**COMMENTS:** please see the article in the houston chronicle today. it says the galveston bay overall "report card" grade is "C". it goes on to say we need to clean it up starting TODAY. allowing CLEAN HARBOR to dump more pollutants into dickenson bayou will not help clean up the bay. again, i am totally against it. as a tax payer in galveston county and a resident on galveston bay, i vote NO.

**COMMENTS:** This permit to expand the amount of effluent into an already overly polluted water system is unacceptable. They should treat to the limits that are allowable to flow into the sewer system rather than continuing to burden the natural water system.

© 2002-2013 Texas Commission on Environmental Quality

The only objection to this request, in my opinion, is the location of this facility (C.H.). If (C.H.) does not use Dickinson Bayou for transportation, why locate in a floodplain?

I wish (C.H.) could move to T.C. proper, where they could have all the water they need from the Bayou Brines Authority, which feeds all of the petro/chem. industries, and (C.H.'s) would not have to worry about their totes floating-off in a hurricane. (two were in the Bayou after "Ike" and we don't know if they were full, half-full, or empty).

I belong to the local Save Our Shores organization and the Nature Conservancy, where our focus is environmental stewardship and wildlife enhancement.

MEETING AGENDA

AT PUBLIC MEETING

Introduction [7:00 p.m.].....MURKIN A. GROVES.....TCEQ

Identify Elected Officials.....TCEQ

Presentations.....Applicant & TCEQ

Informal Discussion Period

Questions & Answers.....Public

Members of the public may ask questions during this time period. TCEQ staff and the Applicant will respond to questions. This time period is for discussion purposes and for obtaining information from TCEQ staff and the Applicant. Questions and/or comments made during this period will not be considered formal comment, and will not go to the Commissioners. Additionally, no written response will be prepared for comments made during this period.

Formal Comment Period

Formal Comments.....Public

During the formal comment period members of the public may voice concerns or comments. Neither the Applicant nor TCEQ staff will respond during the formal comment period. After the close of all comment periods, the Executive Director will summarize the formal comments and prepare a written response to comments (RTC). This RTC will be made available to the public and will also be mailed to those who submitted written comments or formal comments at a public meeting.

Everyone who wishes to comment will have the opportunity to do so, however, we may ask that each commentor limit their time so that everyone will have time to speak.

Closing Remarks/Adjournment.....TCEQ

Please Note: Written comments may be submitted anytime during the evening.

What is tested for water - hazardous waste permit - when provided - to community

**COMMENTS:** I am recommending that TCEQ not approve the amended permit request of Clean Harbors Co. It is a known fact that Dickinson Bayou has had an ongoing pollution problem probably due to the silt left from the old HL&P facility. This has never been addressed all these years, the idea of adding additional pollution into the bayou is absurd. If the bayou was able to flow as it was supposed to the high bacterial problem would probably be lessened greatly. Clean Harbors needs to come up with a less invasive disposal option than

*MW*

dumping into the Bayou/bay. Families fish, swim there not to mention the wildlife affected including the pelicans/birds. A line needs to be drawn when enough is enough with pollution to our bay system and now is the time. Ask yourself would you want you or your family swimming in this bayou or eating the fish from it? We need to say no to this amendment and consider withdrawing their original permit to dump. Thanks for your time.

**COMMENTS:** I am recommending that TCEQ not approve the amended permit request of Clean Harbors Co. It is a known fact that Dickinson Bayou has had an ongoing pollution problem probably due to the silt left from the old HL&P facility. This has never been addressed all these years, the idea of adding additional pollution into the bayou is absurd. If the bayou was able to flow as it was supposed to the high bacterial problem would probably be lessened greatly. Clean Harbors needs to come up with a less invasive disposal option than

*mu*

dumping into the Bayou/bay. Families fish, swim there not to mention the wildlife affected including the pelicans/birds. A line needs to be drawn when enough is enough with pollution to our bay system and now is the time. Ask yourself would you want you or your family swimming in this bayou or eating the fish from it? We need to say no to this amendment and consider withdrawing their original permit to dump. Thanks for your time.

**Subject:** Environmental complaint in Region 12

Date/Time Reported: August 11, 2015 10:52 AM

Date Observed: August 11, 2015

Approximate Time Observed: 12:00

Location of Problem: 2700 Ave. S

Nearest City Or Town: San Leon

County of Problem: Galveston

Source of Problem: Clean Harbors

Description of Problem: Clean Harbors has a permit to dump water waste into Dickinson Bayou and they are applying for an amended permit to dump additional waste. The bayou is already silted over to the point it is unacceptably polluted. It is not recommended to get into the water due to high bacteria content and such. I contend that not only should their amended permit be denied but they should not be allowed to dump at all. People live on this bayou and fish, It is going to take a lot of work to clean up what has already been done. The community is rallying behind the denial of permit WQ0004086000 because we should be able to swim, fish and enjoy our water system without fear of illness from

mm

contaminated water. These businesses need to dispose of their waste in a less invasive way, not dumping into our bays and bayous. They need to figure this into their budget and not take the easy way out.

