COMMENTS: I am opposed to the Port of Corpus Christi's permit application to increase emissions of hydrogen sulfide and particulate matter. These emission are a public health threat - especially to children, the elderly and people with asthma, other respiratory conditions and heart conditions. The Port of Corpus Christi is located in a population center that already has an extremely high rate of pediatric asthma. There are many schools in close proximity. Please deny this permit and, if considering it, please hold a public meeting on the matter here in Corpus Christi. Thank you.

Thanks for checking on my comment. I continued to try to send it and wasn't able to do so. I use a phone rather than a regular computer. Does this cause a problem?

My issue is permit number 47881[✓], concerning coal storage at our port in Corpus Christi. The increase in the amount of coal that will travel in and out of our area will put an extreme strain on the environment and the people who live in Nueces County and across the Corpus Christi Bay. To add a greater burden with more particulate release and more hydrogen sulfide will negatively impact air quality and the health of our community. I request that we receive more information at a public meeting that will explain new pollution levels, types of pollution controls that are planned, and possible disastrous effects of a tropical storm or even a hurricane. Recent linkage of particulates with cancers, metabolic dysfunction, pulmonary and cardiovascular disease must not be ignored in an area that has so many people living right beside the port and across the fence from industry. Thank you. P C Gardiner,
✓ 14321 Scallop St, Corpus Christi, TX, 78418.

COMMENTS: By this email, I formally request that the Texas Commission on Environmental Quality schedule a public meeting in Corpus Christi concerning air permit number 47881 for the Port of Corpus Christi Authority of Nueces County. I am concerned about the public health consequences of particulate matter 2.5 and hydrogen sulfide emissions both from Bulk Dock 1 at the Port of Corpus Christi and from the transportation of materials via truck, rail, and barge to and from the Port of Corpus Christi.

COMMENTS: I am commenting to express my concern about increased shipments of coal through the Port of Corpus Christi. I know from recent media reports and public presentations that the Port has made agreements with both New Elk Mining and Ambre Energy to increase shipments of coal through its docks. The Port of Corpus Christi has stated that this permit amendment is not intended to support additional coal shipments, however the permit amendment would triple the amount of material that is allowed to be shipped through the Port and nothing in the permit prevents the Port from using this expansion to increase the amount of dirty, dangerous coal being transported through the Corpus Christi area. This poses serious health risks for people who live near the Port and railroad that serves the Port.

COMMENTS: We are requesting that a public meeting be held here in Corpus Christi along with a contested case hearing in Corpus Christi. My household is strongly against having this in our city. Our household consist of Richard C. Medina (husband), Alison J. Medina (self), Margaret Medina (mother-in-law), Austin Garcia, Destiny Garcia, Raymond Medina, Isaac Medina, Antonio Medina, and Thaddeaus Medina. Thank you for your attention in this matter.

COMMENTS: I am opposed to the permit being renewed as the request increases the handling of sooty materials substantially, materials that cause damage to respiratory systems of people in our vicinity. This permit allows for a decrease in the quality of life in Corpus Christi by soiling our air. I hereby request a public meeting be held in Corpus Christi in connection with this permit application.

COMMENTS: I am opposed to the granting of this permit because of the health risks from increased coal dust and other particulate matter. I urge that a public meeting on this permit in Corpus Christi. This is a HUGE increase.
