REF: Request for Contested Case Hearing
Permit No. WQ000509200 - TXI Operations, LP
EPA ID No. TX0134732

The undersigned hereby request a Contested Case Hearing regarding the above referenced permit. We live within three (3) miles of the proposed facility and because of our close proximity, unlike the General Public, we will be adversely affected by an increase in dust pollution, noise pollution, reduction of available surface and ground water supplies, potential water contamination, decreased property values, increased truck traffic and increased roadway deterioration.

It is for the above reasons we request a Contested Case Hearing in this matter.

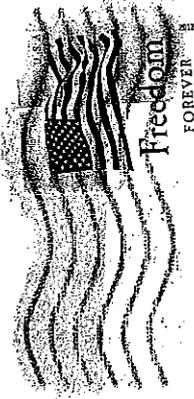

Respectfully submitted,

COMMENTS: I request a contested case hearing regarding the proposed TXI plant expansion in southern Parker County. Permit number WQ0005092000. I own, and live on property across New Tin Top Rd. from the proposed site of the expansion, less than 100 yards from the proposed new mining site. Run-off from the proposed site fills my livestock pond, and irrigates my hay field. I get my drinking water from a shallow well that will certainly be affected by the digging at the new site. I am also concerned that the dust generated from

MW

digging there will make life for me and my family miserable. Numerous visits with the plant manager, Gary Williams, and TXI representative David Perkins, have indicated to me that they do not know with any certainty that I will not be affected by their mining. No studies have been performed to assess run-off control, or ground water effects of their proposed operations. I feel TXI should have to perform scientific analysis of the effects of such mining, not just use "hip pocket" judgments as a resource prior to beginning digging. The proposed site also lies within the floodplain of the Brazos river, and ,I believe, that an environmental impact study, and a hydraulic survey should be performed to determine how new digging will affect the flow, and the flooding in this region of the river. I also request this issue be given extra scrutiny due to the past practices of TXI in this very river valley. Not one of the past mining sites has been reclaimed, and these past sites are a sore reminder of what happens when a company is not required to clean-up their mess. I do not wish to see any more of our river valley turned into a wasteland of sand piles and sludge pits without at least some supervision of the reclamation process by the state. I am also submitting, by USPS mail, a survey containing the names and addresses of over forty of my neighbors also concerned about noise, air quality, and run-off problems. I have been asked to act as their representative. We all are concerned about the quality of life in this region, and are as well concerned about our property values, as we have made significant investments in this region. Your attention to this matter will be greatly appreciated. Sincerely, Steve Hard DVM.

Re: Comment and Contested Hearing Request by Gary and Susan Rosenbach
on Notice of Application and Preliminary Decision for Water Quality
TPDES Permit No. WQ0005092000

To Whom It May Concern:

I am writing on behalf of my clients, Gary Rosenbach and Susan Rosenbach, with regard to the above-referenced Notice of Application and Preliminary Decision (the "Notice"). All future correspondence and communications regarding the Rosenbachs and the Notice should be addressed to this office as follows:

Law Offices of Lewis T. Stevens
131 East Exchange Avenue, No. 204
Fort Worth, Texas 76164
ATTN: Lewis T. Stevens

Telephone: (817) 332-4466
Facsimile: (817) 332-4476
lstevens@lstevenslaw.com

By this letter, the Rosenbachs hereby comment and request a contested hearing with respect to the Notice. The Notice describes a proposed plant expansion by TXI Operations, LP ("TXI"). The Rosenbachs own and live on property (the "Property") lying within one (1) mile of the proposed expansion site (the "Site"). Run-off from river affected by the Site fills stock ponds and is used for irrigation purposes on the Property.

The Rosenbachs are concerned that dust, minerals, and other refuse from the Site will pollute the river and, thus, the Rosenbachs' stock ponds and irrigation system. Additionally, the

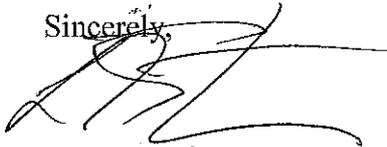

Rosenbachs are concerned with air and noise pollution issues associated with having the Site so close to the Property. Finally, the Rosenbachs are concerned that the Site will greatly decrease the value of the Property, should they try to sell it after the Site is operational.

The Rosenbachs are informed and believe that no studies have been performed to assess run-off control, or effects caused to the groundwater in the area surrounding the Site. In addition, the Rosenbachs are informed and believe that no environmental impact study or hydraulic survey has been performed to assess the Site's effect on the flow and/or flooding of the river in this region.

The Rosenbachs are informed and believe that other sites opened by TXI have been abandoned and TXI has not been required, nor has it taken any discernable action, to put that land back to its previous condition.

For all of the above reasons, therefore, the Rosenbachs hereby make this comment and request a contested hearing. I will be available to discuss this matter further at your convenience.

Sincerely,

A handwritten signature in black ink, appearing to read 'L. Stevens', with a long horizontal flourish extending to the right.