NOTICE OF RECEIPT OF APPLICATION AND  
INTENT TO OBTAIN WATER QUALITY PERMIT AMENDMENT  
PERMIT NO. WQ0004086000 (EPA I.D. No. TX0117757)**

Dear Commissioner Dennard:

Numerous members of the Dickinson Bayou Watershed Steering Committee received the referenced notice and were able to either attend the Public Meeting (Notice Attached) or review the documents in the Public Library. In our regularly scheduled meeting of September 21<sup>st</sup> this notice was discussed and the following concerns were voiced:

1. The listed chemicals being removed do not seem to be fully representative of known byproducts from the type vessels being cleaned; and
2. The listed chemicals did not have documented verification from the vessel providers or any third party; and
3. Storage of the by-product is in open top containers within an area that could possibly be inundated and float into the main stream waters by hurricane storm surge thereby causing blockage and/or environmental contamination.

As this site is within unincorporated Galveston County, we respectfully request that you voice our collective concerns. If we may be of further assistance in this matter, please contact me at your convenience.

Regards,

Jackie L. Murphy, P.E., M-ACE, CFM

August 27, 2015

Office of the Chief Clerk  
MC 105  
TCEQ  
P.O. Box 13087  
Austin, TX 78711-3087

To Whom It May Concern,

The Galveston Bay Foundation (GBF) requests a public meeting for Clean Harbor San Leon, Inc.'s application to amend TPDES Permit No. WQ00004086000 to authorize additional sources of effluent to the waste stream resulting from the treatment of process wastewater, oily waste and spent catalyst from the petroleum and petrochemical industries.

The mission of GBF, founded in 1987, is to preserve, protect and enhance the natural resources of Galveston Bay for its present and future users. The Foundation's strength is that it involves a true cross-section of Bay interests, from industry to environmental, to address issues and concerns related to Galveston Bay. As the water quality of tributaries of Galveston Bay, notably dissolved oxygen levels, are crucial to its ability to support fish and wildlife populations and the recreational and commercial fisheries, we are keenly interested in seeing the area's permitted point source discharges do not contribute concentrations of oxygen demanding substances that may threaten them. The receiving water body, Dickinson Bayou (Segment 1103) is on the State's 2012 303(d) list for depressed dissolved oxygen levels and is the subject of discussions of the results of past dredging that may exacerbate those levels by restricting circulation.

Additionally, Segment 1103 is also listed for toxins (PCBs and dioxin) in edible tissues of fish. As the applicant will be treating wastes from the petroleum and petrochemical industries, we are also interested in seeing that any discharges of wastewater resulting from the process of materials containing potentially toxic compounds will not synergistically interact with those PCBs and dioxins and pose a further threat to seafood consumption. We would also note that there are oysters in Dickinson Bay/Dickinson Bay area that can be indirectly marketed.

GBF is interested to hear the details of the applicant's treatment processes and the TCEQ's modeled loading to make sure the Dickinson Bayou can assimilate the discharge without causing D.O. problems or other possible issues related to the new waste stream. Given the water quality in the receiving stream, and given the fact there is an active and interested Dickinson Bayou citizenry and Dickinson Bayou Watershed Partnership in place, it behooves the TCEQ to conduct a public meeting on this application.

Sincerely,

A handwritten signature in black ink, appearing to read "Scott A. Jones".

**COMMENTS:** I oppose this permit, Dickinson bayou is already poluted. In order for the bayou to get better it must be dredged. With the bayou so shallow towards the bay, the bayou cannot get a good flush with the tide movement. Unlike most bayous, it gets shallower as it gets to the end instead of getting deeper. Dickinson Bayou around the 146 bridge is only 5 or 6 feet deep, with the bayou up towards Dickinson getting to more than 20 plus feet deep. This is the fault of the old H.L & P. plant. When they built the inlet/outlet canal for cooling,

*SM*

they purposely did not complete the dredging due to cost. The bayou was supposed to have been dredged to 20 foot deep all the way out to the Houston ship channel. But once they tied in the canal to the bayou in San Leon they never dredged another inch. This is like having your toilet flush with no place for it to go. Everything just sits in the bowl and floats. You see if this is dumped into the bayou it is just going to get worse. Susan D Jones

**COMMENTS:** I strongly oppose the approval of a permit for Clean Harbors, Inc to dump 105,000 gallons of heavy industrial waste into Galveston Bay in the outfall drainage ditch located near Ave S and 27th Street in San Leon, Texas. Dumping waste from petroleum refining and petrochemical companies into bayous and tributaries near Galveston Bay is a terrible idea. Many people rely on this body of water for their livelihood and

34

recreation purposes. I think Galveston Bay and its Tributaries waters have had enough abuse from corporate america. Please do not approve this permit. Thank You. Pamela Kehoe

RE: TPDES Permit for Industrial Wastewater - Permit No. WQ0004086000

Dear Chairman Shaw, Commissioner Baker and Commissioner Nierman:

Please accept this letter as the City of Dickinson's formal opposition to the approval of the Permit noted above applied for by Clean Harbors San Leon, Inc., 2700 Avenue S., San Leon, Texas 77539.

