COMMENTS: We are seriously concerned about the impact on the air quality in our sub division of Country ridge. Further it most definitely will impact our home values in a negative manner. WE definitely oppose the construction of this concrete facility so near to a densely populated area. There are plenty of places nearby that would not border populated areas.

COMMENTS: I oppose having the Air Quality Standard Permit being granted to BARTOO READY MIX, LLC (registration number 120783) at 550 County Road 364 Melissa, TX 75454. My primary objection is that this is adjacent to a residential area. The proposed facility will emit air contaminants and particulate matter including (but not limited to) aggregate, cement, road dust, and particulate matter with diameters of 10 microns

CM

or less and 2.5 microns or less. Exposure to these contaminants present a health risk for myself and other residents. Please reject this permit request. There are more suitable locations for this plant.

COMMENTS: I am writing in regard to the proposed Bartoo Ready Mix Concrete Batch facility on County Road 364. This facility would not only introduce a noise and waste concern for our community, it would also create an enormous safety hazard as trucks are running in and out of the plant through roadways that are not designed for large trucks, and creating safety issues for all residents in and around the proposed site. We have had the joy of experiencing the nearly daily accidents that have been a part of the Central Expressway

MW

expansion, the noise associated with that, and the deadly result of large trucks using our roadways as their own personal raceways...Introducing a facility that encourages additional large trucks while still working on Central expressway is absurd. Now with the proposal and presentations within the last couple of weeks on Hwy 5, this is a recipe for disaster. We trust that the County leaders responsible for representing the best interest of our community and its citizens will vote against this project/program and see that it has little if any long term benefit to our community. This proposed facility adjoins multiple bedroom communities and is NOT the sort of place that should have a Concrete Manufacturing facility on either a short or long term basis.

COMMENTS: Please deny the application for Bartoo Ready Mix to build a batch plant in Melissa so close to residential areas. Many children in the neighborhood would suffer the detrimental effects of the dust and contaminates produced by this plant. We live in Melissa to escape many of the pollutants of the big cities. There are many sites available, which would not affect our children and families. I would like to see Bartoo find a

me

more appropriate site, further away from all residential areas that would be affected due to our strong Texas winds.

COMMENTS: My husband and I are opposed to having a Permit granted to BARTOO READY MIX, LLC (registration number 120783) at 550 County Road 364 Melissa, TX 75454. I have asthma and am already suffering because of the on going road work on Hwy 75. This application states that, "The proposed facility will emit the following air contaminants: particulate matter including (but not limited to) aggregate, cement, road dust, and particulate matter with diameters of 10 microns or less and 2.5 microns or less". Those words from the

MW

cement company are enough proof that this type of plant does not need to be close to any subdivision, especially when there are other places it can be built. While I understand that cement plants are temporary and shut down once the project(s) is finished, I agree with one of my other neighbors that neighborhoods are permanent and thus priority should be given to the residents, not a business that is temporary. I beg you to please consider the health and well being of the residents. We are already enduring the air contaminates from the highway construction. Thank you for allowing us to comment and thank you for considering our objections.

COMMENTS: I whole heartedly oppose the approval of the permit in the matter of the BARTOO READY MIX, LLC to be located on County Road 364 in Melissa as I have been a neighbor for 24 years to this area and have strong reservations to the future impact of the "Cement Plant" on a country road with several families and livestock as well as wild life in the area. The prevailing winds would carry the "dust" or chemicals from the plant to all of our homes, making the dust alone a nusiance but more so the inhaled dust could cause respiratory

MW

issues with the families and several children. There is a school, Elementary, Middle and High within 1.5 miles of the proposed plant and the dust is proven to travel up to 5 miles endangering the young lungs of many children, the travelling dust can also pollute stock ponds that our livestock drink from, the runoff of chemicals could pollute the ground water of the area as we are in a "flood plane" area also referred to as a wildlife wetlands area which should have some governmental protection from this happening. I cannot imagine who would approve such an industrial development to such a sensitive area and ignore the personal impact on health and well being of families that have lived in this area for generations. Please consider the health of humans and livestock in this area before you even consider approval of this type of industrial development.

