Austin, TX 78711-3087

September 28, 2015

Dear Chief Clerk,

Attached are signed pages of a petition opposing issuance of the Texas Commission on Environmental Quality (TCEQ) Permit No. WQ0015320001.

Please add these signatures as voices of concerned citizens in opposition to the location, construction and operation of the wastewater treatment facility and disposal site as described in TCEQ Permit No. WQ0015320001.

Please let me know if additional information is needed or if you have any comments or concerns regarding this petition or other comments I have submitted regarding the permit. Thank you.

Sincerely,

Gary Riegelsberger

QUALITY

## Vintage Oaks at the Vineyard Residents Petition Opposing the Texas Commission on Environmental Quality (TCEQ) Permit No. WQ0015320001.

Regarding the Texas Commission on Environmental Quality (TCEQ) Permit No. WQ0015320001, to authorize the disposal of treated domestic wastewater via surface irrigation of 40 acres of public access open areas with trails; we, the residents of Vintage Oaks at the Vineyard (VOATV) subdivision, oppose locating the wastewater treatment facility and disposal site anywhere in the VOATV property.

- The prevailing winds blow north and northwest through the valley of Little Bear Creek directly to many homes in VOATV. These winds will be coming directly from the proposed wastewater treatment site, carrying all the unpleasant odors and pathogens that adversely affect the human condition.
- Sales literature, current plat information and designs and future development designs and information presented to current VOATV lot owners prior to the purchase of their property, did not include any plans or information regarding the wastewater treatment facility and surface discharge.
- VOATV sales information and advertisement states all lots in the development will be one acre or larger.
- A wastewater treatment facility with a forty-acre discharge zone inside the VOATV development will negatively impact the property values of homes and property already developed in VOATV.
- Wastewater via surface irrigation on forty acres of public access open areas with trails is a potential health hazard for anyone using the open areas or trails.
- Underground drip irrigation should be used instead of surface irrigation. Any concerns regarding extra cost for an underground drip irrigation system is moot.

REVIEWED  
 09/29/2005  

We ask the TCEQ to deny TCEQ Permit No. WQ0015320001 and any subsequent permit for a wastewater treatment facility and disposal site located in the Vintage Oaks at the Vineyard property.