Dickinson Bayou has two designated segments, 1103 and 1104. Segment 1103 is Tidal and transverses throughout the entire city limits of the City. Thousands of citizens and visitors fish, crab, ski, swim and boat each year in this segment of the bayou, but thousands more do not because the bayou has been designated by your Agency as impaired due to high levels of bacteria and depressed dissolved oxygen. That the TCEQ even considering approval of an additional 105,000 gallons of petroleum effluent to enter this fragile water body is inconceivable.

Although Clean Harbors Inc. agrees to TCEQ requirements and procedures to filter the waste effluent before it reaches Dickinson Bayou, I want to remind the Commission that the EPA in 2007 and 2008 identified numerous violations at Clean Harbors of Braintree Inc. in Massachusetts, whereby inspections found numerous examples of storage tanks that were not properly certified and /or in poor condition and failing to minimize the potential for the release of hazardous waste. And according to the EPA, some hazardous emissions and waste escaped as a result of the storage units being inadequately maintained. In 2015, the EPA cited numerous violations of laws under the Resource Conservation and Recovery Act related to the storage and handling of hazardous waste by Clean Harbors Deer Park in LaPorte, Texas.

Below are additional concerns the City of Dickinson has regarding this permit based on statements made by Clean Harbors representatives at the Public meeting on :

- The amount of discharge, 105,000 gallons, that Clean Harbors is requesting, far exceeds that which is required for operation at this site. Clean Harbors stated that they will truck in material

mm

from other sites to be treated at this location. Bringing additional hazardous material to this waterway is unacceptable and is not imperative to the continued conduction of business at this site.

- Clean Harbors stated that the process can be run in either continuous or batch mode and final treatment will be through a filtration system. Samples of the final discharge will be taken every three days. Clean Harbors stated that it is possible for them to discharge up to 315,000 gallons over that three day period of off spec toxic material into the bayou **BEFORE their samples would show it.**
- Clean Harbors stated that their process does not include storage tanks or detention ponds to store treated effluent for sampling prior to release into the bayou. This should be required.
- No evidence was cited or produced that TCEQ had evaluated the Clean Harbors proposed filtration process for effectiveness. Such questions as, how do they handle filter break through, maintenance of the system and routine operation, and how are contaminants trapped in the filter system disposed of?
- Clean Harbors stated they have no plans to recycle some of the treated water for use in their other processes. Recycling not only makes sense, it should be required.

These concerns need to be addressed before the TCEQ gives any serious consideration to this permit.

I appreciate your time and consideration of the City of Dickinson's opposition to Clean Harbors Permit No. WQ0004086000.

Respectfully,

Julie Masters, Mayor

AT PUBLIC MEETING

October 6, 2015

Commissioner Ryan Dennard  
722 Moody, 1st Floor  
Galveston, TX 77550  
(409) 770-5474

RE: **Clean Harbors San Leon, Inc.,  
NOTICE OF RECEIPT OF APPLICATION AND  
INTENT TO OBTAIN WATER QUALITY PERMIT AMENDMENT  
PERMIT NO. WQ0004086000 (EPA I.D. No. TX0117757)**

Dear Commissioner Dennard:

Numerous members of the Dickinson Bayou Watershed Steering Committee received the referenced notice and were able to either attend the Public Meeting (Notice Attached) or review the documents in the Public Library. In our regularly scheduled meeting of September 21<sup>st</sup> this notice was discussed and the following concerns were voiced:

1. The listed chemicals being removed do not seem to be fully representative of known byproducts from the type vessels being cleaned; and
2. The listed chemicals did not have documented verification from the vessel providers or any third party; and
3. Storage of the by-product is in open top containers within an area that could possibly be inundated and float into the main stream waters by hurricane storm surge thereby causing blockage and/or environmental contamination.

As this site is within unincorporated Galveston County, we respectfully request that you voice our collective concerns. If we may be of further assistance in this matter, please contact me at your convenience.

Regards,

Jackie L. Murphy, P.E., M-ACE, CFM

WAW

① Galveston Bay produces 70% of the oysters in the US.

Why would we put more into the water to kill the marine life in this area, just so Clean Harbours (headquartered in Mass.) can benefit financially?