FAX:

COMMENTS: I strongly protest the application of the Bartoo Ready Mix plant being located on our quiet country road for several reasons, many have already been stated by other neighbors, primarily the pollution factor for respiratory reasons as well as agriculture issues, this area is not only a "flood plain" area it is also considered to be a National Wetlands area where we cannot even build additional housing down near the creek due to environmental impact to water table and possible endangered animals living in the area, we have several

me

owls, hawks as well as bobcats and deer that have been seen all over this area. The noise pollution is an issue as well as air pollution, we have an elementary, middle and high school within 1 mile of this area where our children run, play and exercise during the peak of the cement production times, whereas the dust could travel to their young lungs and this is absolutely unacceptable for any parent to acknowledge as beneficial. Please do not allow this agricultural area to become an industrial area, our little valley has remained beautiful for far too long to ruin due to progress and a good deal on property, re-locate the plant to a less impacted area please.

COMMENTS: It has come to light that a permit has been submitted to put in a concrete plant next to our neighborhood. Naturally I am concerned with the additional noise and dust pollution, but am equally concerned with the safety. I would like to point out that concrete companies typically have terrible safety records, and due to the fact that our access road is becoming one way, our entire neighborhood will be on the same roads with these unbelievably heavy trucks. Due to the high volume of trucks that come and go in these plants, please

mm

carefully consider where you allow them in communities. I understand that the application is not in Melissa proper, but that is a technicality in consideration with the proximity of a wonderful neighborhood. Common sense needs to apply here, and I trust you will weigh this heavy when you think of the many families that will be impacted. Please think that you lived in this community...and then make your decision.

COMMENTS: I strongly discourage granting a permit for the concrete batch plant at its current proposed location. There are currently different sites in industrial areas that would mitigate the issue that this proposed location is creating. Decreased air quality for the residential areas in the immediate vicinity are of great concern. I would greatly appreciate the TCEQ withholding the permit. There is a rapidly growing number of citizens in

MW

the area which are strongly opposed to this proposed concrete batch site. The location poses too many health risks to the nearby residents.

RECEIVED
OCT 09 2014
AT PUBLIC MEETING

Texas Commission on Environmental Quality

Dear Sirs:

I respectfully request that you deny the Bartoo Ready Mix application to build a concrete mixing plant on the land bordering the Country Ridge Property. I believe that it will first and foremost be a hazard to my health and that of my family. I suffer from asthma, as do my children, and the contaminants coming from a concrete mixing plant in such close proximity to my home, will be a health risk for me. Secondly, I believe that the extra traffic generated by the concrete mixing plant will be an unnecessary burden. Lastly, I am sure you can understand that our home and the other homes in our neighborhood will be greatly devalued. I ask that you please deny the request by Bartoo Ready Mix to build on the area bordering the Country Ridge Neighborhood.

Sincerely,

Juan Diaz

MCD

COMMENTS: I strongly oppose the approval of the permit for BARTOO READY MIX, LLC to be located on County Road 364 in Melissa. Approval will negatively effect the health and safety of ALL Country Ridge residents and will make the Country Ridge park uninhabitable and unusable not to mention lower our property values. Please decline this permit. This will directly affect all Melissa Residence.

COMMENTS: I am against the granting of this permit in its current geographic location. The plant is too close to residential neighborhoods, parks, and schools. The predominant wind from the north will continually move particles toward these areas and could be harmful. There is adequate space in Collin County further away from populated areas to grant the permit and not interfere with the areas noted above.

COMMENTS: I strongly oppose the pending application by Bartoo Ready Mix,LLC to build a Concrete Batch Plant on property addressed as 550 CR 364 Melissa,Texas. I object because of increased truck traffic and it's endangerment to school buses,Mother's school carpools,commuters and local residents. Basically this is a quiet residential farm/ranch community.The air pollution factor and problems to families and farm animals is a huge responsibility to all involved in this judgement.Local citizens who have chosen to secure their families in safe

MS

homes for many years ,at no small expense and sacrifice, and their right to live in a family community must be given high priority and heartfelt consideration.The effect of such a potentially unacceptable air safety situation and heavy truck traffic could have devastating results upon home values and farm land usage. I thank you for your time and commitment. Most cordially, Lucy Dysart

COMMENTS: We opposed to an Air Quality Standard Permit being granted to BARTOO READY MIX, LLC (registration number 120783) at 550 County Road 364 Melissa, TX 75454. Our main objection to this permit is due to the following statement in the NOTICE OF RECEIPT OF APPLICATION AND INTENT TO OBTAIN AIR QUALITY STANDARD PERMIT REGISTRATION: "The proposed facility will emit the following air contaminants: particulate matter including (but not limited to) aggregate, cement, road dust, and particulate

ML

matter with diameters of 10 microns or less and 2.5 microns or less". This statement flat out says that this facility will be emitting these contaminants. This is a residential area not a industrial area as we recently lost parents to COPD and lung cancer, exposure to these contaminants would be both irresponsible and unsafe. We find it negligent and discerning that Bartoo Ready Mix LLC would even consider building in a residential area and expose our families and children to these stated pollutants.

