BULVERDE TX 78163-1842

PHONE: 8304383498

FAX:

COMMENTS: I am requesting a PUBLIC MEETING as many citizens are concerned about this waste water facility and how it will affect their property, the Bulverde Area Humane Society, and the Edwards Aquifer Recharge Zone. Citizens are not being informed by the City of Bulverde on how they can comment to the TCEQ on the issuance of this permit even though they are expressing their concerns about the development happening in the area. The waste water facility is not visible from the road so most people are unaware of its

MWB

construction. The public documents are not easy to access on the side of the road adjacent to the construction site and in the line of large machinery operations. I have completed numerous 'Open Records Requests' for the documents of the development agreements and the City of Bulverde has never informed me that some of these records are available at the Bulverde-Spring Branch Public Library NOR HAVE ANY OFFICIALS SHARED HOW TO MAKE PUBLIC COMMENTS THRU THE PROPER CHANNELS BY GOING THRU THE TCEQ. Lack of participation in the commenting process does not signify non-interest by the public because our rural area has not had to worry about how to object to waste water treatment facilities because we have had no large waste water treatment plants in our area until recently. I was told last week by TCEQ public relations that the letter was not yet mailed out which would signify a 30-day window before the comment period was closed. I hope this is still the case. PLEASE ADD ME TO THE MAILING LIST.

COMMENTS: PLEASE ADD ME TO THE MAILING LIST AND E-MAIL LIST. I am aware that there is a large Edwards Aquifer Recharge Feature on this property. It is hazardous to human and livestock health to have a Waste water treatment facility that discharges its effluent in an area with recharge features. If one recharge feature was found then there must be a potential for more to be present in this same area.

COMMENTS: This permit should not be allowed because the treatment facility will be located adjacent to the recharge zone of the Edwards Aquifer. The discharge route has been altered in order to conform to the requirement that discharge must not be closer than 250 Ft. to the Edwards Aquifer Recharge Zone but this does not prevent the possible failure of the pipes or facility. Even more disconcerting is the fact that the facility will be located in a flood plain and less than 250 ft from the recharge zone and the Bulverde Humane Society.

CM

Furthermore, when construction was taking place there were natural springs bubbling up from the ground along the discharge route which means that there is evidence that contaminants may directly enter the Edwards Aquifer Recharge Zone. Please e-mail me if you would like to see the video.

COMMENTS: I am requesting a public meeting. This permit lacks information as to which water body of the state the effluent will be discharged into. It appears the water body is the Cibolo Creek which is illegal. The effluent will outfall into a ditch, then into a raven (unnamed tributary) and then into the Cibolo Creek. This flow of undiluted discharged into the Edwards Aquifer Recharge Zone and then into the Cibolo Creek is illegal. If this permit is allow, it will be the first of its kind.