② My husband worked for <sup>13</sup> many years @ the Clean Harbours facility in Deer Park. Safety practices were a continuous issue that he reported on numerous occasions, but nothing was ever done. If their TCEQ compliance is anything like their disregard for the safety of their employees, Dickinson Bayou/Galveston Bay ~~is~~ will be doomed for any recovery.

③ Why would Texas (or any other place) allow a hazardous material company dispose/contain a facility in a known flood plain? It is a hazard waiting to happen.

**COMMENTS:** I am not for granting this permit to Clean Harbors San Leon Inc. Dickinson Bayou, Dickinson Bay and it's tributaries are already in serious crisis with depressed oxygen levels and dioxins that are a real threat to marine life and is quickly becoming a public health concern. I've lived in Dickinson and have been around the bayou for the past 48 years and I've seen it's rapid decline in recent years. For this reason alone, I started working for the City of Dickinson as a storm water inspector and an employee of the Public Works

MW

Department to help stop the horrific pollution of our bayou, clean it up and educate the public on it's importance to our community and how we can collectively work as a community to improve the quality of our bayou waterway. It's been years since I've seen an alligator, which I used to see them often as a teenager growing up in the city. I no longer see anyone fishing, or enjoying an afternoon jet ski ride, water skiing, or trolling in a john boat with a fishing pole on a lazy Sunday afternoon. It used to be such a beautiful bayou with fantastic habitats for aquatic life, birds and other wildlife. Dickinson Bayou can be again with controls in place from TCEQ and the local governments enforcing the laws covering the watershed. I'd rather have a conversation about funding the restoration of the bayou as opposed to more industrial dumping into the bayou by a company that has been a major violator, such as Clean Harbor San Leon Inc. I'm sorry, but Clean Harbors San Leon needs a new company name (more fitting of their practice) and they need to dump their toxins someplace else, or develop technology to clean up their own industry's waste because polluting the water that belongs to the people of the great state of Texas is not a good idea, or an acceptable practice.

**COMMENTS:** Please deny this permit, we have enough dumping in our waters now, this will cause more pollution, more fish kills and lower oxygen levels, with the permits all allowed and the fines issued for violations, we do not need any more dumping into our water. Pleases deny this permit, lets clean up the water, bacteria levels have been high already, we swim and many live on the water. Deny permit. Thank you.

**COMMENTS:** I live on Dickinson Bay very close to where this company is wanting dump and the prospect of this really makes me nervous. I would like to request a Public Meeting about the ammended Permit Request that Clean Harbors has filed with TCEQ. The local American Legion hall on FM 517 has always been a willing place to host community meetings.

**COMMENTS:** The TCEQ lists the Dickinson Bayou Watershed as "impaired." I am concerned that increasing the effluent released into the bayou will damage the ecosystem threatening the wildlife, commercial seafood operations, and the people that use the Bayou for recreation. Before the TCEQ make a decision, I respectfully ask that protection of the water quality be given the highest priority. I also encourage the TCEQ hold a public

*AW*

meeting to educate the community on what is being released into the Bayou now and what impact an increase could have. Respectfully, Peggy Wooten

TEXAS COASTAL WATERSHED  
P R O G R A M

September 2, 2015

Office of the Chief Clerk  
MC 105  
TCEQ  
P.O. Box 13087  
Austin, TX 78711-3087

To Whom It May Concern,

The Dickinson Bayou Watershed Partnership (DBWP) requests a public meeting for Clean Harbor San Leon, Inc.'s application to amend TPDES Permit No. WQ00004086000 to authorize additional sources of effluent to the waste stream resulting from the treatment of process wastewater, oily waste and spent catalyst from the petroleum and petrochemical industries.

The DBWP was established in 2005 as an informal group of stakeholders concerned with the degrading water quality of Dickinson Bayou and its tributaries. This group worked with the TCEQ to write the Bacteria Implementation plan for Dickinson Bayou and three tidal tributaries, as well as the draft Watershed Protection Plan that focuses on dissolved oxygen. The DBWP is actively working to keep Dickinson Bayou a place where people live, play, swim, fish and boat in clean water.

The receiving water body for this permit application, Dickinson Bayou (Segment 1103) is on the State's 2012 303(d) list for depressed dissolved oxygen levels and is the subject of discussions of the results of past dredging that may exacerbate those levels by restricting circulation.

Members of the DBWP are interested to hear the details of the applicant's treatment processes, plans for monitoring effluent and the TCEQ's modeled loadings to make sure Dickinson Bayou can assimilate the discharge without causing further D.O. problems or other possible issues. Given the existing water quality in the receiving stream, and given the fact there is an active and interested Dickinson Bayou citizenry and Dickinson Bayou Watershed Partnership in place, it would be prudent for the TCEQ to hold a public meeting on this application.

Sincerely,

Charriss York,  
Dickinson Bayou Watershed Coordinator