COMMENTS: The air quality of this community will be negatively affected if Bartoo is allowed to build and operate a batch concrete plant. The narrow dirt road is not adequate for large delivery dump trucks to deliver the raw materials or the concrete trucks to make deliveries from the plant. The size of those trucks would be a hazard for any school bus, or private vehicle, to be traveling on the road in the opposite direction to safely maneuver. Those heavy trucks will cause noise pollution as well as a lot of dust, and when it rains will create

MW

ruts that will make travel on that road by family vehicles next to impossible. The contaminants that are produced by this plant would spread throughout the community in the air, would affect not only the livestock, agricultural and bee farmers but also the residential neighborhoods and three schools that are very near the proposed batch concrete plant site. Our children grades 4 through 12 would be exposed unnecessarily to hazards of the micro fine dust particles that the plant would create. Many of the people in this area have moved here to get away from the air and noise pollution business like this concrete plant would create. The City of Melissa already has one concrete plant and a dump. Aren't those enough contaminants for one community? The ramifications on this community, surrounding area, school children and all the residents for this plant to exist would be devastating. Please do not allow this plant to be built.

COMMENTS: My family is opposed to having an Air Quality Standard Permit granted to BARTOO READY MIX, LLC (registration number 120783) at 550 County Road 364 Melissa, TX 75454. My family moved here in Country Ridge for country living and cleaner air and one of the main reasons we chose this location was to avoid the noise and pollution of larger cities. The NOTICE OF RECEIPT OF APPLICATION AND INTENT TO OBTAIN AIR QUALITY STANDARD PERMIT REGISTRATION states that, "The proposed facility will

MSW

emit the following air contaminants: particulate matter including (but not limited to) aggregate, cement, road dust, and particulate matter with diameters of 10 microns or less and 2.5 microns or less". Those words from the cement company is enough to say no to them to build here. Find another location. And reiterating on another neighbor's comments..."Having these contaminants released into the air will impact all our neighbors health in a very negative way. In addition to the health and quality of life impact this cement plant would have on my family it will decrease tax revenues for the City of Melissa, Collin County, and the Collin County Community College District because property values in the neighborhood will fall if the plant is built. There are many other locations in the area that would be far more appropriate for Bartoo Ready Mix to build on. Cement plants are temporary and shut down once the project(s) is finished but neighborhoods are permanent and thus priority should be given to the residents, not a business that will move on and leave who know what kind of havoc in its wake."

COMMENTS: I wish to coment on this permit as it applies to myself and my neighbors. We live in an agricultural neighborhood where we all own various livestock. Horses, llamas and goats included. This entails many residents as livestock owners, not just a few. We cannot have an industrial cement plant in this area as it would create an cause unhealthy pollution. We understand the property is zoned commercial not industrial. We also know the owner hid the permit application signs so they would not be seen. He has already started polluting

MJD

the are by burning brush. The smoke permeated our homes and was not pleasant. The fire department came out because of this. Please understand that this is not the complaint of one person but several families in the area and the adjacent sub-divisions. Please help us. Thank you.

Barbara S. Hixon
4722 Highland Rd.
Melissa, Tx 75454

To whom it may concern,

We and our immediate neighbors already have 3 concrete batching plants and now a possible 4th plant ~~within~~ within walking distance of each other and our residents.

They pollute the air with truck exhaust, noise, and by-products of the batching. We need you ~~to~~ to provide protection for us and deny the application of Bartool LLC.

COMMENTS: It is my plea to TCEQ that Bartoo Ready Mix, LLC request for an Air Quality Permit be DENIED. Our farm where my wife and I have lived for the past 45 years has frontage on Throckmorton Road (County Road 364). In fact, our home is less than 3,000 feet from the proposed concrete batch plant site. Both my wife and I are senior citizens, and we both are cancer patients. My wife is being medicated to help prevent reoccurrence of breast cancer, and I am undergoing treatment to help prevent reoccurrence of prostate cancer.

M

So you can readily understand why a high quality environment, particularly air environment, could be a matter of live or death for each of us. Please do not compromise our local environmental quality further by locating a concrete batch plant in our neighborhood.

