**COMMENTS:** Let us, for once, consider the ramifications of a decision to the community and individuals in the surrounding areas that will be negatively effected by the influx of waste water being dumped into Mayde Creek that is independent of a developer's ability to monetarily incentivize a HOA or keep details private about the ramifications of their actions until it is too late. Withdraw this permit and place the burden of solution onto Pulte & Nash.

**COMMENTS:** Please find an alternative location to release daily waste water. The current projected location is prone to flooding. Releasing 9,000,000 plus gallons of water daily will present an undue flooding burden on the affected neighborhoods.

**COMMENTS:** I would like to request a public meeting regarding the proposed TPDES that will discharge to Mayde Creek. I am on the HOA for Mayde Creek Estates neighborhood which is located across the creek from the proposed discharge. Our neighborhood and the surrounding area is subject to flooding with rain fall of 3" or more. This plant will discharge treated water within 1000 feet of the Pulte proposed plant WQ0015222001 discharge. The two plants combined will discharge nearly 2 million gallons a day into the creek that borders our

*MWD*

neighborhood. Mayde Creek is in a native state and very overgrown in this area. Several houses in our neighborhood have nearly flooded before and we fear these two plants in this close proximity will increase flooding in the area.
