COMMENTS: As a land owner joining the Georgia Pacific (Acme Gypsum Facility) property I am requesting a Contested case hearing with regards to GP Acme Texas Plant to amend Permit # 20851 which will allow GP to discharge Hazardous, caustic and potentially cancer producing materials into the air and eventually onto grass and streams in the area where my cattle, horses, wildlife, kids And grandkids will come into contact with this material. Not knowing the full extent this hazardous material will have on all things coming in contact with it. The TCEQ has by having to issue a permit is in effect saying there is a potential risk to the public, no greater risk than to those in the immediate area. I strongly protest any pollutants being released into the air which WILL affect my family and the enviroment. I look forward to being notified of the upcoming public hearing to contest this permit application.