MELISSA TX 75454-8908

PHONE: 9728372036

FAX:

COMMENTS: The Board of Directors of the Country Ridge Property Owners Association hereby submits its strenuous objections to the building of the proposed concrete batch plant on County Road 364. Country Ridge is property owners association in the City of Melissa consisting of 242 one and one-half acre residential lots immediately to the south of the proposed plant. Currently 205 families reside within Country Ridge. Country Ridge also contains a large park accessible to all the residents. The northern boundary of the Country Ridge

MCC

park borders on CR364 and is only three tenths of a mile from the proposed plant. The dust and contaminates from the plant, as well as the dust from the trucks using the CR364 gravel road to access the plant, will directly and adversely affect the properties in Country Ridge, the health and well being of the residents of Country Ridge, and will render the Country Ridge park uninhabitable and unusable by its residents. We only need to look to the concrete batch plant on Hwy 121 in Frisco, and the continuous and constant complaints by the residents in the homes near the plant, to understand the adverse effects of this proposed plant on Country Ridge and its residents. In addition to the above, it should be pointed out that Bartoo Ready Mix falsely claimed in its filing with the TCEQ that the proposed plant is not within the extraterritorial jurisdiction of the City of Melissa (See Bartoo's response to Question II. D. 3). Maps clearly show, and the Melissa City Manager, Jason Little, has confirmed, that the plant is within Melissa's ETJ. Despite Bartoo's incorrectly placing the plant outside Melissa's ETJ, the contaminates and dust from this proposed plant will clearly adversely affect the City, its residents and future development plans in this area. Country Ridge Property Owners Association urges the TCEQ to reject this proposed plant. Respectfully submitted, Larry Hofmann, Vice President, Country Ridge Property Owners Association Board of Directors Based on TCEQ rule Section 1.10(h), the TCEQ General Counsel has waived the filing requirements of Section 1.10(c) to allow the filing of comments, requests, or withdrawals using this online system. The General Counsel also has waived the requirements of Section 1.10(e) so that the time of filing your electronic comments or requests is the time this online system receives your comments or requests. Comments or requests are considered timely if received by 5:00 p.m. CST on the due date.

COMMENTS: Allowing a concrete plant to be built so close to a residential area makes absolutely no sense whatsoever to me. It's not like there is a shortage of other locations not too distant that would be away from housing developments and probably even less expensive to build on. What's worse is that the infrastructure in the area is not at all built for a constant stream of concrete trucks driving up and down the area. I understand

mw

that everyone will have a NIMBY complaint no matter where it goes but reducing the proximity to where people live seems like a no brainer for this kind of an operation.

COMMENTS: We own property near the proposed site for the Bartoo Ready Mix Concrete Batch plant. We bought the property to build a home and enjoy the quiet, natural beauty of this rural location. We often have Boy Scout troops come to the property to camp and enjoy other activities in this beautiful location. We did NOT buy this property with the hope that we would be living next to an industrial development. This noisy, dusty blight opens the door to other intrusive industrial development that affects our neighborhood and our way of

MW

life. This area is zoned agriculture and residential. If Bartoo Ready Mix, LLC is allowed to trample on the quality of life and value of the immediate neighbors, a dangerous precedence is set. Awarding a permit at the proposed location would immediately lower the surrounding property values and consign the area to future industrial intrusions, increase water consumption in the midst of a drought, increase breathing problems from particulates, increase noise and traffic in a quiet rural environment, and replace beautiful starry nights with harsh security yard lights, thus negatively impacting the resident's quality of life. We feel awarding the permit would benefit the owners of Bartoo Ready Mix, LLC at the expense of the surrounding neighborhoods. Therefore, we don't believe awarding permit #120783 would be "consistent with sustainable economic development". Please DO NOT award permit #120783.

COMMENTS: I OPPOSE this permit and respectfully request you DENY TCEQ ID 120783. (1) Residential
The proposed location of this cement plant is in close proximity of over a dozen county homes and less than
2000 ft. from the northern edge of the Country Ridge Community Park where children play. Just 3500 ft. south
of this site is the established Melissa community named Country Ridge and 4000 ft directly north of the site is

MS

another large residential community named Pecan Grove. (2) Roads – The roads accessing this site are from the east and the west. Both are very narrow gravel roads that are as narrow as 14 ft with no shoulder and a prominent ditch. They were not designed and constructed to handle the large and heavy truck traffic. Introducing this type of traffic to these roads will pose safety risks, quickly deteriorate the gravel road, and put more dust in the air and noise pollution to the residents. (3) The residents of Melissa already shoulder all the burdens of a permanent concrete plant that exists today just 1.25 miles directly east of the proposed site. There is not a need to add a concrete plant at this site.

