Texas Commission on Environmental Quality
PO Box 13087
Austin, Texas 78711

We request the TCEQ dismiss the permit application for Randolph Todd Company, LLC, permit number WQ00015314001. As a resident of Comal County living next to the where the facility will be constructed we are an “affected person”.

Many people, businesses and tourism in Comal County and surrounding counties rely on the Edward's and Trinity Aquifers for our water and discharging 390,000 gallons per day of effluent over the Edward's Recharge Zone does not seem prudent. In addition to this project there are several more that will add additional effluent to this sensitive area.

The TCEQ's mission is to control the discharge of pollutants into the waters of the state and protect water quality and this project will do nothing to protect our water supply and its quality.

Regards

Carl Thompson
