COMMENTS: We JUST purchased 8 acres on CR 4402 in LaRue, and are in process of building house for relocation to Texas from Ohio. We are OPPOSED to the construction of this plant based upon it's adverse effects ...proximity(less than 5 miles), health issues from pollution & noise, and water source usage. Can you guarantee that our garden(food supply) would be safe for consumption with the amount of pollution? Can you

MLC

guarantee that our investment in home/land will not be devalued by your presence? Lydina & Denzil Ball
Property owners

COMMENTS: TCEQ Permit Application Number: 122733 Dear TCEQ: Whereas, my family resides approximately two miles east of the proposed Halyard Energy Henderson, LLC Natural Gas Powered Electric Generating plant to be located near the intersection of Texas Farm-to-Market 2588 and County Road 4402 which will emit several toxic contaminants into the environment, and Whereas, the Permit Application does not state how the plant operating company will ensure the protection of public health and welfare, and ensure

MW

compliance with all rules and regulations of the TCEQ, and Whereas, my wife and I and many LaRue area residents have significant interest in the details of this application and if and how the proposed project will environmentally impact our lives, Therefore, I respectfully request that a Public Meeting be held in LaRue to provide me and the residents of LaRue with an opportunity to ask questions about the application and to submit comments. Sincerely, Kenneth W. Bitz

COMMENTS: My wife is 100% disabled, and takes immune suppressive drugs for her condition. This means That she is three times more likely to contract respiratory ailments that the rest of us would fight off with ease. Hay fever to you or me, results in a severe infection for her, often resulting in hospitalization..... Common colds generally turn into pneumonia, regardless of the precautions taken from the first signs of illness. I can't

me

imagine what haveing the Exhaust from this plant, close enough to our house to throw a rock at will do to her.....