COMMENTS: I strongly discourage granting a permit for the concrete batch plant at its current proposed location. Aside from the legitimate concerns of additional particulates in the air and general quality of life concerns mentioned in previous comments, the particular site does not have an adequate public roadway that is designed and constructed to handle the heavy truck traffic to safely access the proposed site. Melissa already has batch plants located in the City limits that have adequate access to and from a public road. Additional

mu

concerns relate to the dust management that will certainly be generated on the site that will impact all adjacent residents and properties. Drainage management also needs to be addressed during any site development, as the City is required to manage drainage in the extraterritorial jurisdiction, and the public safety response, particularly fire response, on a site that does not have fire flow protection.

COMMENTS: I am opposed to having an Air Quality Standard Permit granted to BARTOO READY MIX, LLC (registration number 120783) at 550 County Road 364 Melissa, TX 75454. My family has lived in Country Ridge for 12 years and one of the main reasons we chose this location was to avoid the noise and pollution of larger cities. The NOTICE OF RECEIPT OF APPLICATION AND INTENT TO OBTAIN AIR QUALITY STANDARD PERMIT REGISTRATION states that, "The proposed facility will emit the following

CRW

air contaminants: particulate matter including (but not limited to) aggregate, cement, road dust, and particulate matter with diameters of 10 microns or less and 2.5 microns or less". My mother-in-law lives with us and suffers from COPD so having these contaminants released into the air will impact her health in a very negative way, not to mention the potential long-term effects it will have on myself, my husband, and my three sons. In addition to the health and quality of life impact this cement plant would have on my family it will decrease tax revenues for the City of Melissa, Collin County, and the Collin County Community College District because property values in the neighborhood will fall if the plant is built. There are many other locations in the area that would be far more appropriate for Bartoo Ready Mix to build on. Cement plants are temporary and shut down once the project(s) is finished but neighborhoods are permanent and thus priority should be given to the residents, not a business that will move on and leave who know what kind of havoc in its wake.

COMMENTS: We live on the north boundary of Country Ridge Estates in Melissa. My mother in law and grandmother in law also reside with us as they have respiratory issues and require oxygen. The proposed cement plant being requested under this permit will cause an immediate health hazard to them. The prevailing winds are southerly for the majority of the year which will expose us even more. The primary reason we moved to this area was due to the improved air quality from the Metroplex. If the cement plant wants to purchase our property for

Handwritten signature:
mm

market price and relocate us due to the impending health hazard then we would consider that. Otherwise it would be a tragedy to expose the residents of Country Ridge who intentionally moved to the area to avoid air quality issues to such a harmful facility. We respectfully request you deny the permit based on location alone.

COMMENTS: Our home is less than 5 miles of the proposed cement factory on Throckmorton Rd in Melissa. We are concerned about the pollutants from such a plant. This plant is surrounded by several developments/homes, elementary, middle and high school. We understand that this cement factory is not temporary, but to be a permanent facility. Melissa already has two cement factory sites - one on 121 and Fannin Rd and another on highway 5. EPA published in 2014, that "cement plants are the third largest industrial source

mm

of air pollution, emitting more than 500,000 tons per yr. of SO₂, NO_x, and carbon monoxide. The pollution can contribute to respiratory illness and heart disease, the formation of acid rain, reduce visibility, and can be transported over long distances before falling on land and water." We are against the building of this facility. This is considered an industrial facility and the area is not zoned for industrial use and is in close proximity to residential areas.

COMMENTS: As a 15-year resident of Country Ridge, I do not want to have a concrete plant operating on the edge of this large housing addition. Obviously, it will negatively impact my housing appraisal, but I also have concerns about contaminants and dust that would undoubtedly affect the leisure activities many of us partake in here in Country Ridge. It's a safe neighborhood where kids enjoy playing outside and families work outdoors,

Mu

ride bikes and walk together, and I believe the addition of a concrete plant would be detrimental to this wholesome environment. Please seek an alternative location that is farther away from a large housing addition.

