COMMENTS: We are on private wells for our family and animals drinking water. With Nash FM 529 wanting to build a Waste Water Treatment plant right behind us and Pulte's new WWTP located 1/10 of a mile to the west of us. I'm very concerned with our quality of water for human consumption and for our horses. Pulte is planning on dumping 900,000 gallons a day to our west and now Nash FM 529 is requesting to dump another 1

MWD

Million gallons directly behind us. That is 2 Million gallons a day. With our area having record rain amounts for the month of May our property and homes are going to flood and our quality of life is going to suffer. We are also concerned with the smell and air quality. Nash FM529 has over 3000 acres WHY can't they build their WWTP away from our homes?
