargent1951@yahoo.com

COMPANY:

ADDRESS: 1203 CARMEL CT
GRANBURY TX 76048-1245

PHONE: 2545921480

FAX:

COMMENTS: It is our desire to urge you not to allow the permit. Lake Granbury will soon be nothing but just a dry lakebed with weeds out of control ect. We bought a home on the lake and we have no water although it was suppose to be "waterfront property." This will seriously impact Granbury in a very negative way. We urge you to please don't grant this permit! Please help us to keep our Lake and protect our town of Granbury.

COMMENTS: With water levels in Lake Granbury already at historic lows, there are real concerns for taking additional water from the lake and watershed. Population of the area is growing quickly and this lake is relied upon for both fresh water and recreation in the area. Economically, the area is depressed solely due to low lake levels and there are safety concerns with sea walls weakening due to lack of support from the lake. A public meeting in Granbury between Luminant, TCEQ and citizens would show case the issues.

COMMENTS: I am a long time resident of Granbury. The only reason I live here is because of Lake Granbury. In these draught conditions, your use of nature's water has clearly exacerbated the current lake level problem. Until that problem is resolved, you have no business approving any further usage of water by any Luminant or any existing or proposed affiliates of Luminant. Please appreciate that this decision is good business for you and the state of Texas. If Lake Granbury remains dried up, then the city of Granbury and the majority of its tax base

MS

will dry up. You need to do whatever you can to PUT WATER BACK INTO LAKE GRANBURY, NOT TAKE IT OUT. Thank you, Gregory Talmadge

COMMENTS: You cannot allow anymore water to be sold from Lake Granbury. It is becoming an enviromental disaster and destroying a growing county. At some point the elected and appointed officials making these decisions will be held accountable. Make the Brazos River Authority and the for profit power companies start building more water storage with their profits instead of taking and destroying a lake that is

MW

over stressed. Maybe Granbury will totally dry up this summer and get national attention when the nuclear plant cannot take anymore of our water.

COMMENTS: Please do not approve the request for more water to be taken from Lake Granbury. The economic impact that the already low levels are having on our community are terrible. Allowing more water to be pulled from the lake will only make matters worse. I believe the Luminant needs to revise the way they are currently managing the water that they already have access to. The mis-use of this valuable water resource is absolutely atrocious. Thank you for your time.

COMMENTS: Please reconsider your request for more water out of Lake Granbury. The entire community has been negatively financially affected by the historic low water levels. Waterfront real estate continues to plummet and a lake that once was a beautiful, scenic lake is now unsafe for wildlife species and can no longer be navigated. Surely, there are alternatives for Luminant other than to drain the lake dry. The community should have a voice in this decision since we are the ones that pay taxes to keep Granbury alive.

COMMENTS: Our lake has been abuse and now looks more like Brazos River/Creek. I think it would help if TCEQ would meet with Granbury community and have an opportunity, first hand, to see our situation. I do not think that any water should be sold or distributed to another power plant. Please hear and see our issues.

COMMENTS: Please DO NOT allow Luminent access to our most precious natural resource, namely water. This is a company that is on the verge of bankruptcy and has a history of consuming natural resources with little concern about anything but their own financial gains. Please DO NOT allow the BRA to manage this situation either... they have clearly proven themselves to be irresponsible with water rights... overselling water, not increasing the drought status level and putting Lake Granbury into historical lake levels that have never been

MW

seen and padding their bank accounts to record levels at the communities expense (property values, tax revenues losses, recreational suspensions etc...) . The drought is a problem... but the drought has shown us the motives of BRA and Luminant. (Squaw Creek is over flowing) The demand for water with only increase in the coming years. We need to REDUCE the amount of water sales and protect water aggressively, especially during a drought. PLEASE PLEASE PLEASE do not allow the most precious natural resource in Texas to be consumed by a large multinational corporation, run by the biggest investment bankers in the world out of NY. Please carefully review the Luminant and BRA track record - which is clearly shows considerable concern, if not just bad management. If left unchecked.. . they will take it all. Please support the people and community of Granbury which to date have been over run by greed and profiteering.... at the expense of regular Texas tax payers. Please protect us and send Luminant a message that we are serious about protecting and responsibly managing our natural resources. Chris Troyak

COMMENTS: Dear TCEQ. I am appalled that Luminant Power is requesting 1 billion gallons water/day for their gas fired plants on Lake Granbury There are many water quality issues, game fish issues, inefficient cycled water issues, and safety issues that all need to be addressed. Rather than make detailed public comment here on all these considerations, I ask TCEQ to have a Public Meeting with all Hood County Residents here in

MWD

Granbury. At that time, Luminant and TCEQ can address all residents and their concerns. thanks for your consideration. Joe Williams