COMMENTS: I believe a concrete batch plant will cause drifting clouds of dust, cement, and smoke over my property just north of the planned site. Pollution of air and of ground water in the adjacent creek will be severely affected in my opinion. Truck traffic on CR 364 will require reconstruction of the bridge located between the site and U. S. Highway 75. Therefore, I strenuously oppose the creation of this batch plant at the proposed site! Thank you for the opportunity to express my views on this matter! Jerry C. McGrew, MD.

COMMENTS: My family strongly opposes the building of a concrete plant less than a mile from our neighborhood. Concrete plants are known for air pollution and for causing health problems. The plants in Midlothian are a prime example. Some neighborhoods were built there after the plant was already in existence, but in this case, Country Ridge has been here for more than 20 years (my house was built in 1986 and there are some that are even older). We have nice, sought after homes however, that would change with a concrete plant

MM

as close as the proposed site. There is plenty of land on the west side of 75 still in Collin County that is far enough away from established neighborhoods if a concrete plant in this area is needed. Please consider the health risks and the large reduction in value of our land and homes before approving this request.

COMMENTS: Hi highly object to the location for Bartoo Ready Mix to build a cement plant. It is too close to a residential subdivision. There are better locations for Bartoo to consider. My children play at the park in which the plant would be next too, this would halt use of our park area for many families. The pollution from this plant would be harmful to the health of Country Ridge residents, and a decrease in our property values would most likely be seen.

COMMENTS: TCEQ Permit #120783 needs to be denied. I assume that the executive officers at Bartoo Ready Mix simply opened a map and picked a spot. Of all people, they should know the devastating impacts such a plant can have on a community. Pollution, dust, dangerous truck traffic, declining property values, health and environmental concerns. By knowingly choosing a site so close to so many residences they have already shown complete disregard for our community. We live here. This is our home. If this permit is approved, we have

MSW

nowhere to go. If it is denied, they have countless alternative sites located far from residential areas from which to choose. Sites that won't affect the health, safety and overall quality of life for so many hard working Texans. Please do the right thing for the residents living in our community. Protect our community and keep our families safe. Deny the permit.

COMMENTS: I would like to formally protest the construction of this proposed concrete plant in such close proximity to the residential development of Country Ridge. It is completely unacceptable to allow an industrial concrete plant to be built on the northern boundary of this development thereby causing detrimental effects on the property values and our quality of life. There are many other location options available that would be much safer and have less negative impact on the community than this proposed site.

COMMENTS: The entire road rebuilding project has created a dust and congestion problem to date. There must be other areas convenient to the construction site that is not so near housing and would not create problems for the population. There is already one stone processing area on SH 121 which is contributing dust contaminants to the Melissa population. ONE IS ENOUGH.

COMMENTS: Dear Sir, Please do not allow the Bartoo Ready Mix plant to be installed just outside the Melissa city limit next to the Country Ridge sub-division. This neighborhood contains many senior citizens and young children who would be adversely affected by the smoke, dust and other airborne contaminants that may occur. Heavy cement trucks would be a danger to the local traffic containing young families going to school, church, sporting events, and other activities. John Sledge

MEETING AGENDA

- Introduction [7:00 p.m.].....TCEQ
- Identify Elected Officials.....TCEQ
- Presentations.....Applicant & TCEQ

Informal Discussion Period

- Questions & Answers.....Public

Members of the public may ask questions during this time period. TCEQ staff and the Applicant will respond to questions. This time period is for discussion purposes and for obtaining information from TCEQ staff and the Applicant. **Questions and/or comments made during this period will not be considered formal comment, and will not go to the Commissioners. Additionally, no written response will be prepared for comments made during this period.**

Formal Comment Period

- Formal Comments.....Public

During the formal comment period members of the public may voice concerns or comments. **Neither the Applicant nor TCEQ staff will respond during the formal comment period.** After the close of all comment periods, the Executive Director will summarize the formal comments and prepare a written response to comments (RTC). This RTC will be made available to the public and will also be mailed to those who submitted written comments or formal comments at a public meeting.

Everyone who wishes to comment will have the opportunity to do so, however, we may ask that each commentor limit their time so that everyone will have time to speak.

- Closing Remarks/Adjournment.....TCEQ

Please Note: Written comments may be submitted anytime during the evening.

COMMENTS: I do not want this anywhere near my neighborhood. only live about 1 mile from this and it can carry up to five miles. Cement kilns are known to release mercury into the air. Once the mercury is released into the air, it has to land somewhere which means on the land as well as into our waterways. The mercury contaminates everything. Dioxins from Cement Plants Cement plants release many toxins into our environment including dioxins. Dioxins can cause many health problems including non-Hodgkin's lymphoma and cancer.

