TEXAS
COMMISSION
ON ENVIRONMENTAL
QUALITY

To Whom It May Concern:

1. J. Duncan Cartwright
Joe Cartwright
4884 Cartwright Road
Montgomery, Texas 77316
936.588.2126

2. M8EC Enterprises, Inc.
Proposal # WQ00.15341001

3. I request a contested case hearing.

4. The application being submitted is upstream from our agricultural operation where our livestock consumes water. The proposed dumpsite for the sewer water (Mound Creek) is a perennial stream. We have natural spring on our property that will be polluted with sewage discharge. There are other options for the disposal of the sewer water as there are several other sewer plants within a three mile radius of the proposed plant, also Lake Conroe is a potential disposal site for the sewer water. The Texas Water Commission on February 12, 1985, wisely rejected a similar permit to discharge sewer water down Mound Creek. Mid-South and MISD were made aware of this in 2012. The Cartwright land which Mound Creek dissects through has been in continuous agricultural production since the Spanish Land Grant of 1827. At this time we would not like to see sewer water discharged on Mound Creek due to the natural springs that provide our livestock with clean water.

Regards,

J. Duncan Cartwright

COMMENTS: To whom it may concern, I am writing to request a public meeting/hearing to gather additional information and a better understanding of the proposed waste water discharge referenced above. I am a landowner downstream of the discharge point (Mound Creek) that has been proposed. This creek runs completely through my property, flows into the existing ponds/water impoundments and is used as a water

MW

source for livestock, wildlife and recreation. Many additional downstream landowners are also concerned due to lack of information on this waste water treatment plant. Please advise how to go about arrangement of this requested hearing. Regards, Paul D Coombs

Box 13087 Austin, TX 78711-3087 A CONTESTED CASE HEARING IS REQUESTED BY: (I also request a public meeting on this application) Martha Mayer 18507 Rabon Chapel Rd Montgomery, TX 77316 936-588-9960 RE: NOTICE OF RECEIPT OF APPLICATION

MWD

AND INTENT TO OBTAIN WATER QUALITY PERMIT – Proposed Permit No. WQ0015341001 by MSEC Enterprises, Inc., P.O. Box 1266, Montgomery, Texas 77356, has applied to the Texas Commission on Environmental Quality (TCEQ) for proposed Texas Pollutant Discharge Elimination System (TPDES) Permit No WQ0015341001 (EPA I.D. No. TX0136191) to authorize the discharge of treated wastewater at a volume not to exceed a daily average flow of 130,000 gallons per day. The location of my 87 acre property, is approximately 1.5 miles downstream of the proposed Texas Pollutant Discharge Elimination System Proposed Permit No. WQ0015341001 on Mound Creek. My property is located on the South Side of Rabon Chapel Road and ½ mile East of Farm-to-Market Road 2854. This property has been in my family for 48 years and I have lived here 37 years. Beef cattle have been raised here continuously utilizing Mound Creek as a drinking supply. In addition to native wildlife and birds, my dogs enjoy swimming & drinking from Mound Creek. There are numerous pools along Mound Creek that hold water year round. I use Mound Creek on my property for livestock watering, contact recreation, non-contact recreation, fishing, and park activities. I believe the existing uses of the receiving waters, flow characteristics, downstream characteristics and normal dry weather characteristics of Mound Creek is misrepresented in this application for TPDES Permit No. WQ0015341001. In a previously contested case, expert witnesses testified to the findings of fact on the characteristics of Mound Creek and existing uses of Mound Creek on my property. The Texas Department of Water of Water Resources issued an order denying an application for Proposed Permit No 13056-01 by Gerald B. Futch to authorize a discharge of treated domestic sewage effluent into Mound Creek and thru my property. I believe the discharge of effluent of the proposed TPDES Permit No WQ0015341001 into Mound Creek and thru my property will impair my existing uses of Mound Creek and be toxic to terrestrial life.