M76

Minor effects of dioxin exposure can cause skin ailments, burning of the oral cavities, lightheadedness, urinary problems, aches and pains as well as nausea and vomiting. Exposure at low levels can also cause gastric problems and the excessive and abnormal growth of hair. The closer you live to a cement plant the higher dioxin level you will get into your body. At high levels, the potential for more serious health problem increases. Dioxins can wreak havoc on many systems in the human body. Infertility problems can affect both men and women. Developmental delays in children have been the result of high dioxin exposure. Cases of diabetes and heart disease are higher in areas near cement plants. Dioxins also cause liver problems, pancreatic issues and diseases of the circulatory and respiratory systems of the body. Don Sutton

COMMENTS: I am writing to protest the proposed cement plant that is currently being considered for the bordering property of Country Ridge in Melissa. When we bought our property on Trailridge Drive, we did it because we wanted to be able to live without the sights, sounds, smells, and pollutants of city living. Country Ridge is known for those qualities. The cement plant will completely destroy the quality of living for which we purchased our property and will decrease our property value. We have already experienced the unfortunate

MW

dump sight in Melissa, this is just too much for our peaceful and high revenue tax community to take! Please move the proposed plant to an area that will not directly, drastically, and negatively be affected by it. There are many sights in the county that do not border tax payer homes. Please, please, do not allow this plant to build on the proposed sight.

COMMENTS: I would like to formally protest the construction of this proposed concrete plant in such close proximity to the long-established residential development of Country Ridge. Country Ridge property owners have already suffered an environmental and economic blow by having a working landfill just a short distance away. The Landfill constantly emits noxious fumes that inhibit outdoor activities on a regular basis due to the overwhelming stench. To allow an industrial concrete plant to be built on the northern boundary of this

MW

development is completely unacceptable. The tax revenue from Country Ridge property owners is one of the largest for the entire city. Burdening the area with another industrial blight will certainly have detrimental effects on the property values and consequently on the tax revenues for the City of Melissa. For the quality of life and developing reputation of the City of Melissa as a great place to live, please do not allow this development to occur at the proposed location. There are numerous other locations that would be safer and have less negative impact on the community than this proposed site.

COMMENTS: I strongly oppose the construction of a cement plant bordering the Country Ridge Community. The increased air pollution will would be harmful to the children who live in our community. We have a child who has asthma and we are concerned that a cement plant with the associated air pollution will make it very difficult for our children to play outside without breathing complications. Country Ridge is a beautiful and peaceful community in which may of the children actually play outside. Please allow our children to continue to

MSR

play outside with their friends without risk of developing breathing problems. I respectfully ask in the name of all our children ... Please do not approve this permit. Thank you, Jose Vasquez

RON.WINKLER@SBCGLOBAL.NET**

RECEIVED

OCT 09 2014

AT PUBLIC MEETING

I AM A MEMBER OF, AND REPRESENT, THE BOARD OF DIRECTORS OF THE COUNTRY RIDGE PROPERTY OWNERS ASSOCIATION AND THE 205 FAMILIES WHO CURRENTLY RESIDE IN COUNTRY RIDGE. COUNTRY RIDGE IS LOCATED IMMEDIATELY SOUTH OF THE PROPOSED PLANT. ON JULY 28 WE PREVIOUSLY SUBMITTED WRITTEN OBJECTIONS TO THE TCEQ OPPOSING THE PROPOSED PLANT.

COUNTRY RIDGE ALSO CONTAINS A LARGE PARK WITH NUMEROUS LARGE TREES, A CREEK RUNNING THROUGH THE PARK, AND VARIOUS AMENITIES. THE PARK IS ACCESSIBLE TO ALL COUNTRY RIDGE RESIDENTS. THE NORTHERN BOUNDARY OF THE PARK BORDERS ON THROCKMORTON (CR364) AND IS ONLY 3 TENTHS OF A MILE FROM THE PROPOSED PLANT.

THE AIR PERMIT APPLICATION STATES, "THE PROPOSED FACILITY WILL EMIT THE FOLLOWING CONTAMINANTS: PARTICULATE MATTER INCLUDING (BUT NOT LIMITED TO) AGGREGATE, CEMENT, ROAD DUST, AND PARTICULATE MATTER OF 10 MICRONS OR LESS."

THE DUST AND CONTAMINATES FROM THE PLANT, AS WELL AS THE DUST FROM THE TRUCKS ACCESSING THE PLANT FROM HIGHWAY 75 ON THROCKMORTON ROAD, WHICH IS A WHITE ROCK GRAVEL ROAD, WILL RENDER OUR PARK UNINHABITABLE AND UNUSEABLE. IN ADDITION, THIS PLANT WILL DIRECTLY AND ADVERSELY AFFECT THE PROPERTIES IN COUNTRY RIDGE AND DIRECTLY AND ADVERSELY AFFECT THE HEALTH AND WELL BEING OF ALL THE 205 FAMILIES WHO RESIDE IN COUNTRY RIDGE.

mw

I BELIEVE YOU ONLY NEED TO LOOK TO THE CONCRETE PLANT ON HIGHWAY 121 IN FRISCO, AND THE CONTINUOUS AND CONSTANT COMPLAINTS BY THE RESIDENTS IN THE HOMES NEAR THE PLANT, TO UNDERSTAND THE ADVERSE EFFECTS OF THIS PROPOSED PLANT ON COUNTRY RIDGE AND ITS RESIDENTS.

IN ADDITION, THE SECTION OF THROCKMORTON ROAD, WHICH SHOOTS DIRECTLY EAST FROM HIGHWAY 75, IS A NARROW ROAD WITH WIDTHS VARYING FROM 15 TO 18 FEET WITH A DEEP CULVERT ON EACH SIDE OF THIS SECTION OF ROAD. THE SAFETY HAZZARD WITH TRUCKS AND CARS NOW SHARING THIS ROAD IS IMMENSE AND THERE IS NO WAY THAT 2 TRUCKS WILL BE ABLE TO PASS EACH OTHER ON THIS ROAD.

THE COUNTRY RIDGE PROPERTY OWNERS ASSOCIATION URGES THE TCEQ TO REJECT THIS PROPOSED PLANT.

RESPECTFULLY SUBMITTED,

**RON WINKLER
ON BEHALF OF THE COUNTRY RIDGE PROPERTY OWNERS
ASSOCIATION**

MELISSA TX 75454-8912

PHONE: 9728384588

FAX:

COMMENTS: The Board of Directors of the Country Ridge Property Owners Association hereby submits its strenuous objections to the building of the proposed concrete batch plant on County Road 364. Country Ridge is property owners association in the City of Melissa consisting of 242 one and one-half acre residential lots immediately to the south of the proposed plant. Currently 205 families reside within Country Ridge. Country Ridge also contains a large park accessible to all the residents. The northern boundary of the Country Ridge

RM

park borders on CR364 and is only three tenths of a mile from the proposed plant. The dust and contaminates from the plant, as well as the dust from the trucks using the CR364 gravel road to access the plant, will directly and adversely affect the properties in Country Ridge, the health and well being of the residents of Country Ridge, and will render the Country Ridge park uninhabitable and unuseable by its residents. We only need to look to the concrete batch plant on Hwy 121 in Frisco, and the continuous and constant complaints by the residents in the homes near the plant, to understand the adverse effects of this proposed plant on Country Ridge and its residents. In addition to the above, it should be pointed out that Bartoo Ready Mix falsely claimed in its filing with the TCEQ that the proposed plant is not within the extraterritorial jurisdiction of the City of Melissa (See Bartoo's response to Question II. D. 3). Maps clearly show, and the Melissa City Manager, Jason Little, has confirmed, that the plant is within Melissa's ETJ. Despite Bartoo's incorrectly placing the plant outside Melissa's ETJ, the contaminates and dust from this proposed plant will clearly adversely affect the City, its residents and future development plans in this area. Country Ridge Property Owners Association urges the TCEQ to reject this proposed plant. Respectfully submitted, Ronald C. Winkler, Secretary Country Ridge Property Owners Association Board of Directors

COMMENTS: My wife and I moved to Country Ridge for the peace and quiet. A cement batch plant has no place in our neighborhood. I understand it is a temporary facility, but does that mean a few months, or a few years? The ongoing highway construction is a necessary inconvenience, but there are other options for a cement batch plant. Please be considerate of the residents of Country Ridge and the other residents. We are senior

MW

citizens and are concerned about health issues, and certainly sympathize with those residents who have known and serious issues with the environmental impact of a cement batch plant at our doorstep. Thank you!
